Mines and Mining Stocks

GOLD HILL IS GOING TO DEEP

Shaft on Western Utah Copper Property Opening Mine 700 Feet Under Surface.

BIG MINE IS BEING MADE

LOCATED IN DEEP CREEK'S RICH MINERAL REGION.

The shaft on the Western Utah Copper company's Gold Hill mines, in the Clifton district, Deep Creek, is now nearing the 700-foot mark below the tunnel level, and by the first of the coming month the work of exploration and development at that depth will begin. This is the Heinze-MacVichie combination's property.

This, in brief, is the information brought in by James A. MacVichie, superintendent of the properties, Thursday evening. He stated, also, that the 300-foot level in the shaft meant a depth of between 600 and 700 feet below the surface, so it is seen that one Deep Creek mine, at least, is getting down to regulation and telling operations. On and above the tunnel level a tremendous amount of fine gold-copper ore has been developed and when the levels below are run out and the ores are blocked out between them the Gold Hill will rank with the great mines of the state, as the ores average up better than in most properties where the deposits are so extensive.

Since the sinking of the shaft commenced Superintendent MacVichie has been operating with a force of about eighteen or twenty men. When he commences reaching out in the lower levels, however, he will have room for many more good miners.

Mr. MacVichie reports a great deal of activity in the different sections of the Deep Creek region and looks to see the country come to the front with rapid strides from now on. He will conclude his business here and return to camp during the next few days.

BEAVER COUNTY EXCURSION ARRANGEMENTS COMPLETE

Three Pullman coaches loaded to the guards and accompanied by a well-larded diner will pull out of the Short Line depot over the Salt Lake Route at 9 o'clock tonight for Newhouse and other points in the great mineral zone of Beaver county. Frank Harris, chairman of the mine operators' committee that has had the affair in charge, stated last night that all arrangements had been completed and that there was no occasion for those who had arranged to go to lose any sleep over details. Berths in the Pullman coaches, three of which have been reserved, can be had from the conductor at the depot before and when the train leaves, as the list of reservations and tickets will be in his possession.

According to plans the itinerary of the trip will read like this: Train leaves Salt Lake at 9 o'clock tonight; arrives at Newhouse at 7 o'clock Sunday morning; leaves Newhouse about noon and reaches Frisco about 2 o'clock; leaves Frisco for Milford at 7:30 p. m. and leaves Milford for Salt Lake about 9 p. m., reaching home between 6 and 7 o'clock Monday morning.

A message from P. J. Donohue at Milford during the afternoon advises Mr. Harris that the people of Milford have planned a smoker at that point Sunday evening. This will necessarily be a brief affair, but it is promised that it will be lively while it lasts.

The trip will afford the excursionists an opportunity to see the great works of the Newhouse company, the town built by Mr. Newhouse, as well as the famous old Horn Silver mines and mills at Frisco, and numerous other properties in the region about Newhouse, Frisco and Milford, where all kinds of word is now going on and where a dozen or more great mines are being handled in an energetic and businesslike fashion. It will give folks a chance to see the kind of prospects there are in that section as well and, as every arrangement has been made for the comfort and welfare of the patrons of the excursion, a jolly good time is going to be had by everybody.

ELY CON. ORE BODIES ARE GROWING RICHER

The Brilliant shaft of the Ely Consolidated company at Ely is now being pounded down through ore that is averaging 2 per cent copper. The shaft is over 475 feet deep and every foot of the distance from the 400-foot mark has shown copper values ranging from 1 to as high as 14 per cent, the latter coming from select pieces of rock. But 2 per cent copper ore is good enough for anybody in that camp, particularly where it makes in great quantity, and that is evidently the condition of things at the Ely Consolidated's Brilliant shaft workings.

Grant Snyder, manager of the National Development company's property, went to Ely a day or two ago and the information here given was wired in from camp yesterday. Willard F. Snyder, who received the information, was so elated over the news that he proposes leaving for camp tonight to size up conditions for himself, particularly as the word is that the quality of the material being sunk through is improving all the time since the 440-foot mark was reached.

Sulphides have been making their appearance and the evidence all tends to show that the bottom of the shaft is now approaching the heavy sulphide zone, where great bodies of rich ore ought to be encountered.

Government Silver Purchases.

Washington, April 12.—The treasury department today purchased 200,000 ounces of silver at 66.062 cents per fine ounce; 100,000 ounces to go to San Francisco and the remainder to New Orleans.

MINING STOCK EXCHANGE.

Several Stocks Show Improvement—Better Business Is Looked For.

During yesterday's trading on the mining exchange a total of 45,110 shares of stock, with a selling value of $28,691, changed hands. Carisa moved up to 58c. Daly-Judge touched $9 for the first time in several weeks. Beck Tunnel advanced to $1.75. Columbus Consolidated to $5.50, while South Columbus was let down from $1.37½ to $1.27½ at the close. Nevada Hills got up to $3.95 and it is being touted for $5. All in all the market has a better look and, with the two days' holiday that follows today's single session, there is likely to be a good accumulation of orders that will set things moving next week.

Following is the list of final quotations and record of sales made during the two regular and open board calls:

ORE IS GOOD IN DESERT WONDER

Rock That Puzzles the Expert Assays Well in Gold, Silver and Lead.

BEAVER COUNTY EXCURSION

THREE COACH LOADS LEAVE FOR MINES TONIGHT.

W. H. Bramel was exhibiting some rock from the Desert Wonder property, near Modena, yesterday, that was considerable of a curiosity. It was a silicified limestone that would, from its appearance, be passed up as worthless from a mineral bearing standpoint by almost anyone. He had just been having a chunk of it assayed and, after allowing his friends to pass judgment on the rock he would switch the assay certificate on them. The effect was electrifying, as the certificate showed the rock to have a first-class commercial value. It read like this: Lead, 22 per cent; silver, 20 ounces; gold, $14.80. At the same time he exhibited samples of copper ore that looked as though it might carry anywhere from 10 to 20 per cent in the red metal.

"All this stuff," explained Mr. Bramel, "is coming out of the shaft that is being sunk on the property by R. L. Nolf, with whom some of us are associated and, for a depth of forty feet, we consider that the showing justifies our belief that we have a pretty good prospect. At any rate, there are not many prospect shafts around this country that can boast of such values in all four of the metals as we are getting out of the Desert Wonder."

COPPER STOCKS IN BOSTON AND NEW YORK

Following is the daily market comment of Paine, Webber & Co., Boston, together with the range of prices of copper stocks and other Boston listings in which the west is interested, as well as a similar report on New York curb transactions, a feature that has just been added by James A. Pollock & Co., to its private wire service, and from which it is secured for use in this department of The Herald:

Boston, April 12.—A reduction in the price of London copper brought in a good many selling orders this morning and the opening all through the list was practically at the lowest of the day. Traders bought stocks on the break but were disappointed in lack of public interest and were glad to sell them out without loss. Until more acute demand for the metal develops we expect a dull and sagging market.

GOLD MOUNTAIN OPERATOR OUT FROM THE EAST

Alfred Carr, president of the Gold Mountain Consolidated Mining company, that has been operating in the Gold Mountain mining district for a dozen years past without seeking or attracting much attention, is in the city on his way to camp, after a trip to Nevada.

During the years that Mr. Carr's company has been operating in the camp a tremendous amount of telling development work has been done and the company's possessions have been added to materially. The visitor stated yesterday that matters were being shaped up that would, he expected, place him in a position where he could break the long years of silence and give an idea of what was being accomplished and what the company's plans for the future were. That this news, when released, will make good reading and give the camp a send-off, such as it has never received, can be inferred from what Mr. Carr said yesterday. He is not quite ready, however, to talk for publication.

M'DONALD-ELY MINERS DEMAND BIGGER WAGES

(Special to The Herald.)

Ely, Nev., April 12.—All of the miners employed in the McDonald-Ely mine have struck for higher wages, and their demands have been refused by the management of the mine. There is a remote possibility that a general strike, affecting the entire district, may be called to enforce the demands of these miners, but this is not considered likely. The officials of the local union look for a peaceable settlement of the trouble, believing that their demands will be acceded to within the next few days.

Miners engaged in sinking in the McDonald-Ely have been paid at the rate of $3.50 per day of eight hours. In all other mines of the district, according to the officials of the union, the pay is $4 per day of eight hours. The demand of the striking miners is for $4 per day.

The management of the mine insists that the demands will not be met, and that if the miners want to walk out that is their privilege. Their places are still open for them if they wish to resume work on the old scale.

The union will not insist that the striking men be taken back, saying that the strike is not for the men but for the wages. If the management of the mine will pay the wages asked, the union will not interfere if other miners are employed.

WEEK'S ORE SHIPMENTS FROM TINTIC DISTRICT

(Special to The Herald.)

Eureka, Tintic, April 12.—Shipments from this district showed considerable improvement for the week ending last night. Carisa is in the running again, while two "voices from the tomb" are heard in the names of Martha Washington and Shoebridge, both of which show up with a car of what is presumed to be fine ore. A car of concentrates from the "dry" mill at the May Day is also on the list and the belief here is that the plant will be heard from quite regularly hereafter. Following is the list of shippers and the number of carloads contributed by each:

Ajax	4
Beck Tunnel	10
Brooklyn	1
Bullock	1
Bullion-Beck	2
Carisa	7
Centennial Eureka	51
D. A. Depue	1
Eagle and Blue Bell	8
Eureka Hill leasers	1
Gemini	5
Godiva	1
Grand Central	7
Laclede	1
Lower Mammoth	6
Mammoth	6
Martha Washington	1
May Day concentrates	1
Primrose	1
Ridge and Valley	4
Scranton	6
Shoebridge	1
Swansea	3
Tintic Iron	12
Uncle Sam	4
Victoria	5
Yankee	6
Total carloads	155

NEVADA FAIRVIEW AND EMPIRE STATE OPERATIONS

Superintendent Williams of the Nevada Fairview company states that the property is in better physical condition at the present time than ever before, says the Fairview News. In the No. 4 tunnel, where the best showing on the property is made, the work is progressing rapidly. The tunnel is now in 285 feet, and following the ledge and in ore for over 200 feet. The winze in this tunnel is now down 45 feet, with about four feet of ore showing. This is of a high grade, and is being taken out and placed on the dump. The winze will be dropped probably fifty feet more, and then drifts will be started in both directions. This will afford a great deal of stoping ground, and it is expected that sufficient ore will be blocked out here to allow of regular shipments. In fact, shipments could commence at once, as the ore is of sufficient grade to make this possible, and there is a great deal of it on the dumps. The vein on which this work is being done has been developed by open cuts for a distance of over 900 feet, and this will afford some idea of the reserves of the company upon the completion of the work in hand. The other workings on this great property are also looking well, and from all of them more or less ore of shipping grade is being taken. Here is the making of one of the district's great mines, and within a very short time will be one of the regular contributors to the world's supply metals.

E. McCarrick of Salt Lake, president of the Empire State company, spent the greater part of the week in camp, looking over the work already done on the property and planning a new campaign. While here he gave a contract to A. L. Farmer for 100 feet of tunnel, which will be started in a new place on the ledge. A strong cropping of manganese is here uncovered, carrying values from $16 to $60. The tunnel will follow the ledge in for 100 feet to intersect another large ledge. A depth of over 100 feet will be gained in this distance. When the values are picked up a double-compartment shaft will be sunk and the property equipped with all necessary machinery for thorough development.

ELY CLAIM-OWNER SUING TO GET HIS GROUND BACK

(Special to The Herald.)

Ely, Nev., April 10.—Frank McIntire of Salt Lake through his attorney, Alan T. Sanford, has filed suit in the district court here against the Mines Development company of this place to set aside the transfer of the San Pedro and Minnie May mining claims in this district, which he transferred to the company, some time ago in exchange for a large block of the company's stock. In the complaint it is alleged that the transfer was made by the plaintiff, on false representations by the company. He asks that the title to the claims be restored to him.

Alfred Adams of Atlantic City, N. J., has bought from Charles McFadden a group of five claims on Cave creek for $450, and a group of six other claims in the same locality for $350. These claims are about two miles from the junction of Cave and Steptoe creeks. The deeds were filed yesterday.

J. J. Williams has sold to B. H. McQueen and S. McQueen, an undivided one-third interest in a group of eighteen claims in this district for $5,000. The claims are the following: Black Diamond, Black Diamond Nos. 1, 2, 3, 4, 5, 7, Peoria, Peoria Nos. 1, 2, 4, 5, 6, 7, 8, 9, 10 and 11, and the Ozark and Ozark No. 1.

Ore and Bullion.

Ore and bullion settlements in this city yesterday, as reported by McCornick & Co., amounted to $83,000, as follows: Silver, lead, gold and copper ores, $13,000; base bullion, $70,000.

Mining Notes.

The Victor Consolidated company has levied an assessment of 1½ cents per share on its capital stock.

Four carloads of ore from Utah and two from Nevada properties were released from the Pioneer sampler yesterday.

C. E. Taylor, manager of the Pioneer Sampling company, left for a brief business trip to Chicago Thursday night.

Fifteen carloads of ore from Utah mines were released from the Taylor & Brunton sampler yesterday morning.

Joseph Oberndorfer, the popular broker and mining man, returned from a several weeks' eastern trip yesterday morning.

Manager Lafayette Hanchett of the Boston Consolidated and other Newhouse interests, pulled out for New York last evening to meet Mr. Newhouse, who is returning from Europe.

W. H. Clark, the well-known mining operator, and one of the chief men in the Nevada Hills bonanza, returned from a trip to Oroville, Cal., Thursday, and will leave for San Francisco on Monday. It is suspected that Mr. Clark is on the trail of another bonanza and that his trip to the coast next week is to close a deal for it. He could not be induced to say so, however.

A 3,000-horse power electric generator from the General Electric company's works, has just been delivered at the mammoth milling plant of the Utah Copper company at Garfield. This is the third of a series of five to be installed. Two 2,000-horse power machines are already in place. Two more 3,000-horse power machines are yet to come and these are expected along at any time.

The Toper
Does not care for beer. He finds no enjoyment in its use.
He wants a strongly alcoholic drink that will fire his brain and benumb his senses. He seeks intoxication.
Beer is the beverage of conservative people. It stands for temperance and moderation. It has been found to contain the lowest percentage of alcohol in a list of thirteen spirituous beverages.
FISHER BEER
Is a Temperance Drink
It is mild, invigorating and healthful, a drink for the busy merchant, for the hard working laborer and mechanic and for the home. The little alcohol it contains is a necessary and valuable constituent, both animating and nourishing and of pronounced importance in aiding digestion.
Call for Fisher Beer, or let us serve you at your home.
