Mines and Mining Stocks

YERINGTON IS NEXT TO BOOM

Local Engineer Says Camp Is About the Liveliest Place in Nevada.

WESTERN NEVADA'S STRIKE

SIX PER CENT COPPER ORE IN LOWER TUNNEL.

L. A. Jeffs, the well-known mining engineer and operator, has just returned from a two weeks' visit to the mining country south of Bodie, bordering the California-Nevada line, by way of Yerington and some of the other districts. He would not discuss matters of personal interest, but he did say that, in his judgment, Yerington would be the next camp to boom.

"The Yerington camp or district is about the liveliest place I have struck on this trip," said he. "A tremendous amount of work is going on there and it is all of a legitimate, telling character, at that. While I was there I learned that the Western Nevada Copper company had just tapped the ore in its lower tunnel and that the face averaged about 6 per cent copper. You are going to hear things about the Western Nevada before the year is over. The Mason Valley, the Malachite and a dozen other properties are coming along at a rapid clip, and, in my humble judgment, the district is going to boom this fall. Solid work has been going on there for about two years past, and there has been no particular attempt to start things. The time is now about ripe and when it goes it moves rapidly, for it is one of the camps that certainly has the goods."

BRUNEAU REGION COMING TO FRONT

Robert Neill of Ely has been spending some time in the Bruneau rive country in the extreme northern end of Elko county, Nevada. With a partner, he has some good lead-silver claims up there and, while he believes the region is going to come out all right, he says it is too early in the game to begin a stampede. In talking over the country with the Ely Mining Expositor, Mr. Neill among other things said:

"The country is not yet ready for a stampede. The resources of the district have not been proved and the majority of the properties are only prospects. It is hard to get in there as the country has been isolated for the last twenty years by the ranchers of that section. Fish and game exist there in abundance, and there is plenty of water. In the summer time about 250,000 sheep graze in the Bruneau river country.

"I located nine claims near the Nevada Heath group, and I have some good showings in lead and silver. I have obtained 60 per cent assays in lead from my group, and good results in silver. I believe the whole country will turn out all right. Williard Snyder of the Ely Consolidated has bought a group of claims at Lone mountain, and has organized a big company. The mines were bought for their gold values.

GOLDEN ANCHOR AND WHITE ALPS OPERATIONS

George N. Lawrence of Salt Lake City, secretary and treasurer of the Rosebud Nevada Mining company, and Dr. C. H. Dowe of Boston, one of the principal stockholders in the same company, spent several days in Rosebud this week, says the Humboldt Star. They inspected the work done on the Golden Anchor claim of the Rosebud Nevada company and expressed themselves as being well pleased with the results attained. The management here has received instructions to sink the lower shaft from its present depth of 60 feet to 200 feet, at which point drifts will be run in both directions on the vein. Shaft work has been delayed on the Golden Anchor by the scarcity of mining timbers and to overcome this obstacle the management will ship in a carload at an early date.

Manager Goss of the White Alps is doing considerable surface work preparatory to running the big bore into White Alps mountain. In the course of this work he discovered another vein, about four feet wide, an assay from which returned 4 9-10 ounces in gold and 162 ounces in silver, making a total value of $206.54 per ton. Mr. Goss is anxious to sink on this vein and it is probable that a shaft will be sunk at the same time that work is going forward on the tunnel.

DOINGS OF UNLISTED STOCKS ON EXCHANGE

Anybody that thinks that Crown Point is "a dead one" ought to have witnessed its performance during the trading in unlisted stocks yesterday. There has been an evident desire to down it since it sold at 82c during last week. It was started yesterday at 72c and quickly rose to 74c. Then somebody loosened up 100 shares at 71c, following which it rose to 75c and sold back to 73c again. After that repeated bids of 75c for the stock in blocks of 500 to 5,000 shares failed to bring any of it out. Emma Copper sold at 18c and back to 16c. Yerington Copper went at 20c and 19½c, while Ohio-Kentucky sold at $3.50 and $3.60. Ohio Copper was quoted at $4.80@5.00 and no sales were made during the call. In the execution of an order to buy 500 shares, J. L. Hamilton, after the call, was compelled to pay $5 a share.

Bingham Standard was quoted at 58@59c, without sales, Mason Valley advanced to $2.05 in the bidding, but holders declined to part with it short of $2.25. Copper Glance was quoted at 14c bid, with no offerings, with Uintah Treasure Hill in the same condition at 12½c bid. East Tintic was at 10@18c; Eureka-Swansea Extension at 24c bid, Western Nevada Copper at 55@60c and Wheeler Gold at 40@42c.

Ask your grocers for the Vienna Walnut Bread.

MINING STOCK EXCHANGE.

Week Opens With Stocks Booming and Prices Keeping Pace.

Stocks, particularly Tintic stocks, were soaring yesterday. Nevada Hills and South Columbus Consolidated joined in the race and kept pace with the leaders. This is the strongest and broadest bull market Salt Lake has seen in years and the chief attraction attaches to stocks that are selling above the $1 mark. The last boom the market experienced was confined largely to the "little fellows." The reverse is now the case and, from the lively manner in which some of the shares are going, makes it certain that the buying is not altogether for speculative account. Colorado is $1 above Saturday's prices, so is Nevada Hills, while South Columbus Consolidated has moved up 50c, while Uncle Sam, May Day, Beck Tunnel, Mountain Lake and a few more of them holding strong positions in the advancing column. When a bear appears on the scene he is promptly smothered and relegated to the ice chest. He doesn't last a mainute.

During the two regular and open board calls yesterday a total of 80,602 shares of stock, with a selling value of $78,152, changed hands. Following is the list of final quotations and record of sales during the day:

PILING UP COAL FOR THE WINTER

Management of Newhouse Mines in Beaver County Is Planning Ahead.

DIVIDEND IS TO BE POSTED

TWO DOLLARS A SHARE BASIS TO START WITH.

Down at the Cactus properties of the Newhouse Mines & Smelters company, coal is being piled up for next winter's use. Manager Lafayette Hanchett stated yesterday, in response to an inquiry that the company did not intend to get caught as it did last winter and during the early spring months.

In addition to accumulating a big reserve of coal for steam-making purposes, the company has contracted with the Telluride Power company for all electric "juice" necessary to keep everything running from the plant which is now in course of construction at Beaver City on the Beaver river, forty miles away. When it is possible to get power from that company, the steam turbine plant at the Cactus mine will be closed down and held as an auxilliary, with plenty of coal to keep it going indefinitely under the worst possible conditions in the transportation line.

It is not expected that the Telluride company will be able to supply the Cactus with power sooner than November and it may be longer than that, as none of the machinery for the plant has yet commenced to arrive and not a single pole has been planted nor a yard of wire strung.

But the Cactus has started off at a pace during the past three months that will have to be more than maintained and it is not the purpose of the management to be again placed in a position where it has to stand idly by and wait for fuel with which to generate power.

Next Tuesday, it is understood, President Samuel Newhouse will sail for London and Paris and the probabilities are that he will be gone until late in the summer or early fall. Before his departure the initial dividend of the Newhouse company will be declared. He stated Saturday that the company would most likely begin on a $2 basis, the idea being to see what the copper metal market was likely to do before establishing a settled basis for dividend payments. It is an open secret that the company is earning much better than $3 a year right now and the belief is that, if the rate is not advanced at the fall meeting, the company will at least begin the distribution of $3 a share with the first quarter of next year, as by that time the mine will be earning $4 a share or better, unless copper goes to the dogs.

COPPER STOCKS IN BOSTON AND NEW YORK

Following is the daily market comment of Paine, Webber & Co., Boston, together with the range of prices of copper stocks and other Boston listings in which the west is interested, as well as a similar report on New York curb transactions, a feature that has just been added by James A. Pollock & Co. to its private wire service, and from which it is secured for use in this department of The Herald.

Boston, July 1.—The market looks better every day. Stocks are slowly creeping up, and present prices will look cheap before long. The better class of securities is very low and it will be only little effort required to lift them ten points. Go long on Copper Range, North Butte, Quincy, Amalgamated, Anaconda and as a special "flyer" keep your eye on Great Northern ore certificates.

ANOTHER GOLDFIELD LEASE TURNS OUT BIG AND RICH

Goldfield, July 1.—The Frances Mohawk Mining & Leasing company, under the direction of D. Mackenzie & Co., who only five days ago purchased the Curtis lease on the Jumbo Extension, today encountered picture ore equal to anything opened up on the Hayes-Monette, Frances Mohawk or any other of the bonanza Goldfield leases. As soon as the ore was secured, Mackenzie & Co. placed it in charge of Frank Oliver and Tim Connolly, former superintendent under W. L. Mackay, of the famous Frances Mohawk lease on the Mohawk, and the efficient corps of bosses and workmen who made the phenomenal production of $2,500,000 on the Frances Mohawk lease on the Mohawk a year ago, and all are determined and convinced that the same wonderful results will be duplicated on the present lease.

The lease is located on the Wedge Fraction of the Jumbo Extension and it situated between and adjoining the Mohawk-Jumbo and Mohawk Ledge, both of which are heavy producers at the present time. When the examination was made by Mackenzie and his engineers, their former experience and knowledge gained through the Frances Mohawk and other bonanza leases of the camp, immediately showed them that the crosscut run by the former operators did not penetrate the hanging wall, but was discontinued in the false hanging wall that is really a footwall of the ledge of pay ore, and a few feet of work proved the correctness of their theory and resulted in the opening of the bonanza ore encountered today.

MACHINERY GOING TO MINES AT PIOCHE

(Special to The Herald.)

Caliente, Nev., July 1.—The Boston Pioche Mining company today received a carload of machinery, including a large gasoline hoist. George C. Fetterman has the contract to deliver the machinery to the property. The company proposes to push work in its large double compartment shaft which is being put down between the two dykes. The shaft is on the Boss claim and is intended for great depth.

The Last Chance Mining company's hoisting machinery has arrived from Salt Lake and will immediately be transported to the mine. John Janey, of Salt Lake, who is president of the company, will be here in a few days and inspect the work which is being done, and will probably increase the working force which is now upraising from the winze.

Mining Notes.

Morris M. Johnson, chief of the Newhouse engineering force, left for New York on Sunday.

Thirty-eight cars of ore from Utah mines, four from Nevada and three from Idaho mines were released from the Taylor & Brunton sampler yesterday morning.

There was released from the Pioneer sampler yesterday thirteen cars of ore from Utah, four from Nevada and one from Idaho mines.

Charles Snyder, general manager of the Western Ore Purchasing company, passed through the city Sunday on his way to Tonopah from a trip to Los Angeles.

P. J. Donohue returned yesterday morning from a ten days' trip into Grant county, Oregon, where he has been examining mining properties for eastern clients. He brought back with him some handsome samples of coarse placer gold as a memento of his pilgrimage.

Captain O. A. Tibbetts returned from an experting pilgrimage into Arizona yesterday morning. During the past week he experienced the novelty of being in the mountains where it was necessary to dig down through twenty-two feet of snow and ice to determine whether a ledge was showing or not, and then sliding down to where the thermometer registered 116 degrees in the shade.

Ely Mining Expositor.—It might be interesting to mining men in Ely and elsewhere to know the actual cost per foot of a 490-foot churn drill hole, drilled by the Ely Central Copper company, on the Weber claim, under the superintendency of James F. Parks. Number of days drilling, 8; depth of hole, 490 feet; wages of drill men and helpers, $121; wood, $290; water, $27.50; superintendent, $27.50; total, $566. Cost per foot of 8-inch hole, $1.10.

G. O. Jordan is in from the Seven Troughs district with reports indicating that a most substantial showing is being made there. It looked as though all the mines would close down yesterday, however, as the property owners had declined to meet the demands of the miners for a general raise of 50 cents a day. The camp has been paying $4.50 straight for miners and, with hardly any of the properties yet placed on a paying basis, it was felt that the demand was not only uncalled for, but altogether unjust.

In accordance with law and the order of the Board of Directors on the 6th day of May, 1907, so many shares of each parcel of such stock as may be necessary will be sold at public auction at the office of the company, Room 61, Commercial Block, Salt Lake City, Utah, on the 3rd day of July, 1907, at the hour of 2 o'clock p. m., to pay the delinquent assessment, together with the costs of advertising and expenses of sale.

WM. S. BURTON,
Secretary.
Office 61 Commercial Block,
Salt Lake City, Utah.
First publication June 14, 1907.

Assessment Notice No. 33.

THE TETRO MINING COMPANY OF Tintic. Location of principal place of business, Salt Lake City, state of Utah. Location of mine and works, Tintic mining district, Juab county, state of Utah. Notice is hereby given that at a meeting of the board of directors of said company, held on June 3, 1907, assessment No. 33, of three cents per share, was levied on the capital stock of the corporation, payable immediately to the secretary at the office of the company, 225 Commercial Club building, Salt Lake City, state of Utah. Any stock upon which this assessment shall remain unpaid on Saturday, the 6th day of July, 1907, will be delinquent and advertised for sale at public auction, and unless payment is made before, will be sold on Monday, the 29th day of July, 1907, at 10 o'clock a. m., to pay the delinquent assessment, together with the costs of advertising and expenses of sale.

By order of the board of directors.
ERNEST WILLIAMS,
Secretary.
Salt Lake City, Utah, June 3, 1907.

Notice.

ESTATE OF JEDEDIAH S. SHEETS, deceased. The undersigned will sell at private sale, the following property, to-wit:—An undivided one-fifth interest in all of lots seven (7) and eight (8), in block fourteen (14), five-acre plat A, Big Field survey, Salt Lake county, state of Utah, on or after the 9th day of July, 1907, and written bids will be received at the office of Young & Moyle, attorneys, Deseret National Bank building, Salt Lake City, Utah. Terms of sale cash, 10 per cent at time of bid, balance on confirmation by the court.

E. L. SHEETS,
Administrator.
YOUNG & MOYLE,
Attorneys.
Dated June 25, 1907.
