# Mines and Mining Stocks

## RICH ORE BODY IN ALTA MINE

### Strike in South Columbus Con. Uncovers Big Boulders of Copper.

The recent developments in the South Columbus Consolidated, which the work on the property has proven up within the last few days, indicate that a body of ore which will yield enormous returns to the company has been uncovered in the lower tunnel level. Saturday, Alex. Jacobson and a number of men interested in the property visited the mine and made a thorough examination of the new strike and their reports on their return are most encouraging to the stockholders. According to the statement of a member of the party the east drift No. 1 from the lower tunnel level ran into a badly broken formation some time ago which showed the presence of big boulders of copper glance and copper pyrites along with lime, quartz and other mixtures. This broken formation was traversed for forty to fifty feet and from all appearances the management concluded that the boulders of ore had been broken from a large ore body in place. The boulders which were found showed the presence of from 50 to 60 per cent copper per ton and weighed from one to two tons each.

The management determined that the ore body would be found in place above the lower tunnel level and started an upraise from the solid formation to cut the ore body. The upraise broke into the ore body in place on Saturday and the richness shown by the boulders of ore below was fully borne out by the contents of the ledge in place. The ledge is apparently from 2½ to 3½ feet wide and is almost pure copper pyrites. Although the work has not progressed far enough to determine the extent of the ore body it is certain that it will yield large returns to the company.

As soon as the body was cut in the upraise the management, estimating its probable dip, started immediately to sink a winze from the other side of the broken formation which will cut the ore body below the lower tunnel level. It will require some little time to install the equipment and sink the winze to the ore body, but from the showing above the winze should cut the body below the tunnel level within forty feet. This will serve to establish the extent of the ore body for some little distance and will allow of stoping operations in the near future. Timbers are now being placed to facilitate the handling of the ore from the upraise. At the depth of the lower tunnel level the ore body will afford the management fully 700 feet of stoping ground between the tunnel level and the surface. The samples brought from the mine by the party fully bear out the tale of the richness of the deposit.

The party also visited the Columbus Consolidated workings and state that the management has opened an ore body on the 400-foot level for a distance of eighty feet on the vein and for ninety feet along the strike of the vein, and that the ore is of a high grade and is from five to fourteen feet in width. The management is now raising from the 400-foot level to open up the ore body and will be enabled to ship a large tonnage from the level within a few weeks. The water flow down to the 400-foot level along the ore body is acting as a concentrating agent and a mine car a day of high grade concentrates is saved from this flow.

The roads to Alta are in splendid shape at the present time and no difficulty is experienced in conveying the shipments to Sandy.

## COPPER STOCKS IN BOSTON AND NEW YORK

Following is the daily market comment of Paine, Webber & Co., Boston, together with the range of prices of copper stocks and other Boston listings in which the west is interested, as well as a similar report on New York curb transactions, by James A. Pollock & Co., and from which it is secured for use in this department of The Herald:

Boston, Dec. 21.—Led by Union Pacific, Southern Pacific and Amalgamated, the whole market had a good reaction this morning. Local stocks were very dull and there was no stock pressed for sale. Stop orders were caught in North Butte and traders pushed it down as far as possible. When the rally came it was very hard to buy stocks and the recovery was rapid. Superior Copper was strong on the strength of excellent mill run, but we think that the good news on it is all out now and that the stock is likely to decline from this level. The whole situation is unsettled, but on any further break we would commence to buy stocks. We are about due for a rally in a few days.

## NEW SMELTER CROWD'S PLANS ARE DISCUSSED

"It is not surprising that the United States Steel interests and the Amalgamated interests are planning to engage in the smelting business," says a New York financier in the Boston News Bureau. "There is no patent on a smelter. All that is required is the liberal expenditure of money and the employment of high metallurgical skill. Both are obtainable by the Steel and Amalgamated interests.

"The leading officials of the Steel corporation have been more or less interested in copper properties for some time. Messrs. Corey, Gayley and others have been large stockholders in the Cole-Ryan companies from the beginning and they made fortunes in these stocks. Mr. Corey had 8,000 shares of North Butte at $15 per share and sold 4,000 shares of the stock at 115 and is understood to have regained his original holdings on the decline.

"I make the prediction that the Steel interests will become more closely identified with the Amalgamated company and eventually will be the controlling factors in that corporation. Messrs. Ryan and Corey are extremely intimate, and the entire ramifications of the Amalgamated Cole-Ryan interests extend to the Steel interests.

"It takes years to build up a big smelting business, but the intelligent investment of money in that direction and in reputable mining enterprises should be extremely profitable.

"The Guggenheims have made millions in mining and smelting, but they became grasping and not satisfied with an ordinary profit. The result is that the entire mining community is arrayed against them and they have lost in prestige not only in the field, but in Wall street, where they have been under constant attack ever since the Nipissing episode. Their espousal of Lawson in an effort to exchange unknown certificates for cash did not help their reputation."

## DOINGS OF UNLISTED STOCKS ON EXCHANGE

The unlisted securities were exceptionally active on the exchange yesterday and the sales recorded were the heaviest on record for some weeks. Uintah Treasure Hill held the center of the stage for some time and recorded sales at from 26c to 27c, closing with 26½c bid and 27c asked. Ohio Copper recorded the first sale for some days at $5.30 and was freely offered at that price, with little demand. Standard Copper was in demand at 13c during the afternoon and a small amount changed hands at that price. Bingham Central Standard sold at 26c, and the demand was not filled at that price, which was freely offered at the close. Western Nevada Copper sold up from 30c to 32c and was in good demand at the latter price. East Crown Point was freely offered at 2¼c, with no bids, while Talisman was quoted at 2c bid, 5c asked. Mineral Flat sold at 1¼c, and that price was freely bid, with no stock offered. East Tintic Consolidated sold at 4c, although there was only a small amount of stock brought out at that price, and Daly was offered down to $1.60, with no takers. Naildriver was offered at 25c. Plutus sold up to 18c, and 17½c was bid for it at the close.

## COMPRESSOR PLANT FOR THE PIOCHE-XRAY MINES

J. W. Taylor, president and general manager of the Pioche-Xray company, came up from camp Sunday night to look after business on this end of the line. He states that it is the purpose of his company to immediately equip the mine with a compressor plant in order that more expeditious work can be done in the tunnel now being driven to tap the ledge at depth and which, in running a distance of 1,600 feet, will open the ground 1,200 feet deep. This tunnel has something like 400 feet more to go before the vein is opened. Shaft workings have opened up splendid ore to a depth of 165 feet, but as the ground is ideally located for tunnel mining, it was decided to run the tunnel rather than buy hoisting machinery.

The Xray property is located in the Highland district, adjoining the Mendah on the west, one of the most aristocratic neighborhoods in the district, and the management has no fear that the property will not be able to trot in the same class with the best of them.

## M. R. EVANS OF BUFFALO TO LOOK AFTER MINING

M. R. Evans, the old-time Salt Lake business man and mining operator, who left Utah a few years ago to make his home at Buffalo, N. Y., reached town Sunday night. After looking after business matters here for a day or two he will leave for his properties in the Granite Mountain district, at the north end of the Deep Creek country, to shape up the campaign of development work recently resumed there. Materials and supplies went out more than two weeks ago and by this time the work is probably well under way.

Mr. Evans has done a great deal of work in the districts west of the desert and he has some exceedingly valuable ground out there. Now that the railroad across the desert is a reality, he feels it is time to get things moving. The campaign will be largely broadened during the coming year.

**Park City Ore Shipments.**

Shipments from the mines of Park City during the past week, as reported by the Silver King and Mackintosh sampling works, amounted to 3,625,480 pounds of crude ore and concentrates, as follows:

| | Pounds. |
|---|---|
| Silver King | 1,589,480 |
| Daly West | 1,150,000 |
| Daly Judge | 609,000 |
| American Flag | 218,000 |

Tonopah—T. A. Oldfather.

## COMPANIES MERGE.

### Cedar and Talisman Properties to Be Consolidated Today.

The final action for the consolidation of the Cedar and the Talisman properties, both located in Beaver county, will be taken today, when the articles of incorporation of the Cedar Consolidated Mines company will be filed with the secretary of state. The deal for the consolidation of the two companies was arranged last August, but the formation of the new corporation has been delayed until the present time through unforeseen opposition on the part of some of the minority stockholders. The basis of consolidation leaves an adequate amount of stock in the treasury of the new company to thoroughly prospect and develop the ground of both the Cedar and Talisman companies, and the work will be pushed forward at top speed during the next few months. Both properties are recognized as being of unusual merit and with the adequate development fund which will be provided by the new company should add their portion to the wealth shipped from Beaver county.

## RICH GOLD SAMPLES.

### Specimens From Cherry Creek Property Show Excellent Yield.

Some of the most sensationally rich gold samples ever brought into the city were shown yesterday at the office of John Dern. They come from the property of the North Mountain Mining company at Cherry Creek, Nev., which property is largely owned by Salt Lake mining men. The ore comes from a lease recently granted by the company on a portion of their grounds, which has had but a few weeks of development work. The samples shown the presence of a large amount of free milling gold and, while assays have not as yet been made on the samples, the samples will undoubtelly show the presence of over $1,000 per ton of the yellow metal. The leasers are opening the body as fast as possible and it is probable that within a short time a shipment of similar ore will be marketed with the local smelters. The samples were sent to Salt Lake by George L. Kelsey, who is in charge of the property for the North Mountain company.

## READY TO DRIFT FROM NORTH AMERICAN SHAFT

Manager Charles Morrison of the North American company's property in Beaver county states that the contractors have the new shaft down close to the 100-foot level; that the work will be finished between now and the first of the year, when he will go to camp and award another contract.

"We are going to do some drifting and cross-cutting on the 100 level of this shaft," said Mr. Morrison, "and it is probable that we shall also arrange to sink the shaft another 100 feet as soon as there is room made on the 100 level for the miners to get along with the drifting without interfering too much with the shaft work. The property is looking fine and we are more sanguine than ever of making a rich producer of it."

**Ore and Bullion.**

Ore and bullion settlements in this city yesterday, as reported by McCornick & Co., amounted to $160,000, divided as follows: Silver, gold, lead and copper ores, $40,000; base bullion, $60,000.

**Metal Market.**

Silver, 48⅝c per ounce.
Copper (cathodes), 13 15-16c per pound.
Lead, $4.30 per 100 pounds.

**Stocks in San Francisco.**

The closing quotations on Nevada stocks in San Francisco yesterday, as reported over the private wires of James A. Pollock & Co., were as follows:

## TO CONSIDER ABSORPTION.

### Meeting of Stockholders Will Be Final Action in Consolidation.

The final action in the deal for the absorption of the Tetro property by the Plutus company will come before the stockholders for consideration tomorrow. The Plutus company has made an offer for the entire Tetro holdings, and the offer has been satisfactory to the majority of the Tetro stockholders. It is generally conceded that the deal will be put through without a hitch, although it is possible that a minority of the shareholders may oppose the proposed action. The incorporation of the Tetro ground into that of the Plutus company will tend to the advantage of both properties, which will be worked in common and at a minimum of expense.

## NORTH MOUNTAIN ORE IS RICH IN GOLD

Samples of gold ore which, according to the appearance of the rock exhibited at the Consolidated Mercur offices, carries sensational values in the yellow metal, have just been received by John Dern, treasurer of the North Mountain Mining company, from its properties at Cherry Creek, Nev. The ore comes from a portion of the property recently leased to Bannigan & Brown, and it will not take a great deal of it to run into big money; a few tons would mean a fortune. A letter accompanying the samples states that the strike was made late last week, so there has been no time in which to determine the extent of the ore body.

Mr. Dern says that three sets of leasers are now at work upon the property, and one of the older leasers is now preparing to make a shipment of good gold ore to this market.

## MINING STOCK EXCHANGE.

### No Increase of Business Nor Advance in Prices During the Day.

The general trading throughout yesterday's market showed little change for the better after the slump of last week. While the market in general showed a decidedly weak tendency due to the usual holiday slump there was evidence of rank professional manipulation and the figures on some of the stocks which occupied the limelight are not worthy of consideration on that account. The slump is not due to any large degree to depressing news from the properties themselves, but to the natural upheaval which takes place at the end of each year. Investors are closing out their accounts with a view to starting afresh and the fact that many obligations mature on Dec. 31 has a considerable bearing on the market.

Iron Blossom was fairly firm around $2.55 to $2.60, but the supporting orders which have been in evidence throughout the past ten days were not in evidence. Sioux Con. reached a low point with a sale at $1.22½, and it is evident that a determined bear campaign would break the price still farther. Carisa was in some demand at from 85c to 90c, although no new developments are reported from the property. Prince Con. was fairly strong at $1.52½, while Seven Troughs fell to 20c, although a slight reaction was recorded at the close. South Columbus Consolidated advanced to 57c on the news of the finding of the ore above the tunnel level in place. Colorado showed little movement either way and the movement in Utah Consolidated's Tintic was purely due to manipulation.

The trading was fairly well distributed throughout the entire list and no stock was featured to any large extent.

During the day 151,400 shares changed hands for $57,922.87. The closing quotations and record of sales follow:

| | Forenoon. | | Afternoon. | |

Wabash, 200 at 17½c; 500 at 16½c.
Shares sold, 72,400.
Total value, $21,195.50.

## PIOCHE PRODUCTION GREATLY INCREASED

Superintendent Earl Pembroke of the Boston-Pioche, who arrived yesterday for a short visit in the city, states that never since the old bonanza days has Pioche been as active as at the present time. During the present fall and winter many aiditional properties have been opened up and the finding of ore has been continuous throughout the district. Outside capital is coming in steadily and the producers of the old camp are making preparations to increase their shipments as soon as the weather will permit. Mr. Pembroke states that the coming summer will see an activity in Pioche which will rival the days of the camp's former greatness.

**Mining Notes.**

Superintendent George Ames of the Ontario of Park City is spending a few days in the city.

Patents have been granted on 300 acres of the property held by the Ely Resurrection company.

The dividend checks for the current month's dividend on Uncle Sam Consolidated were yesterday distributed among the shareholders of the company.

Superintendent Treloar of the Bingham Butte left this morning for Bingham after a short stay in the city. He reports that the property is rapidly being put in shape for production.

Four cars of ore from Utah and four from Nevada were released yesterday by the Pioneer sampler. The Taylor & Brunton plant reports the release of ten cars from Utah and two from Nevada.

Grant Snyder is making an extended inspection of the Cliff properties in Tooele county. The Cliff mines are producing regularly and are having difficulty in securing teams to transport their ores to the railroad.

More M. P. A. Christmas Money

For years we have been publishing a list of people we collect money for. The Democrats and Republicans are doing likewise, except they tell who they collect it from. The following is a list of clients who received money last week:

Logan Republican, Logan, Utah.
Mrs. J. T. Donohoue, Lenox Hotel, City.
James Ross, Hooper, Utah.
Robert B. Lewis, coal dealer, Ogden, Utah.
Lorenzo Snow, jr., 446 South Third East, City.
Wagener Brewing Co., City.
John McDaniel, grocer, 816 East Second South, City.
Dr. J. Milliron, City.
Rocky Mountain Bell Telephone Co., City.
James A. Smith, Thurber, Utah.
Baer Bros.' Mercantile Co., City.
Drs. Smedley & Rothwell, Murray, Utah.
Vincelli & Amicone, Bingham Canyon, Utah.
Strevell-Paterson Hardware Co., City.
Joe Falsetta, 47 South First West, City.
Frank Hoffman, Murray, Utah.
J. J. McKinnon, Ogden, Utah.
Peter Athanasacos, West Jordan, Utah.
Beesley Music Co., City.
Dr. W. Benjamin, Mercantile block, City.
Miller Commission Co., City.
Henry Walsh, grocer, 739 West Third North, City.
N. D. Porter, Idaho Falls, Ida.

William L. Knott, Carlin, Nev.
W. E. Fife & Co., City.
E. B. Stevenson, 370 West South Temple, City.
Davis Shoe Co., City.
Miller-Cahoon Co., Murray, Utah.
Robert Skelton Publishing Co., City.

If you turn in your claims we will collect money for you. Your claims can be no worse than thousands of others we have collected. Clients come to us from all over the world. We collect everywhere. It is our pleasure. There is no business under the sun that affords so much pleasure. Our clients in many cases are so thoroughly surprised and pleased that they cannot find words to express their appreciation of our efforts. We also find the people pay cheerfully and are happy to get out of debt. Many of them are paying in full now, preparing to get a good start for the New Year. Turn in your claims and let us all rejoice together. Red Streaks of Honesty Exist in Everybody.
