STEEL STOCKS GOING UP AGAIN

Liquidating Pressure Subsides and the Whole List Gains Strength.

New York, Oct. 7.—The stock market gave early evidence today that the liquidating pressure on United States Steel had subsided and the tone of the whole speculation was shaped accordingly. United States Steel continued disproportionately prominent, but not as unduly so as yesterday. The 636,000 shares of United States Steel dealt in yesterday out of an aggregate of 1,500,000 for all stocks, do not include the so-called stop-loss orders which under a rule of the stock exchange are not printed on tape.

Allowing for these sales, which are known to have been on an enormous scale in the case of steel, there is seen to be room for an extensive clearing up of the speculative position in the amount of business done in the stock yesterday and the day before. The way was thus cleared for the substantial recovery of today.

The money market showed signs of having been eased also by the substantial loan repayments, which must have accompanied the stock market liquidation of the past day or two. Funds were reported in better supply early today, although the loaning rate was not materially affected.

Bankers closely associated with the United States Steel corporation offered large sums in the call loan market.

The immediate effect of this development was the advance in the official discount rate of the Bank of England today from 2½ to 3 per cent. The hardening of the private discount rate in London and the steady broad making on the bank's bullion holdings, revealed by the weekly return published today, made it evident that the advance in the official rate was imminent anyhow. With a further demand on American account threatened the governors felt themselves constrained to the prompt step as a protective measure.

Word from Berlin also points to an early further rise in the official discount rate of the Imperial Bank of Germany. The private discount rate rose in Paris and the Bank of France reported a sharp decline in bullion holdings, but with a heavy contraction in outstanding note issues and credits. The foreign exchange market in New York was greatly unsettled in its efforts at readjustment at these exchanges abroad, which operated as obstacles to further extension of credits to American borrowers.

The rise in United States Steel, Union Pacific, Reading and New York Central supplied the most substantial portion of the buying movement.

The widest fluctuations otherwise were in a minor class of stocks, both railroad and industrial. The soft coal carriers were strong as a group, led by Pennsylvania. The steel industrials all rose briskly. Private estimates gave promise of a better showing for the corn crop in the forthcoming monthly government report of conditions than was contained in last month's report.

An increase in Rio Tinto mining dividend had less effect on copper issues than had been expected. The selling of stocks was moderate.

Bonds were firm. Total sales, par value, $4,686,000. U. S. 2s declined ⅛ per cent on call.

Metal Markets.

New York, Oct. 7.—Standard copper was again weak on the New York metal exchange today, closing at 12.25@12.50 for spot, October and November; 12.30@12.60 for December and January. There were no sales. London unchanged; £58 for spot and 2s 6d higher at £59 for futures. Sales of spot were 800 tons and futures 600 tons in that market. Local dealers in copper reported an easier tendency, with lake 13.00@13.25; electrolytic, 12.62½@12.87½; casting, 12.50@12.75.

Tin declined about 7½ points on the metal exchange, ruling easy without sales. Spot closed at 30.37½@30.50; October, 30.37½@30.45; November, 30.37½@30.50; December, 30.37½@30.50; January, 30.40@30.50. London advanced 2s 6d to £139 2s 6d for spot and was unchanged on futures at £140 7s 6d. Sales were 250 tons spot and 150 tons futures.

Lead was steady in tone, spot closing 4.30@4.40 New York and 4.20@4.30 East St. Louis. London was unchanged at £13 5s.

Locally spelter was quiet and unchanged at 5.85@6.95 New York and 5.75@5.85 East St. Louis. London unchanged, £23 6d.

Cleveland warrants, 59s 9½d.

The local iron market continued firm at old prices; No. 1 foundry northern, No. 1 foundry southern and No. 1 foundry southern soft being quoted at 19.25@19.75; No. 2 foundry northern, 18.50@19.25.

GRAIN AND PROVISIONS.

Chicago, Oct. 7.—Increased receipts in the southwest, coupled with an official forecast of rains in portions of the winter wheat belt, offset a number of bullish influences in the wheat market today, causing a heavy tone the greater part of the session. The market, however, experienced fair rallies on buying by an influential commission house and by shorts. The weather bureau predicted rains tonight and tomorrow for Kansas and Nebraska, where the seeding of the winter crop is nearly completed. Receipts today at Kansas City and St. Louis were nearly double those of the corresponding day of last year, while the total primary movement was about 25 per cent in excess of last year. Trading during the greater part of the day was light and prices held within about 1 cent range, December selling between 1.01¼@1.01¼ and 1.02⅜. The market closed only a trifle above the lowest mark with December at 1.01⅜.

Anticipation of a bearish showing in the government crop report to be published tomorrow prompted liberal sales of corn, resulting in a weak market throughout the entire session. The market closed weak with prices ¼@½ cents below the previous close.

Selling of December oats by longs was a feature of trading in the oats market. All the prices were ⅛ cent to ¼ cent lower than yesterday.

Provisions were weak at the start, but quickly rallied and continued firm. Prices at the close were 2½@15 cents higher.

The leading futures ranged as follows:
