THE STRAIN OF WORK.

Best of Backs Give Out Under the Burden of Daily Toil.

Lieutenant George H. Wadsworth, of No. 2 Dupont, Washington, D. C., says: "For an honest lad that knows

no fear, I think I have had more than my share. For the past year or more I felt as if I could not go on. I felt so tired and lame I could hardly drag myself about. It was the strain of duty, the work that brought on kidney trouble and weakened my back, but there is no Doan's Kidney Pills I have tried give people and fail to help others. I have not felt the trouble come back since, although I had suffered for five or six years, and other remedies had got helpless on me at all."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, N.Y.

Dreadful Corns.

Until the reign of Edward I of England pointed shoes were worn with a crook so deeply indented that it might be easily parted into two for halfpence and into four for farthings.

EFFECTS OF PROSPERITY.

In the six years of the country's greatest prosperity, from 1897 to 1903, average prices of manufactures advanced 45 per cent, metals 25.1 per cent, dairy and garden products 50.1 per cent, and cotting 24.1. All these were products of the farmer and stockman who profited more than any other class of the community by these advances. The miner benefited 42.1 per cent by that advance in the average price of metals. The only decrease in the average price of commodities in that period was in railway freight rates which decreased from 178 per ton mile in 1897 to 162 in 1903, a loss of 8.8 per cent. The report of the Interstate Commerce Commission shows that the average increase in the pay of railroad employes in the period was a trifle above 8.6 per cent.

Flogged Because of Their Beauty.

Among the Australian aborigines, the newly married wife, especially where she is attractive, is made conscious of her charms by vigorous flogging from the other women until arms of her youth and beauty wear off.

Beware of Ointments for Catarrh that Contain Mercury,

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you may possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

Sold by Druggists, Price, 75c. per bottle.

Take Hall's Family Pills for constipation.

Peninsula of Arabia.

The peninsula of Arabia has an area of some 1,200,000 square miles, with a population estimated at from 6,000,000 to 10,000,000. The Turkish province of Yemen is most populous and is highly fertile. Aden commands a total export and import trade of some $30,000,000.

Important to Mothers.

Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it

Bears the Signature of Chas. H. Fletcher.

In Use For Over 30 Years.

The Kind You Have Always Bought.

Buy on Credit in China.

Foreigners in China buy nearly everything on credit, giving signed "chits" for every purchase, the reason being their unwillingness to load themselves down with silver or native coin, while paper money fluctuates too much.

BABY ONE SOLID SORE.

Could Not Shut Eyes to Sleep—Spent $100 on Doctors—Baby Grew Worse—Cured by Cuticura for $5.

"A scab formed on my baby's face, spreading until it completely covered her from head to foot, followed by boils, having forty on her head at one time, and more on her body. Then her skin started to dry up and it became so bad she could not shut her eyes to sleep. One month's treatment with Cuticura Soap and Ointment made a complete cure. Doctors and medicines had cost over $100, with baby growing worse. Then we spent less than $5 for Cuticura and cured her. (Signed) Mrs. G. H. Tucker, Jr., 225 Graefe St., Milwaukee, Wis."

Dog Aids Shoplifter.

Arrested for shoplifting in Paris, a woman was found to have a clever accomplice in a King Charles spaniel, which she carried under her arm, and had trained to snatch up pieces of lace from shop counters.—London Mail.

OLD IDEA IN PHOTOGRAPHY.

Use of Colors Was First Suggested in the Kitties.

In the early 70s Professor A. Anderson, of Edinburgh, experimented, apparently, on cats, in endeavor to which a photographic image could be fixed in colors on the human retina.

It seems to have been entirely disproved by the photographers of that time, and for some time afterwards. But it has quite recently been referred, and the method has been seriously taken by advanced students in the problem filed to give them that control over the light and color of the print which they consider indispensable.

The process is briefly this: Good stiff cartridge paper is coated with gelatine, dried and subsequently sensitized in a 2½ per cent bath of bichromate. These were dried, it is claimed to light beneath a negative in the ordinary manner.

Soaked in water, those portions of the gelatine which have received most light have become insoluble and do not retain moisture, while the "shadow" parts do and absorb much more. It is somewhat like oil and water will not mix, and when a paper charged with oil color is applied to the print only the insoluble portions will take. Dissolve in one with the color, then rinse in water the lights of the gelatine dissolve.

The process is an interesting one, and attempts of such another date may be expected as soon as an expert, several days.—Chambers' Journal.

NO DOUBT ABOUT HIS LINE.

Playwright Knew Exactly Where the Actor Belonged.

Julian Mitchell, producer of "It Happened in Nordland," "Babes in Toyland," and "The Wizard of Oz," tells this story of the late Charles H. Hoyt. An actor had been importuning Hoyt for an engagement.

One day when he was in his office (he playwright said to him:

"By the way, there is a part open in 'The Brass Monkey.' Do you think you could play it?" and Hoyt named the character.

"Certainly, Mr. Hoyt," said the actor. "That part is just in my line."

"Well," said Hoyt, "I'll give you a chance at it. The company is up in New York now. You join them, and I will come up to Albany and see how well you play it."

The day came and Hoyt was on hand to see the performance. The actor was very bad, and after the play was over Hoyt went back on the stage to see him.

"Well, Mr. Hoyt, how did you like me?"

"Rotten," was the characteristic answer.

"To tell you the truth, Mr. Hoyt, the part is not just in my line," said the abashed player.

"No," retorted Hoyt, "your line is the Erie."

Goin' Down.

Says Dennis Hicks to Bennie Green down in Bull Dance alley,
Where they bet six bit after day for twenty years or more,
"It ain't no use to talk an' know a-comin' to know this town.
This game ain't never lettin' up, it's allus goin' down."
It ain't no use to talk about a bettin' up town,
For opportunities an' luck for bettin' is the varmint.
There's no use "Th enterprise in this town ain't never lettin' up, it just a little place, mind yo, doesn' up in just a little, down."

Says Bennie Green to Dennis Hicks: "I ain't, Dennis, I'm you an' right."
I bet six bits in Dance Alley this time more I bet not my right.
Hard times, mind, ain't anything, not at all, no, not a bit.
An' yet, an' go to bed agin to feel the pinch of hard times.
I talked about little boarders once, an' some one said, 'Jim, you.'
Tow couldn't board a horthout, much An' we'd kicks an' thought it up; no, Hi, this town, down.
Just as sure as ever ain't comin' up, it's just a little, down.

Says to Bill Jones, the grocer man, who is mostly, an' without regard for any one about:
"You, Jones, put a dare good pair to talk about this town
Not being any enterprise, an' allus goin' down.
Why, dare my skin, you've reported here for more than twenty years
A-waitin' for the Dale to come an' move now from your chores.
You've not right from with the hands, an' bid up the bigger wing
You can't build up a town by sun, a little bettin' down, a bear."
—The Come to Springfield Republican.

Somewhat Mixed Relationship.

A Virginia representative in Congress says that two ladies in Richmond with whom he is well acquainted were one day discussing the relative longevity of the members of their respective families, says Harper's Weekly.

"I have no doubt," said one of the ladies, "that, everything considered, we Blanks are the most notable family in Virginia when it comes to a question of longevity. Do you know my father died at 89, while my grandfather reached the advanced age of 97."

"Is that so?" quoted the other lady. "And which grandfather was that?"

"Oh," replied the first speaker, "that was the grandfather by my first husband."

Getting Ready.

A stylishly dressed young woman entered a Broadway drug store recently, and seeking an out of the way corner waited for the few customers ahead of her to be waited on and go. Then she advanced to the counter and leaning over until her head was as near as possible to the clerk she said:

"I beg your pardon, but is it time to take arsenic yet?"

"No, madam, not yet," replied the clerk as the trace of a faint smile flitted across his face. "I guess you can wait another month or so."

"Thank you," replied the young woman.—New York Sun.

Keep the right medicine.

For a further case, I think for every [illegible] Kidney Pills, I will give a trial [illegible] Doan's Kidney Pills. [illegible] Stone Kidney Pills are a great pill for [illegible] Sold by all druggists.

Ask Your Dealer for Allen's Foot-Ease.

British Stamp Taxes.

Stamps costing £15,000 were forged. It required for an agreement between the London railway companies.

TEA

Is good for a too busy man; it makes him forget his business.

"Free Port."

This is the name applied to certain continental parts—actually districts—which are exempt from import and export duties. Germany has also duty-free ports, the principal of which is Hamburg. Austria two, and Denmark and Brunswick one each.

TEA

"Wasn't it dreadful?"

"Yes."

"Did she know it?"

"Probably not."

Ways of Spelling Smith.

A German resident in Portugal, whose patronymic is Schmitz, or our famous English Smith, has been writing home to Cologne complaining of the spelling of his name adopted by various Portuguese correspondents. Here are a few of them: Smitzitz, Smitzitz, Xmitz, Chmitz and Schmith.

TEA

"How can an everyday drink be so bad?"

"Oh, they're used to it!"

He Wasn't Irish.

The sweet maiden said: "In a minute I'll give you a kiss if you wanna."
And he won the kiss.
As she paused for the mine,
But he was too sly to hesitate.
—Fort Worth Record.

New Equipment on the Santa Fe.

An order for some new equipment was placed the other day by the Santa Fe. It comprises 75 locomotives, 5,000 freight cars and 50 passenger coaches, and postal cars, all to be delivered within the next four months. Fifteen of the new engines are Atlantic type balanced compounds, thirty Pacific type balanced compounds and thirty Santa Fe type. This big expense, aggregating more than $1,000,000, is incurred in order that growing traffic may be promptly handled. Present facilities are ample for today's travel and shipments, tomorrow they may not be sufficient. The Santa Fe looks ahead; that is why it gets the business.

Beer in the United States.

The production of beer is now more than half a barrel for every man, woman and child in the United States.

Isn't it queer that Solomon didn't know tea!

SCIENCE and INVENTION

Tools for the Dress Kids.

In some towns and thoroughfares where horses are used in large quantities, the tracks are cut up by manholes. The horses make a special foot of wooden blocks and the horse shoed in the cutting machine, reminded in the shape of some cup shoes, and of the same size and thickness.

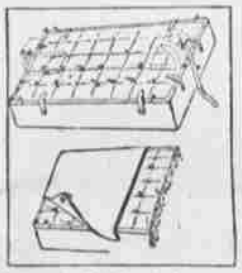
A little apparatus designed to do the same work, as far as the quality of the shoes is concerned, is shown herewith. It is meant for military

hospitals use, where there is an demand for speed in the operation. By its use it is impossible to make anything but a number of shoes, all of the same thickness and all of a size. Clean, straight cut. The blunted walls of the apparatus, between which the loaf of bread is held are set at regular intervals and the knife is drawn back and forth through one of these after the other. The manufacturers have provided these machines with the rate at different distances, so that the housekeeper may have the particular cut which suits her best.

Heat Coil in Bedclothes.

A real up to date invention which is a great measure fills the place of the ancient warming pan has recently been made the subject of a patent paper. This new device goes further, however, for it not only heats the bed when desired, but also in other circumstances cools it. While the apparatus is suitable for the purposes of the ordinary bedroom, it is seen particularly designed for the hospital or sick room, where it may be desired to subject the patient to a higher or lower temperature.

The construction consists of a



framework of tubing inclosing the mattress and supplied with suitable valves for the passage of the coolant or heating medium.

These pipes being filled with a heating or cooling material, a very considerable change of temperature under the covers may be secured, but where it is desired in hospital work, for instance, to subject the patient to a very decided change the invention contemplates the use of a double-walled outer, through which the liquid may flow by a suitable attachment to a pipe framework. Filled with ice water, this will bring about a marked change in the temperature of a fever patient.

FOR THE HOME SCIENTIST.

Ink for Stone or Marble.—Ink for use on stone or marble is made by dissolving Trinidad asphaltum in oil of turpentine, using equal parts of each. This is used in a melted state for filling in letters cut on tombstones, marble slabs, etc. It is very durable.

Dextrine Paste.—Dextrine paste will adhere to glass. In hot water dissolve a sufficient quantity of dextrine to bring it to the consistency of honey. This forms a strong adhesive paste that will keep a long time unchanged if the water is not allowed to evaporate.

Fire-proof Cement.—A very good fire-proof cement, suitable for stoves, is made from iron filings, 100 parts; lime, 15 parts, and common salt, 8 parts. These are worked into a paste with strong vinegar. The cement must be perfectly dry before being heated. By heating it becomes as hard as stone.

Sperm Candles.—Sperm candles are made from spermaceti, the waxy matter obtained mixed with oil from the head of the sperm whale. The spermaceti is purified by distilling off the oil and repeatedly washing the residue with hot water and weak boiling potash lye. For making candles it is usually combined with five per cent of beeswax to prevent crystallization. The candles are made in the same way as other moulded candles.

Manifold Paper.—What is known as manifold or carbon paper is prepared by saturating fine unsized paper with the following mixture: Tallow, 1 ounce; graphite in fine powder, ½ ounce; linseed oil, ½ pint; lampblack, sufficient to make the mixture of the consistence of cream. Melt and mix together to a mortar. Another formula is ten parts of lard and one part of wax, with sufficient finely powdered lampblack to make a mixture of the proper consistency. Saturate the paper with this, remove the excess and press.

ISLAND OF TRISTAN D'ACUNHA.

Where Humans Barings Live a Life of Utmost Isolation.

One of the most longest colonies of civilized human beings on the face of the earth is that on the island of Tristan d'Acunha, which lies almost midway between the Cape of Good Hope and Cape Horn. This lonely island has in such a position that it accounts both eastern and western ships and the Islands number about twenty and are descendants of sailors, castaways and a handful of soldiers left on the island when it was garrisoned by a company of British artillery during the time of the great Bonaparte was in St. Helena. When T. C. Kerry, a British capitalist, settled Tristan twenty years ago he found a man named Green installed as the chief man. The islanders live on land, shares of money for their live cows, of cattle and sheep, potatoes and even grass. Grain does not grow on the island it infested with rats. The people are serious minded and rather shilling in manner, but very honest and hospitable.

GHOSTS IN ROYAL PALACE.

Hampton Court Said to Have Visitors From the Spirit World.

At Hampton Court palace, near London, are accounts to report several ghosts, all of which belong to the Tudor period. "Time is like Bedroom," says a writer, "who clad in white garments, and carrying a lighted candle, accounts the queen's staircase on the anniversary of the birth of her son, Edward VI. The ghost was laid to the opening up of the staircase. Mrs. Penn, the nurse and foster mother of Edward VI, is the most persistent ghost. Since her grave was disturbed in Hampton church her ghost figure in a long gray robe has walked the vicinity of her old rooms and the whirring of her spinning wheel has been heard by several people. The board of works instituted an inquiry and discovered a walled-up room with an old spinning wheel, the treadle of which appeared to have worn the stone flooring. The third Tudor ghost is Catherine Howard, who is reputed to haunt a gallery about to be opened to the public."

Pays Dearly for Stamp.

For using an envelopes two stamps which had already been through the post, an Irish schoolmaster has just been fined £100. Some of woman's little daily economies often prove in the end expensive.—London Globe.

Art of Long Ago.

Perhaps the first American woman pictured in art is a Maya priestess, bearing a huge Moan bird. It was found in an ancient codex, something like the Egyptian papyrus scrolls.

A GREAT MEDICINE

BRINGS HEALTH TO THREE MEMBERS OF SAME FAMILY.

Cures a Wife's Debility After Malaria, a Husband's Rheumatism, a Daughter's Nervous Prostration.

"I have recommended Dr. Williams' Pink Pills to many people," said Mrs. Clossett, "because I have seen such good results, time after time, right in my own family. There are three of us who have no doubt about their merits. We don't need to take anybody's word on the subject for our own experience has taught us how well the medicine proves.

"It was just about two years ago that I first read about Dr. Williams' Pink Pills, and bought my first box. I was at that time all run down, weak, nervous and miserable. I had been suffering all summer for malaria and grippe then. Everybody thought I was going into a decline, so my mother had heard of this medicine.

"Thanks to Dr. Williams' Pink Pills, I am now all right and healthy. I began to improve as soon as I began to take them, and when I had taken three boxes I was well as ever. Everyone wanted to know how I got so well, and I always recommended my friends to try Dr. Williams' Pink Pills, for they helped me.

"My mother got ill shortly after I fell ill, and she was in a very bad state. She was nervous, complained of sharp pains in her head, was all run down and had no appetite. Doctor's medicine failed. She took only a few boxes, but the second box doubled her strength, and caused her to develop into a perfect picture. Double. Then my husband took them for rheumatism and found that they would cure that too. So you see we have all got great good from using them, and that is why we recommended them to others."

Mrs. Minnie H. Clossett, Pres. of Ultra Sewing Machine Co., Ohio, and is well known, as she has resided in the same neighborhood for more than thirteen years. Her story shows that a medicine which makes the blood sound and the nerves strong, overcomes a variety of diseases and should be found in every household. Dr. Williams' Pink Pills are sold by all druggists everywhere. They have cured rheumatism, and all forms of weakness, also the most stubborn cases of dropsy and the anemia. They are indispensable for growing girls.

Mosquito's "D... illness" Lasting.

The old fashioned theory that a mosquito bites but once and then dies is a myth. Some varieties are ready for all comers although it takes three days to digest a full meal of blood.

DON'T FORGET

A large 25c. package Red Cross Ball Blue, only 5 cents. The Blue Company, South Bend, Ind.

Cost of Producing Coffee.

The average cost of labor in the production and preparation of coffee is 4.7 cents a pound.

BAD STOMACH

Attended with tainted, offensive, or foul breath, bitter taste, especially in the morning, furred tongue, dull or bilious headaches, poor or irregular appetite, sour stomach, water brash, constipation with strong tendency to the bowels, or despondency, are all relieved and radically cured by the faithful use of Dr. Pierce's Golden Medical Discovery. No man can be stronger than his stomach; when it gets out of order he becomes fretful, dyspeptic, hypochondriac, peevish and "out of sorts"; he feels languid, tired and "all fagged out."

Nothing will more speedily or permanently invigorate and tone into action, liver and bowels than Dr. Pierce's Golden Medical Discovery. It is compounded from the active medicinal principles extracted from native medicinal plants, without the use of alcohol, not a drop of which enters into its composition. The benefit felt from its use is real, therefore, due to alcoholic exhilaration, and consequently of short duration, but is enduring and permanent.

The great majority of diseases have their inception in a bad stomach, indigestion, biliousness and impure blood. Among these diseases are doubly miserable, nerve-racking, brain-wrecking nervous prostration and exhaustion, body-torturing, rheumatism, insanity-breeding neuralgia, enervating malaria and all manner of disfiguring blood and skin diseases. Dr. Pierce's Golden Medical Discovery is a cure for all these diseases, it takes in anything the reasonable time. It is not a cure-all, but cures the diseases mentioned for the reason that they are caused and aggravated by the same disorders. It makes the appetite keen, the digestion perfect, the liver active, the blood pure and builds firm flesh and healthy nerve fiber. Don't be wheedled by a penny grabbing dealer into taking something she said to be "just as good," only that he may make a greater profit. There's nothing "just as good" as "Golden Medical Discovery," its record of cures extending over a third of a century.

A Great Sufferer Cured.

Dr. R. V. Pierce, Buffalo, N. Y.

Dear Sir—My health is better now than it has been before for many years, and I owe it to Dr. Pierce's Golden Medical Discovery, a gold of gratitude. I was for several years troubled with severe stomach trouble, sick headache and nervousness. Could not eat anything without experiencing the most agonizing pain. Had little appetite and was frequently nauseated. My sick headaches were weak bladder and I had not rest night or day. I became nervous and thoroughly disheartened, and no doctor that I could find seemed to help me. Finally my father who suggested that I try your medicine and I am grateful to say that I had been taking "Golden Medical Discovery" now than five months when I was entirely cured, and can now eat anything without distress.

Yours truly, Mrs. E. Hoffman, North Attleboro, New Jersey.

—Adv. Avenue.

Cures When Everything Else Fails.

Dr. R. V. Pierce, Buffalo, N. Y.

Dear Sir—I am happy to say that I have found Dr. Pierce's Golden Medical Discovery to be a most efficacious remedy for stomach trouble. For many years I could scarcely eat anything without being greatly distressed as gone, and was not to touch the food. I used various medicines without good effect. Later I bought a bottle of Dr. Pierce's Golden Medical Discovery and it proved so satisfactory that I bought several more bottles of the medicine and found that it cured my epigastric well. This was about four months. I can now report to the epigastric friend to Golden Medical Discovery. Yours respectfully, Ann M. Williams, 38 Riley Street, Buffalo, N. Y.

Dr. Pierce's 1008-page Illustrated book, "The Common Sense Medical Adviser," is sent free in paper covers, on receipt of 21 one-cent stamps to pay cost of mailing only. For 31 stamps the cloth-bound volume will be sent. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's When the "Golden Medical Discovery" is not quite laxative enough, as in obstinate constipation, the little, pleasant, sugar-coated "Pellets" should be taken to aid the "Discovery," the one or two for a laxative, two to four for a cathartic. They alone have been known to cure many bad cases of stomach trouble, dyspepsia and indigestion. They act on the liver and regulate the bowels. Put up in glass vials, sealed, therefore, always fresh and reliable. **Pleasant Pellets.**

Animals Flourish in New Zealand.

Experts say that probably there is no country in the world where imported species of animals, wild and domestic, have flourished as they have done in New Zealand. The red deer grow to over 300 pounds in weight in the forests, the trout to twenty pounds in the rivers. The sheep have not expanded to any giant size, but they multiply at a faster rate than elsewhere; they grow a finer wool and a better mutton.

I am now Fish's Cure for Consumption saved my life three years ago.—Mrs. Thos. Roberts, Boston Avenue, N. Y., Feb. 17, 1906.

What it Cost to Discover America.

The discovery of America, according to documents found in the archives of Genoa, cost a little more than $7,500. The fleet of Columbus was of the value of about $1,000. The pay of the Admiral amounted to [illegible] year. The two [illegible] received a salary of $500, and the mariners of his crew were paid at the rate of $2.50 a month each.

On the Trail with a Fish Brand Pommel Slicker

"I followed the trail from Texas to Montana with a FISH BRAND Slicker, used for an overcoat when cold, a wind coat when windy, a rain coat when it rained, and for a cover at night if we got to hard, and I will say that I have gotten more comfort out of your slicker than any other one article that I ever owned."

(The name and address of the author of this testimonial will be furnished upon request.)
