LIFE IN WASHINGTON.

CITY NOTES.

At the present time Justice Wylie is the only member of the District bench in the city.

St. Elmore Demar paid $5 and costs yesterday for assaulting Frank Laughran. St. Elmore is said to have been jealous.

The owner of the Theatre Comique building proposes to offer to rent it to the District for a police headquarters and a station-house.

Between the carpenters and painters the two court-rooms at the City Hall at present have anything but an inviting appearance.

Additional stone for the completion of the monument at the foot of the Capitol grounds has arrived, and will soon be placed in position.

Georgetown people are getting up petitions to the Postmaster General to have the postal carrier and letter-box system introduced in that city.

John T. Williams was held for the grand jury by Judge Mills yesterday for the larceny of silverware and clothing from Commodore H. A. Goldsborough.

Workmen are engaged in building a new draw for the Baltimore and Potomac and Alexandria and Fredericksburg railroads, at the south end of the Long Bridge.

The reduction of the force at Columbia building went into effect yesterday. A revision of the list of employees will be made with a view of making a further reduction if possible.

On Thursday next the District Commissioners will open bids for repairing the Tiber creek sewer, that recently fell in on North Capitol street, at the intersection of New York avenue.

A colored excursion from Richmond, 800 strong, under the auspices of Rev. John Jasper's Baptist church in that city, arrived in the city yesterday over the Virginia Midland road, and returned in the evening.

Henry Reeples got up a little ball in Hughes' alley, and collected $1.25 at the door. He was yesterday fined $5, for not having a license. He said that he only wanted to collect money enough to pay the fiddler.

Marriage licenses have been issued to the following parties: A. E. Gill, of Montgomery county, Maryland, and Emma J. Nash, of this city; M. I. Brittain, of Erie, Pennsylvania, and Lizzie G. Knight, of Bethel, Maine; Spencer Young and Lucy Offutt.

Police Commissioner Gatchel yesterday heard the evidence in the case of Officers Duvall and Moore, charged with cowardice in connection with the Mantz-Dunnigan affair, on the 19th of June. There were many witnesses on both sides, and several hours were consumed in the examination.

A jury was summoned yesterday under a writ of *de lunatico inquirendo* in the case of Mrs. Eliza M. Mosher, a suit having been brought for the appointment of a committee to take charge of her estate. Before the jury was empanelled the counsel concluded not to proceed further, and the case was terminated.

James Stokes, colored, came home drunk last Sunday morning, and when chided by his wife Anna for not bringing home some cotton which he had promised to get, he flew into a passion, beat her savagely, and bit a piece of flesh out of her arm. Justice Mills yesterday fined James $50 or six months in jail.

The new Riggs market, on P street, between Fourteenth and Fifteenth, will be opened for the first time on Saturday morning. The market days will be the same as at the Washington market. The stalls, which were sold Monday, brought an average price of $106.33. They were sold for ten years, subject to a monthly rental of $3.75.

A horse attached to a buggy, in which were seated Mrs. Hatton and her son and daughter, ran away from the corner of Twenty-fourth street and Pennsylvania avenue and dashed down the street at a fearful rate. A colored man named George Belt attempted to stop the horse but was thrown down and injured severely. He received medical attendance in Entwisle's drug store. The horse was soon captured and the occupants of the buggy escaped injury.

EMERY COAL COMPANY.

The Government not a Loser by the Failure.

The suit brought by Albright, Langdon & Co., coal merchants of Philadelphia, Pa., against the Emery Coal Company, of this city, has been the means of giving an incorrect statement of a Government transaction to the public through ill-advised newspaper correspondents. The true facts in the case are these: This company purchased their supply of coal from the plaintiffs in the suit brought, and were deeply indebted to them at the time they became insolvent. On the 7th of June last the War Department, after advertising for proposals for furnishing that Department with 2,900 tons of coal, opened the bids and found that the Emery Coal Company was the lowest bidder. The next day the contract was entered into, and the company having the quantity of coal on hand that they had bid to supply, it was taken by the Government, who paid $4,400, the contract price, for it.

It was also agreed between the respective parties to the contract that a place should be set apart in the coal company's yard where the Government coal should be deposited and kept subject to order, and while there be under the control of an officer designated by the Department. As this coal was to supply fuel for the various bureaus of the War Department, many of which are located in buildings outside that in which the Secretary's office is situated, the idea was adopted of leaving it in the company's yard, subject to the demands of the respective bureaus, and then it would be of easy access and furnished as required.

When the company failed and made an assignment Messrs. Ross and Dean were appointed receivers to look after the interest of the creditors. On entering upon their duties they were told this was Government coal, 953 tons of which remained in the yard. They declined to allow its removal without an order from the court, as they had not been permitted an opportunity to investigate the status of affairs and find out what rightfully belonged to the company and what did not.

The District Attorney brought the matter to the attention of Justice Wylie yesterday while sitting in special term, and the following order was passed:

It appearing to the court that the receivers appointed under the decree of this court to hold and retain the property of the Emery coal company, and to make such disposition thereof as the court shall direct, now hold under their control a large amount of coal belonging to the United States in the yard where it is stored, and which coal has been bought, paid for, delivered and transferred to the United States; and it further appearing that the Emery coal company is insolvent, and the United States as creditor would be entitled to priority of payment from the assets of said company in case said coal were treated and disposed of as property of said firm, and costs and circuity of action would be prevented if the United States were permitted to take the coal so paid for as aforesaid; it is ordered that the said receivers do permit and allow the officers of the United States or such persons as they may designate, to remove the said coal to such places as they may deem proper, and at such times as they deem fit, in accordance with the original agreement entered into between the United States and the Emery coal company.

Thus it will be seen that the Government is secure and does not lose a dollar by the failure of this company, and that the stories sent away by the correspondents have no foundation in fact.

KEEP in mind the excursion to Druid Hill Park.

A PRISONER SHOT BY AN OFFICER.

About 3 o'clock yesterday afternoon Officer Miller, of the Fifth precinct, was informed that a horse was lying near the Washington Monument suffering from want of food. The officer and Mr. Charles Nye, a member of the R. F. T. P. C. T. A., went to the spot to look after the horse. The officer arrested a colored man named John Dennis, the owner of the animal. While they were inspecting the horse Dennis attempted to escape, and ran into the river. Officer Miller, by threatening to shoot, made Dennis come ashore and surrender himself. While the officer was uncocking his pistol, to return it to his pocket, it exploded and the ball struck Dennis on the inside of the right thigh, fracturing the bone. Dennis was taken to the Fifth precinct station, where he was attended by Drs. Walter and McCoy. He was afterwards sent to Providence hospital. Dennis states that he believes the shooting was accidental.

A VALUABLE INVENTION.

The transactions of the Patent office published a few days ago included the granting of a registered label to Mr R. R. Ferguson, pharmacist, of this city, for "Compound Glycerite of Cubeb and Camphor." This preparation is composed of Carbonate of Magnesia, refined camphor, and salicylate of soda, dissolved in flower-water and glycerine, in such proportion that one tablespoonful dissolved in one quart of water will make a solution of sufficient strength for application to inflamed surfaces or to take to arrest fermentation of food, &c. THE COST OF THE RECENT OUTBREAK.

The Working Classes to Pay for the Destruction of Property at Pittsburg, Reading, Baltimore, and the Other Scenes of Riot and Arson—Another Valuable Contribution from Hon. Thomas J. Durant.

EDITOR REPUBLICAN: During the events which have recently disturbed a large portion of the country, much has been said by the conductors of the newspaper press which displays depth of thought, and affords food for reflection. On the morning of the 26th of July the New York *Tribune*, comparing the disturbances then going on with the draft riots in that city fourteen years ago, said:

For that riot the taxpayers of New York were liable to the amount of $2,000,000, and bonds were issued to meet the charge. On these bonds we have already paid more than one million and a half dollars of interest, and this year we have to pay the first installment of the principal, amounting to $500,000. The annual interest thus for has been nearly one hundred and twelve thousand dollars. Every penny of these large sums came out of the pockets of the laboring men of the metropolis, and every penny of much larger sums payable on account of the Pittsburg, Baltimore, Reading, Hornellsville, and other scenes of the present disturbance, must likewise come out of the pockets of the working classes. It is idle to imagine that in this age of the world any burden can be laid upon capital which labor will not finally be forced to bear.

These axioms so plainly uttered ought to be sufficient to deter the workingmen from all attacks on property involving damage or destruction, but the scope of the application of the principles has some limitations. An American workingman resembles the horse of Scholasticus who amused us in our school-boy days, when the unfortunate animal, subjected to an experiment in political economy whose object was to test whether a horse could subsist on nothing, had been reduced to one straw a day, he expired. The problem of living on nothing was not demonstrated, but economists have never despaired of solving it, or doubted its truth, or failed to believe for a moment that it is just as applicable to workingmen as to horses. And so it is. When the burden of taxation, whether laid to pay for property destroyed by mobs, or for any other object, shall equal the amount the working man can produce, leaving him theological bread and water, then he will share the fate of the horse, and after he submits to that who will pay the interest on the debt? "The native hue" of such a condition of things, and the country is approaching it, is sicklied o'er with the pale cast of thought.

The economist of the *Tribune* tells us, too, and tells us truly, that no "burden can be laid upon capital which labor will not finally be forced to bear." But how does this come about? The laborers do not pay it knowingly or willingly. Through what unseen and subtle alembic, then, does the product of labor pass from the hand of the working man to the coffer of the capitalist? Is it just or unjust that such should be the case? These are questions raised by the exigencies of the time, and an answer should not be wanting, and no doubt the conductors of the press will be able to furnish it.

A Mysterious Explosion in Massachusetts.

BOSTON, Mass., July 31.—The first session in the inquest was held to-day in Dorchester, before Judge Churchill, in the case of Mrs. Cynthia Phillips, death resulting from injuries received by the explosion of the boiler of the "Lady of the Lake," a small steamer on Silver lake, Plympton, on the 24th of June last. The principal witnesses examined with the view of ascertaining the cause of the explosion were the captain and engineer, but they could give no reason for the accident, as the boiler was believed to be sound, though it had never been tested for as high as by hydraulic pressure. At the time of the explosion the gauge showed eighty pounds of steam, and the [illegible] was coupled at [illegible] the [illegible] taken before the accident and [illegible] 25 lb. ANOTHER GREAT TEST

of Downey's Improved Combination Self-Acting Trap Valve was furnished Saturday and Sunday afternoons, when the rain was so heavy that the streets and cellars from First to Eighteenth street were flooded. The trap is a very ingenious invention, costing no more than an ordinary one, and so simple that it is impossible for it to get out of order. It is most useful, and if once introduced will be found indispensable. Mr. Downey is ready to show its workings by actual tests, and guarantees that the trap will move as represented. It is so constructed that while water can pass through it one way it is impossible for it to be forced back the other way, the latter being the great fault of ordinary traps. House-owners troubled by having their cellars frequently flooded by water forced back from the sewers during heavy rains will find absolute protection by adopting this invention.

VEGETINE.

THE GREAT REPUTATION

Which Vegetine has attained in all parts of the country as a

GREAT AND GOOD MEDICINE,

and the large number of testimonials which are constantly being received from persons who have been cured by its use, are conclusive proof of its great value. It is recommended by physicians and apothecaries, As a Blood Purifier and Health Restorer it has no equal.

Vegetine is not prepared for a fancy drink made from poor liquors, which debilitates the system and tends to destroy health instead of restoring it.

Are not the many testimonials given for the different complaints satisfactory to any reasonable persons suffering from disease that they can be cured? Read the different testimonials given, and no one can doubt. In many of these cases the persons say that their pain and suffering cannot be expressed, as in cases of scrofula, where, apparently, the whole body was one mass of corruption. If Vegetine will relieve such cases, purify and cure such diseases, restoring the patient to perfect health after trying different physicians, many remedies, suffering for years, is not conclusive proof, that Vegetine is the best medicine that can be made? Is this medicine performing such great cures? It works in the blood, in the circulation of the blood, it can be truly called the "Great Blood Purifier." The great source of disease originates in the blood, and no medicine that does not act directly upon it, to purify and renovate, has any just claim upon public attention. When the blood becomes diseased and stagnant, either from change of weather or of climate, want of exercise, irregular diet, or from any other cause, the Vegetine will renew the blood, carry off the morbid humors, cleanse the stomach, regulate the bowels and impart a tone of vigor to the whole body. The convalescent, in the public mind as well as in the medical profession, that the remedies supplied by the Vegetine Kingdom are more safe, more successful in the cure of disease, than mineral medicines. Vegetine is composed of roots, barks and herbs. It is pleasant to take, and is perfectly safe to give an infant. Do you need it? Do not hesitate to try it. You will never regret it.

VEGETINE

CANNOT BE EXCELLED.

CHARLESTOWN, Mass., July 30, 1876.

H. R. Stevens:

DEAR SIR: This is to certify that I have used your "Blood Preparation" in my family for several years, and think that for scrofula or cankerous humors or rheumatic affections, it cannot be excelled; and as a blood purifier and spring medicine it is the best thing I have ever used, and I have used almost everything. I can cheerfully recommend it to any one in need of such a medicine. Yours respectfully,

MRS. A. A. DINSMORE, 19 Russell street.

VEGETINE

WHAT IS NEEDED.

BOSTON, February 13, 1871.

H. R. Stevens, esq.:

DEAR SIR: About one year since I found myself in a feeble condition from general debility. Vegetine was strongly recommended to me by a friend who had been much benefited by its use. I procured the article, and, after using several bottles, was restored to health, and discontinued its use. I feel quite confident that there is no medicine superior to it for those complaints for which it is especially prepared, and would cheerfully recommend it to those who feel that they need something to restore them to perfect health. Respectfully yours, U. L. PETTENGILL,

Firm of S. M. Pettengill & Co., No. 10 State street, Boston.

VEGETINE

ALL HAVE OBTAINED RELIEF.

SOUTH BERWICK, Me., January 17, 1872.

H. R. Stevens, esq.:

DEAR SIR: I have had dyspepsia in its worst form for the last ten years, and have taken hundreds of dollars' worth of medicines without obtaining any relief. In September last I commenced taking the Vegetine, since which time my health has steadily improved. My food digests well, and I have gained fifteen pounds of flesh. There are several others in this place taking Vegetine, and all have obtained relief. Yours truly, THOMAS E. MOORE,

Overseer of Card Room, Portsmouth Co.'s Mills.

DANSVILLE, LIVINGSTON CO., NEW YORK, Just on the mountain outskirts of this most beautiful village of 5,000 inhabitants is situated one of the most remarkable establishments in the world, known as Our Home on the Hillside. It is an institution where chronic invalids whom medicines fail to restore, recover good health; and where jaded and overworked men, and feeble or delicate women recuperate wonderfully. The cure is kept open the year round. There are now here—July 1—nearly 200 ladies and gentlemen, from 24 States of the Union and Canada. Thoroughly educated physicians have the cure in charge, but they give no medicines. Their plan is to create the best possible conditions of health for their patients, and keep them in these, and then rely on the vital force which their patients respectively possess to restore health. It is astonishing to see how nature, under this management, does dispose of the most obstinate diseases, and dispense health instead. We are at liberty to refer to gentlemen and ladies of high standing, resident in various cities and towns of the Republic, who will gladly endorse all that we say. On application to me full information will be given, free of cost. Address as above.
