FINANCIAL.

The week opened with a better demand for money than for some time. Most of the inquiry, however, was from the country and was on grain and stock loaning paper. Now wheat is moving more freely, which is calling some new money into use and there is an improved movement of currency to the country for moving purposes. Home borrowers are doing little. Rates steady at 6@8 per cent. Movement of currency to the country light. Bank clearings, $1,081,236; same day last year, $1,055,602, an increase of $125,734, a gain of 9 per cent.

Eastern exchange scarce and higher.

Houston, Fible & Co., exchange brokers, quote it as follows:

New York, 50c premium; Chicago, 25c premium; St. Louis, 25c premium.

The gold reserve yesterday was $105,890,927.

Stocks and Bonds.

New York, July 22—A strong tone characterized the trading on the Stock exchange, and with occasional exceptions led to the taking of profits. The stronger tone led the market both in activity and buoyancy, the buying therein being partly for the long, but mainly for the short account, which had been materially increased last week. Reports of a heavy crop came in from all sections of the corn belt, and the advices regarding wheat were more favorable, both of which circumstances induced the bear traders to close out their contracts, and the result is a material gain in the stocks of the grain carrying roads. Nearly the entire railroad list shared in the advance.

Bonds were dull but strong. The sales were 268,000.

WHEAT—Receipts past 48 hours 25,200

There was more life and a firmer tone to the market yesterday. Nos. 2 and 3 were not only in good demand, but brought a little more money. The lower grades, however, were neglected and lower. Receipts, though moderate, were in excess of sales, and sold at a wide range of prices, there being a range of 5c per bushel in rejected. Hard samples are especially hard to handle. Stock, July 22, 1895—Rye, 148,000 bushels; barley, 45,000 bushels.

The week's winter wheat arrivals, 301,000 bushels, were the smallest for same period since 1888, smaller even than in 1890, when the winter wheat yield was only 225,000,000 bushels, less than half last year's and about one-third those for the same week in 1891. Here are the figures for the third week in July for the five winter wheat points, Chicago, St. Louis, Toledo, Detroit and Peoria, since 1888:

Year.	Bushels.
1895	301,000
1894	2,124,000
1893	1,220,000
1892	2,218,000
1891	2,931,000
1890	1,087,000
1889	1,107,000
1888	682,000

A Chicago market reviewer says: The speculative situation of wheat continues as uninteresting as it has been ever since the July delivery came. The public keeps out. Even the ordinary professionals of this and other markets venture very little. The pit has for several weeks been dominated by three big operators, Cudahy, Leiter and Partridge, who have taken no pains to hide their bearish proclivities, not because they expected much from it or believed much in it, but simply because it happened to make a profit. It has been with them rather a playing for profits than a bear campaign. The southwest and the foreigners keep bearish. Northwest fresh news is being bearish, on the fence. There are probably as many bulls here as anywhere.

Yesterday morning the Chicago Times-Herald said: The position as to the spring wheat position is better settled than a week ago. No one expects now that the Northwestern yield is going to be a record breaker. The talk of losses in the Northwest has made up by the Northwest is over. Assumption of sensational damage in the spring wheat territory is not, on the other hand, taken with much patience, but the different conservative authorities have brought the idea of a fair crop and abundance in the Dakotas and in Minnesota is gone for good. From one great luxuriant area the position has changed, it is assumed, to a crop of the ordinary unevenness, very good here and poor there. This change of view in regard to the Northwestern outcome has tended to send speculators back to first principles again. They are more anxious now to decide as to the winter wheat threshings and movements.

The Kansas City Grain Company bought a car of new millet seed in Texas Saturday at 90c and shipped the last early old millet seed yesterday, for which they got $2.00. The new Texas seed will be here in time to be sold in the drouth stricken districts of Indiana and Ohio, and raise a crop there this year, showing it possible to raise a crop of millet from seed grown the same year.

Budapesth, July 22—The official returns show that the harvest does not exceed the average, but is equal to it. For 1895 the amount of blighted wheat is from 10 to 30 per cent. The autumn corn has been fenced in many districts and there has been no complaint as to its quality.
