20% Advance on This Oil Stock Tuesday, June 8

To Investors:

The real opportunity in America is in the Oklahoma Oil Fields at present. If you have the good judgment to recognize a fortune making industrial stock when offered on a real investment margin basis, you will heed the hour of opportunity and secure a substantial or withdrawn, by starting your remittance at once or by **Tuesday, June 8.**

One or two good leases may develop a well—you can see your six millions of barrels and soon pay each stockholder more in dividends than you need now invest to own the stocks.

The Uncle Sam Oil Company has demonstrated its ability to protect itself against the most unfair opposition. It has won its fight. It can use a little new capital to big advantage. It will raise that capital. The stock will be advanced 20 per cent on June 8 and may be doubled in price again by July 8. It is now or never if you get in at this price. The Company is doing things. A little good luck and our income from oil will reach an enormous sum.

Some of the greatest fortunes ever made in the United States have been made in Oil. Oil is cash. The rich oil monopoly manages to keep its affiliated concerns out of the oil business, laying claim to all profit direct from this rich national industry.

In the past, ninety per cent of the oil business has been controlled by one concern. That big trust has grown more arrogant as its wealth increased until it has become the back slave power of the present age in our government and nation.

This oil monopoly started its grasping methods over fifty years ago in Pennsylvania and Ohio, spread out into West Virginia and into the Southern Coast Oil Fields, then went into Illinois and into California and the Northwest.

When oil was discovered in Kansas about ten years ago this monopoly tried the same old trick that had ruined the independent producers in other states. It first paid $1.35 per barrel for the crude oil, and encouraged over four hundred different operators and concerns to invest in the Kansas oil fields between fourteen and fifteen million dollars. Then after the Kansas pioneer had developed the field, the oil Monopoly arbitrarily put down the price of crude oil in a few weeks from $1.35 per barrel to less than 50 cents. In a great many cases it singled out certain Kansas producers who had demonstrated such financial brigandage and shut these certain producers entirely off from a market. The Kansas people would not bow their knee and submit to politics. The Governor of the State and the State Legislature took a hand in the game. Oil laws to curb the monopoly were placed on the statute books. The then Governor notified the World that Kansas would make the Oil Trust be decent. The Oil Trust then raised the black flag.

During these stirring times The Uncle Sam Oil Company was organized to build up on the free soil of America a great independent, producing, refining and marketing concern, as an honest and successful competitor of the Oil and Gas Monopoly.

From the very start the Oil and Gas Trust leveled libel and persecution at The Uncle Sam Oil Company. This Trust did not look with favor on this growing young giant that invaded its Western domain where never a real competitor had in forty years before dared to set a foot.

This great Oil and Gas Trust knew then the wonderful possibilities of the Kansas-Oklahoma oil and gas field. It quickly realized that a great people's company with thousands of stockholders located over neighboring states and fighting for principle as well as financial gain, would soon have its distributing stations in every trade center in the Central West. So the Trust struck back with all its brute power of criminal money.

But The Uncle Sam Oil Company, founded on the Rock of Right, met this persecution and criminal money and the "Jungle" met defeat. The Uncle Sam Oil Company won out. In every court The Uncle Sam Oil Company was exonerated. Recently the United States Supreme Court, the most powerful court in the world, exempted the pipe lines of The Uncle Sam Oil Company from the common carrier liabilities.

During all these years of persecution The Uncle Sam Oil Company has increased its assets, until now we value our combined properties at four million dollars. This does not include a lease, proven in the Federal Court, as rightfully secured for about 400,000 acres in Osage, Indian Nation.

We are contending for the validation of this lease now.

This Osage lease, the richest plum in the Oil World, can be validated by the Secretary of the Interior or by Congress.

A bill has been introduced in the last three sessions of Congress to validate this lease.

We now have about fifteen thousand stockholders, representing every congressional district in the United States. We will increase our independent army at least another five thousand and by the time the next Congress convenes will be so well organized that we should break the power of the Oil Monopoly before Congress and force justice to our persecuted Company by the validation of this great lease, provided the Secretary of the Interior does not move the matter and validate the lease before Congress again convenes.

This Osage-Uncle Sam lease is the key to the domestic gas reserve for all the big cities of Western Missouri and Eastern Kansas and Northern Oklahoma, insuring 150,000 homes.

The Uncle Sam Oil Company contends that the Secretary of the Interior or Congress should not turn over the vast Indian oil and gas lands to any company without a provision written in the lease to authorize the Corporation Utility Commissions to fix the price to the people on the oil and gas products from these great Government-Indian leases.

The people are beginning to realize that The Uncle Sam Oil Company is fighting their battle, and right at home in Kansas, Missouri and Oklahoma and neighboring states consistent citizens are daily numbering themselves among our stockholders.

Right always rises in its might in time against every great wrong.

Consequently as justice is secured in the Osage lease contest and as other big propositions are secured and developed the stock of The Uncle Sam Oil Company will increase in value.

Since the recent great victory of The Uncle Sam Oil Company in the Supreme Court the Oil and Gas Monopoly campaigners have about given up hope of ever really checking The Uncle Sam Oil Company in its onward drive to splendid and lasting success.

If we were willing to remain a little company the Trust would not care so much but it fears a great company with sufficient capital—and it knows if a few thousand red-blooded Americans realize from $15.00 to $200.00 each that The Uncle Sam Oil Company in good faith will invest this new capital and become a rich competitor of the Trust.

This Oil and Gas Monopoly has lately brought about a real crisis in the Oklahoma oil fields. The price of high grade crude oil has been as low as 25 cents per barrel in the last six months.

To meet this crisis and help make The Uncle Sam Oil Company rich or the same time, the Board of Directors at their last regular meeting authorized the President of the Company to sell to the Independent public the capital stock still in the treasury of the Company.

This stock should bring five cents per share right now. But we believe to conserve principle as well as financial gain and we know there are thousands of substantial Americans that will be glad of a chance to help a good cause, but also like to make a profit.

We can buy up producing properties along our extended pipe line for about 5 cents on the dollar. We also want to organize strong for the finish fight for the Osage lease.

Therefore until **Tuesday, June 8,** the Company will accept remittances as per special offer herein but promptly after that date the stock will be advanced twenty (20) per cent.

Do not write asking any extension of time, but arrange to start your remittance at once or not later than **Tuesday June 8,** if you ever expect to secure a part of this valuable stock before a twenty per cent advance.

The Uncle Sam Oil Company has at least ten different properties where test wells should be drilled.

The money you remit will help drill these wells, any one of which may mean a great new oil pool, that by drilling other wells around it, may pour out millions and make all large stockholders rich and a substantial profit for all the small stockholders.

WITHIN SEVEN THOUSAND FEET OF AN 8,000-BARREL PRODUCER.

The Company has made a payment on a two-fifths interest in 160 acres in nearly the center of the township that contains nearly all of the great Cushing oil wells. As quick as the deed is secured and placed of record, one or two wells will forthwith be drilled. Even in 500-barrel well on this new property would mean a fortune to our company—as it is close to our pipe line and we could soon drill a dozen wells around it and soon put our pipe line and refineries at increased capacities.

Your remittance may be small, but combined with a thousand others will enable The Uncle Sam Oil Company to do big things and thereby make the stock you receive all the more valuable. It is not over seven thousand feet from one corner of the new property the Company is securing to an 8,000-barrel well.

Do not neglect securing your stock until some day we drill in a big well and force the price of stock up twenty to twenty-five times.

This stock may go to $1 per share in the next ten years. Right generally wins out.

The Uncle Sam Oil Company already has 122 oil and gas wells, three refineries, 151 miles of completed pipe line, 54 tank cars, many distributing stations and tank wagons and automobile delivery trucks; thousands of acres of oil leases and over a thousand acres of deeded lands and much other property. Two of the refineries are in daily operation.

We want to start the third refinery and then increase the combined capacity to 2,000 barrels daily at each refinery, or a total of 6,000 barrels per day.

PRACTICALLY MONTHLY STOCK DIVIDENDS.

You will make a financial mistake if you delay becoming a stockholder at once. Your prompt remittance may entitle you to a conditional allotment right on the stock still left—which is substantially a stock dividend.

The sooner your first remittance is, the greater your benefit will be under this conditional dividend stock allotment.

When you become a stock holder you own a proportionate interest in all the oil wells, refineries and all rights and property of the Company.

There may be a hundred million barrels of crude oil under the leases and lands of The Uncle Sam Oil Company. But we must first drill the test wells before we can hope to profit by rich oil pools.

We have a substantial lease on Ranch creek in Pawnee county, only five miles from the Boston oil pool. We have developed the same formations in our Ranch creek property that are found in the Boston oil pool. In cleaning out one of our Ranch creek wells it shows for a good well after being drilled for two years.

When you join The Uncle Sam Oil Company you are not securing a "wildcat" stock. Our properties are in the proven oil fields. Many of the new wells we will drill will be within a few hundred feet of oil wells.

The experience gained from a gas to a 300-barrel well on our Ranch creek acreage. Who should guess to a 500-barrel wells be found in the Boston pool, five miles away, and on some of the same in our Ranch creek pool?

We are determined to drill in the immediate future three wells on Ranch Creek and two on the Cushing properties. When the Cushing deal is actually closed and these five wells are completed, The Uncle Sam Oil Company may have a ten thousand barrel production daily.

There is about one-sixth of the stock in the treasury. We offer this stock at about one-third value to drill these wells, and buy an crude oil for our Tulsa Uncle Sam Refinery.

Over a thousand new stockholders have joined the Company during the past few months. This notice will reach about ten million readers. This stock will be sold. These wells will be drilled. The Company will continue to grow in prestige and property.

Be on the safe side and secure a good block of this stock, so when it reaches even twenty-five cents per share that you have a nice little profit.

Other advantages are sure to quickly follow as this stock until it reaches at least five cents per share. It should bring that now.

A little good luck and the price will increase to a big value for **this Company** is a needed corporation and is popular in Kansas, Missouri and Oklahoma.

There is a provision in the charter that protects the Company from Oil Trust control.

Do not let some Oil Trust schemer fill you full of BUNK that the Oil and Gas Monopoly can always ride roughshod over the rights of all the people. Join with The Uncle Sam Oil Company today. Make yourself a useful member in a giant organization for great good.

The Uncle Sam Oil company is controlled by a Board of Directors of 21 large stockholders. Its authorized capitalization is three hundred million shares. Five-sixths of the stock is owned by about fifteen thousand American stockholders.

Only a small percent of the stock still left in the treasury will be sold for less than five to ten cents per share.

The Company plans to raise at least another **Million Dollars in new cash capital** from the stock still left. There is a chance for this stock to greatly increase in value in a remarkably short time, and if you ever expect to join the Company before big advances, either start your remittance at once or write **quick** for further information.

For Reference — You can write to either of the big Mercantile Agencies at Kansas City.

You will have to take a certain chance on every investment, and we do not want to encourage any investor to overreach but in good conscience we can advise every honest citizen to secure this stock in big blocks. The Fates seem to have favored The Uncle Sam Oil Company from the start. It is the determination of the organizers and leading stockholders to push the Company ahead until it secures control of sufficient oil and gas properties in the Oklahoma fields to make it the one great **Bona Fide** Independent producer and marketer in the Middle West.

Many of the stockholders believe that in time this stock will gain in solid value to a **Half Dollar** per share, and in ten years reach par.

The Oil and Gas Monopoly has made millions, and so should The Uncle Sam Oil Company.

Our capital is not large when you consider the possibilities of the Oklahoma Oil Fields and the price of the stock now to you.

With new capital we can increase our capacity several times without increasing our expense over ten percent.

The oil monopoly seeks to scare away from the oil fields all big investors and keep all competition out of the oil business, and likewise would threaten any big bank that would extend a financial favor to The Uncle Sam Oil Company. We were fully aware of these conditions from the start and have always raised our new capital direct from the independent public. We do not go to the big rich looters of the people and permit them to have our stock at a low price and then let them sell to the people at par, but we put our cards face up on the table and let the public have a real first chance. The curse of the age is the monopoly press in conspiracy with big business looters that seek to overcapitalize every opportunity and then sell their watered stock to the people at par.

The Uncle Sam Oil Company offers the American people direct the opportunity to be the **promoters** and derive the profits formerly going to the Wall Street Wolves.

We offer the independent investors a real opportunity to derive the full benefits of their investment.

The monopoly crowd speculate with trust funds of widows and orphans, and pocket the profit when they win, and let the bank go broke when they lose.

Think it over and you will see why the big financial promoters and their subsidized press are so anxious to be the public's guardian.

As before stated, The Uncle Sam Oil company is offering the independent public a real square deal. Of course, it will be lied about, because it is cutting into the most profitable business—the oil business—there is under the stars and stripes. We have whipped the gang in the past. We are winning out now. If one have lost out on other investments—make it back on this advancing oil stock.

We have one well on one of our big leases in Pawnee county that is 2,812 feet deep. In a shut down a few days last fall this well filled up and flowed out over the top.

A force that will push oil up over a half mile may develop a ten thousand barrel well at the next location.

This particular lease stretches across Pawnee county from farm to farm for six and one-half miles. We should start three or four drills on this property.

In a straight forward manner we have in this limited space tried to convince you of our good faith, and we hope you will either write for **further particulars** or send your remittance at once and help increase the assets of The Uncle Sam Oil Company until its red, white and blue tank wagons and automobile delivery trucks will be delivering good oil in every principal trade center in the Missouri valley states and in time cover the United States.

The stock is non-assessable, and the cash payment, together with your agreement to remain loyal to the company, is accepted by the company as full payment, if the company approves you as a stockholder. It wants none but loyal, patriotic, liberty-loving citizens as its stockholders, and therefore reserves the right to approve or reject any subscription to its stock. If you should not be approved, your money will be promptly returned to you.

KANSAS CITY, MO.

NEGRO ACCUSER ADMITS THAT HE LIED AT THE TRIAL

"JIM" CONLEY, WHOSE TESTIMONY CONVICTED LEO FRANK, IS RELEASED

Atlanta, Ga., June 3.—James Conly, negro factory sweeper, who completed last night his sentence of one year as accessory to the murder of Mary Phagan, denied today that he had written the Anna Maud Carter letters which figured in Leo M. Frank's extraordinary motion for a new trial.

Conly's denial, made in the presence of Solicitor Dorsey, was the first intimation that Conly had not been the author of these letters by which Frank's lawyers sought to show that Conly had written without assistance the famous "murder notes" found beside Mary Phagan's body. Conly testified at Frank's trial that the notes were written by him at Frank's dictation.

Frank's counsel contended that the expressions and general form of dictations to the letters were identical with those of the "murder notes" and that Conly had written both independent of outside suggestion. Counsel for Mrs. J. W. Coleman, mother of Mary Phagan, announced today that neither Conly nor Frank would be called upon to testify before commissioners in the suit which Mrs. Coleman has brought against the National Pencil factory in whose building the Phagan girl was found dead.

Restored to Good Health.

"I was sick for four years with stomach trouble," writes Mrs. Otto Gans, Zanesville, Ohio. "I lost weight and felt so weak that I almost gave up hope of being cured. A friend told me about Chamberlain's Tablets, and since using two bottles of them I have been a well woman." Obtainable everywhere.

LEADER WANTS BRING RESULTS

AT THE THEATRES.

At the Lyric.

"Samson" drew large crowds to the Lyric Wednesday night. As a problem photoplay it has few equals.

A Good Card.

"A Buried City," proved a great card at the Gem Wednesday night.

Highland Crowds Pleased.

"False Colors," a keen drama, was presented at the Highland Wednesday night. Adolph and Raymond, in vaudeville, pleased crowded houses.

Booking the Best.

Manager F. D. Papadeas, of the Lyric, believes that high class photoplays are desired by his patrons, therefore he is not sparing any expense in booking the best that comes out of the standard studios.

Buys Herd of Elephants for the Movies

William N. Selig, president of the Selig Polyscope company, has purchased a quartet of elephants from the John Robinson shows and now will have nine elephants trumpeting at the Selig Jungle-Zoo. Like "Toddles," the "wise old elephant," the quartet of new comers are trained performers.

Mr. Selig, who is now at Los Angeles, has expressed his pleasure over the appearance of what is said to be the greatest institution of its kind in the world. Improvements are nearing completion under Mr. Selig's enthusiastic supervision. A storm shovel has been in action to complete landscaping, while a great property building is going up. It is needed in addition to the great storage space already in use, for new directors and new stars are making their appearance at the Selig Jungle-Zoo.

Benches are making their appearance in the motion picture wonderland portending the long-planned for formal opening. The christening of the great institution will not be long delayed. Every possible comfort is being prepared against the day of the multitudes.

Every visitor to Los Angeles now is escorted to the Selig Jungle-Zoo, one of the sights of the Pacific coast. This great institution is the culmination of plans long formulated by Mr. Selig and the Jungle-Zoo will stand for years and years as a monument to the artistic sense and worthiness of Mr. Selig, pioneer in the motion picture art, who has unselfishly planned a wonderland for the enjoyment of generations to come.
