CONCRETE ROADS TALKED IN KANSAS

TOPEKA, Dec. 27.—It would cost only 47 cents an acre for Kansas to build 2,520 miles of permanent concrete highways 14 feet wide and 6 inches thick, with earth shoulders.

Walter W. Jones, a civil engineer of Topeka, estimates this would cover the state with a network of highways no point in the state being more than twenty-five miles from a concrete highway connecting the rest of the state.

ORPHANS HAD TIME

Children of Oklahoma Orphans Home Had Very Best Christmas Day in all Their Lives Saturday

The children of the Oklahoma orphanage, situated on the El Reno interurban line near Oklahoma City, were unusually well treated by Santa Claus this year.

When they woke at an early hour Saturday morning they rushed into the nursery and found all manners of gifts, as well as mountains of candy, fruit and nuts.

A big turkey dinner at noon and an afternoon of fun with new toys Santa had brought, made every little heart in the orphanage glad, but the climax of the whole day came when the boys entered their rooms to prepare for sleep and found a pair of pretty pajamas at the head of each bed.

Mrs. Mattie M. Morgan, superintendent of the home, desires that every retail merchant, wholesaler and private individual who contributed to the success of Christmas day at the home, be thanked for his generosity.
