CATTLE.

Including several loads to around 120 head from Texas points on direct billing to local packers, Friday's run of cattle was estimated at 350 head, an exceedingly light supply. Packers share of the saleable stuff was confined to a few loads. Small bunches brought $8.00, while the best of carlots and $8.25 up. Although the butcher supply was on the right order, slow and a shade lower prices were the best to be had. Stiff prices in all classes are the highest on record. A few odd head of heifers sold up to $8.25, cows, $7.50. A better demand for young stuff has helped tenders in the stockers and feeds divisions, clearing up the supply held over from last week and the few hundred head coming this week. Short yearlings good in quality and light in weight are selling at $7 and up. Stock calves of the same order are going for $7.25@8.25.

RAINS FAIL TO LOWER WHEAT

Bearish Influence Soon Wears Off With Selling Pressure Absent.

CHICAGO, May 12.—Notwithstanding that rains in Kansas and Nebraska had a bearish influence on wheat prices, the effect soon wore off, selling pressure was surprisingly sharp, a fact more or less due to higher quotations at Liverpool where the outlook was for lessened shipments from Argentina and Australia. There was doubt also as to whether rains would be a sufficient remedy for the damage in the domestic winter crop belt. Opening prices which changed from the same as Thursday's finish to 3c lower, with July at $1.16@1.16½ and September at $1.16@1.16⅛ were followed by an almost a complete recovery.

Seaboard inquiry strengthened corn selling was only of a scattered sort. After opening ⅛@¼ off to a shade up the market scored a moderate general gain.

Oats paralleled the action of corn. Fluctuations, though, were narrow.

Provisions hardened in line with the hog market. The best demand was for pork.

Because of rains in Kansas the close in wheat was weak, ⅝ to ⅞c of a cent net lower, with July at $1.16⅛ and September at $1.16⅛. Corn closed steady at the same as yesterday's finish to ¼ of a cent higher.

SPECULATIVES SHOW STRENGTH

Mercantile Marine Assumes Leadership With Gain of Two Points.

NEW YORK, May 12.—Speculation in stocks manifested further strength at Friday's opening. Mercantile Marine again assuming leadership with a gain of more than two points on large transactions. United Fruit rose 1 point and many of the industrials added fractions. In Thursday's final figures Willys-Overland explained the upward movement and Canadian Pacific room showed an overnight gain of two points. Mexicans were generally lower on the failure of the border conference and Lackawanna with the balance of the list later.

Liberty was neglected during the mid-session prices sagging as a shade moving to higher levels. Canadian Pacific and New Haven continued to lead the rails, while motors featured the speculation.

NEW ORLEANS, May 12.—An irregular tone developed in the cotton market around the opening Friday. Prices had no decided tendency, first losing 2 to 3 points on the most active months and then making some show of recovery. Half an hour after the opening the market was 1 point down to 2 points up net.

The tone decided on reports of buying by trading interests. The trading in the most active months kept a net advance of 4 to 7 points.

The spot spot trading of the day caused disappointment among longs and of 1,700 prices showed a net loss of 7 to 11 points.

Spot cotton steady unchanged. Sales on the spot 500 to arrive none. Good ordinary, 12.25c; strict good ordinary, 13.25c; low middling 12.25c; strict low middling, 12.40c; middling 12.75c; strict middling, 12.90c; good middling 13.25c; strict good middling, 13.50c. Receipts, 2,084; stock, 297,884.

NEW YORK.

NEW YORK, May 12.—The cotton market was low early Friday morning and the early trading suggested a disposition to even up small accounts for over the week-end, or for some fresh view of weather and new crop prospects. The opening was barely steady at unchanged prices to decline of 5 points, and active months sold 2 to 3 points net lower after the call under scattered liquidation which came largely from Wall Street sources. July contracts sold off to 12.30c and Oct. to 12.11c, or about 26 to 28 points under the high level of the week. Trade interests were buyers at the decline however and prices soon steadied up to 12.40c for July and 12.18c for October, or about 2 to 6 points net higher.

The rally from the early low point carried July contracts up to 12.46c, or 12 points net higher while new crop months showed net gains of about 4 to 7 points during the middle of the morning.

NEWSBOY WIZARD AT MATHEMATICS

Pennsylvania Student Evolves Simple Extraction of Cube Roots.

PHILADELPHIA, May 12.—Wendell Sloan, once a newsboy, who is now going through Pennsylvania university by his own efforts, lived up to the traditions of genius by startling a class of teachers at the university with a demonstration of a brand new method which he has evolved for the extraction of square and cube roots, and the simplification of the task that was the bugbear of almost every one during school days.

Sloan, by the method he has invented, can do a problem in five seconds that ordinarily requires about twenty minutes of hard work, to a practical mathematician.

The key to Sloan's method is a table which includes the cubes of all numbers up to nine. This, under his system, the demonstrator must memorize. He has found an interior system of numbers by which, when the sum total is cut into sections of three numbers from right to left, the problem of division solves itself almost automatically by the application of the final numbers in the key.

The Chamber of Commerce of Buffalo, N. Y., has gone on record as opposed to tag days.

A country minister had just received his first call to the charge of a small church and his wife, of course, was highly excited, so much so that she was obliged to tell everyone of the good news. One day she met a farmer's wife and began the conversation. "Do you know, Mrs. Hayden," she said, "my husband has just secured the incumbency of a church and I can't tell you how delighted I am. I——"

"Yes," replied the sympathetic old lady. "I quite understand how you feel. I felt just that way when our pig won the gold medal at the fair last week."

The eminent English physicist, Thomson, explains the phenomenon giving radium its name as a gradual loss of some of the ions of its atomic systems, and thus is explained the evidence that its rays behave more like matter than like the waves of heat and light.

CARD TO LIMIT FOOD PURCHASE

Schoenberg, Section 7 Berlin, Announces Close Regulation.

BERLIN.—Schoenberg, a large residential suburb of Berlin, announces the introduction on May 15 of weekly general food cards to supplement the overworked bread cards. The new cards contain 12 lettered sections, each entitling the holder to a quarter of a pound of meat or fat, one section calls for a half-pound of legumes, and five sections for such other food as the magistrate may be able to obtain.

In announcing the introduction of the new cards the mayor expressed regret that he had been unable to induce all of greater Berlin to take the same step. To prevent card-holders from using up the entire 12 sections in one purchase, the Schoenberg authorities will specify from day to day which lettered section will be valid.

"Some people certainly has got queer ideas," observed the lady, glancing up from the scrap of newspaper he had rescued from a rubbish heap.

"Referrin' I s'pose to the guys that insists of bein' a cold bath before breakfast every mornin'," said his pal.

"Wot's that? I was just readin' here about a biche wot's raisin' a terrible rumpus 'cause somebody wants to build a brewery right across the street from his house."

Ten sacks of hubnerite, or tungsten ore, taken recently from a Colorado mine, proved so rich in that much desired mineral that they brought $900, an average of about 80 cents a pound, which goes toward explaining why tungsten has become so much a need in that mountain and mining commonwealth.

The Massachusetts Institute of Technology is arranging for the dedication next June of its great new plant across the Charles river in Cambridge. The full membership of undergraduates will remain for the event which is made additionally important because it is the fiftieth anniversary of the famous scientific school.
