DEPARTMENT SAYS HUGHES IS MISQUOTED

No Recommendation Upon Immigration in Report Made to Congress

CONSUL'S WORDS NOT SECRETARY'S

Publication of Supposed Views of Cabinet Officer Starts House Clash

By The Associated Press

WASHINGTON, April 20.—A formal statement issued today by the state department said that Secretary Hughes did not have and did not intend to make any recommendations whatever regarding immigration, in transmitting to Congress reports from American government agents abroad dealing with the movement of emigrants to the United States. It was stated in an Associated Press dispatch last night that Mr. Hughes had made such a recommendation and he was quoted as saying that restriction on immigration should be imposed if it would be reasonable for most of these people to enter the United States, the statement being made especially to Representatives Jones, Democrat, and Hawley.

As a matter of fact the quotation appeared in a paraphrase of a report from the American consul at Athens, relating to people in that country, which was among a number of reports transmitted to the senate and house immigration committees by Mr. Hughes, after Chairman Johnson of the house committee had asked for information on the subject.

Publication of extracts from the government reports was the subject of discussion in the house today. Representative Chandler, republican, New York, who formerly was consul to the United States for Latvia and Lithuania, took exception to an official government report which said that Letts and Lithuanians seeking to come to the United States were largely people from the slums, the lazy majority of them "lines of the pro-Bolshevik type." He declared that whoever made the report "misrepresented to this government that which was absolutely false."

"I do not believe that Mr. Hughes authorized this or any similar report," said Mr. Chandler. He came from abroad, Mr. Hughes is the top and table-trained to respond to anything of that kind."

Chairman Johnson said he believed Mr. Hughes had read all of the reports before sending them to congress with that he knew that he had signed the letter of transmittal.

Representative Siegel, republican, New York, interrupted to say that Mr. Hughes signed the letter in the usual course.

Mr. Johnson said that if there was to be a "purge" about the matter he would send to the state department for all reports. He said he thought it would be bad if there is an "Mr. Chandler talked with him and the discussion was closed.

Anti-Japanese Members Unite Upon Program

By The Associated Press

WASHINGTON, April 20.—A caucus call by the leadership of anti-alien and Japanese-exclusion states to restrict alien property rights in the states with the Japanese immigration problem will be held within the next week, Representative Johnson, republican, California, chairman of the committee on rules of the representative, announced tonight that he would sign a request for the caucus call and the committee would meet on the subject the first week of the special session of congress.

The first work of the committee, it was announced, would be to make a survey of its strength with the anticipation of submitting a proposed rule to other states for possible action.

Another project of today's conference meeting emphasized the necessity of action with the western states in facing conditions which they charged are threatening, unless remedies are soon forthcoming, it was understood.

Farmers' Union Asks Congress To Take Action

By The Associated Press

WASHINGTON, April 20.—Congress was urged by a resolution adopted today by the National Farmers' Union, in convention here, to amend the anti-trust laws, to provide what is wrong and necessary, and to make recommendations to remedy the discovered evil complained of.

The farmers have been hoodwinked as producers, the resolution said, "and have been accused of asking an unreasonable price for their commodities while, at the same time, manufacturers and other producers were allowed to form the price and that separate with the price charged to consumers."

The farmers have charged that the farmers have been discriminated against in the matter of credit and transportation and that they have been forced to sell products below cost of production, while consumers of the country have paid prices, it was said. "The farmers have been blamed for the high cost of living, the resolution declared.
