On Wall Street.

...ork, Feb. 7.—Today's market ...ed under the volume of bus-...ed down on the same scale as ... and sugar and St. Paul were again the leaders in point of activity, although there was today a disparity of over 40,000 shares between them in favor of the first mentioned stock. Lower London prices for Americans and free selling here again exerted a depressing influence upon the local speculation. The dealings were for the most part governed by the professional leaders whose tactics were more clearly evident in the manipulation of the industrials. On the other hand there was good investment buying of some of the stocks, and particularly of the shares of the corn-carrying roads. Commission houses were in receipt of orders for Rock Island and Burlington and the discovery of this fact induced a respectable amount of covering by the shorts.

Declining tendency evident in the early dealings was checked by adroit manipulation of the industrials and general improvements resulted, although the edge of the advance was taken off by realizing sales. The purchasing movement gained fuller headway in the afternoon dealings. Sugar was the pivotal stock, rising about 3 per cent. on very heavy trading.

Distilling attracted attention by an advance of 1 3-4 incidental to the news of the practical completion of the plan of re-organization. Other notable gains were scored in L. and N., Grangers and a few other prominent shares. Tobacco was the exceptionally weak spot of the market toward the close, declining 2 per cent. on heavy offerings on revived rumors of impending hostile action toward the company by the New Jersey legislature.

The close was heavy in tone, but the net result was general gain.

Trading in railroad mortgages was on a large scale, amounting to $2,211,000.

The Post's Cable.

New York, Feb. 7.—The Evening Post's London financial cablegram:

One hundred and eighty-five pounds in gold was withdrawn from the Bank of England for America to-day but in bars instead of eagles. The bank price for bars being high, to-morrow's shipments will probably be only 200,000 pounds.

The feature of to-day's market was a further revival in Kaffirs. There was good buying but the movement is rather difficult to understand amid much that should tend to depress the shares. The other markets were idle and easier on realizations in view of the settlement to begin next Tuesday. Americans were lower on New York sales but closed above the lowest. The Paris bourse was steady and quieter. Berlin was firm.

The Wool Market.

Boston, Feb. 7.—The Boston Commercial Bulletin will say to-morrow of the wool market:

The only feature of the market has been the liberal buying of Montana fine staple on a basis of 37c and 38c clean by a Massachusetts worsted mill. The market is a little steadier and there is a better demand for American wool. Cable dispatches from Antwerp and Montevideo note that prices there have followed the London advance. The heavy failures in the clothing trade and the disorganization of prices on men's wear wool continue to check activity here. The sales of the week are 3,653,000 pounds domestic and 1,341,000 pounds foreign, against 1,626,000 pounds domestic and 1,431,000 pounds foreign for the same week last year.

The sales to date show an increase of 1,436,334 pounds domestic and 4,717,400 pounds foreign from the sales to this date in 1895. The receipts to date show an increase of 175 bales domestic and 19,006 bales foreign.

Chicago Grain.

Chicago, Feb. 7.—In wheat there was less doing, the market at times ruling quite slow, the range for the session being 1 7-8c. There was more disposition to take the long wheat and while the pressure was at no time very urgent it exceeded the demand and caused the early weakness. There were three quite bearish items in the early news. Liverpool was quoted 1-2d lower than at the close of the day before as cabled to the board of trade, but a private cablegram, which presumably covered a later hour at Liverpool than the public message, said 1d lower, owing to disappointing demand for spot wheat. Later accounts described the condition of the Argentine wheat as so bad that it was heating in the holds of vessels. This relieved the trading from its early nervousness and caused a lively scramble for May wheat among those who an hour earlier had been sellers at 66 5-8c and had to pay 67 7-8c for some of it shortly after the noon hour. The opening price swept 5-8c lower at from 66 7-8c to 67 and during the hour or so it had worked down to 66 5-8c. A private cablegram from London saying wheat was strong there with indications favoring materially higher prices contributed largely to the recovery. In the last hour the market became very strong. The price for May got up to 69 3-8c near the close and although various rumors were afloat the real reason for the spurt seemed to be that New York sent heavy buying orders because of another batch of bullish statistics cabled this afternoon by the editor of the Liverpool Corn Trade News concerning European clearances. The closing price for May was 68 1-8c bid.

Corn was a little weaker early in the day and sold off 1-4c but there was a fair cash demand; the receipts continue extremely light and it was also helped by the last rally in wheat. The market developed much strength during the last hour, May selling up to 30 5-8c and closing there.

Trade in oats limited. The feeling was generally firm in sympathy with other grain markets but prices were not materially higher.

Provisions were heavy. May pork closed at $10.37 1-2. May lard closed at $6.77 1-2. May ribs opened 2 1-2c lower at from $5.40@5.42 1-2; declined to $5.22 1-2, and closed at that.

Estimated receipts to-morrow: Wheat 84; corn, 300, oats , 171 cars.
