News Notes Compiled from the "Times" Exchanges.

One family in storm-bound Atlantic City was found huddled in a hotel parlor with a cow and were short of provisions.

Corporal Tanner is now on the dishonorably discharge list. Will he now apply for a pension?

Death has claimed five members of the Fifty-first Congress: Cox, of New York; Burns, of Missouri; Gay, of Louisiana; Townshend, of Illinois; and Laird, of Nebraska.

Archbishop Kenrick, of St. Louis, is the oldest Roman Catholic prelate in the United States. He was consecrated in 1841, and at the age of eighty presides over his diocese.

It is reported that hydrophobia is epidemic in Jackson county, West Virginia, where fully half the dogs are afflicted. The people are terrorized. One woman was bitten and died in spasms.

David N. Blakely, a graduate of Dartmouth College in the class of '89, has received the appointment of instructor in English of the American college of Aintab, Turkey. He will also be financial manager of the institution.

The French newspapers announce that Amelie Rives and Catulle Mendes, a Parisian writer of fiction, are to collaborate a novel together. The possibilities involved in the fusion of Mrs. Chanler and the French are startling to say the least.

Edwin Riggs, a farmer of Pleasants county, West Virginia, being greatly annoyed by rats in his barn, filled a hogshead with water, put chaff over the top, scattered meal on it, and in the morning fished out over two hundred dead rats.

The strength of the case against the Cronin suspects, remarks an exchange, is increased by the fact that all new evidence being discovered points, without a deviation toward the five men in the dock, and seems to connect them infallibly with the mystery of the "removal."

An exchange estimates that it will cost $4,000 to purchase the horses necessary to run a sixteen-foot car 120 miles a day. Whereas, the cost of a storage battery for a similar amount of work is $1,500. And the latter can be maintained for about one-half the cost of keeping the horses.

The new New York *World* building will be thirteen stories high. Above the main structure of stone, brick and terra cotta will be raised a dome five stories high, surmounted with a lantern, which will be 300 feet above the sidewalk. The editors and reporters will have quarters in the dome.

The Hunton family, of Grayson county, Kentucky, are notable people. Every member of the family has feet of such enormous size that no ready made shoes can be had that will fit. Not one uses a shoe smaller than that made on a fifteen last, and the largest foot in the family measure eighteen inches in length.

The following is a Washington society item: Mr. Chang Yen Hoon, minister of the Chinese legation, attended by Mr. Shu Cheon Pon, first secretary, Mr. Ho Shen Chee and Dr. Yon returned to the city from the Catskill mountains, where they spent the summer. The party stopped in New York city for a few days *en route*."

What is the penalty for murder in the State of New York? Hanging, except for a crime committed before the first day of January last, is illegal, and electrocution is impossible. From the number of murderers already on hand there is promise of very serious inconvenience between this and any new style of execution devised by future legislators.

James Payne, the popular English novelist, had twenty-six articles rejected in one year by various periodicals. Still, he persevered, feeling that he had something to tell, if he only knew how to tell it and could get an editor to read it. He did finally write something worth telling and made a successful hit, and has since written thirty-six novels, all more or less popular.

According to the Baltimore *American*, two young men came to Baltimore to see the Exposition. Instead of behaving themselves and enjoying the sights in a sensible, legitimate way, they went into unrestrained debauchery. On the steamer on which they expected to return their dead bodies were shipped to their homes. It is a terrible story, but an old one. The wages of sin is death.

The outrage mill can grind as well in the North as in the South, for it was in Indiana, and not in the South, that a band of masked Kuklux whipped an old negro and ordered him to leave the country, and on his refusal to do so, shot his head off, cut the throat of his daughter from ear to ear, and riddled his house with bullets. Indiana is the State that President Harrison hails from.

English shopkeepers are complaining that American shoppers are exceedingly troublesome. They say that the Americans turn over everything in the "store," "taking care to remind you every now and again that they really don't mean to buy now." One shopkeeper, whose business is not far from Bond street, refuses to take American orders. This is unfortunate—for the shopkeeper.

The Louisville *Courier Journal* evidently thinks that a great deal of paper, time and wit was unnecessarily consumed in the Harrison-Tanner correspondence. It suggests that it might well have been condensed as follows:

"Dear Ben: I see that I must git.
"Tanner."

"Dear James: You must indeed git.
"Harrison."

The steamship City of Lincoln, from Hamburg, which arrived from Boston a few days ago, brought for a firm in that city 3,237 packages, and the duties amount to over $45,000. The invoices number 225, and aggregate 17 feet in length. It took the entry clerk six days, working from 7 to 11, to make out the invoice bill. It was the largest importation ever received at the Boston custom-house on one vessel for one firm.

It will be a great comfort to many an old veteran to know that Corporal Tanner is defended by no less a person than General B. F. Butler, the deviser of the great powder-boat, which was to blow Fort Fisher into dice, but which made only a big noise and a lot of smoke, since the war General Butler has been celebrated chiefly because he holds a monopoly on bunting, on which there is a duty of 113 per cent. for the encouragement of home industry.

The discovery of the curious ice cave in Ashley valley, in the Rocky mountains, continues to attract attention. Tom Mitchell, who has just returned to Salt Lake City from there, says that in the latter part of August he found in the cave a section of ice twenty-five feet high and thirty feet thick at the base. A small lake was also discovered. One of the rooms in the cave was over 1,200 feet long. The party who went in with Mitchell were bound together much after the fashion of Alpine climbers.

Dr. Milburn, the blind preacher, made a very interesting and pathetic address at the funeral of Congressman Cox in New York on Friday, ending it as follows: "This man bore himself to the age of threescore years and five, not only untainted by the world, but unwearied with it. No scowl of discontent or misanthropy was ever seen upon his brow; no complaint of the emptiness of the world, or of its vanity, was prompted by that cheery heart. He was kind, and he imparted his kindness to others."

The greatest known depth of the ocean is midway between the island of Tristan d' Acunha and the mouth of the Rio de la Plata. The bottom was there reached at a depth of 40,236 feet, or 8¾ miles, exceeding by more than 17,000 feet the height of Mount Everest, the loftiest mountain in the world. In the North Atlantic ocean, south of Newfoundland, soundings have been made to a depth of 4,580 fathoms, or 27,480 feet, while depths equaling 34,000, or 6½ miles, are reported south of the Bermuda islands. The average depth of the Pacific ocean between Japan and California is a little over 2,000 fathoms, between Chili and the Sandwich islands, 2,500 fathoms, and between Chili and New Zealand, 1,500 fathoms. The average depth of all the ocean is from 2,000 to 2,500 fathoms.

HARMONY, HALIFAX COUNTY, VA., September 14, 1889.

Dear Sir,—In reply to your inquiry, I have within the last thirty days had an opportunity of seeing the growing crop of tobacco in the border counties, from Granville, N. C., to the mountains, including the best bright tobacco section, which includes Person, Caswell, Buckingham, Guilford, N. C., and Pittsylvania and Halifax, Va. On account of scarcity of provisions, owing to short crops last year, scarcity of labor, and means to farm on, I do not consider in the first place there was more than 75 per cent. of a crop planted, and of that 75 per cent., owing to the excessive rains and freshets, there will be more than from 50 to 60 per cent in weight in pounds.

As to *color* there is, or will be (if the season continues as favorable as up to this time), a larger per cent. of brights of poor, thin tobacco than in any crop in my recollection—say some 20 per cent. of *smokers* and about the same of *cutters*, and 15 or 20 per cent. of yellow wrappers, and the remainder of nondescript *smoker*-trash, &c.

As to tough fillers and navy wrappers, I think there will be but a small per cent., say 10 per cent. of each. Really, I see very little that promises these grades.

If it is seasonable from now out, and we have late frost, some of the late planting may make some pretty good tobacco of these grades, but the prospect does not look that way now.

The tobacco on the hill is not growing any, it is rather going back, from the dry season we are having at this time. I think about half of the crop has been cut, and the best half. What has been cut was not, as a general thing, ripe. It has been cut because it *cured yellow*, or bright, easily, and the farmers were fearful it might set in wet, and the tobacco would take a second growth, and could not be cured bright. For that reason, and the small growth generally of the crop, I put it down at fifty or sixty per cent. (if over fifty per cent.), and owing to the *thinness* of the leaf, it *cures bright so easy*. We cannot have tough fillers and good navy wrappers without *body*, which the tobacco this year has not, and there is hardly any *gum* in it.

I think what I have stated to you as to the counties I have been through, will be the character of nearly all the yellow tobacco belt east of the mountains.

I have no late information from and know nothing of the tobacco crop in the North Carolina counties west of the mountains. Very respectfully,

[Signed.] WM. H. FAULKNER.

The Richmond tobacco market was quiet to-day. C. McL.

REVIEW.

NEW YORK, September 17.—The market showed strength to-day in the face of a weak London market, and news that C., B. and N. had prevailed upon several Eastern lines to issue the new joint tariff from the Seaboard to St. Paul. C., B. and N. getting only fifteen cents for its haul, the other roads getting full rates. After a slight fall the whole market was very strong to 2 P. M. It is the railroad earnings and the business in sight that makes the holders of stocks so confident of the future. Gould says he is a big bull because the big crops will not only bring in a great deal of money, but will stimulate the speculative spirit. What little evil there is in the situation it is buried under the avalanche of good. In the last hour the whole list was very strong, but after 2:30 fell off on 6 per cent. money.

New York Financial Market.

[By Telegraph.]

NEW YORK, September 17.—Money closed at 4 per cent. Exchange steady; posted rates, 485½a489; actual rates, 484¾ for sixty days, and 488¼ for demand. Governments closed steady; currency 6's 118 bid; 4's coupons, 128 bid; 4½'s do., 105¾ bid.

In the first hour of business prices for the Granger, Southwestern and coal stocks declined ½ to ¾, while Northern Pacific preferred declined 1¾, but after 11 o'clock values slowly recovered, and by 12:30 nearly all the stocks were ½ to ¾ per cent. higher than they closed last night, with the exceptions of Northern Pacific and Canada Pacific. Northern Pacific was the special feature of the afternoon's dealings, advancing on an active trading from 73¾ at 12 o'clock, to 75½ by 2 P. M., and closing at a reaction of 1 per cent. from the top figure. The general market although sparingly dealt in, was firm and prices advanced in most cases until the last hour, when there was a sharp reaction, leaving values irregularly and fractionally changed from those of yesterday. Sales, 184,832 shares.

New York Cotton Market.

[By Telegraph.]

NEW YORK, September 17.—Messrs. Hubbard, Price & Co., say: "An advancing market abroad aided the bulls upon September to day and carried the entire list to a higher plane. The same generalship noticed yesterday continued to-day, preventing any amount of cotton from being shipped to New York for delivery. It is evident that the bulls do not wish an actual cotton, as an advance of a few points would have enabled commission houses to load cotton in blocks, but the slow, gradual advance prevents business from being done. Our bull operators threaten a similar move in October and November, stating that New York continues to be the cheapest market, and they are simply establishing prices that readjust this and the Southern markets.

Futures closed firm and 3 to 12 points higher. Spot cotton quiet, 11⅛ for middling uplands, with sales of 612 bales to spinners. IN NEW KENT CIRCUIT COURT—IN CHANCERY:

P. Ball against W. W. Gordon, *per. rep.* of Henry Webb, deceased.

[*Extract from decree of 29th October, 1888.*]

On consideration whereof the court doth adjudge, order and decree that this cause be referred to one of the commissioners of this court to take, state and settle the following accounts:

1. An account of the transactions of W. W. Gordon, administrator of Henry Webb, and showing what cause and what by due diligence might have come into his hands as such administrator, and said W. W. Gordon, administrator as aforesaid, is hereby directed to produce before said commissioner all books, accounts, vouchers, &c., relating to said administration, in order to enable said commissioner to state said accounts.

2. An account of debts of said Henry Webb, deceased, giving amounts, dignity, priority, &c., of same.

3. An account of the real estate of said Henry Webb, deceased, giving description of same, and ascertaining amount and fee-simple value of same.

[*Extract from decree of 25th April, 1889.*]

It is adjudged, ordered and decreed that Thomas Barham, one of the commissioners in chancery of this court, proceed to take, state and settle the accounts directed by decree entered in this cause on the 29th October, 1888, and said commissioner shall, before taking said accounts, publish notice of time and place of taking said accounts once a week for four successive weeks in some convenient newspaper, which publication, as aforesaid, shall be equivalent to personal service of notice to all the parties to this suit, and said commissioner shall also take the following accounts after giving notice as aforesaid:

An account of what would be a reasonable fee to M. H. Barner for his trouble in prosecuting this cause, to be paid by the parties proving their claims in this suit and getting benefit of same, and the court reserves.

Teste:

THOMAS BARHAM, Commissioner.

WHAT CURES?

As a medicine of GENUINE MERIT we place

HUNNICUTT'S

RHEUMATIC CURE

Against the world for all impurities of the blood and diseases of the kidneys and skin.

It is absolutely an infallible cure for Rheumatism in all its forms.

We do not refer to people in some remote and inaccessible place, but give you the testimony of your friends and neighbors. Here is the proof:

LEE CAMP SOLDIERS' HOME, RICHMOND, VA., November 2, 1888.

Hunnicutt Medicine Company:

Gents,—Some eight years ago I was attacked with Sciatica, and suffered for several days at a time the most agonizing pain. It continued getting worse, although receiving the best medical treatment and using almost every remedy that was suggested. I finally got so bad off and suffered so much I was unable to attend to any business, and went to the "Soldiers' Home." A short time after being there, in reading the Atlanta *Constitution*, I saw your "HUNNICUTT'S RHEUMATIC CURE," advertised and so highly recommended by citizens of Atlanta that I at once wrote to you for some, and in a few days received three bottles. I commenced taking it as soon as received, and before one bottle had been used I felt its benefits. I took the other two bottles and scarcely ever felt a pain. Ascertaining that this GREAT AND ONLY CURE for SCIATICA and RHEUMATISM was for sale by OWENS & MINOR, I bought one bottle more and used that, and now feel like a new man, without a twinge from that unbearable disease, SCIATICA, and I cheerfully recommend it to all afflicted with Sciatica or Rheumatism as a SURE CURE. Respectfully,

T. W. HUNGERFORD.

Hunnicutt's Rheumatic Cure.

Infallible cure for Rheumatism, Sciatica, Neuralgia, and all diseases of the blood, skin and kidneys. For sale by druggists at one dollar per bottle; six boxes for five dollars. Send for book of testimonials free.

READ! READ!! READ!!!

From John Ott, Esq., Secretary of the Southern Fertilizing Company:

A remedy for torpid Liver:

RICHMOND, VA., April 17, 1886.

Dear Sir,—The Chase City Mineral Water I have been getting from you has been used partly by myself and a friend, with, so far, very happy results for torpid liver in both cases. Yours truly,

BENJ. T. CRUMP,
of Crump & West,
Coal Dealers, 1719 east Cary street.

RICHMOND, VA., April 27, 1886.

Mr. M. E. Hardy, Chase City, Va.:

My Dear Sir,—I have used with special benefit, for relief of the kidneys of an excess of uric acid, and other gouty indications, and as a preventative of indigestion, the Chase City Mineral Water, and commend it without hesitation. The water at the same time is delightful to the taste.

JOHN OTT.

A perfect cure of Dyspepsia:

RICHMOND, VA., April 30, 1886.

Mr. M. E. Hardy:

Dear Sir,—I have been afflicted with dyspepsia for many years, and treated by intelligent physicians who prescribed various remedies, but I
