Religious Intelligence.

The Franklin and Grand Isle Conference of Congregational churches will meet at Enosburgh, on Wednesday, June 6th.

There is a powerful revival in progress at Townshend, confined principally to the young people in the Academy and village.—Eight were baptized last Sabbath and united with the Baptist church, and many others are designing to go forward.

About twenty hopeful conversions have recently taken place in Westfield, Vt., and ten or twelve in Lowell, Vt., both churches being under the pastoral care of Rev. A. A. Smith.

There is considerable interest in both the Congregational and Baptist churches in Brattleboro.

In Westminster an increasing religious interest has been prevailing and twenty or thirty young people are rejoicing in a new hope.

The Young Men's Christian Association, of Manchester, Vt., carry on four schools in that town and one in Dorset.

Rev. G. W. Bailey, late of Lebanon, N. H., has taken the Pastoral charge of the Universalist Societies in Morrisville and Stowe.

The Baptist anniversaries, including the Home Mission Society, the American and Foreign Bible Society, the American Bible Union, the Historical Society, the Publication Society, and the American Baptist Missionary Union, commenced in Boston on Thursday.

The Christian *Register* acknowledges contributions amounting to $30,000, towards the $100,000 Unitarian fund.

The Council of the Protestant Episcopal Church of Virginia met at Alexandria, Thursday, Bishop Jones presiding. Upward of 100 members were present, among them Ex-rebel Gen. Pemberton.

The Convention of the non-Episcopal Methodist churches assembled in Cincinnati, Wednesday, to discuss and effect a basis of union. Delegates representing nearly all the churches in the Northern States were present. The Convention will probably last several days.

The eleventh annual Convention of the Young Men's Christian Associations of the United States and British Provinces, will meet in Albany on Friday the first of June. Eight hundred delegates are expected, representing associations in almost every State in the Union and a large number in the Canadas.

VERMONT IN CONGRESS.—Our Vermont delegation in Congress—at least the Senatorial portion of it—is showing a shrewd appreciation of the political future, not only in the country at large, but even here in Vermont. The black Republican fever in Vermont has had its day; and though it will doubtless be more or less the ruling element in our State politics for some time to come, yet its power over the people is waning, and already our Congressmen understand that their constituents at home do not desire them to follow in the wake of the extreme party of men who have thus far led the present Congress. Their recent action accordingly has evidently been influenced by this sense of how things are going at home; a course of action which has greatly surprised and displeased the Radical leaders, and led them to exclaim 'Can such things come from Vermont?' Vermont, indeed, has always been foremost in the anti-slavery cause; but now that slavery is abolished, our people do not see the need of keeping up a further state of agitation, discord and sectionalism, but desire, rather, to see the country fully pacified and harmony of all its parts restored. Their *interests* require this, and they do not see that their principles forbid it. Our Senators and Representatives in Congress, therefore, may safely go out upon a strong force element in their favor, as often as they refuse to yield to the exactions of Radicalism and pursue in its stead a conservative course.—*Burlington Sentinel.*

Our Senators, we trust, will be duly grateful for the Sentinel's kind approval, and promise of support. They must make the most of it, for we fear it will not last long.

GRASS VERSUS TOBACCO.—For some years past the farmers of the Connecticut River Valley have devoted much attention to the tobacco crop, and have found it very profitable. The only limit to the crop is manure. It requires all that can be obtained from every source. The grand difficulty has been to obtain it. The tobacco requiring all, there was none left for the grass, and grass without manure soon failed, the stock grew less and less, and with little stock there was little manure.

Columbia County, New York, has been noted for its crops of hay as the Connecticut Valley for its crops of tobacco has been, particularly during the war, a very profitable crop.

This year the New York market has not been good, and Columbia County farmers began to despair, when a new light dawned upon them. The tobacco farmers discovered that they could buy Columbia County hay, and send it down by the Western Railroad to Springfield and vicinity, at a price that would warrant them in feeding it to stock, and with but little profit on the feeding they would make money out of the increased piles of manure which such feeding furnishes for the tobacco crop. A moderate trade was opened last year, which gave such favorable results that it has been largely increased this year. The hay of Columbia County will now reach New York in the form of Connecticut River leaf, and be puffed away by city smokers, instead of being eaten by city horses.

This new course of trade may save the Connecticut valley farms from destruction by the exhausting tobacco crops, but who can answer for continued fertility of the hay farms of Columbia County?

"Without grass, no stock;
Without stock, no manure;
Without manure, no grass."

This old saw is as true now as it was 30 years ago.—*N. Y. Tribune.*

ARTFUL INVOICING.—Five casks of Alcohol were seized at Rouses Point, lately, in which a little shellac had been dissolved to make it pass as "Varnish." The duty on alcohol is $3 per gallon, on varnish only 50 cents.

"DEADHEADISM" AT AN END IN NEW YORK. In compliance with the provisions of the recent law passed in New York, members of the City Councils, Judges, members of the press, clergymen, ex-railroad officials, government officials, &c., who have received free passage over the various railroads in that State have received notice that the privilege is at an end. The following is the law:

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. Every railroad company in this State is hereby prohibited from issuing free passes over its respective road or roads, *to carrying persons or property free of charge* over their road or roads, except such persons as may be injured upon their road or roads, and excepting such persons as may be employed by such railroad company, as clerks, laborers, officers or attorneys, and excepting sick and disabled soldiers.

Section 2. The penalty for a violation of this act shall be fifty dollars for each offence.

NITRO-GLYCERINE PENALTY.—Mr. Edmunds reported Wednesday in the Senate the bill to regulate the transportation of Nitro Glycerine already passed by the House with an amendment changing the punishment for secretly shipping this compound on a vessel, and thereby causing death by its explosion, from death by hanging, to imprisonment for not less than 10 years. The penalty for carrying Nitro-Glycerine in any steamship, vessel, car or wagon used for the conveyance of passengers within the limits of the United States is $500.

Applications for agencies for the three last named Companies in Vermont, Western New Hampshire and Northern New York, should be made to us as General Agents and Agency Superintendents for said Companies in said territory.

Fire and Inland Insurance taken in the above names first class Companies, to the amount of $2,000,000, in one risk.

Dwelling houses and their contents and farm property generally will be insured for one or a term of years, allowing the insured to share back yearly three fourths the profits of policies, low as to make them almost equal to mutual, and having such property to insure, carry these Companies.

Premium notes are not required, and the insured is free from liability to assessments, the large cash assets of these Companies furnish perfect indemnity for all losses.

First-class Farm and Village dwelling Houses,

With their Contents

will be

INSURED THREE YEARS FOR HALF ONE PER CENT FOR THE ENTIRE TERM.

Losses liberally adjusted and promptly paid at this agency.

S. & R. S. WIRES, Agents.

GENERAL AGENCY,
—OF THE—
Manhattan Life Ins. Co.
OF NEW YORK.
Assets, $3,000,000.

THIS Company commenced its operations in 1850 and has proved to be a successful and reliable business concern. Policies are granted to those in sound health on the most favorable terms and mutual plans of insurance, thus affording to the public the advantages of either system at their option in one institution. The lowest rates of premium are charged that this Company may be enabled to furnish security to the assured and perpetuity to the company.

This company has already paid over $1,000,000 for losses and over $370,000 in dividends to policy holders.

NON-FORFEITING LIFE POLICIES.

Premiums may be paid singly or in five or ten annual payments, at option of the assured. This plan is commended to the public as it gives to the assured the full value of all the money paid and being completed in early life, whilst the parties are vigorous and hopeful, gives entire exemption from payments of premiums in advanced life, its value cannot be too highly estimated.

NON FORFEITING ENDOWMENT POLICIES

These are made payable at death or on attaining a given age. Premiums payable in ten annual payments. The policy becomes forfeitable for one tenth of amount insured for each payment, parties insuring in this plan have all the advantages of a savings bank, as the payment of premiums secures to equivalent value, payable on the assurer attaining the given age or at death should it occur sooner.—Each life, short term, endowment and annuity policies issued in all their various and approved forms. Printed documents containing full information furnished without charge and sent free by mail. Good local agents wanted in every town and energetic and reliable men employed on favorable terms to travel for this company.

Music.

S. D. & H. W. SMITH'S
AMERICAN ORGANS.

THE MOST PERFECT AND BEAUTIFUL MUSICAL INSTRUMENT IN THE WORLD FOR THE AMERICAN HOME CIRCLE.

Seventeen (17) First Premiums were awarded to the American organs in the month of October 1865, over all competitors at different State and County Fairs.

The American Organs
—are the only—
REAL REED ORGANS
now before the public. The only organ having a
Reverberating Sound Box,
or WIND CHEST, which has the same important part to perform as the Sounding Board has in a Piano Forte (to give body and resonance of tone) and without which the organ becomes merely a Melodeon in an Organ Case.

Special attention is called to the style of AMERICAN ORGANS, No. 17, containing the Super Octave Coupler and Sub-Bass, FOR CHURCHES in want of a powerful instrument, who remains are limited, its price renders it very desirable.

Every Organ is Warranted to Prove Satisfactory.

THE AMERICAN ORGANS all have the Reverberating Sound Box, or Wind Chest, and are finished in the highest style of art, in Rosewood, Jet, Walnut, and Oak finish, richly varnished and Polished or in Smooth Oil Finish, forming elegant pieces of Furniture for the Parlor or Boudoir; and the Oak and Walnut especially adapted for Churches, Lecture and Lodge Rooms.

THE AMERICAN ORGANS are all finished with our new PATENT Improvements, containing the Improved Knee Swell, Dog-le Bellows, two Blow Pedals, and TREMOLO found in no other instrument.

NEW STYLES OF CASES,
Richly Finished and Highly Ornamented.

Illustrated Catalogues, containing cuts taken from Photographs, showing their relative size to each other, sent free.

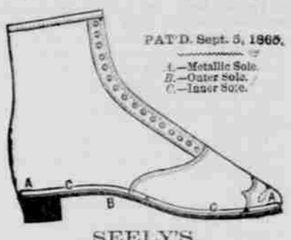
POWERS & STORY,
GENERAL AGENTS FOR THE STATE

DENTISTRY!
A CARD
Preparatory to retiring from the practice of dentistry in Burlington, I have taken as partner Wm. H. Waters, D. D. S. A regularly and thoroughly educated dentist, who graduated at the Baltimore College of Dental Surgery in 1859, and has been in successful practice ever since. He came to me well recommended and having been with me now three months, I find him all that he was recommended to be.
I shall remain in the office with him until the first of October, after which he will be associated with Dr. N. W. Gilmore, who as I am assured by Dr Waters is also well educated in his profession, having studied and practiced with an eminent dentist in Massachusetts and having had an extensive practice and experience of ten years.
I therefore while tendering my grateful acknowledgments to the public for a long and liberal patronage, respectfully solicit its continuance at the old stand, which I shall leave in the hands of two good dentists, both gentlemanly men and both well qualified to conduct a first class dental establishment. In the meantime will be glad to see my old patrons at the office during the few months that I remain in it. JAMES LEWIS.
Burlington, April 17, 1866. dawly.

Miscellaneous

TAKE CARE OF YOUR LIFE!



SEELY'S
Patent Metallic Sole.
A NEW INVENTION.
WETTING THE FEET is the most prolific cause of disease and death known to humanity. It is almost sure to bring on a cold; and colds, neglected, and often when not neglected, lead to fevers or to coughs and fatal consumptions. It is in consequence of this truth that the inventive talent of the country has for years been devoting some method, or attempting to devise it, for keeping the feet dry, and yet that should not give inconvenience to the wearer. Rubber shoes, in one form or another have hitherto been our reliance; but it is well known as among their many evils that while they keep the feet dry from external moisture, they sweat them over much, and by thus inducing an undue tenderness increase a susceptibility to colds rather than otherwise. They are also cumbersome to the feet, and withal are very expensive. The demand is for something that shall make the ordinary Boot and Shoe impervious to water, without impairing their elegance or durability, and if possible, without adding sensibly to the cost of their manufacture. These, it will be conceded, are most important desiderata, and we conscientiously affirm that they are absolutely attained in the invention herewith presented to the public.
The invention consists in inserting between the inner and outer soles, when the boot is making, a thin METALLIC PLATE, exceedingly ductile, combining flexibility with toughness, very light, and every way adapted to the end desired, while the additional expense is merely nominal. It furnishes a perfect barrier against the admission of wet or dampness, though the feet may be exposed even to living upon wet pavements or damp ground.
To ladies and children the METALLIC SOLES will be of inestimable value, as from their flexibility of and delicacy of texture, they are particularly exposed to the long train of ills that attend upon an inadequate protection to the feet.
These Soles have already been tried by the best of all tests, actual wear, and the testimonials to their superiority, cheapness and durability, indicate that they must be speedily and universally adopted by the public. The Patent Metallic Sole and Boots and Shoes are being introduced into the leading Boot and Shoe houses throughout the United States, and will continue all first-class manufacturers, as soon as they become aware of the demand for them, as they become aware, by one trial, that they cannot afford to be without them.
If your dealer does not happen to have them, ask him to get them and take no other. If your dealer does not happen to have them, ask him to get them without delay. If he will not, then send yourself to the inventor one enlarged sixteen cents, and obtain six pair, assorted sizes, (length to be sent, which will be promptly returned by mail, or express prepaid. All which are for sale or by any dealer in the country. Agencies will be established in every city and village, and supplied with Soles and proprietary rights, or individual special, and liberal inducements offered to agents. Also General Agencies for state or county, on application, with proper testimonials to the inventor.
SAM'L H. J. SEELY,
General Depot corner City Hall Place and Court street, New York.

TESTIMONIALS.
The undersigned have for the past six months worn Boots and Shoes possessing the Seely Metallic Sole, and find them an effectual preventive against dampness, and the cold so often taken from damp feet. We cheerfully endorse the perfect excellence of their services. The Metallic Sole is now only a grand contribution to the cause of general health, but a positive luxury, effecting all comforts of home, without cost, except in actually wet weather. All actually unexpected and even water proof pavements, is completely foiled at its power of harm by the most simple and useful invention. We and who has once used them will never be without them again, as they increase the comfort and shoes by a sum which is scarcely worth naming, and insure, positively, dry feet, which is confessed among the best conditions of health and comfort. We heartily commend the "Metallic Sole" to all the sensible.
J. CLEMENT FARNUM,
Pastor Central Congr. Church, Brooklyn.
MARY A. FRENCH
New York, Dec., 1865.

SAMUEL J. SEELY, Esq.—
Dear Sir—In reply to your inquiries regarding your patent Metallic Sole, I take great pleasure in stating that I had them put in a pair of fine red tips boots, which I wore the whole of last winter (three wet streets of Albany). I have had them well soiled and are wearing your Metallic Soles now with full as much ease as I ever had in wearing them. I have never had a wet or damp foot during the whole time I have worn them. I pronounce them the best invention made. I am satisfied that no person having once worn them will do without them. Wishing you the success you deserve for a valuable invention for the preservation of health. Yours truly,
SAM'L SLAUGHTER, Colonel, New York.

EZR. SWARTS, Esq.—
I have pleasure in expressing my opinion of the usefulness and quality of your patent Metallic Sole. I have worn a pair of Boots for the past seven months, throughout with the Sole, and have found them as good as new, and they always were dry. I consider it a valuable invention for comfort and durability.
EZRA OVERTON, Brooklyn, New York.

S. J. SEELY, Esq.—
Dear sir—In answer to your inquiry, I am pleased to state that I have manufactured shoes for fitting your Metallic Sole by machinery. I think there is a superior article for keeping the feet dry. In manufacturing them there is no trouble from cutting the thread when sewing, and any difficulty in putting them in the shoe.
Respectfully yours,
SELEGMAN FRANKENBOOK,
Practical Shoe Manufacturer, Schenectady, N. Y.

STATE OF VERMONT.
A PROCLAMATION.
WHEREAS, The Farmers and Mechanics' Bank, a corporation duly incorporated by the Legislature of the State of Vermont, located and doing business at Burlington, in the County of Chittenden, has made application to me requesting me to issue a proclamation designating some day for the termination of the existence of said corporation; and
Whereas, it has been made to appear to me that two-thirds of the legal votes of the stockholders of said corporation were given in favor of said application;
Now, therefore, I, Paul Dillingham, Governor of the State of Vermont, in conformity with said application and the provisions of section eighty-six and eighty-seven of chapter eighty-nine of the General statutes of Vermont, do hereby issue my proclamation and declare that on the Tenth day of September, A. D., 1866, the said corporation of the Farmers and Mechanics' Bank shall cease to exist, as fully and with the same effect as if its charter expired by the limitation therein.
In witness whereof, I have hereunto signed my name and caused the seal of the State to be hereunto affixed, at the Executive Chamber in Waterbury, this Eighth day of March, in the year of our Lord one thousand eight hundred and sixty-six, and of the Independence of the United States the ninetieth.
PAUL DILLINGHAM.
By the Governor,
CHAS. M. GAY,
Secretary of Civil and Military Affairs.
