Our New Administration

One of the greatest changes in the history of the American government was made at the noon hour today when William Howard Taft surrendered the office of president to Woodrow Wilson. The outgoing president is republican in politics, while the new chief executive of the nation is a member of the democratic party. In many instances the beliefs of the two gentlemen are identical, but in one there is a wide difference of opinion. The principal bone of contention during the last campaign was over the tariff question. The republican platform was for a protective tariff; that of the democratic party for a low tariff. The republicans sought to protect the industries and the working class of the United States; the democratic party has attributed to the high tariff the high cost of living.

Both questions have been argued from practically every rostrum in the country and the views of the two parties are just as opposite today as when the campaign started some eight months ago. It will remain for President Wilson to determine if the low tariff will prove more beneficial than has the Payne-Aldrich tariff law. There are many who predict ruin and disaster for the new administration; there are others who predict a continuation of the era of prosperity that has marked the administration of President Taft. Of the two predictions the Bonanza would prefer to believe in that which sounds optimistic, rather than entertain the belief that leads to dire forebodings.

In all his official acts the Bonanza is of the firm belief that President Taft acted for the best interests of the American public. Unjust accusations have been hurled at him during the stress of the political moments, but with the air cleared of all political remarks, there is reason to believe that William Howard Taft is today the greatest man of his day. His administration was marked with adversities such as Lincoln encountered, and such conditions have been met in a quiet manner. The accomplishment of the four years' administration of President Taft are many; more than any other president has accomplished in a single term, and when this record is carefully and honestly summed up, then the real efforts of the man will be appreciated.

In the inauguration of Woodrow Wilson as president, the Bonanza pays homage to the new executive. His politics we do not consider. The only consideration given is that he has been tendered the highest gift in the hands of the American people. The hope is entertained that his administration will be fruitful of good legislation and will mark the continuation of the prosperity now enjoyed. In this connection, the same sentiment is being expressed by practically every newspaper in America, irrespective of political belief.

So keen was the judgment of Governor Oddie in selecting competent men to fill office that one of his choice has already been removed and efforts are being made to dislodge a second. This does not count the labors of the legislature to annex the goat of the governor's pet. Verily, it is a peaceful administration.

Another administration scrap is scheduled at Carson. Superintendent McKinnon of the orphans' home has been asked to resign but refuses to oblige the hungry crowd at the democratic pie counter.

As soon as Roosevelt left the White House he went lion hunting in order to keep the spot light in his direction. Taft will occupy a chair at Yale and is content to perform his duty in a quiet and orderly manner. Some contrast, eh?

Probably T. R. is now arranging to give advice to Wilson regarding the conducting of the government, through the progressive dailies of New York.

The reception committee appointed to receive Woodrow Wilson at Washington came near tendering all the honors to William J. Bryan.

President Taft's last official act was to veto a bill. But it was not the republican party that vetoed Bill last election.

A sure sign of spring: The Tonopah Gun club is demolishing blue rocks every Sunday.

Strange. The press dispatches make no mention of Roosevelt's attendance at the inaugural ceremonies.

Wilson declares he will be a buster of precedent—but not a buster of presidents.

Woodrow Wilson. He is the guy who put the dent in president.

The pie counter at Washington is not lacking in patronage today.
