Wall Street Vastly Changed By the European Hostilities

(By International News Service.)

NEW YORK, Sept. 15.—The European war has played havoc in Wall street. That "crooked thoroughfare, with a river at one end and a cemetery at the other," is only a wraith of its former self. While it would be an exaggeration to say that grass is growing in Wall street, there has been a great difference in the place since the stock exchange closed a month ago.

People still pass frequently along Broad and Wall streets, a few men stand idly in the open space at Broad street and Exchange place, and the cabbies still drowse on the stand before the stock exchange, but all is not as it once was.

There is a lack of excitement, of bustle and business about Wall street that never was known there in the days of prosperity before the war came. Not even in the days of 1907 was there such stagnation there.

Nobody seems to be in a hurry. There is no shouting and gesticulating from windows, giving quotations and orders to waiting brokers in the street. One receives the distinct impression that the sidewalk pedestrians are walking to kill time.

But now and then a man or woman passes by whose faces one can tell they are people without jobs. Because of the war in Europe, which paralyzed the markets of the world, hundreds of men and women in Wall street, bookkeepers, clerks and stenographers are out of employment, watching their small savings dwindle away, facing, some of them, the prospect of going hungry ere long.

The brokers declare that they are no better off than the employes they have discharged. "How could we help ourselves?" demanded one broker. "We did not wish to turn off men and women we had trusted, in some cases, for years. But what recourse have we? My firm is a small one, yet with the help reduced to a minimum and my partners and I doing most of the bookkeeping, the office's expenses are $100 a day. With no new business of any sort, that means our net loss is $100 a day, or $3,000 a month. Besides that I have the interest to pay on my seat on the stock exchange. I bought mine when business was good and paid $74,000 for it. All this counts up. I am living on my savings. None of the brokers in the street are any better off than I am and many of them are in much worse plight."

Different firms have pursued different policies in dealing with the unique situation presented by the shutting off of speculative trade. Some firms, which feel sufficiently prosperous, have retained all their help. But in the majority of cases there has been at least a partial reduction of the staffs. The newer employes were given a week's or two weeks' salary and dismissed with the promise they would be given first chance at their old positions when business was resumed.

Again some firms expect their employes to report at the offices every morning as if business were going on, while a few of the firms are paying their employes full salaries, but telling them to stay away from the offices and get the benefit of a real vacation.

The same state of affairs prevails now more or less in the shipping trade. With little or no steamship traffic and importation at a standstill, there is nothing shipping employes can do, any more than stock brokers' clerks.

Almost everybody down town claims to be losing money. One must stop in New street to observe isolated cases of prosperity, all the more striking for their rarity. These are the "put and call" men and they are the only ones of the financial district who know prosperity. The dealers on the stock exchange, the consolidated exchange and the curb marker are forbidden to trade, which leaves a free market for the irregulars on New street.

And the sudden prosperity that has come to them is proof that even in times of direst financial stress there is a considerable minority of dyed-in-the-wool speculators who will take any risks purely for the love of the game.

But as has been said before the pinch of hard times bears most heavily on the small fry rather than on the firms employing them or on the independent broker. It is the individual stenographer or clerk who has lost the job that means food and shelter perhaps, for more than one, who is bearing the brunt of the actual suffering.

A few stray job hunters are seen in the region of the street, but not many. Any man or woman with strength of mind realizes that it is futile to try to find work in Wall street in such times. Only those helpless ones who have tried and failed, drift back again, tramping the streets, waiting wearily at dors, haunting lobbies of big office buildings, searching for some old acquaintance who may have for them the long sought word of cheer.

Their plight is becoming well nigh a hopeless one. A month has passed and the end is further off than the beginning. The suffering of the Wall street employes is none the less real because they are not the kind to join the bread lines or organize demonstrations before the city hall.
