OLD DISTRICTS SHOWING LIFE THIS SPRING

With the spring season at hand and with work limited in the mines of Tonopah and nearby districts, many men are resuming farther into the hills in search of the precious metals. As a result numerous discoveries are being made from Tonopah to Goldfield, well worthy attention, most prominent of which are Silver Peak, Bellehelen, Klondyke and Hannapah.

Reports from Bellehelen are to the effect that the coming summer promises to witness great activity in a mining way. The fact that the Bellehelen mine will unquestionably be equipped with an up-to-date mill for plant has stimulated matters materially, and owners of property are making ready to institute development.

Little has been heard concerning Silver Bow, yet it is nevertheless a fact that there is considerable activity therabouts, and a few weeks should bring about a great change in conditions. Hannapah is active and a number of prospects are showing up well, especially the Antelope, Running Elk and Central.

Klondyke will be heard from in no uncertain way during the coming summer and shipments of high-grade ore will soon be in order from at least two properties.
