ORDER FOR NOTICE TO CREDITORS

[illegible]

NOTICE

In the District Court of the Fifth Judicial District of the State of Nevada, in and for the County of Nye. In the matter of the Last Will and Testament of Richard Noonan, Deceased.

Notice is hereby Given that Mable Andrews has filed with the Clerk of said Court a petition praying for the admission to probate of an instrument purporting to be the last will and testament of Richard Noonan, deceased, and for hearing the application of Mable Andrews for the issuance to her of letters testamentary thereon, and that Thursday, the 28th day of July, 1921, at 10 a. m., the same being a day of the regular session of said Court, at the Court House, and in the Court Room thereof, in the Town of Tonopah, said County and State, has been set by the clerk for the hearing of said petition, when and there any person interested may appear and show cause why said petition should not be granted.

In witness whereof, I have hereunto set my hand officially and affixed the seal of said Court, this 18th day of July, 1921.

(Seal) L. E. GLASS,
County Clerk Nye County, Nevada, and Ex-Officio Clerk of said Court.
By L. HAFFERON,
Deputy Clerk.

FRANK T. DUNN,
Attorney for Petitioner.
J16 to 27.

MARKETS NOT TO BE FLOODED WITH HUN DYESTUFFS

(By Associated Press)

LEVERKUSEN, Germany, July 23.—German dyestuff manufacturers' total production this year will not exceed 60,000 tons, which will make it impossible to "flood" the markets of England or America, or even compete successfully against American manufacturers, asserts Dr. Carl Duisberg, head of Germany's greatest dye manufacturing organization.

"We have recently increased our capital to 1,762,500,000 marks, which is 712,500,000 more than our previous capital, but this was the inevitable consequence of the tremendous depreciation of our currency and resultant increases in the prices of commodities," he said. "It has nothing to do with intended attacks on the world market, which it has been reported we were planning.

"Labor difficulties, shortage of coal, the unsatisfactory traffic conditions, as far as the Rhineland is concerned, the obstables caused by the Rhine customs barrier, all prevent us, in any case, from increasing our output, and leave us in a far from satisfactory position. This position is made worse by the hindrances placed in our way in many foreign countries."

Dr. Duisberg characterized as "ridiculous" the demand in some American quarters for the closing of German dyeworks because "they might be used for the manufacture of explosives and poison gas in another war," was "utterly senseless, since Germany has been deprived of the means of employing poison gases for war purposes, even if she wanted to." He added that "no sane man in Germany thinks of fresh wars."

"It is difficult to understand the American anxiety," he continued. "For the American industry is incomparably stronger than ours."

60 FAMILY MEMBERS ATTEND REUNION

(By Associated Press)

KELSO, Wash., July 23.—Sixty members of the pioneer Bozart family, of which there are about 300 descendants in the Pacific northwest, attended the seventh annual reunion of the family at Woodland, Washington, near here, recently. The Bozarts crossed the plains from Pike county, Missouri, in 1845, locating on the Lewis river near here. Mrs. Cynthia Bozart, aged 84 years, is the only living member of the original party.

PRISONERS TO MANUFACTURE OWN FOOTWEAR

(By Associated Press)

OLYMPIA, Wash., July 23.—All shoes needed by wards of the state of Washington will in the future be manufactured by prisoners in the state penitentiary at Walla Walla, according to J. W. Pace, assistant director of the state department of business control.

As the penitentiary jute mill has been losing money, it probably will be closed and a shoe manufacturing plant installed. It is expected the prisoners will manufacture 12,000 pairs of shoes annually.

Women prisoners in the state institutions will operate knitting machines and turn out 20,000 pairs of cotton socks a year, according to present plans.

Answering Summer's Call

IN THIS sketch we commence far away from everything garden scene, or that such tasks further scene. Manufacturers and such color fall to charm splendor being summer; then are privileged to wear materials as thin as mist in pale colorings of color or in fresh white. All the diaphanous stuffs answer the call of summer and furnish bewitching raiment that enhances forget the heat and burden of the day.

A frock made of fine voile is shown in the picture, for the model will look well in any summer material including taffeta silk or organdie. As pictured, it has graceful folds of vail lace arranged in crescent fashion up and down the bodice and skirt. If organdie is chosen instead of voile, these frills are likely to be made of it, but [illegible] and are more suitable. The sleeves are short and puffed and the girdle with each dress is made of the same material as the frock. It ties at the back in a full sash bow, with long ends that are composed of the bodice and trimmed with the material. A deep and wide of mirror ribbon finishes the dress.

Nothing would look so warm gauze dressy dress as satin shoes and stockings and nothing would prove themselves the most decent of summer shoes. They are shown in the picture worn with white silk hose.

AUSTRALIA WANTS MANY IMMIGRANTS

(By Associated Press)

SYDNEY, N. S. W., July 23.—Australia wants 100,000 immigrants within a year, according to the new immigration department of the commonwealth government. Immigrants "of the right sort" are desired and a organization is to be set up to provide employment for them. Many from the British Isles are expected.

THE RIGHT THING AT THE RIGHT TIME

By MARY MARSHALL DUFFEE

ANNIVERSARIES.

Moderation, the noblest gift of Heaven.—Euripides.

RECENTLY at a silver wedding anniversary of a prominent New Yorker, the invitations which were engraved in silver contained these words at one side: "The demands of war relief are pressing. We hope for your presence—not presents at our silver wedding anniversary." Among the guests present at this anniversary reception were scores of New York's most noted society folk, the very people whom we fondly look to for leadership in such matters of social [illegible]. So if you are looking for a precedent in adding to your invitations for anniversary receptions or other occasions which presents might be expected, some indication of the fact that you would prefer not to have them here it is.

The fact is that often people refrain from having wedding anniversary parties for the simple reason that they dare not send invitations that will make the recipients feel that they are obliged to make some sort of present. When this is for a tin or wooden wedding the obligation is trifling, but when it is for a silver or golden wedding then there is more sense for this hesitancy.

Usually any anniversary for anything less than a silver wedding takes the form of a party only for some intimate friends. Anything one has been married longer than ten years that there is real excuse for a large party. The time for it is the afternoon or evening. For the afternoon affair the invitations in the usual form might mention tea, but it is better to say "Bridge and tea" or "Tea and music." Dancing should be avoided before half past five, or four and music late enough there after the tea dance is over. No dance music would generally give the neighbors complaint on the score.

Beyond, however, if you are sending an anniversary present that although a wedding present is sent to the bride, the anniversary present is sent to both husband and wife.

The question of "to be or not to wear one's first wedding frock is one

COURT LIFE OF JAPAN TO SEE SOME CHANGES

(By Associated Press)

TOKIO, July 23.—Changes, democratic in nature, will probably be made in the court life of Japan and in the relations of the imperial family to the people, as a result of the visit of Prince Hirohito to Europe. It is likely that the printing of photographs of members of the imperial family in newspapers and magazines will be permitted. The ceremony guards which are always established on the occasion of a visit of a member of the imperial family to any place outside the palace will also be simplified. If the suggestions which have been formulated by officers of the imperial household are adopted.

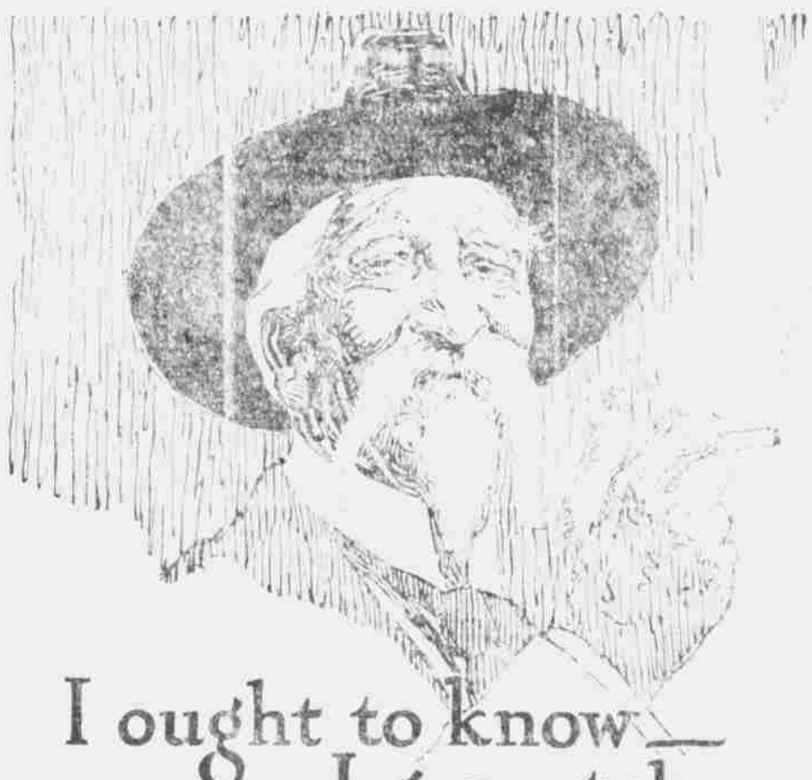
According to one report, the household department requested the press bureau to inquire while he is abroad as to the customs which are followed in the royal family of Great Britain and as to the social works which are undertaken by them. It is assumed that these customs and practices which exist in Great Britain will be adopted more nearly, increasing prospects for reforms in Japan.

BIG DIFFERENCE IN TEMPERATURE ON THESE JOBS

(By Associated Press)

PHOENIX, Ariz., July 23.—There is a difference of approximately 90 degrees between the hottest and the coolest jobs in Phoenix on a warm day.

The man with the coolest job probably is the one working in a cold storage plant where the temperature never rises to 32 degrees above zero. Roof workers claim to have the hottest jobs in general and those men whose work is in connection with tar roofing claim to have the very hottest work. They claim that this is greater heat. The roof workers declare that the temperature on the roof usually is 12 to 25 degrees higher than that shown by the official government records, so that when the newspapers here give the temperature as 116 degrees, the roofers really have been working in a temperature of at least 122 degrees, just 90 degrees warmer than the man in the ice plant.



I ought to know—
I grow tobacco

You can't beat a Camel, because you can't beat the tobacco that goes into Camels.

That's why Camels are the choice of men who know and love fine tobacco. They know what makes Camels so smooth, so fragrant and mellow-mild.

They'll tell you that the expert Camel blend of choice Turkish and Domestic tobaccos makes a cigarette smoke you can't equal—no matter what you pay.

But it doesn't take an expert to tell Camel quality. You'll spot it the very first puff. Try Camels yourself.
