NOTICE

In the District Court of the Fifth Judicial District of the State of Nevada, in and for the County of Nye. In the matter of the Last Will and Testament of Richard Noonan, Deceased.

Notice is hereby given that Mollie Andrews has filed with the Clerk of said Court a petition praying for the admission to probate of an instrument purporting to be the last will and testament of Richard Noonan, deceased, and for hearing the application of Mollie Andrews for the issuance to her of letters testamentary thereon, and that Thursday, the 28th day of July, 1921, at 10 a. m. the same being a day of the regular session of said Court, at the Court House, and in the Court House thereof, in the Town of Tonopah, said County and State, has been set by the clerk for the hearing of said petition, when and there any person interested may appear and show cause why said petition should not be granted.

In witness whereof, I have hereunto set my hand officially and affixed the seal of said Court, this 18th day of July, 1921.

(Seal) L. E. GLASS,
Clerk Nye County, Nevada.
County Clerk and Ex-Officio Clerk of said Court.
By L. HAPPGOOD,
Deputy Clerk.

FRANK T. DUNN,
Attorney for Petitioner.

EXCHANGE RATE HURTS BUSINESS IN SWITZERLAND

(By Associated Press)

GENEVA, Switzerland, July 25.—Switzerland has reached the acute stage of economic stringency resulting from a too favorable rate of exchange. The tourist season, upon which she depends to such a great extent, opened with little prospect of an improvement in the situation.

Tourists who usually visit Switzerland during the summer are going to French and Italian resorts.

The Swiss themselves, to a considerable extent are abandoning their own country to spend their savings in France, where Swiss money counts for twice its value at home, or in Italy, where it counts five times the normal value.

The crisis shows not only in the absence of tourist trade but in an industrial stagnation, a good many workers being already out of employment.

A few weeks ago it looked as if the delegations to the second assembly of the league of Nations, September 5, would find difficulty in getting lodgings here, hotel keepers hesitating to reserve apartments for them because it would require them to refuse tourists at the height of the season.

It now appears that the hotels will welcome the league delegations unless there is an unexpectedly radical change in the travel situation.

As You Like It

MOST thirsty period of all means the afternoon gown is also the most diversified in style. It is especially accommodating this season, with much elegance in silhouettes and four range of many materials to choose from—you may have it as you like it. If slim lines and soft colors suit have won your heart, they are yours for the asking. If [illegible] and crisp materials have captured your fancy—they are your selection. You may almost forget there is such a thing as a corsetless or gown and insist upon embroidery, lace with a [illegible] bodice [illegible] conscious girdles.

All and indifferent to the beauty of white with black will be sent over to enthusiastic summer as it is the favorite afternoon [illegible] here. It employs familiar [illegible] white georgette crepe [illegible] black [illegible]—for building a [illegible] charm that it pleases [illegible] who has an eye for fine [illegible] style. The [illegible] has a [illegible] front panel, sides and back banded with double rows of braid and is fitted to a bodice of georgette covered with an allover pattern traced with the braid. The bodice opens at the front which is extended below the waist line and on to the panel of the over jumper. It is with a band embroidered in black and white. The sleeves are finished also with the embroidery.

A girdle of black and white barrel taffe ribbon has long flowing ends and ends the fan in all in white with ostrich feather trimming and the feet are clad in white pumps and silk hose. This ensemble of white and black is set off by a gay silk parasol.

The slim silhouette has the support of many great names in the world of fashion, the white and black vogue is sponsored by all of them.

Julia Bottomley

ODD SITUATION OF TRANSPORT NOW IN RUSSIA

(By Associated Press)

WARSAW, July 25.—Russia's transportation difficulties, because of the general deterioration of the railroads under the bolshevik regime, according to Moscow reports, have brought about an odd situation. While southern Russia has a surplus of corn and has been endeavoring to export it to Italy, northern Russia has been buying the same kind of grain from foreign countries.

The railroad situation is said to be particularly bad in central Russia and only recently it was reported that the service between Moscow and Kiev had been reduced to an average of one train a week for freight and passengers.

Russia's metal production is reported to have reached but 2 per cent of the pre-war figures, the coal production about 20 per cent and the oil production 40 per cent.

CONDITIONS ON PACIFIC COAST LOOK BETTER

(By Associated Press)

SAN FRANCISCO, Cal., July 25.—Business conditions on the Pacific coast are more encouraging, with increased lumber activity reflecting the employment situation generally, according to a report made public by the United States department of labor.

"Industries generally are attempting to stimulate trade by drastic price cutting," the report said. "Declining construction costs have stimulated home building in the largest coast cities. In rural districts and in the planning industries demand for labor is tending to increase."

An optimistic feeling prevails, the report added, in the mountain district comprising the states of Montana, Idaho, Colorado, New Mexico, Utah, Arizona, Wyoming and Nevada. In those states public works are providing considerable employment while prospects for recuperation in mining and railroading are somewhat brighter. Building is reported principally to be in the structures though some residence construction is reported.

Parts of the report covering several of the states follow.

CALIFORNIA — Considerable unemployment is still evident. Owing to large migration from states the force labor supply is abnormal. Home building is brisk, although office construction is delayed, pending labor adjustments. Retail business is good. Confidence in gradual improvement is generally expressed.

OREGON—While unemployment is in excess of normal, there are some signs of improvement. Activity in lumber is more pronounced. A majority of plants, idle for several months, have resumed in full or part time. Fishing is dull and reports indicate canneries will remain closed all season. Extensive building operations are deferred pending a period of stable industrial conditions. Reports point to an abundant supply of farm labor, with increased demands. Retail business is satisfactory and in general generally are maintaining conservative policies. The general forecast is for improved conditions.

WASHINGTON—There is no marked influxment of the unemployed situation. Lumber is operating on a reduced force, with reduced crews, some mills are still closed. General belief is that this industry seems to revived by adjustment of freight rates. Building is active in [illegible] now has accorded women [illegible] men. But some of them are going to find it rather hard to get right up in the air in a strong wind.

BIG BARGE PLAN NOW IS BEFORE GOVT. ENGINEER

(By Associated Press)

CINCINNATI, Ohio, July 25.—Coal by direct water route from West Virginia and Kentucky to Chicago and the northwest and ore from the Lake Superior region by direct water route to the Ohio valley states is the main argument presented to the board of engineers in Washington which now has before it the plans for the building of a barge canal from Toledo to Defiance, Ohio, from Defiance to Chicago via Fort Wayne and from Defiance to Cincinnati.

At the same time the appropriations have been made and work has begun on the improvement of the Illinois river which is the connecting link from the Chicago drainage canal to the Mississippi river. When this improvement is completed there will be a through deep waterway from the Great Lakes to the Gulf of Mexico.

Between the eastern waterway from Buffalo to New York and the western one from Chicago to New Orleans the central waterway line advocates desire a through waterway from Toledo through Cincinnati to New Orleans and give the whole Ohio valley an outlet to the gulf and to the Great Lakes.

[illegible] some sections though held back by [illegible] costs. Demand for farm help is below normal. Retail business is very fair. A sentiment of hopefulness prevails.

IDAHO—Improved conditions in mining, agriculture, highway work and seasonal activities have reduced unemployment. Building is conservative.

NEVADA—The employment situation is improved. A fair amount of building is planned. Improvement in the railroad situation is looked for within the next few weeks.

ARIZONA—Building and highway construction are picking up, while agriculture is expected to absorb a labor surplus. On the other hand, mining and allied industries show no improvement.

MONTANA—Part time mines are affected, some relief, though no marked improvement on this line is expected for three months. Building is picking up. There is some activity in lumber and public works. The supply of farm labor is ample. Ranchers show little change.

Everything for QUALITY
—nothing for show

THAT'S OUR IDEA in making CAMELS—the Quality Cigarette.

Why, just buy Camels and look at the package! It's the best packing science has devised to keep cigarettes fresh and full flavored for your taste. Heavy paper outside—secure foil wrapping inside and the revenue stamp over the end to seal the package and keep it air-tight.

And note this! There's nothing flashy about the Camel package. No extra wrappings that do not improve the smoke. Not a cent of needless expense that must come out of the quality of the tobacco.

Camels wonderful and exclusive Quality wins on merit alone.

Because, men smoke Camels who want the taste and fragrance of the finest tobaccos, expertly blended. Men smoke Camels for Camels smooth refreshing mildness and their freedom from cigaretty aftertaste.

Camels are made for men who think for themselves.

Camel
