## COMMITTEE HAS REDOUBLED ITS FIGHT ON S. P.

[illegible] members of the Citizens' Committee of Tonopah, in view of the success being waged against the Southern Pacific [illegible] service, redoubled their efforts today in preparing for the coming demonstration before the public service commission of Nevada, in hearing which is scheduled for next Friday morning.

Petitions are still in circulation throughout the various communities in the Nye and Esmeralda counties, and in Nye county alone it is believed that fifty good signatures will be obtained. A petition was received this morning from Manhattan, containing 98 names, which had been circulated by William McClure, editor of the Magnet. Others will be received from outlying districts before tomorrow night, and it is expected that this part of the work connected by that time.

Nearly every business man, as well as mining company in this district will prepare briefs showing the great losses that would be suffered by them in the event tri-weekly train service was established by the Southern Pacific and when the hearing is held on Friday the towns that would be affected should the petition of the Southern Pacific be granted, the protestants will be fortified with an array of evidence that should cause the public service commission to promptly reject the proposition of allowing only three trains a week.

While the San Francisco Chamber of Commerce has informed the Citizens' Committee of Tonopah that the Southern Pacific officials have agreed to reconsider the matter, the people of Southern Nevada do not propose to be found asleep at the switch. On the other hand, they are loading up with ammunition and purpose being prepared for a bombardment at the appointed hour. Every person interested in the welfare of southern Nevada should keep everlastingly at it and assist in preparing a case that will be incontrovertible. More money is needed to finance this fight and everyone is urged to assist in every way possible.

A limited expense account will be kept by the executive members of the Citizens' Committee of Tonopah and when the delegation returns from Carson City, following the hearing on Friday, the same will be published.

## 8000 WORKERS IN OIL FIELDS OUT ON STRIKE

(By Associated Press)

BAKERSFIELD, Cal., Sept. 12.—Eight thousand oil workers in the fields of the San Joaquin valley struck last midnight, said H. Fred Scott, president of the union. The strike is the culmination of the operators' refusal to sign agreements with the union. Practically all oil producers except the Standard and Shell companies refused to have shut down their leases.

Operators estimated that monthly production of nine thousand barrels of petroleum will be affected by the strike. There was no strike against the Standard which doesn't recognize the union nor the Shell, which signed the memorandum of the union providing a cut of $1 a day for all laborers. Workers in northern and southern California fields have not been called to strike, action being deferred pending developments locally.

## ZEB KENDALL BUYS HORNSILVER GROUP

Sol Camp and J. L. Patrick have taken over the Jack and Jack No. 1 claims at Hornsilver for Zeb Kendall, William Walters and associates. The claims are said to be on the western extension of the State Line vein. An option on the claims was obtained from J. W. Crane, the owner, by W. Borchording and Martin Duffy of Goldfield, and they turned the option to Patrick and Camp. The deed has been placed in escrow and a substantial payment was made Saturday.

These two claims are 2½ miles northwest of Hornsilver, near the old Jack Lee mill, and they are thought to be on the western extension of the State Line vein. The vein is 3 to 5 feet wide and is traceable through the two claims. There is a remarkable outcrop of high-grade silver-gold ore near the junction of the claims. At this point samples taken along the strike of the vein for 50 feet, representing the characteristic ore in the deposit, gave assays as follows: $213.20, $279.52, $152 and $277.10. These samples were taken by A. Borchording, J. P. Sweeney, Sol Camp and J. W. Crane. All of these samples assay about $19 in gold.

The vein is a contact, with granite on the footwall and limestone on the hanging-wall, and it is plainly defined on the surface.

Kendall plans to start work immediately in sinking a shaft on the vein.—Tribune.

It is estimated that the expenses that will be incurred will total between $900 and $1000, so if you are called upon to assist in this just cause, open up your pocketbook and do your bit.

The response with which the finance committee has met has been most gratifying and if you have not been called upon, take up one of the subscription lists and give whatever you can to the cause.
