MINES AND MINING STOCKS

SUPERIOR AND ALLOUEZ TO ENTER DIVIDEND LIST NEXT

LARGER TONNAGE WILL BE SENT TO MILL BY BOTH SUBSIDIARIES.

The next Calumet & Hecla subsidiary mine to enter the dividend list will be Superior, and later Allouez, says Editor J. H. Wilson of the Native Copper Times. The Superior is now earning good money, and with stamping at Point Mills, the results will be much better, and we understand Superior rock commenced Monday going to the mills of the Lake Milling, Smelting & Refining company, and a larger tonnage, which will materially swell the earnings. The Superior will likely be sending a sufficient tonnage of rock to mill, to assure a product of around 8,000,000 pounds per annum, and this with a fair price for copper will give earnings of about $4.00 per share, which will be doing pretty well for a new mine.

The Allouez, too, is sending an increased tonnage to mill, and when the No. 2 Tamarack mill is overhauled and put in shape for economical duty, with possibly an addition later, rock from Allouez and Centennial will go to this mill, and that will help some in lowering the costs a quarter of a cent per pound and is worth while.

Isle Royale.

The announcement last week that the directors of the Isle Royale Consolidated had declared the initial dividend of $1 per share, was well received on the lake, as it means other dividends to follow, and whether quarterly or semi-annually will depend a great deal upon the price of the pound of copper.

Conditions at the Isle Royale, underground, are satisfactory, and promise well for the future of the mine. The Isle Royale's entering the dividend list comes as the result of an able management—a management that are in the business of producing copper at the lowest possible cost and a management who understand their business—and the passing of the Bigelow-Hyams branch has proven a good thing for the district, and in more ways than one.

Much work was done during 1912 in the interest of the future of this property, in the increase of available ground reserves, and arrangements for increased stamping capacity, in the company's taking a stock interest in the Lake Milling, Smelting & Refining company's plant at Point Mills, which will admit of the use of two additional heads, and with the three heads in the Isle Royale mill and the two at Point Mills, and the production will foot up around 12,500,000 pounds of copper, as each head can be relied upon with reliability, or in the past, for a production of 2,500,000 pounds. No. 7 shaft is also being carefully sinking and raising, so that it will not be very long before this shaft, which is south of No. 6, will be in position to take up the stretches of rich ground in that quarter, and admit of making large additions to the resources of the mine—in ground ready for stoping.

The success of Isle Royale will not only prove of great advantage to the county seat town, but of vast importance to the copper field, and will help in assuring the future of the Lake Copper district, and The Times congratulates the management, the stockholders, and all Lake people on the addition of another mine to the list of dividend payers.

BROKERS' GOSSIP

Calumet & Arizona.

The combined production of Calumet & Arizona and Superior & Pittsburg for January was 4,726,000 pounds of finished copper.

Heavy Sales of Metal.

It is estimated that since last Friday, when price of copper metal was reduced to 17 cents, the total sales by the three leading producing companies aggregate approximately 75,000,000 pounds, while the buying has been general for nearby deliveries. The domestic consumers have taken the bulk of the offerings.

The Montezuma Tract.

It is stated on the authority of one who is in a position to know that the reports of the Calumet & Hecla engineers upon which the Montezuma purchase was negotiated estimated some 60,000,000 pounds of copper net in the property to a depth of 500 feet on the vein. This figuring is said to have been made on the basis upon which Isle Royale was to have been taken into the merger—about 12½ pounds copper to the ton.

There are said to be net values in copper in the property of nearly 40 times the purchase price—$1,600,000—and it is asserted that the property adds more to the Isle Royale's assets than the purchase of the Hussey Howe property some years ago for four times the price. The Montezuma is to be paid for in four annual installments of $25,000 each.

Superior & Boston.

Globe, Ariz.—Superior & Boston has considerably in excess of 75 feet of commercial ore in the raise that is now about 250 feet above the southeasterly drift on the 800-foot level. While the raise has been in ore from the beginning, it has been averaging as high as 9 per cent in copper for more than the last 70 feet. The ore is glance and the average width of the shoot is about 7 feet, partly mined and partly exposed by drilling towards the hanging wall. It appears that the ore is dipping from the raise southeasterly under Quo Vadis hill. This will necessitate drifting in that direction on the 800 and 1,000-foot levels to explore the ore body beneath the hill. In the southeast drift on the 800-foot level the showing is so encouraging that it is certain the 1,000-foot level will be driven ahead very soon.

The mine has been shipping excellent ore to the Old Dominion smelter at the rate of five carloads weekly, and as soon as the raise has established connection between the 800 and 600-foot levels the shipments can be increased to a carload daily. If the ore continues above the 600-foot level the shipments can be still further increased to two carloads daily.—News Bureau.

HOUGHTON, MICHIGAN.

STOCKS

Boston, Feb. 18.—The markets opened this morning rather stronger than last night's prices indicated would happen. The fact that European advices and tone of the continental markets were quite cheerful accounted for it.

A good deal of forced selling took place but for the first time in this long decline new buying appeared and in good sized volume. Bargain hunters with cash orders turned up and furnished a real market to sell on.—L. J. Sturgis.

CURB STOCKS.

J. A. Minnear & Co. say today:—

The markets were erratic and nervous all day, though, however, prices were better all around, and it can even be said stocks were strong. It is generally felt that the Balkan situation will be cleared up in the next few days, and this, together with the developments overnight in Mexico, helped to restore confidence to a great extent. Calumet and Arizona declared a regular quarterly dividend of $1.25 payable Mar. 24, to stock of record Mar. 7. It is also reported C. & A. will take over American-Saginaw on a basis of 6¼ for 1 and that the circulars announcing the plans will be mailed American stockholders tonight. Further, the 800 shares of C. & A. in American treasury, will be distributed to American stockholders. For investors, some of these coppers at these prices are winners.

COPPER.

A man who through his connections abroad is particularly well qualified to speak on the metal situation, is quoted by Thompson, Towle & Co., as follows:

"As a result of the trying European conditions which have existed during the past six months, the Balkan war severely affecting business, the peace of Europe threatened, and with high money rates in force on both sides of the Atlantic, it is not at all surprising that the copper market has been depressed.

"During this period consumers have refrained from taking on any quantity of the metal. As a result of this holding-off policy abroad, the American consumer has also withheld from purchasing, believing that the metal can be obtained at lower figures. During the past seven months, or from July, 1912, the world's visible copper stock has increased 70,000,000 pounds. The invisible supply, however, namely, the stocks in manufacturers' hands, in this period has drawn up heavily.

"From the information I receive from abroad, the copper consumers are carrying little or no metal on their shelves and it would seem that they must buy heavily in the near future. I believe that had the war not taken place, we would not have seen conditions in the copper market such as exist today, but that instead of an increase in the world's visible supply this copper would have passed into the hands of the consumer.

"With the settlement of the political situation in Europe and peace actually declared, the Balkan war concluded and a general European conflict averted, I believe the metal situation will rapidly adjust itself."

NEVADA CONSOLIDATED.

The conditions surrounding the Nevada during the last quarter of 1912 were very similar to those at the Utah Copper, which are commented on below. That, in spite of these, the actual receipts were within $43,000 of dividend requirements is really very satisfactory.

The strong treasury position of Nevada is especially worthy of attention. This company, at the end of the year, has quick assets amounting to $4,114,000, against current liabilities of about $900,000, or a net working capital of $3,200,000. This alone is equivalent to $1.50 per share.

CANS GREATEST LIGHTWEIGHT.

Britt Believes Richie Will Soon Grow Out of His Class.

Joe Cans and George Lavigne were the two greatest lightweights that ever lived, in the opinion of Jimmy Britt, former lightweight champion.

"I believe that Cans in his best day could beat any of the present day fighters," says Britt, "simply because he knew how. He had everything that a great fighter ought to have and when he was dying with consumption he went in and made wonderful fights. He knew how, for he studied the game.

"Lavigne was a two-handed fighter and always dangerous, and his gameness was a thorough as I ever saw. Cans and Levigne were to my mind the most wonderful that ever stepped into a ring as a lightweight.

"I do not think Richie will be a lightweight very long, because he is a big boy and will grow very fast. Richie should be a champion as long as he can make the weight, because he is a tough boy to beat."

Daily weather maps of the United States weather bureau are now printed in 58 cities. The combined annual edition exceeds [illegible] copies.

UPPER PENINSULA

Contractor Sues for $5,000—

Robert Rick, a Menominee contractor, has filed suit for $5,000 in the circuit court of Menominee county against the Menominee & Marinette Light and Traction company. He alleges the amount is due him for concrete, stone and labor furnished in the construction of the company's power dam at Grand Rapids, on the Menominee river.

Cow Is Found in a House—

A valuable cow, owned by Joseph Kinney, disappeared at Quinnesec recently, and all efforts to find it proved futile. After searching for a full week, hopes were abandoned. Finally, O. B. Pegg noticed a cow that was looking at the landscape from the upper story of a vacant house, where some hay was stored. Investigation proved it to be the lost animal, which now makes no objection to her residence in a one-story, warm barn building.

Railroad Man Gets Big Job—

P. C. Hart, formerly agent for the St. Paul railroad at Republic, has been made general superintendent of all the lines east of the Missouri river. His headquarters are in Chicago. It was as operator in the Green Bay office of N. S. Kimball, then master mechanic for the Milwaukee & Northern road, that Mr. Hart began work in 1888. His first promotion was to the position of chief clerk in the office of Division Superintendent H. M. Bell. He remained there until 1894 and was sent to Republic as agent. He has been promoted several times since.

Librarian to Wed School Head—

Miss Wilhelmina Van der Hagen, librarian at the Escanaba Carnegie public library, has filed her resignation, to take effect March 15. Miss Van der Hagen announced to the board her coming marriage to Prof. George P. Edmonds, superintendent of the public schools in Manistique, offering that fact as the reason for her decision to give up her post. The resignation of Miss Van der Hagen has been accepted with regret. The board has a number of applications on file for the position of librarian and it is thought it will be possible to fill the vacancy within the time limit offered. Miss Van der Hagen has been in Escanaba since early last summer, and her work has been eminently satisfactory. The date for the coming marriage has not yet been announced. The bridegroom-to-be formerly served as principal of the Escanaba high school and has many friends in the city.

Iron Mountain Free From Crime—

Mayor R. L. Hammond, of Iron Mountain, writes: "The crime wave that swept the range from Escanaba to Iron River two weeks ago has passed and Iron Mountain is the only city or town that has not reported from two to seventeen robberies. Our neighbor, Norway, reported seven. When reports first reached this city that an organized band was looting this territory, I made the assertion to dozens of citizens that Iron Mountain was immune and would be given a wide birth. The result has born our my confidence in our police force. Not a robbery was committed here, and we are the dumping ground for north, east and west. Here is the record for ten days: Escanaba, seventeen robberies; Norway, seven; Niagara, two; Crystal Falls, four; Iron River, three; Stambaugh, two. No citizen of this city had a gun shoved into his face in the night, as happened to some of our neighbors. Still there are some people who would criticize our police."

Menominee Couple Plan Long Tour—

Mr. and Mrs. John Henes, Sr., of Menominee will depart on Friday, Feb. 21, for an extended and interesting trip to the Panama canal zone and numerous points in the Carribbean. They will be absent about six weeks. Mr. and Mrs. Henes will sail from New York Feb. 25, on the steamer Moltke, of the Hamburg-American line, for Havana, their itinerary being as follows: Havana to San Juan, Porto Rico; San Juan to Kingston, Jamaica; Kingston to Colon, Panama, where the canal will be viewed; Colon to La Guyare, Venezuela; La Guyera to Caracas; Caracas to Port of Spain, Trinidad; Port of Spain to Bridgetown, Barbados; Bridgetown to Fort de France, Martinique; Fort de France to St. Pierre, Martinique; St. Pierre to Charlotte Amalie, St. Thomas; St. Thomas to the Bermudas, and thence back to New York and Menominee. At Fort de France the travelers will view the ruins occasioned by the horrible earthquake of several years ago, in which thousands lost their lives. At the time of the disturbance, peculiarly enough, a liner of the Hamburg-American company was lying in the harbor and its passengers saw part of the spectable.

BATTLE IS OVER; HUERTA IS CHIEF

Continued From Page One.

choose whether he would send his resignation in the regular channel to Congress, or be expelled from the country. Huerta declared he would deliver the position to anybody who was legally named.

Special Elections Soon.

It is understood special elections will be called at an early date to select a successor to Madero. Meanwhile Huerta has assumed the post of governor-general and has appointed Blanquet military commander. All this was done without the agreement and knowledge of Felix Diaz, Huerta taking his word ten days ago he was not fighting for personal ambition, but merely for the removal of Madero.

The world's principal jade mine is in Burma, where the privilege of mining the stone has been in the possession of one Indian tribe for many generations.

In the densest parts of the country there are 740 persons to the acre. New York has 1,000 in the same area.
