THE MORNING HERALD

BY E. W. HARRIS & SON.

Entered at the postoffice at Greenville, Texas, as second-class mail matter.

Tuesday, Sept. 20, 1910.

This good year will be remembered in Greenville as the era of concrete sidewalk building.

Help to make Hunt county's exhibit at the Dallas fair something notable and representative of our resources and possibilities by contributing some choice specimens of your products.

The building of electric street car systems usually mark the transition of communities from the "town" class into the "city" group. Greenville is now crossing the dividing line for which many have worked and waited long.

It is now generally accepted as a fact that the saloon does not help any business except that of the coroner and the coffin maker. It will be up to the people of Texas next year to sweep the state clear of the whole liquor traffic.

Mr. Roosevelt has been doing some wholesome preaching of late and his doctrine is fine, but Mr. Bryan was a voice crying in the Wilderness on the same lines some ten or fifteen years ahead of the great hunter. But mighty truths can not be too often repeated.

Up in Illinois the Democrats have renominated a man for the legislature who stands charged by indictment with having bribed other members to vote for a Republican millionaire for United States Senator. Illinois politics is on a low and dirty plane.

Caleb powers, eight years in jail and twice convicted as an accomplice in the assassination of a governor of Kentucky and finally pardoned, has been nominated by the Republicans of his district for congress. Political vindictiveness always comes high, but hell is about the highest price ever paid in this country.

"There isn't a saloon or brewery interest in Texas that does not long for a resultant of satisfaction and for "peace and rest."—Greenville Herald. * * * That's one reason the cry for "peace and rest" was begun in Texas.—Bonham News. * * * And that's the reason why there will be no "peace and rest" in Texas.

The nomination of a decent man for governor of New Jersey is one of the few bright spots to the credit of the criminal wealth that for years has perverted its citizenship of taxation by chartering large lines for charters the very character of predatory corporation to prey upon the rest of the country. New Jersey is the shame of the union of states.

The work and voice of the 16 senators in the third special session of the Thirty-fifth Legislature that defeated wholesome legislation restricting the activity of the saloon in politics will remain forever the crowning legislative infamy that has so far disgraced Texas. Such a result could only have been accomplished by a combination of money and an unholy political alliance.

"The Automobile as a Menace" is the title of an editorial from Home and State, published on this page. While there is much good food for thought in the article we do not believe that the facts at all warrant the statement that "the great majority in order to make the first payment have mortgaged their homes." Occasionally some one may be so foolish as to do this, but in the great majority of cases these machines have been paid for in cash by those who personally are financially able to own them. However, this does not change the condition which is working a hardship upon those who need financial assistance in the conduct of their business. The automobile may fairly be classed as a luxury and the withdrawal of forty or fifty million dollars from the state heretofore used in business is to say the least rather startling.

THE AUTOMOBILE MENACE.

Home and State: "You may not have stopped to think about it, but the automobile is today threatening to upset financial conditions in this country as does no other single factor. The nation has gone mad over them. Bankers are becoming panic stricken as they view the holes made in "cash on hand" that is going out to Northern manufacturers never to return. For the manufacturers demand the cash, and the local seller is allowing only a small commission on each sale. Very few are able to pay down cash, the great majority in order to make the first payment have mortgaged their homes. There are thousands such mortgaged homes in Texas today. The local banker has discounted the paper and the cash—and the cash is what talks—goes North to the manufacturer. His supply thus reduced is undeniable to help the local legitimate business men to properly finance the business. Money becomes "tight," and business slows up. Meanwhile the man with the mortgage on his home, instead of spending his money as formerly, is in most instances forced to exercise the most rigid economy, to meet his notes and repay bills. At the end of three years, if he is so fortunate as to still have his home, he finds that the several thousand dollars he has put into his machine simply stands for more or less junk. But during the three years that it has taken the two or three hundred thousand owners of automobiles to find this out, financial conditions grow worse. Texas has spent $18,000,000 for "cars" and $15,000,000 for their upkeep, a total that if put into railroads in Texas or interurban lines would have added millions of dollars to the permanent wealth of the State, and made life for its inhabitants easier.

The fact is that the average "car" owner if put into a farm or city home would be sooner or later a wealth producer instead of a poor farm filler. It is well that the bankers are taking the stand they are. Senator Aldrich's rubber trust declared a dividend of 18.2 per cent recently, largely due to the automobile, and helping the tariff downward (?). It is but a question of time until this industry will be found to sink of its own weight; then look out."

The following, from an exchange, is worthy of all appreciation: "Would it not be a very poor specimen of a man who would wish or pray for an easy job where he would have no responsibility, no job no danger and not be forced to exercise his powers of body or mind? No one who has really faced the storm could have respect for a poor creature who crave of a job that would not require half his powers. The man who is worth while takes the job that is given him and if it is a hard one prays not that the work may be made lighter, but that he may be given the strength to conquer. And he usually is given the power if his faith is strong enough.

The following from the Bonham News states the facts in the case: "There isn't a paper in the country that favors the interests that have free domination Roosevelt as they denounced Bryan in 1896, 1900 and 1908. Roosevelt is now advocating many of the things that Bryan has advocated. The organs of the favored ones haven't changed, but it is gratifying to see that people opinion has so changed that the friends of the people in both parties now support the things that make for the people's good. Roosevelt is to be congratulated that the very people are now calling him a commoner who called Bryan an anarchist in 1896. Roosevelt has progressed, that—in his teachings at least."

DANGER IN DELAY.

Kidney Diseases Are Too Dangerous For Greenville People to Neglect.

The great danger of kidney troubles is that they get a firm hold before the sufferer recognizes them. Health is gradually undermined. Backache, headache, nervousness, languor, sleeplessness, dizziness, urinary troubles disorder, diabetes and Bright's disease follow in merciless succession from neglected kidneys. Cure the kidneys with the device and safe remedy, Doan's Kidney Pills, which has cured people right here in Greenville.

J. A. Taylor, farmer, of Greenville, Texas, says: "I believe that if it were not for Doan's Kidney Pills, I would not be alive today. My kidneys were badly disordered and I had to get out of bed five or six times during the night to pass the kidney secretions. My back ached most of the time and though I tried all kinds of medicines and consulted physicians, I received no relief. I finally saw Doan's Kidney Pills recommended by a Greenville citizen and concluding to try them, I procured a box at Ford & Pennington's Drug Store. They removed the remedy and I continued taking them until my trouble was dispelled. I am pleased to recommend Doan's Kidney Pills to other kidney sufferers."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

Now if these goods aren't first-class, our merchants here are brought to task. If short on cash, it's a dead cinch; to our home merchants we run in a pinch. Buy MONOGRAM flour and be at ease.

The kind "Booster Woman" expresses good business practice which will benefit all Greenville people and her industries. MONOGRAM flour is alright.

U. B. A. CLASS INITIATION

One Hundred and Forty-Two New Applications.

In the near future, perhaps not so far, a class initiation into the Knights of Pythias Lodge No. 171, U. B. A. One hundred and forty-two new applications for membership have been passed to date and this list will be swelled increased during the next few weeks through the energetic management of Major E. T. Clements, the live wire chancellor.

At the fifteenth annual session of the Supreme Lodge a new ritual was adopted. This new ritual will be rendered in detail at the class initiation.

The services of an experienced ritualistic man have been secured for the Greenville degree team. A banquet will be one of the features of the occasion. All of the Supreme Lodge officers will be present on this occasion.
