No. 1 'Super Phosphate of Lime.'
VERSUS "GUANO."
THIS valuable fertilizer has been used for several years in England and other parts of Europe, and next to guano holds the highest rank in popularity and the extent to which it is used among Farmers. Its introduction in this country by the subscriber has been more recent, but the progress it has made in the estimation of the public has not been less marked or successful than abroad, after a full trial of three years investigation of its merits, in which time there has been very many scrupulous experiments made by the most scientific agriculturists and various Clubs, Committees, &c., side by side Peruvian Guano, as to its relative value compared with the latter, and in most instances a preference given to the "Super Phosphate of Lime." Such reports are returned will shortly be placed before the public, which will convey more information than the subscriber feels disposed to offer, as the manufacturer, at the present moment.
Its chemical composition is of that nature to at once afford food and nourishment to growth of all descriptions, its basis being crushed or ground "*Bones*," the efficacy of which as a manure is already well known and appreciated, which are decomposed by the addition of one fifth their weight of Sulphuric Acid, to which is added a due proportion of Guano and Sulphate of Ammonia; the latter is one of the most efficient agents in the best Peruvian Guano.—It is easy handled, being in a perfect powder; it will be found suitable to all soils, warranted pure and genuine, and when at maturity to be found as efficacious as here represented.
