Six Inside Points on Clothing For You.

1st. Our Clothing is made to our order; made as we know good clothing should be made.

2d. Consequently it has some special features of our own worked in.

3rd. Not "How Cheap," but "How Good" is our motto.

4th. No imitation of foreign fashion but ade on the lines favored by practical business men of the country.

5th. No passing fads—but all the new styles.

6th. If this suits your ideas our Suits will suit you.

Watchmaker, Manufacturing Jeweler and Graduate Optician.
10 S. Palafox Street, Pensacola, Fla.

TERSELY TOLD.

Prayer meeting will be held in Palafox M. E. church this evening at 7:30.

Judge Beggs, who is among the yellow fever refugees, is registered at the Tulane Hotel, Nashville.

A special meeting of the Board of Public Works will be held at noon today, having been called by Mayor Bliss.

Marion Quina returned yesterday afternoon after an absence of several weeks, spent in Missouri and North Carolina.

Today will be pay day with the numerous city employees, and checks for service during the past fifteen days will be signed and distributed among the men.

The regular session of the Board of Public Safety has been called for this afternoon at 3 o'clock. There is but little business to be transacted except routine affairs.

Among those who departed yesterday for the detention camp were David Bear, Max Kahn and Dr. Stevens. All will go to southern cities as soon as released.

If your wife is a victim of "to much kitchen," advertise for a cook and let her slip her neck out of the collar. The Journal's want ads. will straighten out matters for you. Try for yourself.

The Journal has a large number of old newspapers which it would like to dispose of at five cents a hundred. These papers are all clean, whole, and tied up in bundles, convenient for carrying. They are just the thing for wrapping or packing purposes, and for putting under matting. Of course, The Journal will not deliver these papers, they must be called for and paid for in advance.

Alderman Sol. Cahn will go to the detention camp today to speak with members of his family before departure for Alabama. Of course he is not allowed to go into the camp, but can remain on the outside and speak with his family. Mrs. Cahn and children, as well as other members of the party who went with them, will leave the camp tomorrow for Montgomery.

The whole family share the pleasure when you use the Blue Ribbon Lemon and Vanilla Extracts. Nothing touches the exact spot like the "Blue Ribbon Flavor."

RELAY AT GRAND BAY REMOVED SOUTH BOUND

The New Orleans Picayune of yesterday says: The Louisville & Nashville Railroad will today begin to run its No. 3 passenger train through to New Orleans instead of relaying at Grand Bay. No. 3 reaches New Orleans at 9:40, and hence it passes Grand Bay at 5:30 o'clock in the morning. The relaying at Grand Bay has, therefore, caused great inconvenience, which will be entirely relieved by the new working arrangement. This change applies to incoming trains. Outgoing trains have not yet been relieved of the necessity of relaying at the point mentioned.

Funeral of George Byrnes.

The funeral of George A. Byrnes, son of M. F. Byrnes, who died yesterday of yellow fever, will occur this afternoon at 3 o'clock. The services will be conducted at St. Michael's church, and the interment will be made in St. Michael's cemetery.

FIFTH ATLANTIC CABLE OF THE POSTAL

Immense Task Completed on October 6—Description of the Great Work.

The Commercial Cable Company's fifth Atlantic cable from Canso, Nova Scotia, to Waterville, Ireland, was completed and put in operation on Oct. 6th. This makes seven Trans-Atlantic cables worked in direct connection with the lines of the Postal Telegraph Company. All of them are duplexed so that their combined capacity is fourteen messages at one time.

The new cable is the best and most expensive submarine cable ever laid. It was manufactured by the Telegraph Construction and Maintenance Company, of London, having been begun in March, 1905, and finished and shipped on board the Construction Company's steamer Colonial on August 3rd, 1905.

Atlantic cables are always laid from West to East, because the prevailing winds in the summer months on the Atlantic are from the West and ships make much better weather going Eastward consequently the Colonial sailed direct from England to America, arriving off the coast of Nova Scotia on August 16th, and landed the heavy shore end of the cable on the morning of August 18th. Moving out from shore she struck a rock and remained fast on it for four days. The injuries she sustained compelled her to go into the drydock at Halifax with 2300 miles of submarine cable aboard. She was the largest and heaviest ship ever taken on that drydock, exceeding by thousands of tons the United States battleship Indiana of ten thousand tons, which went into the drydock there a couple of years ago. Repairs were made and the Colonial took the sea again. On September 23rd she passed through a hurricane in Mid-Atlantic, although on that day on both sides of the Atlantic it was reported fine, with gentle winds. On October 3rd she arrived without mishap at a point 187 miles from the Coast of Ireland, where the final splice was to be made between the cable that she had paid out from the American side and the 187 miles of cable previously laid Westward from the Irish Coast by the Steamship Cambria in the month of June. The weather was heavy and the Colonial was compelled to heave to for several days waiting smoother seas to enable her to make the final splice, which was made on October 6th.

At some points the cable was laid at the depth of nearly three miles below the surface of the sea. The quantities of material used in the manufacture of the cable were 1,411-200 ponds of copper; 799,688 pounds of gutta percha; 1,500,000 pounds of brass tape, jute, yarn, iron wire and preservative compound.

The signalling speed of this cable is fifteen percent greater than that of any other cable of equal length in the Atlantic. The cost of the cable varied from one thousand dollars to six thousand dollars per mile, according to the character of the ocean bed and depth of water, the great variation in cost being due to the different diameter and weights of the sections of the cable, the cable which is laid in the deepest water being the lightest for the important reason that it would be impossible to retrieve a heavy cable from deep water because of the enormous pressure, cable in deep water is practically safe from mechanical injury and therefore does not need to be strong, so that the sections laid in deep water are of smaller diameter and lesser cost. The sections laid near shores are of massive construction and very expensive. In the neighborhood of the fishing grounds off the coast of New Foundland, a type of cable midway between deep water and shore cable is used. This intermediate size is made strong to resist injuries from the anchors of fishing craft, the most prolific source of danger to submarine cables. This intermediate type is made just heavy enough to afford reasonable prospect of retrieving it in the event of its being damaged by the anchor of a fishing vessel.

The completion of this cable increases so greatly our already large facilities for ocean cabling that no other company can now excel or even equal our cable service.

HORSEWHIPPING AT ST. AUGUSTINE

LIVELY ENCOUNTER BROUGHT ABOUT BY INCIDENT OF MANY YEARS AGO.

St. Augustine, Oct. 17.—Shortly after court adjourned yesterday a sensational incident took place in front of the court house, when Louis Mickler of Dieso attacked and severely horsewhipped Perry Green of Moultrie. Both men had attended the Osteen hearing, and when the two met outside Mickler pulled out a whip and lashed him victim terribly before he was finally stopped by outsiders.

It seems that Mickler had it in for Perry for an insulting letter the latter had written to Mickler's wife many years ago, and this was the first opportunity he had had for revenge.

After the thrashing both parties went in opposite directions unmolested.

The bottom layer of a box of Huyler's CANDIES brings forth as many delicious morsels and surprises as the top layer.

AS A MATTER OF PRECAUTION ALSO PROTECT YOURSELF AND FAMILY FROM THE MOSQUITOES AND YELLOW EVER.

AUTHORITY TO ENTER ANY HOUSE

Is Given State Health Officer Porter by Mayor Bliss—Correspondence Between Them.

Mayor Bliss, yesterday upon request of State Health Officer Porter, conferred upon that official the authority to enter any residence within the city.

This authority was asked for on account of the fact that the state health officer might desire to enter some residence where he suspected that yellow fever existed. The correspondence is as follows:

Dr. Porter's Letter.

Pensacola, Fla., Oct. 17, 1905.

Hon. Chas. H. Bliss, Mayor of the City of Pensacola, Pensacola, Fla.:

Dear Sir:—In order that cases of yellow fever which are unreported to the health authorities, of either the city or state, may be detected, authority is requested of you as mayor of the city of Pensacola for myself as state health officer, or for such of the assistants or special assistants of the state health officer as the state health officer may designate from time to time, to enter any house in the city of Pensacola for the purpose of examining and determining the character of any "fever" case which may be reported as "fever" or the existence of which may be suspected in such house and has not been so reported.

Very truly,
JOSEPH Y. PORTER,
State Health Officer.

The Mayor's Reply.

Dr. Joseph Y. Porter, State Health Officer, City:

Dear Sir:—Your letter of this date requesting authority to enter any house in Pensacola for the purpose of examining and determining the character of any fever is before me.

In reply I beg to say that I think you, as state health officer, under Section 796 of the State Laws, have a right to enter any place you may suspect of having yellow fever, and make an examination thereof. I think that you have this authority without any question whatever.

In addition to this I, as mayor of the city and as ex-officio chairman of the City Board of Health, hereby invest you with power to inspect any premises in which you may suspect fever to exist and to examine and determine the nature of same between the hours of 8 a. m. and 5 p. m. of any day.

I cannot give authority to enter at any other time, as our ordinances do not provide for it.

CHAS. H. BLISS, Mayor.

Mrs. Roger's Case Advanced.

Washington, Act. 17.—The case of Mrs. Mary M. Rogers, under sentence of death by a Vermont court on the charge of murdering her husband has been advanced by the Supreme Court of the United States and set for November 6 next.

CONTRIBUTION OF $50 FROM MILLVIEW

A check for fifty dollars was received yesterday towards the yellow fever relief fund. It came from the white employees at Millview of the mill there and will be of much assistance to those who are endeavoring to relieving the poor and worthy, but who are handicapped by the lack of funds. In fact the relief fund is now getting very low and the citizens and others who are able to do so should send in their contributions at once.

RACE OF THE U. S. CRUISERS

The New Orleans Picayune of yesterday has the following relative to the squadron that will escort President Roosevelt from that city to Washington:

It is announced from Washington that the squadron of armored cruisers which is to escort President Roosevelt from the mouth of the Mississippi River to the Virginia capes has started South under command of Rear Admiral Brownson, and ought to reach the mouth of the river long before the President is ready to board the flagship West Virginia. It is probable that only the flagship will come as far as the Louisiana coast, the other vessels of the squadron awaiting her return at Key West, many hundred miles distant from any possible attack by the festive stegomyia fasciata.

The cruiser West Virginia will, of course not come up the river, the announced reason, namely the lack of sufficient water is, of course, not the true reason, as there is ample water for an even larger ship than any of our armored cruisers. It is probable that the true cause is a desire to prevent any possibility of contagion getting aboard the ship. While we of New Orleans understand how unnecessary such a precaution is at this period of the season, the action of the ship is not unreasonable, considering the exaggerated ideas that prevail elsewhere with respect to local conditions.

After President Roosevelt has been taken aboard at the mouth of the river and the West Virginia has joined her consorts at Key West and taken in coal, the race at full speed up the coast will commence and will not end until Hampton Roads is reached.

These armored cruisers are known to have a speed of as much as 23 knots on spurts, and the President is anxious to see whether they can approximate their trial records under service conditions. Ordinarily warships seldom equal their trial speeds but as there was no special premium for extra speed in the case of the armored cruisers, it is possible that their true service speed more closely approximates their official trial speed than was the case with the earlier ships.

House Work

Need Not Wear Her Out

The drudgery of house work seems never ending to tired-out, dispirited women who suffer from female complaints or irregularities. Inflammation and ulceration of the womb and ovaries cause fearful bearing down pains which are aggravated by much standing on the feet, and lifting necessary in house work.

But let no woman despair of relief from this torture. That famous tonic reconstructor of diseased or disordered female organism,

Lydia E. Pinkham's Vegetable Compound

has cured more than one million American Women, and it will cure you. When monthly periods are painful or irregular, when backaches and headaches drive out all ambition, Lydia E. Pinkham's Vegetable Compound will bring back health, strength, and happiness.

It Gave Me New Life and Vigor

DEAR MRS. PINKHAM:—Last spring, while we were moving, I did considerable more work than my strength permitted, and, having mental trouble at the same time, my health broke down completely and I found myself unable to rest or eat. My nervous system became shattered and I was pale and emaciated and had to take to my bed.

My sister advised me to try Lydia E. Pinkham's Vegetable Compound, and, although I had no faith in patent medicines, I was so miserable that I would take anything for relief, I found that it made a complete change for the better, inducing appetite and restful sleep and imparting new life and vigor to my entire system.

I gained nearly fourteen pounds, my complexion looked fresh and clear, and my best friends were surprised and pleased at the change and could hardly credit the fact that Lydia E. Pinkham's Vegetable Compound had accomplished it.

HONORA LILLIAN HENRY.
