SPRINGFIELD, O.

SHERIFF'S PROCLAMATION.

To the qualified electors of Clark County, Ohio:

You are hereby notified that on the **Second Tuesday of October, A. D. 1885,** being the 13th day of said month, between the hours of 6 a. m. and 6 p. m. of said day, you shall meet at your general election districts in said county at the usual places of holding said election, or at such other places as the proper authorities shall direct, and proceed according to law to choose the following named officers, to wit:

One Governor of the state of Ohio.
One Lieutenant-Governor of the state of Ohio.
One Judge of the Supreme Court for the state of Ohio for the full term.
One Judge of the Supreme Court for the state of Ohio for the short term (to fill vacancy caused by the death of John W. Okey).
One Attorney General for the state of Ohio.
One Treasurer of State for the state of Ohio.
One member of the Board of Public Works for the state of Ohio.
One State Senator for the eleventh senatorial district.
One Judge of the Court of Common Pleas for the third subdivision of the second judicial district.
One Representative in the General Assembly of the state of Ohio for Clark County, Ohio.
One Surveyor for the County of Clark.
One County Commissioner for the County of Clark.
One Prosecuting Attorney for the County of Clark.
One Infirmary Director for the County of Clark.
One Coroner for the County of Clark.

You will also vote upon the question of amendments to Section 4, Article 10 and Section 2 of Article 2, Section 1 of Article 3 and Section 2 of Article 10 of the constitution of the state of Ohio.

And the trustees of the several townships, and the councilmen of the several wards of the city of Springfield, in said County of Clark, are hereby notified that the following number of jurors are apportioned to their townships and wards respectively, and that they are required to select the said number and make return thereof to the clerk of the Court of Common Pleas together with the poll books.

Springfield Township	18
Harmony Township	11
Moorefield Township	8
Madison Township	13
Bethel Township { Donnelsville Prec't, 5; Midway Precinct, 6; New Carlisle Prec't, 8; }	19
German Tp. { Lewisonville Prec't, 7; Tremont Prec'nct, 5; }	12

MAYOR'S PROCLAMATION!

To Whom it May Concern:

In accordance with the provision of the Revised Statutes of Ohio, Section 6943—All persons who sell or barter any spirituous wine or malt liquors, or being the keeper of a place where any such liquors are habitually sold and drank, fail on election day to keep the same closed shall be fined not more than one hundred dollars and imprisoned not more than ten days.

Now, therefore, as an election for State and County officers will be held in the City of Springfield, Ohio,

Tuesday, October 13, 1885,

I, JAMES P. GOODWIN, Mayor of said city, issue this Proclamation to warn all persons that the above law must be observed, and will be strictly enforced.

All persons mentioned in the above section shall keep their establishments constantly closed between the hours of 6 a. m. and 6 p. m. on the said 13th day of October, 1885.

And the City Marshal and police officers of said city are directed, to enforce this order, to close any such place found open, and report any such violation of the law forthwith.

JAMES P. GOODWIN,
MAYOR.

REPUBLICAN STATE TICKET.

Governor:
JOSEPH B. FORAKER,
Of Hamilton County.

Lieutenant Governor:
ROBERT P. KENNEDY,
Of Logan County.

Supreme Court Judge,
(Long Term)
THADDEUS A. MINSHALL,
Of Ross County.

Supreme Court Judge,
(Short Term)
WILLIAM T. SPEAR,
Of Trumbull Co.

State Treasurer:
JOHN C. BROWN,
Of Jefferson County.

Attorney General:
JACOB A. KOHLER,
Of Summit County.

Board of Public Works:
WELLS S. JONES,
Of Pike County.

Common Pleas Judge:
JOSEPH W. O'NEALL,
Of Warren County.

State Senator
THOMAS J. PRINGLE,
Of Clark County.

CLARK COUNTY REPUBLICAN TICKET.

Representative:
GEO. C. RAWLINS.

Prosecuting Attorney:
WALTER L. WEAVER.

County Commissioner:
DOUGLASS W. RAWLINGS.

County Surveyor:
WILLIAM SHARON.

County Coroner:
JAMES M. BENNETT.

Infirmary Director:
JAMES BUFORD.

Tomorrow will be the day for the work that counts.

Even Chicago griffins are bigger than any other kind.

Hoadly has kept faith with nobody. Spot him, tomorrow.

One can now be cremated for $25. That is more than dirt cheap.

English dudes now affect to speak the United States language in London.

Ohio should send the right kind of greetings to New York, tomorrow. And she will!

"Call me early, mother, dear!" should be the young republican's evening song, tonight.

Browning is at work on a new poem. Now we shall need an annex to the dictionary.

Let the Hoadly-Leonard conspiracy be rebuked and beaten and broken in pieces, tomorrow.

George William Curtis, now that he has returned to the republican party, reasons like a Plato.

Foraker knocked Hoadly out at Toledo, and then again at Cincinnati, and he will knock him out all over the state tomorrow.

Minneapolis produces more flour than any other city in the world. And better flour, too. This is what ails Minneapolis.

Hotel guests who kick against tips to waiters are apt to get the soup tipped on to them and their shins accidentally kicked.

The New York Sun speaks of the republican leader, Davenport, as an iceberg. It will certainly be a very cold day when he gets left.

All republicans should have an early breakfast tomorrow morning. Every man of them should be at the polls by a quarter of six, sharp.

The democrats are making a fight on Fitton (republican) at Hamilton. But their lies do not Fitton! They are a misfit and do not count.

The good, strong qualities of Foraker have been shown to greater and greater advantages, day by day, since the war opened. Vote for him, tomorrow.

It is said that John R. McLean is the owner of the Sun, Cincinnati, and that Warner M. Bateman is a large owner in the Post and is the editor of that sheet.

At Akron, Dr. Leonard "vindicated" his right to hold office, so we are told. Tomorrow's election will settle that matter. Should he be elected, nobody will object to his taking his seat.

Great interest is manifested by both democrats and republicans in New York state in the result of tomorrow's election in Ohio. Every republican should be brought to the polls, if he doesn't go without bringing.

The late Jumbo really lost his life in a heroic way in saving the life of another and smaller elephant. We know this because we have seen pictures in the papers of him doing it. As a matter of course, that settles it.

A democrat has been found in Indiana who is not a bigoted partisan and the president is urged to appoint him on the civil service commission. But a civil service commissioner who is not a bigoted partisan will not suit the bourbon boys. They want a man who will bounce a republican, wherever he can be found, irrespective of capacity or character.

The first proposed amendment (to Section 2 of the Constitution) to be voted for tomorrow, if adopted, will change the time for holding state elections from the second Tuesday in October to the first Tuesday after the first Monday in November. This should be adopted, as it will give us one instead of two elections in the fall of presidential years. The amendment to Section 1 is to make the terms of township officers three years instead of one. There are three proposed amendments, and they should all be voted for and adopted.

Good Men as Mischief-Makers.

A good, honest, sincere man does a great deal of harm when he goes wrong. Such a man, when he makes up what mind he has, to do something out of the ordinary way, and different from the thing that other good men are doing, usually jumps at once to the conclusion that because he is well meaning and conscientious, he is therefore right. And he is reinforced in this position by the strained inference that he is right because he is in the minority. His next leap is to the supposition that God and he have formed a copartnership and that the new firm can buck against and beat the world.

This last inference—so often made by people of this sort—is as monstrous as it is sacriligious and impious. God is not with any man except as that man is with him, and he has made no revelation—not even through St. John, of Kansas, or St. Leonard, of Springfield—as to which party he favors in the present Ohio campaign.

The man in the minority—no matter how well-meaning—is usually in the wrong. The average judgment of honest and sincere men in the mass, is better than the judgment of an individual, and when the individual assumes that he is right and the majority of other men are wrong, and that the Almighty is on his side, he may be sincere, and honest, and even pious, but he is an ass, all the same, and when he prances about, indiscriminately, and handles with his hoof—so to speak—such an edge tool as the ballot, he is capable of doing a great deal of mischief, and in ninety-nine cases out of a hundred, harms the cause he represents more than any other.

The Fastest Time on Record.

PITTSBURG, Pa., Oct. 10.—George H. Smith of this city, and H. M. Johnson, of Cincinnati, champion sprinter of America, ran 150 yards at Exposition Park today for a purse of $1,000 and the championship of America, Smith winning in 14¼ seconds which is the fastest time on record. The men got away together and ran even for one hundred yards when by a tremendous burst of speed Johnson went to the front, but being unable to maintain his gait he broke down a few yards from the goal, and Smith crossed the line a good winner, beating all previous records by a half second. Johnson's time was fifteen seconds.

HELL GATE EXPLOSION.

A PRELIMINARY EXAMINATION SHOWS SATISFACTORY RESULTS.

Facts and Figures Showing the Immensity of the Undertaking—A Comparison with the Work of Blasting Hallett's Point Ten Years Ago.

[From Morning Edition.]

NEW YORK, Oct. 11.—A large number of people visited the scene of yesterday's explosion at Hell Gate today and carried away mementoes of the occasion. The northern end of the reef still projects from the water at high tide, but the officer in charge declares the explosion a complete success. He says that the projecting portion was honey-combed preparatory when operation begun for removal. To a casual observer, however, it appears intact. If any further blasting should be necessary, the system of surface blasts will be resorted to.

The preliminary examination of the Hell Gate rocks, which were blown up yesterday, shows that the explosion was in every way satisfactorily, and the benefits resulting to the shipping interests of New York will be almost incalculable.

Flood Rock has long been a source of danger to navigators in the East river. It lay in the course of travel through Hell Gate channel from Long Island Sound, and but a small portion of it was visible above the surface of the water at all times. From this apex the rock stretched away under water, and its area was indicated by spar buoys. The strong current through Hell Gate when the tide was rising and falling made it a dangerous object to pilots and many vessels have in years past come to grief on its jagged ridge. By yesterday's explosion, a depth of about 26 feet at mean low water has been secured, and about nine acres of rock has been scattered about the river bed. These fragments will be removed with dredges.

The rock was 1,200 feet in length and 300 to 625 feet in breadth. This solid pyramid of rock has been tunneled by patient labor, the roof ten feet thick being kept up by over 450 stone pillars left standing. In the center, where the rock was highest, the chamber which was drilled out was forty feet below the surface, and about one acre in area. The hundreds of stone pillars were fifteen feet square and were drilled with deep holes pointing upwards and into each one of them was put about twenty pounds of a high explosive.

The roof, too, was similarly perforated and charged with dynamite. Altogether there were 13,286 of these perforations into the solid rock of the roof of this submarine cavern, aggregating in length, if they might be imagined as consecutive, about twenty-two miles. Into these holes 300,000 pounds of explosives were put.

The work of undermining the rock and drilling it full of holes was done with compressed air drills, and men and mules by the score have been at work here for several years removing the necessary 80,000 cubic yards of rock, in order at last to blow up the remaining 275,000 cubic yards.

While the work was in progress much difficulty was found in keeping the cavern from being flooded by the water, which found its way through the rocks from the river overhead, and pumps having a capacity of 4,000 gallons of water a minute have been busy returning to the tide above the water which stole through the fissures in the rock.

The first attempt to remove by explosions the obstructions in Hell Gate channel was about ten years ago when Hallett's Point was blown up.

An idea of the immensity of the present work can be obtained by comparing it with that at Hallett's Point. There the total length of galleries was 7,426 feet, against 21,670 in Flood Rock. In the former there were 173 piers, each 10 feet square; in the latter 467, each fifteen feet square. There 51,000 cubic yards of rock had to be removed; here there were 350,000 cubic yards taken away. In Hallett's reef 3,673 holes were drilled, in Flood rock there were 13,286, and while only 47,781 pounds of dynamite were used there, six times that amount was stowed away under the waters of Hell Gate.

THE DEAD CARDINAL.

Large Attendance at the High Mass—Funeral Arrangements to be Announced.

[From Morning Edition.]

NEW YORK, Oct. 11.—Many visitors came to Cardinal McCloskey's palace today, but outside of clergymen and members of the different religious orders, none were admitted. At the high mass in the Cathedral there was an unusually large attendance. The rosary for the dead was recited. At the conclusion of the mass, the remains of Cardinal McCloskey were removed from the bed room to the south part, on which they rested on a catafalque. He is dressed in his robes of office with mitre and all insigns of office, and shows no traces of his long illness. The office for the dead was chanted in the cathedral this afternoon. All the arrangements for the funeral will be announced tomorrow. In the various Catholic churches throughout the city today, prayers were offered for the dead Cardinal, and in many of the churches of other denominations fitting references were made to his decease.

A CITY DEBT.

A Number of Guarantors Held Responsible for the Interest.

CINCINNATI, Oct. 11.—It will be remembered that a year ago, when the city was in such sore financial straits that the banks forwarded $165,000 to the city, payment for which was guaranteed by eighteen prominent citizens. Of that sum $100,000 was advanced by a syndicate of banks, and $65,000 by the Fidelity Trust Company. Seventy thousand dollars has been repaid, leaving a balance still due of $95,000. This it is hoped will be paid in the not distant future. However, the interest on it still goes on, and yesterday each of the guarantors paid $275 as his share of the interest.

Of course justice and common courtesy demand that this money be repaid to the public spirited guarantors. It is plain that they should not be obliged to pay the interest on the city's debt.

CENTRAL BOOT AND SHOE STORE!

NO. 88 EAST MAIN STREET.

Our stock is now complete for fall and winter trade, consisting in part of Men's and Boys' Kip, Calf, Waterproof, Warm Lined Boots and Shoes and Rubber Boots, Arctics, &c. Dr. W. A. France, of New York.

The well known and successful specialist in

Chronic Diseases. Also Diseases of the Eye and Ear,

Will make his next visit to the Lagonda House, Springfield, Ohio, Wednesday and Thursday, October 14 and 15 TWO DAYS ONLY. The Doctor has been making periodical visits to Ohio for several years, which is the best possible proof of his success as a physician.

RETURN VISIT EVERY THIRTY DAYS.

Special attention to Female Diseases. Consultation and examination Free.

W. A. FRANCE OF NEW YORK,

Physician, Surgeon and Gynecologist. He makes Chronic Diseases and Diseases of the Eye and Ear a Specialty.

IT IS WELL KNOWN by all intelligent observers that it is impossible for any person, no matter how largely endowed by nature or acquirements, to become thoroughly conversant with all the divisions of the Science of Medicine. Nearly all who have obtained distinction in medicine have made some special department their life work, being fitted therefor by natural adaptation or selection, special education and experience. The Doctor, having devoted several years to the special study of this class of diseases in hospital and general practice, and having the most recent and improved instruments for finding out diseased conditions in the organs of the body, he proposes to devote the whole of his time to the practice of these specialties.

DR. FRANCE

will examine all who call upon him and tell them if they have an organic disease; where it is located, the organ or part affected, and the principal symptoms they experience,

And This Without Asking Questions.

He adopts the following plan, which is peculiar to the large hospitals, and is not and never has been the practice among country doctors, viz.: He carefully notes the symptoms of the patient, ascertains the condition of the internal organs, examines Eye, Ear and Throat by the most recent and improved instruments and methods, all of which he carefully records in his register for future references. In this way he ascertains the true nature of the disease and its cause. Knowing the disease, he knows the changes it produces in the tissues, and, knowing the changes, he checks them with specific remedies, and places the patient on the high road of recovery. When sick people consult him he readily tells them whether he can cure or help them, or if they are beyond hope.

The examinations are in accordance with anatomical and physical science, and he will convince the most skeptical. By an examination he will convince any one of the nature and extent of disease, amount of danger to life, and chance of a perfect cure. He only uses remedies from the vegetable kingdom, as his experience he has found remedies that will antidote every humor or poison in the system, and aid nature to cure every disease, if taken in time. Believing that science is truth, and "Truth is mighty and will prevail," when known, and knowing that diseases can be cured, with positive certainty, he invites the afflicted to call and receive advice free and be cured of their diseases.

There is no subject that requires so much study and experience as the treatment and cure of Chronic Diseases. The astonishing success and remarkable cures performed by him are due to the long study of the constitution of man, and the cure of disease by natural remedies. Let those given up by others call for examination. He has successfully treated the following diseases since his arrival in this State: Eye and Ear Diseases, Chronic Diarrhœa, Chronic Inflammation of the Womb, Chronic Inflammation of the Bladder, Painful or Irregular Menstruation, Fever Sores and Ulcers, Incontinence of Urine, Tape Worms, Crooked Limbs and Enlarged Joints, Spinal Curvature, Club Foot, Hip Joint Disease, White Swelling, Discharging Abscesses, Sterility or Barrenness, Nervousness and General Debility, Prostration and Impotence, Diseases of the Kidneys and Bladder, Leucorrhœa or Whites, Blotches and Pimples, Skin Diseases, Dyspepsia, Constipation, Dropsy, Cancer, Epileptic Fits, Erysipelas, Gravel, Gallstones, Gleet, Gonorrhœa, Hydrocele, Heart Disease, Liver Disease, Headache, Piles, Hysteria, Syphilis, Secondary, St. Vitus Dance, Bloody Dysentery, Enlarged Tonsils, Fever and Ague, Fistula in Ano, Hernia or Rupture, Ovarian Tumors, Paralysis or Palsy, Prolapsus Uteri, Bronchitis, Asthma, Catarrh, Scrofula, Consumption, Chronic Cough, Female Weakness, Spermatorrhœa.

THE REASON I TRAVEL.

It is often asked why a physician whose ability would afford him a profitable practice at home should consent to travel. I answer: Because this method of practice is the most economical, and the only successful way of reaching the great mass of people suffering with chronic ailments. Few invalids have the means, and fewer still have the energy and strength to make long journeys to consult eminent physicians.

I treat every month more than three hundred patients, whose average expense in visiting me at my house, if they had the physical strength to do so, would not be less than $20 each—an aggregate of more than $6,000. While my expenses in seeing them, at their various country seats, are less than $300, a clear saving to patients of nearly $5,000 per month. Then in the treatment of Chronic Diseases, my regular and continued visits afford me an opportunity of examining my patients and meeting the changes, also any new requirements, arising in each individual case, keeping my patients under my personal supervision, and placing within the reach of the people all the advantages of a Medical Infirmary right at home.

The entire cost of a complete cure under my treatment is often less than has been paid by the same person in a single year for worthless patent medicines.

The benefits thus secured to the afflicted are of the highest importance, and must be apparent to the most ordinary mind.

TO YOUNG MEN. Spermatorrhœa—Its Cause and Cure.

The chief causes of this disease are unnatural abuses of the sexual functions, or self-pollution, venereal excesses and weakness of the organs resulting from venereal diseases, and other difficulties affecting the urinary organs. The minds of such patients, particularly if the affection be attributed to unnatural abuse, become greatly depressed by an apprehension of impotency. He suffers from a sense of pollution and degradation, becomes melancholy, with an aversion for society. Then follow loss of memory, dullness of the head, general nervous debility, indigestion, impurities of the blood, pimples or eruption on the face, palpitation of the heart, weakness in the small of the back, loss of procreative power, nervous irritability, wasting of the frame, cough, consumption, decay and death. These are but a few of the terrible consequences which follow, sooner or later, the victims of solitary vice, that dreadful and destructive habit which annually sweeps to an untimely grave thousands of the most talented and promising young men. Hundreds of these sufferers are to be seen in every community, who are conscious of their condition and the dangers to which they are exposed, yet are too timid to take the necessary steps to get relief. I would say to such, look at once to your health and happiness. Delays are dangerous. Take one candid thought before it is too late. A week or month may place your case beyond the reach of hope. Waste no time with catch-penny advertisements, or unlearned pretenders, who keep you trifling month after month, taking poisonous and injurious compounds that will affect you nothing but bitter disappointment. My methods of treatment will speedily and permanently cure the most obstinate cases and absolutely restore perfect manhood.

TO MIDDLE AGED MEN.

There are many of the age of thirty to sixty who are troubled with too frequent evacuations of the bladder, often accompanied by a slight smarting or burning sensation, weakening the system in a manner the patient can not account for; on examination of the urinary deposits a ropy sediment will be found, and sometimes small particles of albumen will appear, or the color will be of a thin or milkish hue, again changing to a dark or turpid appearance. There are many men who die of this difficulty, ignorant of the cause, which is a second stage of seminal weakness. I will guarantee a perfect cure in all such cases, and a healthy restoration of the genito-urinary organs.

DISEASES OF WOMEN.

The alarming number of wives, mothers and daughters who are daily suffering and sinking from diseases peculiar to their sex, demand our most serious consideration and sympathy, and to relieve as far as within our reach, this dreadful scourge upon American women, I have greatly increased my facilities for their medical and surgical treatment. To accommodate all who may apply to me for treatment, large additions and varied and valuable improvements have been recently made to my former outfit, and every seemingly indelicate or objectionable feature that occurs ordinarily in the treatment of these cases has been removed, thus avoiding much of the embarrassment and objections usually experienced in the treatment of this class of cases, and my increasing patronage by some of the most intelligent and refined ladies, as proof of my success, has been very marked, over two-thirds of my patients being ladies, old, young, married, single, rich and poor. My method is free from objectionable features of the general practitioner, namely: "Local Treatment." I seldom find it necessary. I prepare remedies constitutional and local, as the nature of the case demands, and instruct ladies how to treat themselves.

PRIVATE DISEASES.

Blood Poison, Venereal Taint, Gleet, Stricture, Seminal Emissions, Loss of Sexual Power, Weakness of the Sexual Organs, Want of Sexual Desire, in male or female, whether from imprudent habits of youth or sexual habits in mature years, or any causes that debilitate the sexual functions, speedily and permanently cured. Consultation free, and strictly confidential. Absolute cures guaranteed. No risk incurred. Correspondence promptly answered, and medicine sent free from observation to all parts of the United States.

REFERENCES.

To Whom it may Concern:

We, the undersigned, do cheerfully and conscientiously recommend Dr. W. A. France as a gentleman of high moral worth and superior professional ability, having enjoyed an enviable position in hospital clinics in New York and Philadelphia, and acquitted himself superbly in the treatment of chronic diseases. We, therefore, recommend him as a true and thoroughly medical man, and advise the afflicted to avail themselves of his superior skill. We further know that those who counsel him will find him humane to a fault, ripe in judgment, ready to do good, considerate in price, and enthusiastic for the relief of the suffering and good of his fellow men: William Clark, M. D., LL. D., Philadelphia; J. I. Miller, M. D., Schenectady, New York; Hon. M. I. Shoemaker, Granville, Pa.; B. E. Gillette, M. D., Albany; G. E. Hall, M. D., Albany; J. Leroy Hall, M. D., Syracuse; Samuel York, M. D., Lewiston, Maine; First National Bank, Fostoria, Ohio.

Consultation and examination free. Do not condemn until you call and judge for yourself. Any person who may be skeptical about the ability of Dr. France, can, by calling upon him, see for themselves whether he is what he advertises himself to be or not. He has three diplomas and certificates to show that he is a member of different medical associations.

Patients visited at their homes when desired. All letters should be addressed to Fostoria, Ohio.
