# DREYFUS WALKS ALONE TO THE COURT ROOM

## Remarkable Early Morning Freedom Allowed the Celebrated Prisoner.

### At Noon However He Was Guarded by Double Files of Infantry and Cavalry—No New Developments.

RENNES, France, Aug. 10.—The Dreyfus courtmartial resuming its secret session this morning, finished the examination of ex-Minister of War Chanoine, and commenced the examination of M. Paleologue, of the foreign office.

Dreyfus today crossed from the prison to the Lycee unaccompanied. At noon, however, he was guarded by a double file of infantry and cavalry standing on either side of him, back to back. The only revisionist paper in Rennes has been ordered by the department commander to stop sending copies to the military club. President Jouast, of the courtmartial, announced this morning that the next public session of the court would take place next Saturday.

# TO MAKE GRAIN BAGS IN OREGON

### Flax Fiber Grown in That State to be Utilized.

ALBANY, Or., Aug. 10.—Eugene A. Larrimore, manager of the linseed oil works, of Portland, is in Albany on his return from the forks of the Santiam. Farmers in the vicinity of Scio are growing this year about 4,000 acres of flax for the Portland company, and Mr. Larrimore has been inspecting the crop, which is now about ready for harvest. The flax, he says, will produce from 12 to 15 bushels per acre. The entire crop in that vicinity is contracted to this company for $1 per bushel.

The flax seed, which is used in the manufacture of linseed oil, has heretofore been the only part of the flax saved, but this year a new company has been formed for the purpose of manufacturing the fiber into grain bags. A retting and scutching plant has been established at Scio to handle the fiber. This industry promises to prove an important factor in the production of grain bags. Recent experiments have shown that a first-class quality of grain bags can be made of Oregon flax fiber at a moderate cost. An ordinary crop of flax seed is about 15 bushels per acre. After growers become familiar with the requirements of growing flax, Mr. Larrimore says, the Linn county flax fields will yield fully that much, and perhaps more, making it a profitable crop that will be better than wheat at present prices.

# THE TOWN IS BEING DESERTED

PIERRE, S. D., Aug. 10.—In a fight for prestige between the towns of Miller and St. Lawrence on the N. W. road in Hand county, Miller was victor, and so many buildings were bought and moved from St. Lawrence to Miller that the former town is all but wiped out. To prevent any further removals an injunction was sought on the ground that the value of obligations incurred by St. Lawrence was being impaired by the reduction of taxable property. Judge Gaffy held this not to be good ground for action and denied the relief asked.

# IS POSTED ON ALASKA

### Chas. Meek Discusses the Different Parts.

Charles Meek, who came in on the Queen this morning, has prospected through Alaska for six years and is well posted on the country. To a Star reporter today he said: "I came down the river from Dawson and saw about all there was to see excepting Cape Nome. There were no good reports from there, so I stayed out. Dawson has had the bottom knocked out of it, and if the United States do not relieve the people there, I think a great deal of suffering will occur during the coming winter. I have prospected Copper River and saw nothing there to pay. There is gold in all of the boom districts, but the conditions are such that the claims cannot be worked profitably. I tried Michigan creek, Cripple creek and the Koyokuk, and found gold in all of them, but not in paying quantities. I also started on the Edmonton Trail, but gave it up as a bad job. There has been no good strike around Dawson since the first great strike. The hill claims above El Dorado are paying well. The bench claims around Circle City are only heard about when you get to the coast. I came down that way, and if there is anything good there I would have heard something of it. From the Kuskokwim country all kinds of reports come into Dawson. The Kuskokwim country has not been well prospected, and the indications there are good, but no one can tell yet whether or not it will pay. When the placers are gone, and the country is well opened, the quartz claims will be a big reserve for the gold seekers to fall back on. I believe that when proper machinery is used the quartz will pay better than the placers."

# LAWTON IS TO BE IN CHARGE

WASHINGTON, D. C., Aug. 10.—It is understood that Maj. Gen. Lawton, now in the Philippines, is to be placed in command of all the cavalry forces in those islands as soon as an active campaign is resumed. There is one cavalry regiment there—the Fourth. Two battalions of the Third cavalry are under orders for Manila and a volunteer cavalry regiment is being organized by Gen. Otis. There will be a cavalry force in the Philippines of between 4,000 and 5,000 men. It is understood, too, that one or two of the volunteer infantry regiments will be mounted as cavalry.

### BUILDING PERMITS.

Building permits were issued today to C. P. Snyder to build a one story frame residence in Allen's addition to cost $500; W. E. Nichols to build a two story frame residence at 515 Belmont avenue north to cost $1,925; Christy & Miller for alterations at 1300 Railroad avenue to cost $150; A. F. Haynes for alterations at 807 Twenty-fourth avenue south to cost $125.

# INCREASE IN THE GOLD RESERVE

NEW YORK, Aug. 10.—The subtreasury in this city has paid out $100,000 on account of the Yukon gold deposited at Seattle or San Francisco. Payment was made through the clearing house in the regular way, so that the amount has already been added to the reserves of local banks. Nothing further was heard at the sub-treasury respecting the $1,000,000 warrant payable in this city to the order of the superintendent of the mint at San Francisco on account of the Australian gold deposited there. Imports of gold from Australia during the twelve months ending June 30, last, aggregated about $25,000,000. This year larger receipts from Australia and the Klondike are predicted by buyers of bullion. A well-known banker said today that most of the Australian gold received at the Pacific coast this year would find its way to New York, New York exchange being nominally at a premium in San Francisco. This was also true of the Klondike arrivals.

### Excursion to Olympia Sunday

The best excursion the Van Excursion company will give this season will be the one to Olympia next Sunday. Steamer State of Washington will leave Yesler wharf at 8:10 a. m., stopping at Tacoma both going and returning. The musical concerts rendered on these excursions are a big feature. Tickets and other information at Lee's pharmacy, or at the wharf. The price has been reduced to 75c a round trip. Children under 15 years, 50. Plenty of seats. Bicycles free.

### A Bicycle Boat.

TORONTO, Aug. 10.—Toronto has a bicycle boat. It is said to be practicable and is the invention of C. Clark of this city. The boat consists of two cylindrical tubes of galvanized iron about 13 feet long and a foot in diameter, tapering to a point at each end, surmounted by a framework of iron after the fashion of a bicycle. The propelling power is obtained from bevel gearing which sets in motion a screw at the back of the boat. The pedals are worked as on a bicycle and are easy of propulsion. Steering is done by bicycle handles.

### THE ETHEL GROUP SOLD

George A. Pounder, of this city, has bought the Ethel group of claims four and a half miles from Index, for $45,000. Mr. Pounder has just returned from there, and states that 20 men will be put at work opening the three leads.

# PROSPECTORS ARE ATTRACTED

MYRTLE POINT, Or., Aug. 10.—The new gold mine on the headwaters of the Coquille and Sixes rivers are attracting many prospectors, although so far, but little development work has been done. The discoverers are not financially able to put their claims in condition to be inviting to capitalists. Men of good judgment have inspected the claims of the Harrisons, Colliers, and Guerins, and are convinced that several of the claims are rich in free gold and sulphurets. Two of the Harrison brothers are taking out about half an ounce a day from their Mountain Daisy claim. They are working on a dry mud seam that is found between strata of porphyry. They dig the pay dirt out and sled it down a hill 800 feet to a spring, and then wash it with a rocker. The gold is fine and requires quicksilver to save it.

# REPAIRS ON THE CITY HALL

The repairs on the City hall are fast nearing completion. The mayor's new office on the second floor has been opened, and it is now nearly ready for occupancy. The paper hangers began work on the council chamber yesterday. It is expected that by the next council meeting the room will be re-papered, painted and carpeted.

When the repairs have been completed on the second floor, the first floor will also receive attention. The room which is now used by the mayor will be divided into two rooms, one of which will be used by Supt. Youngs, of the water department, and the other by Mrs. Walker, who has charge of the lady's department of the employment office. It is expected that the outside of the building will also receive a coat of paint.

### Day as Arbitrator.

WASHINGTON, D. C., Aug. 10.—The governments of the United States and Hayti have about agreed to submit to arbitration the three claims of an American citizen for alleged indignities and loss suffered by him in Hayti. The arbitration will be a novel one, as Hayti trusts all her interests to an arbitrator of the United States, who in this case is to be Judge Day, late secretary of state.

### Shot Through the Stomach

GUTHRIE, O. T., Aug. 10.—It is now given out as a reason why Wm. Goings, the Choctaw Indian, did not die immediately at his execution, that Sheriff Watson, instead of shooting the condemned man through the heart, shot him through the stomach, on the advice of an Indian doctor, who assured him that the stomach and not the heart, was the vital spot.

# REPORTS OF COMMITTEES

The Seattle Anti-Saloon league held another meeting last night in the parlors of the First Methodist Episcopal church. All of the different organizations were represented. President Knapp occupied the chair during the session.

The law enforcement committee reported that Mayor Humes, Chief Reed and Prosecuting Attorney McElroy had been visited regarding Sunday closing. The special committee appointed to look after the use of anti-narcotic text-books in the public schools reported that the school board had referred the matter to the city superintendent.

An invitation was ordered to be sent to Rev. Howard H. Russell, of Columbus, O., national superintendent of the American Anti-Saloon league, to visit Seattle in the interest of the local society. A meeting of the executive committee will be held tomorrow evening in the office of President Knapp.

# REPORT OF TREASURER

Yesterday afternoon a meeting of the executive committee of the Seattle Press club was held for the purpose of hearing a report of the treasurer and finance committee. The report detailed expenses in who have visited Seattle during the that have visited Seattle during the summer. The total subscription amounted to $1,112, and the total expenses to $965.20, leaving a cash balance on hand of $146.80. This will be used by the press club as an entertainment fund for future occasions. Some of the subscriptions have not been collected, but Chairman Ambrose, of the finance committee, reported them good, and they were counted in the treasurer's account as cash.

### Anvils for Siberia.

NEW YORK, Aug. 10.—A Brooklyn manufacturing company has just shipped 43 100-lb anvils to the Chinese-Eastern railway at Vladivostok, where the company also shipped 13 large machine shop anvils in November last.

# JOHN L. OPENS A SALOON

NEW YORK, Aug. 10.—John L. Sullivan has made his advent as a New Yorker by opening a saloon on Sixth avenue between Thirty-fifth and Thirty-sixth streets, two blocks from Jim Corbett's place. The new saloon was jammed all day and far into the night. Paddy Ryan came down from Troy as an especial honor to John L. In the evening the three former champion pugilists of the world, Ryan, Corbett and Sullivan met in the saloon.

# WILL OPEN THE TEXAS OIL FIELDS

HOUSTON, Tex., Aug. 10.—The oil fields of East Texas are to be opened in a short time. President John H. Kerby, of the Gulf, Beaumont and Great Northern this afternoon told the correspondent this road would at once be pushed to completion. It is already operating trains out of Beaumont to the timber lands, but the petroleum belt of East Texas has never been developed, because of the lack of railway facilities.

### MORTGAGE FORECLOSURE

Letitia J. Wallace has filed a suit in the superior court against Emelie Head and R. L. Head. She asks for a judgment of $2,000 and foreclosure of a mortgage on lots 1 and 2, block 7, Washington place addition.

# MARKET QUOTATIONS

Thursday Morning.—The fruit and vegetable markets opened this morning on yesterday's prices, with the exception of native plums, which opened 10c weaker than yesterday's closing price. Plums are unusually plentiful, and a further decline is likely to occur. Peaches are becoming scarce, and the demand is increasing. An advance is likely to occur today.

The long-expected drop on chickens has arrived, the price falling to 12c. The chickens are becoming too numerous to feed, and the merchants are dressing them and putting them in cold storage. The decline in price has not stopped the influx, and a further decline will probably occur. Other poultry is scarce, and not in demand.

Dairy products are holding firm, and while eggs are still plentiful, it is thought they will raise to 24c by the first of next week.

For some time past the fish market has been well supplies with halibut, but the spawning season has arrived, and the fish are becoming scarcer and of poor quality. Salmon are getting quite plentiful, and have taken the place of halibut in the market. All varieties of small fish are scarce.

The following prices are being offered to the producer by the local dealers for delivery in round lots on the dock or in the car at Seattle:
