That Comet.

Doubtless many of us felt relieved when we woke up last Monday morning to find ourselves safe and sound and later to see that our beautiful moon had not been stolen by that wandering terror. Many doubtless looked for the comet and the shooting stars, but only one person is reported to have seen the former, and but few of the latter were observed. The clouds spoiled all.

Now that we are safe, what do the astronomers say? They prophesied that something terrible was about to happen, but it did'nt and they say that this comet is now running away from us. It must have been coming bragging to itself how it would send us flying out the ring at the end of one [illegible] nearer,

☞Perhaps if Mrs. Lease could post Mr. Lease down in the crowd and have him thrown a few eggs at her, she might be elected to the Senate.

☞Rev. Dr. John W. Scott, the father-in-law of President Harrison, died on November 29th., at 4:10 p. m. at the White House, [illegible]

☞Bishop Hennessey, of St. Louis, it is believed, will soon be named as coadjutor, and hence successor of Archbishop Kenrick, whose age interferes with his performance of the duties of his office.

☞After the second battle of Bull Run, Lincoln is said to have exclaimed: "Well I've heard of being knocked into the middle of next week, but I never heard of being pitched into the middle of last year."

☞The vote in the Electoral College will stand as follows: Cleveland 276. Harrison 138 and Weaver 28. It will be seen that Cleveland has a majority of 112 votes over both Harrison and Weaver.

☞Alex Greggains and "Buffalo" Costella, two welterweight pugilists, fought a draw of 81 rounds in the Arena of the Coney Island Athelic Club. This is the second time the same pugilists fought a draw.

☞Here is a riddle that lately crossed over from Paris to London: "What is the difference between Napoleon I. and the Duc D'Orleans? The former escaped from Elba, and the latter escaped from (M)elbo."

☞If the Pope succeeds in disarming Europe he will have accomplished the greatest practical good since Christ appeared on earth. It is a noble ambition, and if he were 20 years younger, we should not dispair of seeing it realized.

☞Gen. A. B. Nettleton, who resigned the Assistant Secretaryship of the Treasury a few days ago, will make his future home in Leavenworth, Kan. He is to be interested in the establishment of a compressed air plant for operating a street railway and to furnish motive power for manufacturers.

☞The vagrant comet—it was not Beale's—has turned its stump of a tail and dashed off into space at the rate of 15,000 miles per second. It did not even give the promised display of meteoric [illegible]. That is to say, except a [illegible] exhibition to the Pic.'s [illegible] St. Louis

[illegible] taken the View [illegible] the Burchard of the [illegible] and that the Home[illegible] defeated Harrison. W[illegible] perhaps an exaggerated construed board the matter, it cannot along the top, being that it hurt the President. It called attention, as we have noticed, to the fact that wages had not been increased, but on the contrary reduced, and it more or less antagonized union workingmen, and lost the Republican many votes in the towns.

The strike had other important effects. It was a very expensive one to the State of Pennsylvania and the county of Alleghany, as it compelled the calling out of a large militia force to preserve the peace. It proved that the Pinkerton system of meeting and attempting to suppress strikes with armed "detectives" was a bad one in every way; and it sounded the death knell of Pinkertonism in this country.

How thoroughly opposed this system is to American institutions was never better illustrated than at Homestead, and it called down such vigorous denunciations from all portions of the country and from the people of all parties, that we will probably never again hear of armies of these janissaries being sent into a State to overcome and kill the people. And the Homestead strike showed, at the same time, the necessity for each State possessing an efficient militia force not only for protection from foreign invasion, but for the preservation of peace at home.

Gov. Pattison's action in ordering the militia to Homestead, at once suppressed what threatened to become a great rebellion and restored order. It proved the necessity of a good militia force, and the wisdom of calling it out at an early day. Gov. Flower adopted this coures, both at Buffalo and Fire Island, with great success; and Gov. Foster here at New Orleans found the militia of equal service.

It will be seen, therefore, that the Homestead strike had its effects, not only in Pennsylvania, but throughout the Union, and that these were generally good, aiding in the election of a Democratic President, giving a death blow to Pinkertonism, and establishing the importance of a good militia force, and the necessity of of calling it out promptly whenever there is trouble or threats of it.

Locally the Homestead strike was one of the most disastrous that has ever been ordered. It has hurt the men engaged in it, many of whom have lost their [illegible]

places; and it has [illegible] form of the [illegible] ed the merchants [illegible] conspicuous line, [illegible] it in an ornamental [illegible] ers of Homestead, [illegible] the galvanized wire reduced to the bright[illegible] the center of the [illegible] cy by the great [illegible] half-grown, and again [illegible] successively till it business since [illegible] 6). It is often best to let suck two days apart two or three times or even more rather than to shut off at once. With the dams, with the exception of the milch cows, the better plan is to put on dry, rather scant feed for two or three days; it will add materially in drying up the milk. With ewes and mares it is often best to examine the udders daily and milk out if necessary; some prefer this to allowing the offspring to suck after they are taken away to wean. Ordinarily with the cows it is an item to keep them giving milk as long as possible, and hence no change of feed is necessary.

It pays to give the young stock especial care at this time in order to maintain a steady growth. The change should be made so that it will be felt as little as possible. In a majority of cases it will be best to wean reasonably early, while there is plenty of grass, as the young stock will feel the change less than when they must depend largely upon dry feed.—N. J. Shepherd, in Farm, Field and Stockman.

HANDY POULTRY CROOK.

Stealing a Fowl Without Excitement or Injury to the Bird.

Per C. Jarscen, Philadelphia county, Pa., sends the following description and sketch of a crook designed for catching poultry: The pole is round, ten feet long, with a piece of quarter-inch iron,

nineteen inches long, driven three inches into the end. This iron is so bent as to form a hook five inches in length. The crook is then ready for use. Its operation is simple. Step quietly towards the fowl, and, with the pole advanced and close to the ground, put the hook under the fowl so as to catch its legs, then draw the pole gently, disengage the bird's feet from the crook and the deed is done without excitement or injury to the bird.—American Agriculturist.

His Heroic Wife.

Mr. Henpeck—I believe I've got the most heroic wife in the world.

Friend—What did she do?

Mr. Henpeck—A burglar came into the house during my absence. My wife didn't scare worth a cent. She received him politely. I saw him. Just as I entered window and made his escape. He was a young fellow and rather good looking.

SUNSHINE comes, no matter how dark the clouds are, when the woman who is borne down by woman's troubles turns to Dr. Pierce's Favorite Prescription. If her life is made gloomy by the chronic weaknesses, delicate derangements, and painful disorders that afflict her sex, they are completely cured. If she's overworked, nervous, or "run-down," she has new life and strength.

"Favorite Prescription" is a powerful, invigorating tonic and a soothing and strengthening nervine, purely vegetable, perfectly harmless. It regulates and promotes all the proper functions of womanhood, improves digestion, enriches the blood, dispels aches and pains, brings refreshing sleep, and restores health and vigor. For every "female complaint" and disturbance, it is the only remedy so sure and unfailing that it can be *guaranteed*.

If it doesn't benefit or cure, you have your money back.
