Every Woman Casts Loving Glance at the Nestling Cuddled in its Bonnet.

A woman's heart naturally responds to the charm and sweetness of a pretty child, and more so to-day than ever before since the advent of Mother's Friend.

This is a most wonderful external help to the muscles and tendons. It penetrates the tissues, makes them pliant to readily yield to nature's demand for expansion, so there is no longer a period of pain, discomfort, straining, stress or other symptoms so often distressing during the anxious weeks of expectancy.

Mother's Friend prepares the system for the coming event, and its use brings comfort, rest and repose during the term. This has a most marked influence upon the baby, since it thus inherits a splendid growing system of nerves and digestive function.
