BUTTE TERMS ACCEPTED.

Butte, Mont., May 18.—Serious menace to operation of the mines in the butte district was removed today, according to operators, by the acceptance by the Workingmen's union of the wage increase offered by the Montana Power company ending a strike of two weeks duration. There was no indication today of an early resumption of service on the lines of the Butte street railway company which also had been paralyzed by the strike.

CORONER RETURNS VERDICT.

R. B. Rawlins, coroner, declared the death of R. M. Jones, who was thrown against the side of a street car Saturday while riding a motorcycle, was the result of an accident, following an inquiry Monday. Jones died a few hours after the accident.

ARRAIGNED ON LIQUOR CHARGE.

Ernest Valenzia, charged with possession and transportation of 22 pints of whisky, was arraigned before A. J. W. Schmid, United States commissioner, Monday afternoon, and held to United States district court on bond of $750, not furnished.

Seek Oil Below Shallow Sands Of Pecos Field

Pecos, Texas, May 18.—Larger production at a depth below the shallow sands, which made the Bell well a sensation of the year, is the aim of numerous operations in the Pecos valley field and eight drills are now going down prepared to reach several thousand feet, if necessary, in order to find the bigger pools which geologists say underlies the Pecos valley and the Toyah basin.

While 13 drills are now going down for the shallow sands of the Bell pool and two of them, the Minerva and the Lucky 13, have had showings of oil, and more than a score of bits are reaching into the earth in the Toyah lubricating oil field at the 200 foot level or waiting for the pumps to make this latter production available, many companies are ignoring the smaller production in their search for the bigger pay that geological reports indicate lies under the valley in what is said to be the thickest layers of oil bearing sand in the world.

Eight big rigs are now drilling for the deeper sands, but the majority of them have only recently started, and but one has had a showing of oil. This was the Laura of the Sunshine Oil corporation, which passed through a small sand at 1200 feet, but is going after another which geological reports indicate lies about 1450 feet down.

MINERVA NO. 1 FIGHTS WATER

Pecos, Tex., May 18.—Minerva No. 1 well is still fighting water in its efforts to shut off the flow before drilling into what the drillers believe will prove to be the Bell sand.

The Bell-Reeves is the latest drilling well in the Bell pool to report a showing of oil. They had gas bubbles yesterday and a few rainbows, and are continuing to drill. This well has drilled to beyond 500 feet.

The Lucky 13 has succeeded in shutting off the water at beyond 650 feet, and are drilling slowly in the hope of reaching the pay sand. This well also has gas bubbles in the water.

The Bell discovery well is now pumping into the big 1000 barrel tank, two 250 barrel tanks having been filled.

This well is showing very heavy gas pressure, and this has cut down the production to from four to five barrels an hour.
