**ROYAL CROWN STEEL
SMILK**

An 8 foot wheel elevated 25 feet, with a cylinder 3 1-2 inches in diameter, will draw 432 gallons per hour, or 10,408 gallons every 24 hours. Price, \$45 and freight, which will be about \$12.

The vane is a single sheet of steel riveted to a bow-shaped bar of angle steel, the two ends hinging on the pivot casting. The construction of the wheel which is ALL STEEL, is such as to give the wheel a light, airy appearance, yet make it the strongest and most substantial. The arms, double bolted to the spider casting, are made from angle steel, being the strongest possible form for the weight of material employed. The outer girths are made of channel steel bent on a circle, they are so shaped as to form a bearing the full width of the sail, thus strengthening the same and holding its curved form securely. The six sections when bolted together and strongly braced in front, as shown, make a very rigid, strong and safe wheel. Weight, 300 pounds.

It will be one of the liveliest and most interesting family newspapers in America. One dollar per year. Three copies one year two dollars. Ten copies one year all ten to one post office, \$5. If you are for silver and against a national debt, this is a paper you want for a fact and for its facts. Sent at once to M. M. Pomeroy, Rooms 46, World Building, New York City.

A PAPER OF THE PEOPLE—THE

RECKITAT LEADER should be in every home in Southern Washington. It is fearless and aggressive, ever ready to defend the interest of the people. It is bated and feared by the political shysters of its own county. THE LEADER has had one of the hardest fights ever encountered by any paper. All Populists should give it their support. Subscription price, \$1. per year. If you have the money, send it along; if not, give us your name anyhow. Address THE LEADER, Goldendale, Wash.

Silver Is The Issue.

Appreciating the magnitude of the financial question and the importance of having statistics and other data on the subject compiled in durable form suitable for frequent reference, we have published a book of this character, and are now ready to supply the demand. It is a little book of forty-six pages, entitled the "Elementary Principles of Money and Statistics on Silver and Gold," edited and compiled by W. H. Harvey, chairman of the bimetallic executive committee of the state of Illinois. It gives the elementary principles of money; the statistics on both silver and gold, the gold standard arguments and the answers to them; reviews the coinage laws, and contains other valuable information. It will be mailed post paid to any address on receipt of 10 cents. Address, COIN PUBLISHING CO., 115 Monroe Street, Chicago.

We have just received a copy of "The Autobiography of a \$100 National Bank Note," by Frank E. Richey, the editor of the St. Louis Illustrated Populist paper, VOX POPULI. The story is told, of course, as though the \$100 bill had written it. In the early history of the banks and of the Greenbacks, and the secret inside workings of the present banking system is charmingly told. The work contains some 30,000 words and is profusely illustrated with more than twenty cuts, making it the best literary bargain that was ever offered at 10c. Bristling with facts, figures and illustrations and containing a stirring story concerning the latter day White Slavery of the National Banking system, and touching deeply the national life, this story will sell by the million and profoundly impress the political thought of the time on one of the most vital subjects before the People.
