NEW IRON LASTS AND HOME REPAIRING OURFITS.

Enlarged, Remodeled and Greatly Improved.

Fig. 10127.

No. 2. ONLY 68c PER SET.

Consisting of 21 first-class tools and materials shown in cut, viz; 1 Iron Last, 10 in.; 1 Iron Last, 8 in.; 1 Iron Last, 6 in.; 1 Iron Standard with base; 1 pkg. assorted nails, 1 pkg. 4-8 wire clinch nails, 1 pkg. 5-8 wire clinch nails, 1 pkg. 6-8 wire clinch nails, ½ doz. pairs Star heel plates, 1 sewing awl, complete; 1 pegging awl, 1 wrench, 1 stabbing awl, complete; 1 shoe knife, 1 shoe hammer, 1 bottle rubber cement, 1 bottle leather cement, 1 ball wax, 1 ball shoe thread, 1 bunch bristles, 4 harness needles.

These tools, when purchased separately at a country hardware store, would cost nearly $5.00.

No. 2, same as No. 1, except has no soldering tools, harness clamp, rivets and punch. Weight 14 pounds, price.....68c

Fig. 10129.

No. 1. ONLY $1.15 PER SET.

All the tools are full sized, practical, neat and cheap, not mere toys, enabling any person to do his own half-soling, boot, shoe, rubber, harness and tinware repairing. The only complete outfit on the market.

How often it happens that a boot or shoe gives way in the shank, the sole comes loose, or the heel begins to turn one side; your harness gives out at the busiest time or your milk pans spring a leak at the most inconvenient season. If you live near a shop these are not such serious matters, but if you have to travel miles, perhaps, to get the little repairs made, and then possibly have to wait for the shoemaker's proverbial "next week," you will appreciate the convenience of some means to do it yourself, without expense, right at your own fireside.

ONE OF OUR MANY CUSTOMERS' LETTERS.

August 7th, 1897.

T. M. Roberts:

Dear Sir—I would like to say a word in regard to the retailers' convention, held in St. Paul. I do not think they can hurt the catalogue houses, as every farmer who has got enough money to buy a dollar's worth at once can save 25 per cent on same by sending to you, as you carry a very large stock, and orders are, as a general thing, promptly filled, and goods as represented, and as for the retailers running a bluff on the manufacturers they can not do that.

The Catalogue House is a good thing for the farmers, and also for every class of workingmen. Let the good work go on. It is our wishes.

Yours Truly,
ED. CLYNGENPEEL.
Spooner, Washburn County, Wis.

We Wish to Say,

In conclusion, to our customers and patrons, that the middlemen, consisting of retailers and jobbers, are making every effort to defeat and prevent you and us from getting goods at their real value, and are endeavoring to enact laws to tax us out of existence, if possible. You should remember that when they add to our expense we are obliged to add it to the price of goods, so it evenually comes out of your pocket.

Be sure when you elect your Legislators that they are pledged to your interest, and not pass laws against the Department Stores and Supply Houses.

SEND US the names and postoffice addresses of 17 farmers, and we will send you, free, every two weeks, OUR LATEST GROCERY PRICE LIST, giving latest prices on Groceries and other goods.

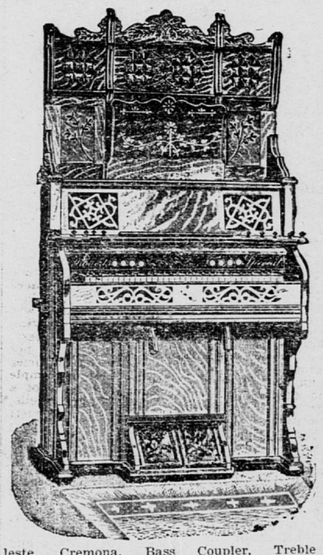
MUSHROOMS.

Spring up in a night, flourish for a few short hours, and are cut off by the fierce rays of the noonday sun. Some supply houses, like mushrooms, are born in an hour, and live a short, swift life, until the sure and sudden rays of honest competition blast their young lives. Can you afford to risk your money with unknown and untried concerns which are apt to vanish in the morning, no man knows where?

PARLOR ORGAN

We have long desired to have a first-class Organ, that we could sell for a small amount, and after carefully examining the samples submitted us and compared the prices, we feel sure that we have at last made the right selection, and submit to your inspection the

Roberts' Special .... Parlor Organ.



Description.—In offering this design to our customers we do so to fill the demands of people who cannot afford to pay for our more elaborately designed organs, and yet insist on an organ with a superior action at a low price. The style of this case is entirely constructed with a view towards making a very presentable appearance, yet being inexpensive in the cost of construction. To do this we are compelled to buy from the factory using the latest, greatest labor-saving machinery, in the possession of which they lead all other factories. The case is made of solid oak or walnut lumber (state choice), thoroughly seasoned, handsomely carved, and finished with three coats of varnish and hand-rubbed in oil. The action is the same as in our more costly cases, made up of the best wire, leather felts, etc. Bellows are made of the best rubber cloth and of three-ply bellow stock, and the finest sheepskin leather in the valves. The factory guarantees the organ for 10 years, and we make the guarantee to you. They are also made absolutely mouse proof.

Among the important features of this organ are bevel-face celluloid stop knobs, nickel plated pedal frames, with best brussels carpets, casters, extension lamp shelf and handles.

No. 797. Action 1162, 5 octaves. Contains four sets of reeds, two of 3 octaves, two of 2 octaves each. Eleven stops, as follows: Diapason, Principal, Dulciana, Melodia, Celeste, Cremona, Bass Coupler, Treble Coupler, Diapason Forte, Principal Forte, Vox Humana, 122 reeds.

With each organ we furnish one stool and instruction book.
Price, f. o. b. Minneapolis..... **$35.90**

N. B.—For those who desire, we will furnish 10x16 inch French bevel plate mirror for $1.25 additional.

We allow 2 per cent cash discount when full amount of cash accompanies order.

Be sure and state choice of wood.

Office of BURNHAM, TREVETT & MATTIS,
Investment Bankers.
HURON, S. D., June 19, 1897.

T. M. Roberts' Supply House, No. 508 Nicollet Avenue, Minneapolis, Minn.

Dear Sir—Yours of the 15th is received, with your check, $256.34, proceeds of the car of wheat consigned to you some days since. We note your statement of account, and everything is, apparently, correct. We have no doubt that you made the best disposition of the grain that was possible under the circumstances. Of course, we knew that the grain was not first-class, but wished to realize out of it all that was possible.

We shall feel that we can mention your house kindly in connection with such matters in the future.

Yours truly,
BURNHAM, TREVETT & MATTIS.

If you and your friends will send us a trial car of grain, there is no question but what you will be pleased with the results.

We have thoroughly completed our arrangements for handling any grain you would like to send us. We can, at least, save you your dealer's profit, as we are right here at headquarters, and can take advantage of the highest market prices, whether it be to our large mills or elevators or the Board of Trade (Chamber of Commerce), where Eastern and export buyers have a chance to bid on it.

SHIP YOUR GRAIN ONLY IN CARLOAD LOTS, IN GOOD CONDITION, that is, dry and reasonably clean, as it comes from the thrasher or as you would sell it if at home. Any that should be quite dirty it would pay to run through a fan-mill. Level it in the car after loading.

SHIP TO T. M. ROBERTS, AND SEND HIM THE FREIGHT RECEIPT OR BILL OF LADING as soon as it starts. As soon as it reaches us we will have it weighed by the State Weighmaster and inspected and graded by the State Inspector, and will send you their certificates, as well as a bill of sale, with the money at once

All Steel Rotary Disc Harrow.

Fig. 40735.

BEST STEEL BLADES.

ROUND —OR— CUT-OUT DISCS.

The machine is made entirely of steel and iron, except the pole. It is very simple, there being little more than the disc, blades and pole, hence it is a very durable machine, having no complicate parts to get out of order. NO WEAR ON TOE BEARINGS. It has case hardened boxes, easily oiled, and sand and dirt proof, and on the inside end of one of the gangs there is placed a large iron ring, as shown in the cut, which is fastened to and revolves with the disc, and the disc on opposite gang, and each gang thus takes and offsets the thrust of the other. AXLES AND BEAM. It has a steel beam, heavier than heretofore, square iron axles, steel seat support, steel discs, almost a solid steel harrow, and is the most durable disc harrow made, the tongue alone being of wood. A SCROOL SCRAPER which is placed in such a position that the earth, roots and rubbish are forced outward as they are carried upward by the discs, the earth itself pushing off all the roots that cling to the edge of the discs, and as the earth is carried outward all the time there is no chance for the discs to roll up full of dirt and rubbish. The space between the discs and scrapers increases as it nears the edge, so there is no chance to form a brake by the earth wedging between the scraper and discs.

Taken from the Farm, Stock and Home of July 15:

C. F. Danfield, Kossuth County, Iowa, writes: "The 1st of April I made up a list of miscellaneous merchandise and got prices on it from four local merchants, two supply houses in Chicago, and T. M. Roberts, of Minneapolis. My local merchants priced the list from $88.30 to $92.60; Chicago quoted $74.86 to $78.50, and Roberts, of Minneapolis, quoted $73.12. I sent the order to Roberts, and in five days got the goods exactly as ordered, and am satisfied their quality was equal, if not better, than the local merchants showed me.

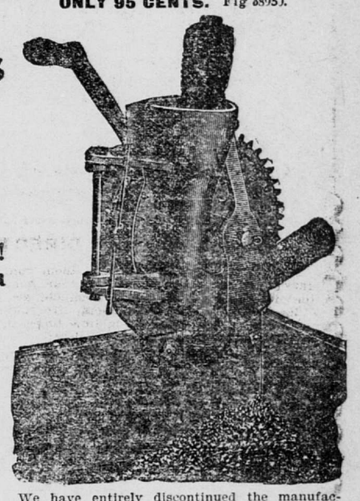
Improved "Famous" Corn Sheller

ONLY 95 CENTS. Fig 8895).



We have entirely discontinued the manufacture of the little "Famous" sheller, and have seen that the introduction of one of larger size and capacity would be very acceptable to most of our customers. A sheller that is portable and can be used winter evenings, near the kitchen fire, to shell corn for the poultry, pop corn and seed corn, will certainly meet those requirements, and is in demand even by those who own large shellers. It is very simple and will not get out of order, and will last an indefinite time. If turned rapidly it will shell from 25 to 30 ears of corn per minute, or as much as any larger, expensive, one-hole sheller. The tension is adjusted by a thumb screw in the back of the machine. The sheller is a perfect success, and warranted to give satisfaction. Weight, 15 pounds.
