THE LIVER QUARANTINE

"TAKING HIS MEALS OUT."

Hurried eating has ruined many a man's stomach. The digestion-destroying process is gradual, often unnoticed at first. But it is only a short time until the liver balks, the digestive organs give way, and almost countless ills assail the man who endeavors to economize time at the expense of his health.

A torpid liver causes a quarantine of the entire system. It locks in the diseased germs and body poisons and affords them full play, inviting some serious illness.

In families where August Flower is used, a sluggish liver and constipation are unknown, so are all stomach ailments, as well as indigestion, dyspepsia, heartburn, headaches and kidney and bladder affections. No well-regulated family should be without this standard remedy.

Two sizes, 25c and 75c. All druggists.

IN GLASS BOTTOM BOAT

MR. HARVEY TELLS OF AN INTERESTING TRIP.

Viewed the Contents of The Ocean Through the Bottom of Their Ship.

Mr. G. W. Harvey continues his entertaining account of sights on the Pacific coast began in last week's paper as follows:

After leaving Redlands we stopped at Los Angeles where we remained about one year. Los Angeles is a beautiful city and is the most central attraction of any California city, and I think it is the best equipped with street railway system of any city I was ever in. There is double track lines running to Pasedena, Montrovia, Redowonda, Alhambra, Long Beach, San Pedro, Santa Monica and many other points ranging in distance from 15 to 70 miles and they often make a run of a mile a minute. The last time we were at Long Beach in going back to Los Angeles a distance of twenty seven miles they run it in 29 minutes including two stops.

We took a trip to San Pedro and from there took a steamer out in the ocean to the Catilina Islands. When we approached the island we were saluted with the grandest display of fireworks I ever had the pleasure of viewing. We were soon nicely located in a tent and enjoying a midnight lunch at practically our own table. The next day we took a ride in a glass bottomed boat and we were informed that we could see the bottom when we were in water not deeper than 80 feet. However we could see far down where we sat was several feet below the surface of the water. That might have had something to do with us seeing down so far. We could see varieties of fish and animals too numerous to explain. One peculiarity of the fish is they go in groups of the same variety and about the same size, all going the same direction as fast as possible. Then another group of another size perhaps going the opposite direction. There was one variety the Red Salmon as large as 3 and 4 feet long looked just like the gold fish. They seemed unconcerned as to where they were going or whose company they were in. The saw fish is a very predominating fish. Won't get out of the way for anything. We could also see large rocks hills and long valleys and often the smooth bottom covered with salt as white as snow. We also crossed the marine garden and to describe the grandness of that would be impossible. There were probably one hundred ladies and gents on the boat and the universal expression was that it was the most beautiful flower garden they ever had seen. I would judge that the flowers were about 30 feet below the surface of the briney water. We finally arrived at Moonstone beach where we went ashore and gathered many fine moon stones.

On our return trip we went around by the salt cliff and seal rocks and had the opportunity of taking some fine pictures. The only thing we regretted concerning the trip was that my business at Los Angeles deprived us of staying longer. The Catilinas is a beautiful place to go to spend a few week's of recreation. My next letter will be concerning an ocean trip to Sandiego and the peculiarities of the people and country through the gold regions of Old Mexico.

DRUMMER'S SALARIES.

The Large Amount Paid To That Class.

A prominent and successful drummer of this city hands us the following clipping from the Louisville Courier-Journal on the subject of "Drummer's Salaries" from which we take a number of items.

The drummers of America represent the highest order of labor as a class on the face of the earth today.

They draw the largest salaries of any class of hired men in America, except the President of the United States.

Senators and Congressmen draw each $5,000 a year, and there are thousands of drummers who draw much larger salaries than they.

Some few railroad presidents draw $50,000 annually, but they are stockholders, and not strictly speaking hired men.

Some few bank presidents draw $50,000, but they, too, are stockholders and not hired men.

All the drummers combined draw more money in salaries than all the combined forces of any other class of men under the sun.

There are 500,000 drummers in America today, and to put their average daily salaries at $4 per day, which is a very low average, they are paid $2,000,000 every day, or $600,000,000 every year.

All the Presidents of the United States at $50,000 annual salaries would only draw $5,000,000 in 100 years of time—just the little pocket change that the drummers of America draw in two days and a half.

All the Congressmen and Senators combined at $5,000 annually only draw $2,500,000 a year, or $250,000,000 in every 100 years—just half what the drummer draw in only one year.

If 50,000 bank presidents draw each $5000 annually, their combined salaries would only amount to $250,000,000—only half what the drummers draw in the same length of time.

We draw $600,000,000 salaries every year and spend $300,000,000 more in our expense account; circulate one round billion dollars every year. We pay to hotels, $240,000,000 annually. We pay to railroads, $225,000,000 annually, and spend $50,000,000 for incidentals rarely every item noted.

We talk about a billion dollars Congress that means two sessions—appropriations for two years. We spend a a billion dollars every year, never feel it.

Five hundred million dollars is supposed to run the United Government, all her expenses, amply every year, while we spend that much every 6 months.

The gross earning of all the railroads in America are put at $2,000,000,000 annually. Their net earnings at 4 per cent amount to $80,000,000 every year, which represents our gross earnings for our respective firms. At 2 per cent net profit we would make our net earnings $180,000,000—$100,000,000 more at 2 per cent than all the railroads at 4 per cent.

A Laxative Cough Syrup.

"A cold or cough nearly always produces constipation—the water all runs to the eyes and nose and throat instead of the system through the liver and kidneys. For the want of moisture the bowels become dry and hard." Kennedy's Laxative Honey and Tar is the original Laxative cough Syrup. It meets and corrects the above conditions by acting as a pleasant cathartic on the bowels—expels all colds from the system and cures all coughs, croup, whooping cough, LaGrippe, bronchitis etc. Sold by J. GAVE UP SUPPORTER.

"I wore a supporter for two years, to keep my body upright, but it crowded everything down behind it," writes Mrs. E. J. Tillman, of Gloversville, N. Y. "My doctor told me I could never get well without it, but I suffered terribly when I walked, and could hardly walk. After taking two bottles of Cardui I gave up my supporter. Now I am taking my fifth bottle, have no bad feelings as formerly, and can be on my feet half a day at a time. I already recommend Cardui to every suffering woman."
