The new antiseptic tablets for douche, gargle and daily mouth wash, called

Catarrlets

Are far more effective and economical than listerated solutions and other antiseptics, for cleansing the mouth and sweetening the breath, curing sore throat, overcoming the offensive odor of and curing nasal catarrh. Their effect is so immediate and so satisfactory that people who have used them tell us they would not be without them for daily use. At druggists, 50c. or $1. Or by mail of C. I. HOOD CO., Lowell, Mass., U. S. A.

REAPPOINTMENT FOR MARTIN.

"Understood" That He Will Be District Attorney Again.

The Brattleboro correspondent of the Springfield, Mass., Republican, announces that United States District Attorney James L. Martin will be reappointed. He writes as follows: "It is understood that the Vermont delegation in Congress, including Senator Proctor, who was reported as unwilling to commit himself until now, has decided to recommend the reappointment by the president of United States District Attorney James L. Martin of Brattleboro. So many rumors have been in circulation to the effect that Senator Proctor favored another candidate that this assurance is most satisfactory to Mr. Martin's friends. There are a number of important offices to be filed on the recommendation of the members from Vermont, some of which will be sought by a number of candidates. If it be the policy, as suggested by some of the newspaper correspondents in Washington, to give others a chance at the public crib than those already in office, several veterans will necessarily have to retire. Over in Wilmington, where Postmaster Jones has served long and faithfully, there are two or three aspirants for the post-office, and one of them, the editor of the Wilmington Times, L. E. Strawser, seems to be driving the most active canvass for indorsements. There are two or three other towns in which a fight is projected, and, all in all, there is about as much activity in this way as was shown on the election of Mr. Cleveland to the presidency the first time."

REPORT ON WATER SUPPLY.

It Must Be Ready for Brattleboro's Special Village Meeting.

Brattleboro, Nov. 20.—The board of bailiffs sent to the village water committee Saturday a request that the committee have the report on the water supply printed and circulated among the voters at least two days before the special village meeting, which is set for December 1.

The committee was appointed to investigate the subject of village ownership of the water system and report at a special meeting.

The bailiffs took this action in view of the fact that Sunset Lake water company has engaged the same engineer and has begun the establishment of an independent private system in advance of the publication of the engineer's report.

TWO MARBLE QUARRIES.

Middlebury Marble Company Acquires Sheldon Property.

Pittsford, Nov. 20.—It has been learned that the Sterling Marble company has sold the Sheldon quarry, at Fowler and seven acres of surrounding land, and the property known as the Willis quarry, near the home of E. R. Hendee, to the Middlebury Marble company, of Baltimore. The Middlebury Marble company also bought the tools used in operating the quarries, and will take possession at once. The terms of the sale have not been announced.

FIRST TRAIN TO BETHEL.

Granite Brought from Quarries Earlier Than Was Expected.

Bethel, Nov. 20.—The first train to run over the new Bethel Granite railway, exclusive of construction trains, was run from a point one mile below the quarries to this village Friday afternoon. It contained two cars of rough granite and one car of contractor's equipment. The shippers and the Central Vermont Railway Co. were a half day ahead of the predictions. With favorable weather trains probably will be run to the terminus of the line in ten days.

Carnegie Ate $1,000 Luncheon.

Pittsburg, Nov. 20.—Fred Flack, an old locomotive engineer of the Pennsylvania road, says he has received a letter from Andrew Carnegie enclosing a check for $1,000 to pay for a luncheon which Mr. Carnegie ate in Flack's engine cab years ago when he was riding with the engineer.

Mr. Carnegie, it appears, was ravenously hungry, and gladly dined on the contents of Flack's dinner pail. He has now paid for that meal.

FOR SQUARE DEAL AND ROOSEVELT

National Grange Pleased With the President.

Atlantic City, N. J., Nov. 19.—The national grange, in session yesterday, by a standing vote, adopted a resolution, which was ordered sent to President Roosevelt, stating that the farmers of this country want neither more nor less than a square deal. The resolution says: "We unanimously and heartily indorse the manly efforts of President Roosevelt to secure equal opportunity of the individual and common people against the arrogant power of aggregate wealth. Irrespective of party, we pledge ourselves to support his efforts." Master Hill of the Pennsylvania state grange offered a plan before the convention late yesterday, whereby he believed the farmer could avoid usurious money lenders. He learned on his trip to Italy as a delegate, he said, that the farmers on the other side took care of their own cash by establishing rural banks. This, he stated, made them independent. He said he had brought the subject before Pennsylvania financiers and they had promised support. He asked the grange's indorsement, and suggested one bank in each county in the state, and also favored the removal of the tax on alcohol as an aid to the farmer's profits.

SEARCH FOR MRS. CHURCH.

Disappeared from White River Junction With Two Children.

Boston, Nov. 20.—A search for Mrs. Julia Lura Church, who disappeared from White River Junction, November 7, with her two young children, was started Saturday by the Boston police at the request of her husband.

Charles Ernest Church, her husband, told the police that his wife was unable to properly care for the children and that they had agreed to separate as husband and wife. He never suspected, he said, that she would take the children with her.

He is willing now to take her back, he says, provided he can get the children.

Mrs. Church was a pastry cook at the Thorndike Hotel on Boylston street before her marriage. Her husband believes that she is working in Boston as a cook and that she has placed the children in some institution.

The children are a boy, Clyde, 1 year and 6 months old, and Laura, a girl of 8 or 9 years.

FOR ATHLETIC ASSOCIATION.

Hardwick Academy Pupils Organize—A Girls' Basket Ball Team.

Hardwick, Nov. 20.—The pupils of Hardwick academy have completed the organization of an athletic association which is to govern all the athletics of the school.

The officers elected are: President, Principal J. B. Danforth; vice president, Alton Lawson, '06; secretary and treasurer, Miss Blanche Hollister, '07. The executive committee is composed of Preceptress Alice M. Hancock, Miss Florence L. McCoy, Miss Ethel J. Powers, '06, Philip Wakefield, '07, Miss Grace McKinstry, '08, and C. C. Carr, '09.

The association is to be represented in basket ball this season by the girls' team. The manager of the team is Miss Mary F. Donald, '06, and the coach is Frank A. Worthen, the captain of the '05 base ball team.

Charles W. Mulcahy, '07, was re-elected manager of the base ball team.

ITALIAN IMMIGRATION PLAN.

Special Envoy Royal Explains Movement.

Washington, Nov. 20.—Under a broad policy the Italian Government is making a systematic effort to exert a paternal supervision over the distribution of its emigrants to the United States, with the ultimate object of making them better citizens here and more wealth producing, so that they may add to the trade and increase the prosperity of the mother country. To carry out the paternal end of this scheme, the initiatory steps of which have already been taken, Adolph Rossi, special representative of the Italian Government, who has just come from Rome, together with Bishop Broderick of the Catholic Church, called on the President and also conferred with the officials of the Department of Commerce and Labor.

HE IS NOT A CANDIDATE.

Attorney General Fitts Not Seeking Vermont Supreme Court Judgeship.

Brattleboro, Nov. 20.—The name of Attorney General Charles C. Fitts is being used throughout the state in connection with the vacant judgeship on the supreme court bench.

Mr. Fitts authorized your correspondent Saturday to state that he is not in any way a candidate for the position, and that the use of his name in connection therewith is entirely unauthorized.

Funny as the "Doll Lady's Watch."

A Northampton tradesman gives prominence to the following notice: "No persons can be supplied with fireworks under thirteen years of age."

After so fair a warning the purchaser has only himself to blame if those unpopular noises refuse to go off.—London Punch.

HARVARD FAILS TO WIN

Dartmouth Ties the Score and Shows Much Superiority.

YALE WINS FROM TIGERS

By Score of 23 to 4 at New Haven—Blue Eleven Superior Team—Brown's Easy Victory Over U. V. M.

Saturday's Foot Ball Scores.

At New Haven—Yale 23, Princeton 4.
At Cambridge—Dartmouth 6, Harvard 6.
At Williamstown—Amherst 17, Williams 0.
At Providence—Brown 56, Vermont 0.
At Worcester—Holy Cross 12, Tufts 2.
At Middletown, Ct.—Wesleyan 23, Susquehanna 0.
At Ithaca, N. Y.—Columbia 12, Cornell 6.
At West Point, N. Y.—West Point 34, Trinity 0.
At Annapolis, Md.—Annapolis 22, Virginia 0.
At Philadelphia—Pennsylvania 42, Villa Nova 0.
At Cambridge—Yale freshmen 16, Harvard freshmen 0.
At Ann Arbor, Mich.—Michigan 12, Wisconsin 0.
At Georgetown, D. C.—Bucknell 18, Georgetown 0.
At Cincinnati—Carlisle 34, Cincinnati 5.
At Chicago—University of Chicago 44, University of Illinois 0.

HARVARD FAILS TO WIN.

Dartmouth Ties the Score and Shows Much Superiority.

Cambridge, Mass., Nov. 19.—The Harvard foot ball eleven yesterday, for the third consecutive time, failed to win a victory over the Dartmouth college team, the score being a tie, 6 to 6. Last year the result was also a tie, neither side having scored, while the year before Dartmouth defeated Harvard 12 to 0. Throughout the game Dartmouth showed much superiority, and most of the playing was in Harvard's territory. The scoring of both teams was the result of line bucking and there were no spectacular plays. The weather was perfect for foot ball and more than 20,000 spectators witnessed the contest. The game throughout was clean and open and free from slugging, although both teams were penalized for holding and for off-side play. The scoring was mainly for the result of persistent rushing, although both sides were penalized. Both scores were made in the first half and the two teams played each other to a standstill in the second half.

YALE DEFEATS PRINCETON.

Score 23 to 4 in One of Hardest Fought Battles of Year.

New Haven, Nov. 18.—Eleven Yale athletes outplayed and outstayed but not outgamed eleven Princeton players at New Haven yesterday.

Old Elis' sturdy and stalwart sons administered a stinging and decisive defeat to the plucky Tiger cubs.

The size of the score—23 to 4—about indicates the relative strength of the two teams.

YOUNG ROOSEVELT KNOCKED OUT.

Plucky Fought Through First Half of Game With Yale Freshmen.

Cambridge, Mass., Nov. 18.—Determined to put Teddy Roosevelt, Jr., quickly out of the game, to hammer and bang at Harvard's light and plucky end until the son of the president could stand the gaff no more, Yale's sturdy freshmen eleven, after an hour's terrific battering forced the game little end to quit the field. Battered and bruised and beaten, practically unable to longer withstand the fearful onslaught of the savage Yale interference, Teddy Roosevelt, Jr., was carried from Soldiers' Field yesterday, dazed and exhausted. It had taken the Yale men almost an hour to do up the valiant Teddy.

BROWN OVERWHELMS VERMONT.

Quakers Hardly Had a Look During the Game—Score 56 to 0.

Providence, R. I., November 19.—Brown overwhelmed Vermont by a score of 56 to 0. The "Quakers" hardly had a look-in during the whole 60 minutes of play, although Vermont once in the first half reached Brown's 11-yard line on two long returns by Woodard and Gerrish on trick plays. Brown was weakened by the loss of three regulars, but despite this fact the home eleven showed the best form of the season. If Vermont's men in the backfield had not fumbled Brown's kicks with such regularity, allowing Brown to either score or secure the ball close to the visitors' goal line, the score would have been greatly reduced. Russ played a star game, making five touchdowns himself. Long runs were made by Kirley, Raekle, Russ and Gerrish. The Brown team played very speedily, rushing Vermont off her feet with her varied and powerful attacks. The only fault in the playing of both elevens was the offside work. Both teams lost at least 40 yards in penalties. Brown scored four touchdowns in the first half and six in the second. Vermont was especially weak on the left side of the line, where most of the plays were directed.

BRONCHITIS

Rickert & Wells Tell the People the Quickest Means to Cure It.

Asked one day in their store the question, "What is god for bronchitis?" Mr. Wells of the above firm answered, "For years old fashioned cod liver oil has been known to possess the most remarkable curative and healing properties for throat, bronchial and lung troubles of anything known to medicine, but on account of the grease which enveloped its curtaive principles, it has been impossible for many people to take enough of it into their systems to combat a thoroughly settled disease without clogging the system and upsetting the stomach.

"Now, however," continued Mr. Wells, "we have Vinol, which contains in a highly concentrated form all of the medicinal curative elements of cod liver oil actually taken from fresh cods' livers, without a drop of oil or grease to upset the stomach and retard its work, and physicians agree that it is the greatest cure for all throat, bronchial and lung troubles known to medicine.

"Miss Anna Ray writes us that after suffering for five years with bronchitis, and trying all kinds of medicines without relief, Vinol cured her, and we have hundreds of just such letters.

"We wish every person suffering from chronic colds, coughs, bronchitis and every aged, weak or convalescent person who needs a healing, strength-creating and blood-making tonic would try Vinol on our guarantee to return the purchase money if it fails." Rickert & Wells, Druggists.

CLASS GAME A TIE.

Much Excitement on Norwich Parade Saturday.

Northfield, Nov. 20.—The annual class game between the Sophomores and Freshmen at Norwich university took place Saturday on the parade and resulted in a no score tie. This game was played in 25-minute halves, and it was the fastest and hardest fought game ever seen on the foot ball field. The teams were very evenly matched in weight, the Sophomores having the advantage only in experience. Both teams played with life and spirit from the start, there being much rivalry and class feeling between the two teams.

In the first half neither side had any advantage, both teams making line plunges first through right and then left side of the line for small gains. During this half neither goal was in danger. In the second half by a quarter back run by Hutchins for fifteen yards and line bucking and tackle back plays, the sophomores advanced the ball to the Freshmen's 1-yard line. It was at this point of the game when the crowd and the student body went wild with excitement. Hutchins twice tried to make the distance but failed, and Clarkson was called upon but was tackled for a two-yard loss. The ball went to the Freshmen, who advanced it to the center of the field when time was called and the score stood 0 to 0. Haight played the whole game for the Freshmen, never failing to make the distance when called upon. Clarkson and Hutchins did the most effective work for the Sophomores. The line-up:

SOPHOMORES		FRESHMEN
McCarty, r. e.		l. e., Howe
Wilder, r. t.		l. t., M. Carpenter
Chase, r. g.		l. g., Ross
Walden, c.		c., Cole
Brown, l. g.		r. g., Scott
Smith, l. t.		r. t., McGraw
Eaton, l. e.		r. e., G. Carpenter
Hutchins, q. b.		q. b., L. G. Chase
Clarkson, r. h.		l. h., Danver
Phelps, r. h. b.		l. h. b., Bayley
Barber, l. h. b.		r. h. b., Haight

Referee, Geo. Moore; umpire, Andrews; linesmen, Huntley and Watson; time, 25-minute halves.

PLAYED BASEBALL IN 1823.

John W. Oliver Goes Back of Chadwick's Date of 1839.

Yonkers, Nov. 20.—A difference of opinion as to the origin of baseball led Albert G. Spaulding of New York City, Samuel Winslow of Worcester, Mass., and Charles H. MacDonald of this place to pay a visit Thursday to John W. Oliver, the veteran editor of the Yonkers Statesman. Mr. Oliver is nearly ninety-years old, but is still active and at his desk every day. Mr. Spaulding had heard that the editor of the Statesman had played baseball long before there was any published record of the game. Henry Chadwick, who is considered an authority on the subject, has claimed that baseball developed in 1839 from the old English game of "rounders," while Mr. Spaulding is of the opinion that the game had its origin in the old colonial game of "one old cat."

Mr. Oliver said his recollection was very clear as to how the game was played from 1823 to 1833 in Baltimore. He said it was known as baseball at far back as 1823, and that the players ran bases just as they do now.

The Usual Way.

"I hear that Bingham has returned."

"Yes."

"What was the cause?"

"He had the easy job he had, and is compelled to earn the small wages he's now drawing."—Chicago Record-Herald.

FOR A SEA-LEVEL CANAL

The Consulting Engineers So Vote at Washington.

EIGHT FOR, FIVE AGAINST

The Canal Commission, the President and Congress Are Still to Be Heard From on the Question.

Washington, Nov. 20.—The board of consulting engineers of the Isthmian canal commission, by a vote of 8 to 5, Saturday placed itself on record as favoring the construction of the Panama canal on the sea level. The decision represents the outcome of nearly three months' hard work. Early in September the engineers gathered from all parts of the world, for the president, desirous to avail of the best talent, as well as to avoid adverse foreign criticism in the future, had called upon the governments of five great nations, distinguished for the successful construction of great hydraulic works, each to send one of its best engineers to assist the American engineers in the decision of the momentous question of constructing the Panama canal at sea level, or at a greater altitude, involving a system of locks.

The decision was reached about noon, and thereby the board practically concluded its labors. There will be a few more meetings this week, simply to deal with small details and to put into permanent form the results of the board's protracted meetings. The foreign delegates desire to leave for their homes by the 27th. To accommodate them in this the full board has agreed that they may conclude some purely technical work connected with this project, such as the approval of certain minutes, and signature of papers at a special meeting to be held in Paris in December or January. It is expected that one of the American members of the board will go to Paris to wind up this business, all of which must be done before the final report of the board can be regarded as complete and ready for submission to the isthmian canal commission.

The commission in turn must record its own judgment upon the conclusions reached by the board of engineers, and there is even now a belief current that that judgment will be adverse to the board's plan. However, there are two more important steps, at either of which there may be great changes proposed, for the commission must pass the plans and its own recommendations to the president, who in turn must stamp them with his own approval or disapproval and forward them to Congress, which after all will be the court of last resort as between the sea level and lock canal projects; simply through the fact that additional legislation will be necessary if a sea level canal is to be built for the board finds that such a canal will cost from $71,000,000 to $100,000,000 more than the cheapest practical lock, and will consume from five to seven years more in the construction.

DEATH AS CARS STRUCK.

Motorman Killed and About 30 Passengers Injured.

Springfield, Mass., Nov. 20.—Two cars of the Springfield & Hartford trolley line collided head-on at a curve in Longmeadow, four miles below this city, at 2:10 o'clock Saturday afternoon, and Motorman G. A. Charen of this city received injuries from which he died two hours later, and about 30 passengers were injured, some of them seriously.

SOMETHING DOING IN HALLOWELL.

An Up-to-date Plant with Modern Appliances and Good Ventilation.

The C. E. Taynton Co., granite dealers and quarry owners of Hallowell and New York, are to construct a modern working plant on Wilder Point, Hallowell, says the Granite Cutters' Journal. This will be a welcome and Hallowell people are naturally elated in contemplating the prospects of improved trade. The proposed location is the point above Hallowell, for many years occupied by the Wilder Factory. The tract extends north and south about one thousand feet bounded by the Kennebec River on the east, and the tracks of the Maine Central on the west. The area is entirely adequate to meet all future as well as present demands of the company.

The large building will be 406 feet long by 60 feet wide. From ground level to eaves will be 30 feet, making the building over 40 feet in height from the ground to apex of the roof. A motor electric overhead travelling crane, with a capacity of twenty tons will be installed, and the track will extend the entire length of the building. The manufacturers of the crane have considered the element of safety with regard to capacity of the machine accrediting the same at twenty tons. The rough stone work will be received at the end of the building and will be transferred as needed to other parts.

The cutting shed will be in the central portion, occupying about one-third and next in the north portion will be the room for surfacing machines and lathes.

Proper light and ventilation have been duly considered. There will be two sets of windows, one above and the other extending around the building on every side. The lower windows will be 6 feet high and 3 feet wide. The windows above will be of smaller size but will be provided with hinges. There will be about 40 windows in all. In addition to the ventilation thus provided there will be three roof ventilators of large size. The east elevation of the building will have wings extending at right angles from the main building, about one-third the distance from each end, 28 by 60 feet in size. The north wing will provide for the grinding room and blacksmith forges, with electric motor for power. The south addition will contain the air compressor which will furnish the power for the pneumatic tools. South of this addition and at a lower level wil be located the steam plant which in the cold months will supply steam to the radiators in the main building. Heat will keep the frost out of the stones and incidently out of the men. The plant will be piped for a supply of water from a spring which the company owns. Proper sanitary appliances are to be provided.

As to the shipping facilities a spur track will extend south from the eastbound track and will enter and cross the south portion of the main building. Cars may be loaded inside of the building. Granite may be unloaded by the electric crane and no derrick will be used. A dock will eventually be built at some convenient point where stock may be transferred from the shed with only one handling.

Fido Rode Inside.

"It is against the rule to permit dogs to ride in the cars," said a conductor on the Rockhill line yesterday, "and there is a woman living out south who doesn't like the order. Several times in the past few months she has boarded my car with her little dog. I have always kept the dog out here in the vestibule and she has been mad at me for it. Last week I suggested that she leave the dog at home when she had to use street cars. Monday she boarded my car. The dog was nowhere to be seen, but the woman held a bundle wrapped in a newspaper.

"'You won't have to keep Fido out in the vestibule this time,' she said to me.

"'So you left him at home, did you?' I replied. She simply smiled. At Eleventh and Grand she left the car. As she stepped from the platform she began tearing the paper off the bundle. Fido was in it.

"'Fido rode inside your car,' she said, with an air of triumph.

"'All right,' I replied, smiling. 'If Fido hasn't any kick coming, I guess I haven't.' Then that woman actually made a face at me."—Kansas City Times.

If You Suffer

From Germ Troubles, Please Learn What Liquozone Can Do.

Thousands who were sick—like you, perhaps—are well to-day because of Liquozone. Many had doctored long. Many were discouraged because other treatments had failed. But they were treating germ diseases with remedies which do not kill germs.

We offered to buy them a bottle of Liquozone—just as we offer you. They did with it what other remedies failed to accomplish. And those countless cured ones — scattered everywhere — are now telling others what Liquozone has done.

Kills Disease Germs.

Contact with Liquozone kills any form of disease germ, because germs are of vegetable origin. Yet to the body Liquozone is not only harmless, but helpful in the extreme. That is its main distinction. Common germicides are poisons when taken internally. That is why medicine has been so helpless in a germ disease. Liquozone is exhilarating, vitalizing, purifying; yet no disease germ can exist in it.

The virtues of Liquozone are derived solely from gases. They are generated from the best germs of oxygen, sulphur dioxide and other germicidal gases. The process of making requires large apparatus, and from 3 to 14 days' time. The object is to so fix the gases, and to combine them, as to carry into the system a powerful germ-germicide.

We purchased the American rights to Liquozone after thousands of tests had been made with it. Its power had been proved, again and again, in the most difficult germ diseases. Then we offered to supply the first bottle free in every disease that required it. And ever one million dollars have been spent to announce and fulfill this offer.

The result is that 11,000,000 bottles have been used, mostly in the past two years. To-day there are countless cured ones, scattered everywhere, to tell what Liquozone has done.

But so many others need it that this offer is published still. In the last few years, science has traced scores of diseases to germ attacks. Old remedies do not apply to them. We wish to show these sick ones—at our cost—what Liquozone can do.

Where It Applies.

These are the diseases in which Liquozone has been most employed. In these it has earned its widest reputation. In all of these troubles we supply the first bottle free. And in all—no matter how difficult—we offer each user a two months' further test without the risk of a penny.

Asthma	Goitre—Bronchocele
Abscess—Sinuses	Gonorrhœa—Gleet
Bronchitis	Hay Fever—Pollenosis
Blood Poison	Lumbago
Bowel Troubles	Leucorrhœa
Coughs—Colds	Malaria—Neuralgia
Consumption	Piles—Quinsy
Contagious Diseases	Rheumatism
Cancer—Carcinoma	Scrofula—Syphilis
Dysentery—Diarrhœa	Skin Diseases
Dropsy—Dandruff	Tuberculosis
Eczema—Symptoms	Tumors—Growths
Fever—Gall Stones	Throat Troubles

Also most forms of the following:

Kidney Troubles	Liver Troubles
Stomach Troubles	Women's Diseases

Fever, inflammation or catarrh—impure or poisoned blood—usually indicates a germ attack.

In nervous debility Liquozone acts as a tonic, accomplishing remarkable results.

50c. Bottle Free.

If you need Liquozone, and have never tried it, please send us this coupon. We will then mail you an order on a local druggist for a full-size bottle, and will pay the druggist ourselves for it. This is our free gift, made to convince you to let the product itself show you what it can do. In justice to yourself, please accept it today, for it places you under no obligations whatever.

Liquozone costs 50c. and $1.

CUT OUT THIS COUPON

Fill it out and mail it to The Liquozone Company, 458-460 Wabash Ave., Chicago.
