Weekly Citizen

ALBUQUERQUE, -- OCT. 12, 1895.

From Thursday's Daily

D. G. Miller, of Lamy, is registered at the Armijo.

Mrs. Lacey, of Los Angeles, is among the guests of the Armijo.

J. Fischer and wife, first-class people from the north, are at Sturges' European.

H. W. Loomis, deputy United States marshal, came down from Santa Fe last night.

J. L. Lamb, of Rowe, N. M., arrived last night from the north and is at Sturges' European.

Chas. E. Hill, traveling auditor for the Atlantic & Pacific, came in from the west last night.

George C. Cabell, of San Francisco, representing a big wholesale wine concern, is in the city.

Rev. Bovard and family left for Chama, Rio Arriba county, where they will visit for about ten days.

Mrs. F. M. Jones, wife of the proprietor of the Zeiger Cafe, was a passenger for Santa Fe last night.

Jefferson Raynolds, the dudeist, who was at El Paso, passed through the city for Las Vegas last night.

Mrs. C. E. Michael, registering from Atchison, Kansas, is in the city and is stopping at Sturges' European.

W. L. Trimble left this morning for Thornton, and from there he goes to Bland, Cochiti mining district.

District Attorney L. S. Walkerson was initiated last night into the mysteries of the Nobles of the Mystic Shrine.

C. M. Postman, who represents a Louisville, Ky., wholesale liquor house, is here to-day, interviewing his customers.

F. M. Murphy, president of the Santa Fe, Prescott & Phoenix railroad, passed through the city from Prescott this morning for Chicago.

R. B. Burns, superintendent of the Atlantic & Pacific water service, headquarters at Williams, was a passenger to the city last night.

J. E. Saint and wife, who attended the Old Timers' reunion at Hillsboro, where Mr. Saint is interested in mining, returned home last night.

James Cooper, of Quincy, Ill., a city that has quite a number of former citizens in Albuquerque, registered last night at the San Felipe.

W. C. Hadley left this morning for Raton, and will probably continue his trip on to Denver, where he has some business which needs his attention.

S. T. Meyers, a well known citizen of Kansas City, was a passenger from the north last night, and can be found at the San Felipe for the next few days.

Joseph Kahn, storekeeper for the Atlantic & Pacific and president of the Albuquerque board of education, returned to his office last night after a trip west over the road.

Joseph De Rosear, the Atlantic & Pacific agent at Holbrook, arrived from the west last night, being met at the depot by his wife, who has been here visiting the past few weeks.

West, Bruton, a well-known cattle raiser of Socorro county, also in the meat business in Socorro, left this morning for Denver. Mr. Bruton came up to the metropolis several days ago.

Ed. O. Hughes, special agent and adjuster for the Palatine Fire Insurance company, who was here yesterday, the guest of W. W. McClellan, left last night for the west. Mr. Hughes' headquarters are at Denver.

Ned Gold, city marshal of Santa Fe, who attended the Territorial Fair in this city and received courtesies while here, remembered George M. Cundiff by sending the latter a box of mixed fruit, which was received this morning.

Capt. Carpenter and John Corbett, of Deming, passed through the city last night on their way to Santa Fe. Capt. Carpenter has the beef contract at Fort Bayard, and besides is a prominent cattle raiser of northern New Mexico.

Jacob Loebs, of the Southwestern Brewery company, has gone to Cincinnati, Ohio, and will be absent about two weeks. When he returns Mrs. Loebs and the children, who are visiting Ohio relatives and friends, will accompany him home.

W. G. Wilson, of Denver, is at the San Felipe. Mr. Wilson informs THE CITIZEN that the Mountain and Plain Festival, which opens in Denver on Oct. 16th and continues for three days, will be the biggest thing Denver has ever given, and it is his opinion that the Festival will be largely attended.

W. E. Dame, of Cerrillos, came down to the metropolis last night and returned home on the No. 1 passenger train this morning. Mr. Dame stated at the depot this morning that the smelter project for Cerrillos is a sure go, and that the projectors are men who have means and who will push matters to a satisfactory conclusion.

Judge Sterry, the hard-working general counsel for the Atlantic & Pacific who is at Chicago on legal business, writes that he will probably be detained away from his local office for several weeks yet. The traffic suit comes up in St. Louis on the 16th inst., and Judge Sterry will, of course, have to be in attendance.

Dr. C. G. Duncan, of Socorro, came up to the metropolis last night, and attended the meeting of the Shriners at the new Masonic Temple. The doctor gives the encouraging news that the mining industry of Socorro county is improving, and that a revival of mining is very perceptible in the Kelly, Magdalena and other mining districts of that county.

Major Van Doren and W. F. McLaughlin, of Blue Water and Fort Wingate, out on the Atlantic & Pacific, and both interested in the Blue Water Irrigation and Improvement company—a company which has under cultivation many thousands of acres of land—arrived in the city last night. Major Van Doren states that the whole country west of Albuquerque and especially in the vicinity of Blue Water and Fort Wingate looks fine from the recent rains.

Dr. Haynes, the city physician, has two cases under his care. Chas. Tracy, who was shot in the right hand in Dayton, Ohio, about six weeks ago, yesterday applied to the shelter for treatment. T. J. Sherratt, a transient, himself accidentally fell to the left thigh above the knee with a knife at Laguna yesterday. He arrived in the city this morning and his wound was at once dressed by Dr. Haynes. Sherratt was a sailor up from about Cape Horn, and is making his way home to San Francisco.

Joseph Mondas recently purchased a fresh load of cattle from Capt. Vail of Fortuna, Arizona. Mr. Mondas came up to the city last night to see to it that the live stock agent, leaving the cattle at San Marcial, and continued on to Jersey City, Kansas, this morning. The cattle will arrive from the south this afternoon.

Luis Gonzales, a witness in the U. S. calaboz case, who was arrested here the other day, and held in the county jail, will be taken to Santa Fe this evening by deputy United States Marshal Boomer.

It is learned that dysentery is very bad among the children of old Albuquerque and other towns adjacent to the city. The undertakers have had several cases the past two or three days.

F. A. Potter, chief clerk of railway mail service at Denver, is in the city holding an examination of the postal clerks. He is the guest of Postmaster Grunsfeld.

Dr. Tarcher and George Williams, the druggist, have gone out to the ranch of James Stradley, where they will remain a day and hunt for the next week.

Andrew Sparks Egger, the bright ten-year-old son of John Egger of this city, died at St. Marys, Kansas, of diphtheria. He was a promising student.

John Berry, the First street druggist, went up to Cerrillos this morning and will return this evening.

HYMOR SHEATS.

Dr. H. C. Hymor and Miss Mabel N. Sheats Will Be Married This Evening.

At 6 o'clock this evening, Dr. H. C. Hymor, Atlantic & Pacific surgeon at Needles, California, will be joined in matrimony to Miss Mabel Sheats, one of the most popular young ladies of Albuquerque, at the residence of the bride's parents, on the corner of Seventh street and Coal avenue. The wedding is to be a strictly quiet affair, and there will be no guests except relatives and a few intimate personal friends. The Rev. Mr. Allen, of the Congregational church, will officiate, the ceremony, and after the ceremony and an informal supper, the newly wedded pair will take the evening train for the east. They intend to go from here to Omaha, and after a week's visit there will come back as far as Kansas City, where they expect to make their home. The best wishes of a large circle of friends, for their future happiness and prosperity, will go with the doctor and his bride, to their new place of residence.

WAS HE A FORGER?

The Check of Arthur Murray, Left to his Wife, Returned "No Good."

The suicide of Arthur Murray, which sad event occurred in this city on last Thursday night, THE CITIZEN at the time devoting considerable space to the account, is no doubt still fresh in the minds of our readers; but few thought, when they perused the article, that the newly wedded husband, whose marriage had occurred only a month before he took his own life, would prove to be a forger.

In one of his letters, left behind to his wife and to the local A. O. U. W. lodge, was a check for $410 drawn on the Arizona National bank of Tucson, Arizona, in favor of Arthur Murray, signed by E. A. Cutter, a merchant of Bonita, Arizona, and endorsed on the back to his wife, Laura C. Murray.

After the inquest upon the body of the suicide, Justice of the Peace Wagg presented the check to the bereaved wife, and she took it to the First National bank for collection. Yesterday the bank here telegraphed to the Arizona bank regarding the check sent to them for payment, and in response received an answer that the check had been returned to the bank here and that it was "no good."

This morning the check reached the First National bank, and a slip of paper attached to the check pronounces "it a forgery," thus confirming the dispatch of yesterday.

When the Arizona bank informed Mr. Cutter, the Bonita merchant, that his check for $410 had been received, he emphatically declared that his name was forged to the check, and, of course, ordered the bank to refuse to pay same.

THE CITIZEN learns that Mrs. Murray, on the supposition that the check was genuine, borrowed some money, but, as the $2,000 insurance on the life of her husband in the A. O. U. W. is pronounced good, she will be able shortly to liquidate all her obligations.

THE CITIZEN has received the official circular announcing the appointment of John C. Mutt, formerly of this city and Gallup, chief dispatcher for the Chicago & Eastern Illinois railroad, with headquarters at Danville, Ill., who will have charge of and be responsible for all wires on the system. This position was formerly held by A. S. Lowsley, who resigned.

Cure For Headache.

As a remedy for all forms of Headache Electric Bitters has proved to be the very best. It effects a permanent cure and the most dreaded habitual sick headaches yield to its influence. We urge all who are afflicted to procure a bottle and give this remedy a fair trial. In cases of habitual constipation Electric Bitters cures by giving the needed tone to the bowels, and few cases long resist the use of this medicine. Try it once. Large bottles only fifty cents at Dr. Thos. H. Burgess & Son's drug store.

SAN PEDRO.

Progress of the Camp—Mills to Start Up—News From the New Placers.

San Pedro, Oct. 8.—J. C. Bender is getting ready to put a number of men to work on the Gold-smith and Cuchilla claims, and as Mr. Bender intends milling some of the ore from these claims there will be work for some of the boys who have been out of employment for some time.

The lumber for the mill building is coming in every day from Skinner's sawmills, at the rate of 12,000 feet a day, and now there is lying on the ground here some 15,000 feet ready for wheel builders to commence sawing.

In the meantime, while Mr. Bender is getting ready on the south side of the mountains J. J. Keith is getting the machinery on the north side ready to start up in Wednesday, milling some 100 tons of ore for R. V. Anderson, who has a bond and lease on the fabulously rich gold mines on the south side of the Ortiz mountains.

The cockfights had a great fiesta last Thursday in honor of the patron saint of the town, "San Francisco." The parish priest of Peña Blanca and his assistant, Jesus Tapia, officiated. The day was very wet and rainy, but that did not prevent the procession from going around the main streets of town. After the procession the new mayor-domos were named, and in the night two balls were given to complete the program.

Last Monday it looked as though the Chinese war had struck town by the number of shotguns in town, but upon inquiry made by your correspondent, he learned that Tom Tucker, the first deputy sheriff of Cunningham, and a posse had arrived from the ranch where they had been after Pedro Garcia and his partner, and after partaking of a few drinks of Jack's best, their brains were so affected that they began to see Pedro Garcia all over town and commenced firing at him until all their ammunition was fired off. This is the first time Golden has been painted red to officers of the law, but nothing will be done about it, because the parties who did the shooting are democrats, and anything is "O.K." if done by democrats. Had they been republicans, you would have heard the wail ringing all over the territory about it. Keep up your flag, boys, but it may be the last chance you will have to work such outrages.

The new placer discoveries made a few weeks ago in Pedro Arando, east of town, have caused all the Mexican "Sombreros" to leave San Pedro and Golden, and they have gone to the new placer fields to look for the precious metal.

Your correspondent doesn't go much on the new discovery, but he was told that Pablo Arando washed out enough gold in two weeks to start up a store in town, and last week he bought from Morris, Bibo & Co., of Bernalillo, quite a bill of groceries and he is now another Golden store keeper. But I would not advise anybody from your vicinity, or elsewhere, to come in to the new strike, for it is likely to be a fake more than anything else.

PEDRO.

THE SILVER CITY KILLING.

Brief Sketch of the Murderer and the Man Killed.

THE CITIZEN yesterday gave in a special dispatch, the shooting and killing of Chas. L. Cantley, marshal of Silver City, by James Fiedler, a young lawyer of that town. The following is a brief sketch of the two men:

James Fiedler, Cantley's slayer, is a young attorney of brilliant attainments and highly esteemed, particularly throughout the southern half of the territory, where he is better known. He is a brother of the late Lilis L. Fiedler. They formerly resided at Deming, but for some ten years past Mr. Fiedler has made his home at Silver City. He is a native of Georgia, and is married, having led to the altar about three months ago the accomplished daughter of Hon. James Upton, at present a member of the Grant county board of commissioners.

Chas. L. Cantley was a native of Texas and leaves a wife and one child, a little daughter, aged 5 years. He also had long been esteemed as one of Grant county's best citizens. For some twelve years he had made Silver City his home, and for six years past he had served as city marshal. He had always been counted a first-class officer, yet he was generous and humane.

Both men were well known in this city, and among local attorneys regret is expressed at the bloody action of a member of the territorial bar.

Every mother should know that croup can be prevented. The first symptom of true croup is hoarseness. This is followed by a peculiar rough cough. If Chamberlain's Cough Remedy is given freely as soon as the child becomes hoarse or even after the cough has developed it will prevent the attack. 25 and 50 cent bottles for sale by Thos. H. Burgess & Son.

Beauties of California.

Just about the time the fleas in this locality are contemplating a much-needed rest, the mosquitoes are preparing to take up the work where they left it off. There is always something in this climate to keep the mind busy and the fingers active.—Los Angeles Express.

Southern Situation.

"The South Carolina Constitutional convention got all tangled up on the proposition to override the constitution of the United States by disfranchising its negro citizens and has taken a recess to give the delegates time to think the matter over."

The foregoing is from the Kansas City Star, an independent democratic journal, and expresses the situation in South Carolina exactly.

Death of Pezuti.

Antonio Pezuti died on Wednesday evening at 9 o'clock. The deceased was born in Campobusso, Italy, in 1853, and came to this territory in 1887. He owned a ranch north of old town, where he died. Mr. Pezuti leaves a wife and a large circle of friends to mourn his death. The funeral will take place at the Catholic church to-morrow morning, and the interment at Santa Barbara. The deceased suffered several weeks from disease of the kidneys and death was a happy relief.

Bragging.

Grier is said to be bragging that the governor dare not remove him. He intimates that he has enough damaging testimony to remove Thornton, and that he will use it if he is removed.

AN INDIAN'S JUSTICE.

His Abandoned Wife [illegible] and He Will [illegible]

[illegible]

There was no other person on board who knew much about navigation except the engineer, who, of course, could not undertake the task of conducting the barge to the place of destination. The second mate was a young man twenty years old, able to take the helm but ignorant of the process of making observations.

The captain's wife, therefore, assumed the command of the vessel, took observations, calculated the latitude and longitude regularly, maintained her place on the poop, and directed the course of the vessel. After exercising control for fifty-eight days, during which the vessel encountered violent gales and shipped heavy seas, she conducted the vessel, with its valuable cargo, safely into the port of Buenos Ayres. In this actual impersonation of the sweet little angel that sits up aloft to keep watch for the life of poor Jack," the captain of the Rebecca Crowell was indeed fortunate in his matrimonial venture.

HIS RELIGION ALL RIGHT.

It Was Just Kind That Was Necessary for the Occasion.

In the "Reminiscences of an Emigrant Milesian" is the following curious anecdote: Stack, formerly of Walshe's regiment, was among the officers of the Irish brigade who went on half pay at its dissolution. He had remained on half pay so long that he became the oldest colonel in the army. He obtained his promotion to the rank of major general after a somewhat curious interview with the duke of York, the commander in chief at that time. Having solicited the honor of an audience of his royal highness, he received an intimation that the duke would receive him at the horse guards next day. He was punctual in his attendance, and being introduced to the commander in chief was honored by the customary question:

"Well, colonel, what can I do for you?"

"I perceive, sir," replied Stack, "that there is a brevet coming out, in which I hope to be included. I am the senior colonel in his majesty's service."

"True, Col. Stack; but give me leave to ask you of what religion you are?"

"I am of the religion of a major general."

The duke bowed, and Stack was gazetted.

Petrified Oysters.

A bed of petrified oysters has been found on the top of Big mountain, just back of Forkston, Wyoming county, Pa. Some of the specimens are of mammoth size, one in M. Reynolds' possession measuring twenty-two inches long by nine inches wide and weighing forty pounds. The specimens range in all sizes, from this down to the ordinary edible oysters of the present time. Some of the specimens show the eye of the oyster perfectly, and in all of them the meat is easily removed from the shell. The bed seems to be confined to a small mound, resting on a small plateau, at the extreme top of the mountain, near the Sullivan county line.

Albuquerque is a prosperous city.

REFORM IN DANCING.

Planned to Have a More Uniform System Throughout the Country.

At the recent meeting of the National Association of Dancing Masters a movement has been started to establish a uniform set of dances for the entire country, so that a dancer will appear to as much advantage in one city as another and will not be embarrassed by the difference in the style of steps or by any sectional peculiarities. It is somewhat remarkable, says the St. Louis Republic, that this idea has never before occurred to the dancing masters, but now that it has been agitated it should be pushed forward until it is successfully carried out. Americans are recognized as far and away the best dancers in the world, partly because they are naturally graceful and agile, and partly because the national style of dancing, while it differs in particulars, is generally of a nature to enable a reasonably graceful man to make a good appearance on the floor. But while a man may be a good dancer in New York he may make a sad mess of it in Chicago or New Orleans, and vice versa. Not that the general principles of dancing are not the same, but because in different localities certain apparently trifling peculiarities of steps are allowed to creep in which confuse a stranger and often throw him out of step completely until he has mastered the local style. The St. Louis man finds that he has trouble in dancing with the Pittsburgh girl, and the Kansas City man confesses that it requires a good deal of patience to master the unaccustomed movement of the young lady from Boston. All four parties may be the most graceful and accomplished of dancers, but there is in each case that little distinguishing peculiarity, that bit of "local pride," as it might be called, which is annoying until the parties have danced with one another often enough to accommodate their steps each to the other. This is one of the difficulties in the art of round dancing which might be easily remedied by an agreement among the dancing masters to conform to the same steps and to popularize the same general styles of dances.

BICYCLE RACING UNPOPULAR.

Meets in Country Places Draw Only Small Crowds.

Bicycle racing in America is not a popular sport, and it never has been. It occupies a rather better position in the popular view than lawn tennis, but cannot compare with baseball or prize fighting. It has always been hard to get a crowd at a cycle meet, even in the days of pure amateurism, when every man brought out his friends and acquaintances. Perhaps if cycling were as dangerous as football and men were maimed and killed at every meet, more people would pay to see the fun, for Americans have a deal of the Roman in their makeup, or if men fell off their wheels in a dead faint, as is so often the case in boat racing, or if quasi team racing could be introduced, or if men could race standing, with either foot on the saddle of a bicycle; in fact, if any scheme could be evolved which would add more noise, bluff or spread-eagleism to the business cycle racing might become a success financially, but at present, outside of a few enthusiasts who really understand the skill and speed of the game, the average cycle meet audience might be attending a funeral or a suttee, so far as one could judge from the solemnity which they exhibit. Once in awhile, to be sure, when a well-known favorite or a couple of them make a game finish or produce a burst of extra speed in an effort to catch the leader of a handicap, there is a howl from club members or other misguided enthusiasts; but, as a rule, those who have spent their time and money to see the grandest sport on earth sit like animated manikins, with apparently no appreciation of the fact that they are watching the greatest speed-producing combination in the world—good bicycles and well-trained athletes.

A Molasses Pavement.

Perhaps the oddest pavement ever laid is one just completed at Chino, Cal. It is made mostly of molasses, and if it proves all of the success claimed for it it may point a way for the sugar planters of the south to profitably dispose of millions of gallons of useless molasses which they are said to have on hand. The head chemist of a sugar factory at Chino, Mr. E. Turke, was led to make certain experiments, of which the new sidewalk, a thousand feet long, from the factory to Main street, is the result. The molasses used is a refuse product, hitherto believed to be of no value. It is simply mixed with a certain kind of sand to about the consistency of asphalt and laid like an asphalt pavement. The composition dries quickly and becomes quite hard, and remains so. The peculiar point of it is that the sun only makes it drier and harder, instead of softening it, as might be expected. A block of the composition two feet long, a foot wide and one inch thick was submitted to severe tests and stood them well. Laid with an inch or so of its edges only resting on supports, it withstood repeated blows of a machine hammer without showing any effects of cracking or bending.

Queer Place for a Snake.

Not long ago, when a clothing house advertised a special reduction sale, Jacob Shaw, manager of the electric light works in Ellicott City, Md., bought an outfit for his little boy. The jacket included in the purchase was worn with the suit until, in the course of a month or so, the garment became unfit for wear and had to be put away. About it there was a most unnatural odor. There was no living in the same room with the boy and that coat. The other day Mrs. Shaw ventured to make an investigation, the offensiveness of the garment having somewhat subsided, when in the coat's lining, securely sewed in, were found the remains of a viper snake fifteen inches long. How the snake got there is a mystery of some sweat shop.

"I would rather trust that medicine than any doctor I know of," says Mrs. Hattie Mason, of Chilton, Carter Co., Mo., in speaking of Chamberlain's Colic, Cholera and Diarrhoea Remedy. For sale by Thos. H. Burgess & Son.

Masonic Banquet.

Temple lodge gave a banquet at their new hall last evening to the members of the grand lodge. There were about 100 Masons present, and the evening was pleasantly and profitably spent. The supper was excellent, and the new banquet hall was a scene pleasing to the epicure. F. H. Kent filled the position of toastmaster, and speeches were made by E. S. Stover, Dr. Harroun, Chas. Bowmer, Rev. W. B. Clayton, W. H. Seamon, R. C. Stewart, T. N. Wilkerson, E. E. Day, C. H. Spoteder, R. Murray, J. J. Kelly and Dr. J. H. Wroth. The festivities closed by the brethren joining in singing "Auld Lang Syne."

EUROPEAN GOSSIP.

Jean de Reszke and Sims Reeves first appeared as baritones and Marie as a baritone. Miss Calve, who is a pupil of M. [illegible], was at first thought to be a [illegible].

Osiris, [illegible] of the Hotel des Invalides is to be given up to the French department of war as a hospital, and in time the many departments will also be moved into the building, the invalid veterans being provided for elsewhere.

Loving cups in Jonquils have so far brought in a sum of 700 francs and seventy-three [illegible] in Paris. Of this sum "La Cigale" Madame Angot brought in 150 francs, "Le Petit Duc" 100 francs, and "Geroldo Geroldo" 250 francs.

Antonio Angelo Eccellenza, the tenor, is to be given in a French translation at a Paris theater next a year. A translation of his translation with the [illegible] time in the [illegible] is available at the Eden.

[illegible] are now [illegible] Paris streets [illegible] Hugh Jeffery [illegible] 78 [illegible] John Jeffery, age 91, [illegible] 87, John [illegible] and 57 [illegible] and has been hunted up [illegible] He took first [illegible] and for [illegible] and also [illegible] and geography [illegible] first prizes for [illegible] as but ended with honors [illegible].

[illegible] and fifty of the [illegible] in the Congregation of Avignon [illegible] and during the last four years including the Grand Bourbon [illegible] which [illegible] from the Seventh, Sixty and the [illegible] in bad condition. This [illegible] is said to have been covered with a liquid containing injurious chemicals.

ELECTRICAL SPARKS.

A test for the security of porous cells consists in filling the cell with [illegible] and taking the percent of [illegible]. The cells containing leakage to fifteen per cent in twenty-four hours.

A perfect vacuum is a perfect insulator. It is possible to exhaust a tube so perfectly that no electric machine can send a spark through the vacuous space. When the space is only one millimeter [illegible].

Iron has been as good a conductor of electricity as copper, says Prof. Alfred Daniell, we would probably never have known anything about electricity, for our attention would never have been directed to any electrical phenomena.

Fine resistance coils, for moderately heavy currents, hoop iron, bent zigzag shape, answers very well. One yard of hoop iron, one-half inch wide and 1/32 inch thick, measures about 1-100 of an ohm, consequently, 100 yards will be required to measure an ohm.

The voltage of a secondary battery must always be equal to or slightly in excess of the voltage of the lamp to be burned. For example, a twenty-volt lamp will require ten secondary cells, but ten cells will supply more than twenty lamps.

Compression of air increases its dielectric strength. Cailletet found that dry air compressed to a pressure of forty or fifty atmospheres resisted the passage through it of a spark from a powerful induction coil, while the discharge points were only 0.05 centimeter apart.—Scientific American.

CONCERNING BLOOMERS.

Astagain, when the bloomer woman goes into full effect, that deep mystery, the dress skirt pocket, will go out.—Washington Post.

Bloomers will never be made the ground for divorce. Wherever the wife wears trousers domestic affairs have reached a settled condition.—Washington Times.

The difference between ordinary trousers and bloomers is that bloomers do everywhere what ordinary trousers do only at the knees.—Milwaukee Sentinel.

Mr. and Mrs. John Quill had a quarrel over the matter of Miss Maggie Quill wearing bloomers, during which John lost his whiskers and Mrs. Quill was deprived of her alleged reason. This seems all the more strange inasmuch as gouquils are naturally bloomers. Perhaps after all, they are not so much John Quills as passion flowers.—Boston Herald.

The late Mrs. Bloomer is receiving posthumous glory to which she is not entitled. The bloomer costume of the woman who wheels is both good to see and comfortable to wear. If the good woman had devised such a costume she might not have been doomed to failure. Father Knickerbocker, however, in application of his name to a costume, gets no more than his fair show.—San Francisco Examiner.

POPULAR SCIENCE.

Paris has established a municipal laboratory for bacteriology in the old Lebon barracks, where analysis of suspected cases of diphtheria are made within twenty-four hours after the materials have been handed in.

A new lead for deep-sea sounding carries a cartridge which explodes on touching the bottom. A submerged microphone receives the sound, and the depth is estimated from the time occupied by the lead in sinking to the bottom.

According to Sir Robert Ball, a telegram sent at the usual rate would require seventy-eight years to reach the most distant telescopic stars. But the camera has revealed stars far more distant than these, some of which, if a message had been sent in the year A. D. 1—that is to say, 1895 years ago—the message would only just have reached some of them, and would be still on the way to others.

Dr. E. Taylor, formerly of this city, writes to B. Ruppe from El Paso, that he contemplates visiting City of Mexico.

PEST-KILLING INSECTS.

The Ichneumon Flies Which Do Away with Caterpillars.

A family of insects that are immensely valuable in killing the caterpillars that prey on the most luxuriant trees in the city, and in many cases have made them almost leafless, are the ichneumon flies. In appearance these insects are not unlike the mason wasps, with their slender waists and torpedo-like bodies, but they are perfectly harmless to man, though a terror to the caterpillar.

The webworm, says the New York Tribune, is one of the pests of the parks. This caterpillar is gregarious in its habits and spins a big web around the leaves it intends to eat. This is no doubt spun as a protection from the worm's enemies, but a Tribune reporter the other day noticed that an ichneumon fly had forced her way in, and every second one could see her dart out her ovipositor, or egg-laying tube, and puncture a worm, who would squirm up but the mischief was done. An egg had been laid below the skin, and when each of these caterpillars turns into a chrysalis that egg will hatch and gradually eat the pupa.

Another of the ichneumon flies was seen stalking the big and ugly looking caterpillar of the golden moth. The fly actually crept up to her victim on tiptoe along a small twig, for the caterpillar in self-defense can emit an acrid green fluid, and as it can swing around with great force, the fly has to be cautious. In this case the fly was successful. She got within striking distance and the next moment the big caterpillar was writhing in rage, but the egg had been laid successfully, and the fly was out of reach searching for another victim.

A big species of the ichneumon fly can often be noticed crawling along the dead limbs of the trees. Watch one stop. She has heard a worm boring its way in the center of the bough she was walking on. She is busy at once driving her needle-pointed ovipositor through the wood, and it is always with unerring aim. As soon as the borer is struck an egg is deposited. The chief victim of this most useful fly is the elm tree borer, that is doing incalculable mischief through a large region of this country. This pest was imported into this country only a few years ago, but has already made great inroads into the maples, sycamores and elms.

Prof. W. Beutenmuller, the entomologist for the American museum of art, remarked recently that probably there had never been such a pest of insects injurious to every sort of plant as this year, but at the same time insects such as the ichneumon fly and lady-bird, who prey on these bugs, have increased wonderfully.

Another probable reason why the ravages have been so bad this year is that the ordinary number of birds to be found in the parks all through the summer has greatly decreased, owing, no doubt, to the severe frosts in the southern states last winter, which killed thousands of birds that make their southern homes in the region above New York.

A Lover of Trees Tells Nonsense.

A Boston visitor at Warwick castle writes: "Henceforth I believe in aristocracy. It protects trees better than democracy. We have no respect for them, as a country. Our country is more haggled and slashed and cut up than England. Three months ago there was a great windstorm. At Charlescote and at Warwick and at all the large country seats great trees were torn up, and everyone looks at it as a great calamity and looks sad in speaking of it. When I think of the disgraceful destruction of trees near Boston in the past few years it makes me ashamed of our free country; it is too heartlessly, barbarically free. I would buy all New England if I could, own it all and keep the trees as it was intended they should be. I don't see that the houses of the poor in the country in England are any worse than our shanties."—Boston Transcript.

Where the Wheels Are.

Blevins—O, I have such a pain in my head! I wonder what can be the cause of it?

Bestick—Perhaps one of the bowlings has got hot.—Puck.

"Many of the citizens of Rainsville, Indiana, are never without a bottle of Chamberlain's Cough Remedy in the house," says Jacob Brown, the leading merchant of the place. This remedy has proven of so much value for colds and croup in children that few mothers who know its worth are willing to be without it. For sale by Thos. H. Burgess & Son.

Dobbins Did It.

Sheriff Cunningham's racers have scored a good record up the country since the Territorial Fair, says the New Mexican. At the Maxwell City Fair, Joe Baile won two races. At Trinidad he took second money, and Dobbins distinguished himself, winning in every race he contested. This was a surprise for the bookmakers, Heffner, of Denver, and Chas. Yondorf, of Albuquerque. In fact, they were flat broke by Dobbins' work. The horse is said to have won $4,000 for his backers. Archie Waldie, of Albuquerque, was the mount, and handled the horse well. Baile and Dobbins have gone to the Dallas fair.

TAKE STEPS

in time, if you are a sufferer from that scourge of humanity known as consumption, and you can be cured. Facts are the evidence of hundreds of living witnesses to the fact that, in all its early stages, consumption is a curable disease. Not every case, but a *large percentage of cases*, and we believe, *fully 95 per cent*, are cured by Dr. Pierce's Golden Medical Discovery, even after the disease has progressed so far as to induce repeated bleedings from the lungs, severe lingering cough with copious expectoration (including tubercular matter), great loss of flesh and extreme emaciation and weakness.

Do you doubt that hundreds of such cases reported to us as cured by "Golden Medical Discovery" were genuine cases of that dread and fatal disease? You need not take our word for it. They have in nearly every instance, been so pronounced by the best and most experienced home physicians, who have no interest whatever in misrepresenting them, and who were often strongly prejudiced and advised against a trial of "Golden Medical Discovery," but who have been forced to confess that it surpasses, in curative power over this fatal malady, all other medicines with which they are acquainted. Nasty cod-liver oil and its filthy "emulsions" and mixtures, had been tried in nearly all these cases and had either utterly failed to benefit, or had only seemed to benefit a little for a short time. Extract of malt, whiskey, and various preparations of the hypophosphites had also been faithfully tried in vain.

The photographs of a large number of those cured of consumption, bronchitis, lingering cough, asthma, chronic nasal catarrh and kindred maladies, have been skillfully reproduced in a book of 160 pages which will be mailed to you, on receipt of address and six cents in stamps. You can then write to those who have been cured and profit by their experience.

Trustee's Sale.

Whereas Laura L. Finke and E. D. Finke, her husband, did on and by a certain deed of trust dated April 2nd, 1892, and recorded in volume four (4) of trust deeds, on page 217, of the records of the county of Bernalillo, in the territory of New Mexico, in the office of the probate clerk and ex officio recorder of said county, convey to the undersigned, A. A. Keen, as trustee, the following real estate, lying and being in the county of Bernalillo and territory of New Mexico, to wit: Lot number eleven (11) in block seven (7), as shown and designated on the map of Hunning's Highland addition to the town of Albuquerque, made by Otto Dockmann, filed in the office of the probate clerk and ex officio recorder of the county of Bernalillo, territory of New Mexico, May 12, 1887, in trust to secure the payment of a certain promissory note, described in the said deed of trust, made by said Laura L. Finke and E. D. Finke, wherein they promised to pay L. M. McAllister the sum of one thousand dollars ($1,000.00), two years after the said second day of April, 1892, with interest at twelve (12) per centum per annum from date until paid.

And whereas, the said debt, represented by the said note, with interest thereon, is due and payable but is unpaid, and whereas, the holder of the said note, in accordance with the provisions of the said trust, on the 27th day of September, 1895, paid the sum of fifty-seven dollars and forty-three cents taxes on the said property which the said Laura L. Finke and E. D. Finke had neglected to pay whereby the money so paid became an additional indebtedness secured by the said deed of trust.

Now therefore, at the request of the legal holder of the said note, in accordance with the terms and conditions of the said deed of trust, and the power invested in me as trustee under the said deed of trust, I do hereby give notice, that, for the purpose of paying the principal and interest of said note, and the amount hereinbefore set forth as having been paid for taxes together with interest thereon, which indebtedness, with interest, will amount on the day of sale to the sum of one thousand, one hundred and nineteen dollars and sixty-eight cents ($1,119.68), and all costs and expenses attending the execution of said trust, and provided to be paid by said deed of trust, I will, on Wednesday, the 6th day of November, A. D. 1895, at the hour of 12 o'clock, noon, of said day, at the front door of the postoffice in the city of Albuquerque, in the county of Bernalillo and territory of New Mexico, sell the property hereinbefore described, or so much thereof as may be necessary to pay said indebtedness, and the expenses attending the execution of said trust, at public vendue, to the highest bidder for cash.

A. A. KEEN, Trustee.

Albuquerque, N. M., October 10, 1895.

Notice of Forfeiture.

To Claude Nadoe and M. S. Murphy:

You are hereby notified that I intend to do the necessary work required by law on the Lucky mine, situated in Hell canon, Bernalillo county, New Mexico, and that unless you pay your proportionate share of said expense you will come down any interest in said mine and mining claim. You are further notified that the cost of said work is one hundred dollars, and that the total expense to date is five dollars per day, and that the amount due from each of you, upon said work, is $33.33. Unless the same is paid on or before the 31st day of December, 1895, I shall consider that you have abandoned said interest in said property.

Dated at Albuquerque this 20th day of August, A. D. 1895. JOHN WICKSTROM.

W. C. HEACOCK, Attorney.

ENGAGED TO BE MARRIED.

James Grunsfeld and Miss Carrie Schutz Soon to be Wed.

This afternoon THE CITIZEN learned, from reliable sources, that James Grunsfeld, of the big wholesale dry goods firm of Grunsfeld Bros., this city, and Miss Carrie Schutz, of El Paso, are engaged to be married, the date of the happy event not having as yet been announced.

The prospective bride is a sister of Mrs. Noa Field and Mrs. Berthold Spitz, of this city, and is regarded as one of the nicest and most pleasant young ladies in the social circles of El Paso, where her father is a prosperous and well known merchant.

Mr. Grunsfeld, ever since he grew to manhood has been a favorite among not only the men but the ladies of this city, and, while some will read the announcement of his approaching marriage with great joy, others, no doubt, will feel that their best friend is soon to be weaned from them. Mr. Grunsfeld, in every sense of the word, is a true, liberal-minded westerner, with plenty of grit to make himself prosperous, and THE CITIZEN is pleased to publish this article of his engagement to such a worthy young lady as Miss Schutz.

BEFORE AND AFTER

MANHOOD RESTORED "CUPIDENE"

This great Vegetable Vitalizer, the prescription of a famous French physician, will quickly cure you of all nervous or diseases of the generative organs, such as Lost Manhood, Insomnia, Pains in the Back, Seminal Emissions, Nervous Debility, Pimples, Unfitness to Marry, Exhausting Drains, Varicocele and Constipation. It stops all losses by day or night. Prevents quickness of discharge, which if not checked leads to Spermatorrhœa and all the horrors of Impotency. CUPIDENE cleanses the liver, the kidneys and the urinary organs of all impurities.

CUPIDENE strengthens and restores small weak organs.

The reason sufferers are not cured by Doctors is because ninety per cent are troubled with Prostatitis. CUPIDENE is the only known remedy to cure without an operation. 5000 testimonials. A written guarantee given and money returned if six boxes does not effect a permanent cure. $1.00 a box, six for $5.00, by mail. Send for FREE circular and testimonials.
