He rode and informed the section foreman, who was employed about two miles away. The washout was about twenty feet in length, rails hanging in place and every train would have been ditched. The company should appreciate the services of Mr. Rector.

E. W. Clapp, who has been relieving G. L. Bugbee, agent at Benson, while he has been taking a vacation, has returned to Lordsburg and is again in charge of the Southern Pacific affairs. He reports that both the Bisbee road and the Nogales road are washed out for miles south of Benson. How many miles no one knows, for there had not been even a track-walker in there from below the wash. He thinks it will be at least a week before trains are able to get through.

R. B. Burns of the Santa Fe engineering department was here a few days and told of the new process of raising water at the railroad well at Yucca, a station half way between Needles and Kingman. The well is a drilled one, 588 feet deep, seven inches in diameter. The water is forced from the well by compressed air, a 20-house power engine furnishing the power. The tank is of steel, forty feet high and holds 60,000 gallons and it takes about six hours to fill. Air is forced to the bottom of the pipe in the well with less power than required to pump the water and is done at much less expense, there being no valves to get out of order.

Topeka, Kas., Aug. 1.

To the Honorable Mayor and City Council, Albuquerque, N. M.:

Gentlemen—I, as chief engineer of the Atchison, Topeka & Santa Fe Railroad company, do hereby request that an extension of time to January 1, 1902, may be granted by your honorable body to the existing contract between the city of Albuquerque and the Atchison, Topeka & Santa Fe railroad company for the construction of a viaduct over the tracks of the Atchison, Topeka and Santa Fe railroad at Coal avenue in your city.

This extension is requested on account of the existing strike among the steel workers. Owing to the strike the Missouri Valley Bridge and Iron works, with whom we have contracted for the erection of this viaduct, have been unable to secure from the mills some of the iron needed in the construction of this work. The bridge company assures us that they will use every effort to complete the viaduct within the shortest time possible and we will ask for no further time upon the same, providing the extension now asked for is granted.

Yours respectfully,

Reports from the Nacozari road, down in Arizona, tell of a general quitting of work by many of the employes of the road. It was not exactly a strike, although it had nearly the same effect. There was a cut in wages, which the employes did not like. Instead of striking for the resumption of the old pay and appointing arbitration committees boycott committees, preparing for a fight, and going through the usual program which usually accompanies a strike, they just quit, leaving the company to hire men to do the work at the price it saw fit to pay, if it could find such men.

An Old Friend

S. S. S. has been before the public for many years; from a small beginning, it has steadily worked its way to the front, and is now known in every city, town and hamlet in the country. Its staunchest friends are those who have known it longest and have witnessed its wonderful curative powers in their own families or among their friends and acquaintances. Grateful patients in all parts of the country tell of their restoration to health and happiness, and the testimony of these is the highest evidence of the medicine's worth. S. S. S. is more popular today than ever in its history—no other remedy stands so high, has ever given such perfect satisfaction or is so reliable in the cure of Cancer, Rheumatism, Catarrh, Contagious Blood Poison, Scrofula, Eczema, Psoriasis, Salt Rheum, Acne, or any disease that originates in the blood. Being strictly a vegetable preparation, you will find it agrees with you much better than a drug store concoction or any of the widely advertised potash and mercury remedies, which affect the bones, muscles and stomach, causing Rheumatism or Dyspepsia. If you have never tried S. S. S., you will be surprised at the immediate good effects, appetite increases; you grow stronger, and gradually but surely it drives out the poisons and restores the blood to a healthy condition. If there is a sore or ulcer on the body, it begins to heal around the edges, the discharge finally ceases and the place gets well; muscular and bone pains vanish, and the skin is relieved of all itching, irritating eruptions. Nervous, run down and anaemic people will find S. S. S. just the medicine they need, for blood poverty and idle nerves are responsible for their condition. For old people and children S. S. S. has no equal; being free from all minerals, it does not nauseate or have any injurious effect whatever, and keeps the blood in good condition, thus fortifying against disease. Experience teaches what is good and what is not good; this applies particularly to medicine, and S. S. S., a remedy that has retained the confidence of the people for nearly 50 years, must have merit—IT CURES, is the secret of its success. When you call for S. S. S. don't be persuaded to accept something else—there is no substitute for S. S. S. It is the only guaranteed purely vegetable blood purifier, and the safest and best for all blood and skin troubles. Do not let them force an inferior mineral remedy on you because there is larger profit in it. If you have any blood or skin disease, don't hesitate to write us about it; our physicians will carefully consider your case and advise you without charge. Book on Blood and Skin Diseases free.

Don't Experiment—Take S. S. S. for no sooner does it get into the circulation than the
