Roswell and the Pecos Valley Look Forward to Most Prosperous Season

Not Only the Waving Fields of Alfalfa, and the Orchards Laden With Fruit, but the Verdant Ranges, Where the Grass Grows Knee High, and Feeds Countless Cattle, Will Contribute to Make the Banner Year of a Steady Development for Dwellers on the Pecos.

(John T. Kelly, Staff Correspondent.)

Roswell, June 1.—The metropolis of the Pecos valley was never in better condition than at present. The prolonged drought has been broken to the great and endless joy and hence the stockmen, who are numerous here, have been filled with joy as they saw the copious showers early in the season with grass.

Although an increasing quantity of alfalfa fields and luscious fruits where the Pecos valley enters our wild, yet orchards, as in the Rio Grande valley, the cattle and sheep ranges actually play much to the wealth of Roswell especially when the season is proper from all it is this year.

Spring has run from summer over here without any Fall. Every thing and country in the high grades of this section, and consequently the fruit crop will be unusually large this year. The Roswell apple, known for its superiority, will be one of the most numerous and best advertising agents for New Mexico circulating in Europe and America next fall. The other fruit crops peaches, pears, etc., grown principally for home consumption, will also be larger than in past years.

The alfalfa crop, which is a staple one, is already taken moved to outside markets.

There are a number of large buildings being erected here at present. The Roswell Tribune has about completed its new home, a reinforced concrete building of ample dimensions for a high class printing and newspaper establishment. Rev. Mr. Allison of the M. E. church, South, Albuquerque, is putting up a reinforced concrete building, two stories, which, when completed, will be occupied by the Morrison Bros. as a dry goods store. The upper floor will contain offices. The Chaves county court house and jail buildings are under roof. This will be the handsomest court house building in New Mexico. Its cost will be $110,000. The new high school building, which will be ready for occupancy in the fall, will cost $60,000. The contract for the federal building was let on the sixth to Philadelphia contractors whose bid was $115,000. Their contract stipulates that the building is to be completed on August 1, 1912. It is expected that the cost of this building will run considerably over the contract figure at the time it is completed.

Interview With Prominent Citizen.

I had a very interesting conversation with C. A. Cahoon, cashier of the First National bank of this city, relative to present conditions here and the outlook for the fall. Mr. Cahoon's position in the financial world of this section makes him an authority on any subject pertaining to the welfare of Roswell and Chaves county. He has lived here for twenty-one years and has seen this town develop from a small village into one of the handsomest and most prosperous communities in the southwest.

Speaking of local conditions, Mr. Cahoon said:

"The livestock and farming interests of the Pecos valley are in better condition now than at any time in the past five years. The cattle market is falling high and the sheepmen have all reported the percentage of lambs unusually large this season. The sheep industry is increasing in this valley as the farmers of the plains have made it impossible for settlement to have large herds any more in the Roswell tributary territory. Prices of wool and sheep will be regulated this year, to a great extent, by congressional action on tariff schedules.

"Our fruit and jim crops promise well. We have about 1500 acres in bearing orchards in the orchardhead of Roswell and the trees are now heavily laden with fruit. The cooperage of apples from this same this year will, I think, break all previous records as the country has been most prosperous for such fruits. Our orchard acreage is being increased yearly.

"The alfalfa fields are in and excellent shape and the weather is ideal for the staple now growing almost daily. It is now selling at $9.00 to $10.00 a ton f. o. b. No. 1 Pecos valley alfalfa commands a higher price than that of any alfalfa grown elsewhere. Our people are proud of this fact and are determined that this enviable record shall continue. It is unnecessary for me to say varieties regarding the superiority of apples grown here since they are in such large demand."

Pumping

As in many other sections of the country irrigation as the pumping process is attracting much attention in the county about Roswell at present. On this new method of irrigation Mr. Cahoon said:

"Seven thousand acres of a body of land consisting twelve thousand acres is now being prepared for irrigation by pumping for the Berrendo Irrigated Farms Co. The land which will be supplied by irrigation by the pumping process is just above the irrigating ditch and close by the town. Twenty-five hundred acres of this land have been sold. The pumping process is undoubtedly going to be the salvation of our valley and it will enhance the price of our cultivated lands by thousands of acres. It has been demonstrated as practical, particularly in this section where there is an artesian pressure to force the water up close to the surface. On the land I have mentioned the water is pumped from twenty-five to forty feet.

"Power is supplied by the Roswell Gas & Electric company, at four cents per kilowatt hour. This company is now installing new apparatus in order to accommodate our patrons who will want to use electricity for pumping. They are installing three large gas engines with producers north which will give them an increased capacity of 1,500 horse-power. This plant will be made soon complete in order that it may furnish the requisite amount of power at a minimum cost to the numerous pumping wells which will be drilled in this curtain in the next few years. Accommodations have been provided for the installation of another engine of 900 horsepower when the time comes to again increase the capacity of the plant. Exclusive of the Berrendo land there are now thirty miles of wire in this vicinity used to convey power to pumping wells. There are about 15,000 pumping acres near Roswell. The average pumping well in this section will furnish 1,000 gallons a minute. On the Berrendo property six inch American centrifugal pumps are used with Westinghouse motors of twenty-five and thirty horse power. Of course, wells are being pumped here successfully and satisfactorily by gasoline and other engines. The Berrendo pumping land sells for $125 to $250 an acre after it has been prepared for irrigation. Until the pumping process was introduced the land outside of the artesian belt had an uncertain value. Now its value is becoming fixed and is thereby adding considerable wealth to the county.

Artesian Wells.

"It is just twenty years ago," continued Mr. Cahoon, speaking of the artesian flow of this section, "since the first artesian well was drilled here and it was ten years later before we realized the wonderful developing influence which was to come to us upon the discovery. It can be said that practically all the development which is seen in valley and town has been made in ten years. There have been ten busy years for the people of the town, but no stranger has yet come among us who has not said that we wrought well in that short space of time."

Albuquerque Capital Here.

M. R. Summers, assessor of Bernalillo county, and F. B. Schwentker, general agent of the Pacific Mutual, together with California capitalists, have just purchased 2,000 acres of land about ten miles from Roswell. They have incorporated under the title of the Pecos Valley Development company. It is their purpose to develop water on the land and then subdivide it into small tracts and place it upon the market.

Much favorable comment has been expressed here at the advent of Albuquerque capital in this field. It is an indication to the people of Roswell that capitalists of the Duke City realize that this valley is a good field for investment and it also indicates to them the fact that Albuquerque money can be had to aid in the development of any section of New Mexico.

ST. LOUIS HAS 180 DEATHS IN ONE WEEK

St. Louis, Mo., June 7.—The deaths reported in St. Louis for the week ending June 3 were 180, 17 less than the previous week, when the mark trembled to St. Louis values 181 deaths, or an increase of 28 over the previous week.

Among the deaths reported was one from sun stroke, scarlet fever took 7, diphtheria 5, pneumonia 20, and apoplexy 10.

There were 6 suicides, 2 homicides and 10 accidental deaths.

S.S.S. A GREAT TONIC AND BLOOD PURIFIER

There is one reason above all others which makes *S. S. S.* the greatest of all tonics, and that is because it is the most perfect of all blood purifiers. Any system which needs a tonic, needs a blood purifier, for it is impure blood which causes the weakened, run-down condition of the body. *S.S.S.* is made entirely of roots, herbs and barks, which possess not only strengthening properties, but at the same time are recognized as ingredients of the greatest value for removing every impurity, poison or taint from the circulation. *S.S.S.* improves the appetite and digestion, corrects stomach disturbances and steadily tones and builds the system up to perfect health. It adds to the blood the rich, healthful properties it needs, and in every way enables the system to stand the strain of the long, hot summer. *S. S. S.* cures all diseases and disorders arising from weak or impure blood. Book on the blood and medical advice free. *S. S. S.* is for sale at drug stores. *THE SWIFT SPECIFIC CO., ATLANTA, GA.*

A trio of bunnikers, who are to be seen in Matinee Girl Musical Comedy Company, which plays in Elks' Theater three nights beginning Thursday.

"MATINEE GIRL" IS POPULAR IN THE SOUTHWEST

Company Which Begins Three Night Stand Here Thursday in Elks' Has Made Hit All Along the Line.

There lines in the west within the months, and with greater attention each time their appearance in the record made in the Matinee Girl Musical Comedy Company, which is to stay at the Elks' theater three nights beginning June 8.

Never has an organization appeared made such a record as this in the metropolis.

Headed by Russell and Drake, who are supported by a sweet cast and with a chorus recruited from the front ranks of some of the leading New York companies of last season, these players are able to produce an entertainment that is beyond approach in the usual attractions that come through this section.

The resuffling is extremely natty and the scenes of the leading lady are exquisite. Paradise overtures will be a rare treat for the eyes of the local connoisseurs.

Another feature is the big party of pretty chorus misses who are wonderfully well drilled, attractive and attractive.

The Matinee Girl company is playing in Las Vegas tonight, having played an extended run in Pueblo and Raton.

BOLT STRIKES HOME NO ONE HURT

Santa Fe, N. M., June 7.—The home of Mr. Maxie Hess of this town was struck by lightning during the severe thunder storm that visited this section last week. Although the entire family was within doors at the time, all escaped for slight shocks.

The residence is a four-room adobe house with a concrete cap in the top of its roof. The lightning struck the five demolishing the top of it, and then the bolt separated a part of it, going down the inside of the house. The five demolishing the top of it, and then the bolt separated a part of it, going down the inside of the house. The effects of the rent were evident with broken and the lightning in the form of fires to the outside of the house. In the southeast corner of the house with a heavy gilt frame on the floor and the pictures were torn to ribbons while the frame was apparently not damaged. Mrs. Hess was about three feet from the door, with her back to it, at the crash came, but escaped injury. Mr. Hess, for another, was standing in the door about ten feet from the door, and outside of where struck, but he was in a big quilting and it helped to the load. In the south and covers the well were down to the tops of the room during but but enough to knock the paper off the wall. The bolt in the southwest corner seemed much stronger, tearing off more paper, scattering it over the room and ripping the boards badly. The lightning followed the piping to the northeast corner and jumped to the gas fixture that on the summer kitchen, followed the pipe to the stove, bore off a piece of linoleum on the floor and then went through the floor into the ground.

BIG ARTESIAN WELL FOUND AT LAKE ARTHUR

(Special Correspondence to Herald.)

Lake Arthur, N. M., June 7.—An artesian well was drilled in last yesterday on the farm of Winston, ten miles west of Lake Arthur, which flows 1824 gallons a minute. The well was drilled by T. A. Hunter & Co. of this town. The well is 12 miles from the Pecos river and is located in a section of the country that is very high. The depth of the well is 770 feet. The people of this entire section are pleased at this new evidence of the remarkable artesian flow of the country tributary to Lake Arthur.

FIFTY PER CENT GREATER AREA CULTIVATED

Professor J. D. Tinsley Says This Year's Farmed Acreage Exceeds Last Year's by One Half.

Las Vegas, N. M., June 7.—Prof. J. D. Tinsley, the noted "Pecos dry farming expert" who is touring the irrigation part of New Mexico in an automobile, was here Saturday of last week and reported the farming situation better than it has been for many years past. He says that there will be this year from forty to fifty per cent more land devoted to agricultural purposes than last year. Mr. Tinsley says that the farmers have already broken a much larger acreage and will continue to break more ground until the limit of the planting season has been reached.

Professor Tinsley stated that the wall that went up last year from the farmers of the farmers for year has changed this season to a shout of joy. In all parts of the territory indications point to a magnificent season for all kinds of crops. Professor Tinsley believes that even should dry weather come in July there is enough moisture stored in the ground to guarantee good crops. He says that the southern part of the territory has had a little more rain than the northern part and that prospects for good crops in the former there are encouraging to a high degree. In the neighborhood of Roswell the farmers say the success of the season is now practically assured.

Caught in the act of removing articles of merchandise from the east warehouse of the Gross Kelly and company warehouses, late Friday night, Pedro Gonzales was placed under arrest by Santa Fe Officer Frederick. A trunk and wagon belonging to Gonzales were found a short distance from the warehouse and it is believed he was planning to remove a whole wagon load of merchandise. When arrested the man had already taken three rolls of barbed wire and a sack of corn. He was arraigned and committed to jail to await the action of the grand jury. District Attorney Ward represented the territory at the hearing. Gonzales, it is understood, has served a term in the territorial penitentiary.

In taking at the esteem and admiration which the men through their efficient work in capturing the kidnapers of Billy Noble Rogers, Captain Fred Fornoff and Adolphe Sena of the territorial mounted police, and Inspector Fox, who makes his headquarters in Dodge City, have been presented by the citizens of Las Vegas with handsome, silver silver mounted pearl handled Colt's six-shooters. The revolvers were purchased from money raised by subscriptions.

SIXTEEN FEET OF WATER AT DAM

Meloche Reservoir, Now Two-Thirds Completed, Already Impounds Waters Behind 1,100 Foot Structure.

Roswell, N. M., June 7.—The Meloche reservoir, which is now practically two-thirds on the way towards completion, has over 16 feet of water stored up behind its mammoth 1100-foot dam as a result of the abundant precipitation this community has been blessed with during the past week. The water extends back from the dam for a distance of fully half a mile, which is as large a quantity of water as the dam will be allowed to hold in its present state of construction, although the cement core has been built up to a height of 35 feet or more, a little more than half its intended height when completed. The large reservoir of flood water is already being drawn on to irrigate a considerable acreage that will be placed in cultivation during the present season. Eventually the big project will include the irrigation of 8,000 or 10,000 acres.

ARIZONA NEWS OF INTEREST

Condensed Paragraphs of the Happenings and Events That Are Making History in the Sister Territory.

At Nogales many curious articles pass through the United States custom house. Yesterday duty was paid on 105 pounds of fish bladders, valued at $105, consigned from Guaymas, Mexico, to a prominent Chinese merchant in San Francisco.

Saturday last at Congress Junction Undersheriff Raible overhauled two Prescott runaway boys and took them home. As they were hungry it is probable that they were glad to be taken back.

Jesus Melendez, editor of a Spanish newspaper at Phoenix left Sunday for Prescott to circulate a petition asking for the pardon of Vicente Lucero, now serving a life sentence in the penitentiary. Twelve years ago he was convicted in Prescott for the murder of William Wagner, but claims he did not do it. The convict is now in the penitentiary hospital suffering from tuberculosis.

Miss Lina Eldred is a recent arrival in Prescott from Naco, Ariz., where she was in charge of the public school during the second insurrecto trouble in Mexico.

There is to be the installment of pumps at the old Dominion mine, according to superintendent G. H. Dowell, vice-president of the mine. The April production was 2,215,000 pounds of copper, a little less than was produced in the two preceding months but the production for May will be larger than for the two preceding months.

Fire broke out at 2 o'clock Tuesday morning in the second story of the Lewis-Herman building at Phoenix just over the office in the northwest corner. Only a small amount of damage was done.

The Mohave board of supervisors has a standing reward of $500 for the capture of Quebo, an Indian murderer.

In Kingman, because they were caught gambling, two men were fined $100 each. It is not known whether they were playing faro, bridge, seventy-up or poker.

At Phoenix, in view of a large number of complaints which have been made of automobile speed maniacs, particularly on Center street, the city council has authorized the appointment of a motorcycle policeman for the enforcement of the speed ordinances.

Otis T. Winterholer died in the U. V. hospital at Jerome from injuries received while at work in the U. V. smelter. The remains were shipped to Joplin, Mo., for burial.

John B. Ard, aged 83 years, was found dead in his bed in Jerome a few days ago. He was a veteran of the Confederate army. Heart disease killed him. He was a carpenter by trade and had been at work the day before his death. He leaves a son who resides at Pueblo.

The mail route between Jerome and Camp Verde is to be restored in the near future.

The News states that the trouble at Jerome between the U. V. Copper company and the boilermakers has been settled.

In all probability the Phoenix high school will have a professional physical director next year who will have only one class to teach outside of his classes in football, baseball, basketball, track and tennis, and that class will probably be public speaking.

Grading has been started for a six-mile extension of the Arizona & Swansea railroad. The extension is to be from Swansea to the Moro mine, which is owned by the Clara Consolidated Copper company, and its ore is to be for hauling ore.

Mrs. Frank A. Hathaway died in Prescott a few weeks ago. She is survived by her husband and had been a resident of Prescott for many years.

Development work is to be resumed shortly on the property of the Inglenook Mining company, located near Squaw Peak.

The Parker Post of May 29 reports the Colorado river within one foot of its highest water mark. At this season of the year the river has the appearance of a veritable rapids, the water rushing down in huge volumes.

Tungro mine, better known as the old Hedges mine, near Oatlo, Yuma county, has suffered a very serious cave-in and is temporarily close. In the meantime ten miners are congratulating themselves that they escaped being the breaking ground caught them. For a distance of 300 feet the top level caved in to the second level and the two dropped upon the third.

The Arizona Blade-Tribune states that the farmers of the Casa Grande valley who are cultivating grain are harvesting from 60 to 70 bushels of barley and from 40 to 50 bushels of wheat to the acre this year, these figures being based on crops already harvested.

Prof. Robert T. Hill, a well known mineralogist, has announced that he has discovered in the mud volcanoes at the mouth of the Colorado indications of a gigantic subterranean lake of oil in that vicinity. He predicts that the Yuma vicinity will become one of the greatest oil sections of the continent.

At Mesa, says the Free Press, a Gila monster and a gopher were matched to fight and rushed together, each sinking its teeth into the other. Simultaneously they broke away; the gopher fell back and died in two minutes, evidently from poison.

Dr. D. Pentland, a pioneer dentist of Prescott, died suddenly at his home in Redlands, Cal., last week. His son, Walmot Pentland, left Prescott for California upon receipt of the sad news.

Last week J. H. Mettler of Jerome was adjudged insane and taken to the territorial asylum.

A company is making ready to bore for oil a short distance north of Winslow.

Williams had a snowstorm on the 14th of last month.

OFFICIAL NOTES OF THE CAPITOL

The Department of the Territorial Engineer Grants Long List of Water Applications; Big Sums for Treasury.

Santa Fe, N. M., June 7.—The department of the territorial engineer Monday took action on a great many applications which will be of interest to the irrigation public of the territory. The principal applications involved were several filings made on the Pecos river which had been received by Vernon L. Sullivan, territorial engineer on the 12th day of November 1910, in accordance with an opinion of the attorney general, stating that the waters of the Pecos were not subject to appropriation on account of prior notices of intended appropriation by the United States government for the Las Vegas Urton Lake and Carlsbad projects.

Applications 418, 419, 421 and 422 by the Fort Sumner and Pecos Land company, East Las Vegas, filed on March 17, 1910, were returned rejected, on the ground that in the aggregate that of applications 178 and 198 the same project was covered and that these last applications were superfluous.

Applications 196, 198 and 197 filed by D. J. McCune of Fort Sumner for waters of the Pecos river, for a total of 17,000 acres were returned by the territorial engineer rejected on the ground that in the approval of application No. 126 by D. J. McCune, calling for the relocation of 12,000 acres in the vicinity of Fort Sumner for the waters of the Pecos river and Alamogordo creek, on the grounds that the same territory could be covered as mentioned in the applications above referred to.

In the matter of application 295 in the Urton Lake, Lake and Water company of Santa Fe, New Mexico, and application No. 126 of D. J. McCune of Fort Sumner, the territorial engineer requested applicants to submit plans and specifications of the dams, dams, siphons, etc., to be filed within 60 days. The said plans covering a project which upon combination of the two above mentioned applications will form one large project. The Urton lake and McCune applications will be consolidated, therefore the plans and specifications will be approved for one large combined project and the acreage for each water supply is found available will be segregated by the combined parties, forming a new company under the provisions of the Carey Act, and will probably develop one of the largest Carey Act projects in New Mexico. As soon as these plans and specifications are filed and comply with the provisions of the law and requirements of the territorial engineer, same will be approved and the project started under the Carey Act provisions.

This combined project will take the place of the Urton Lake reclamation project, which has been on the waiting list of the government for funds for several years and the water claimed by the government in their notice to the territorial engineer having been formally released by the secretary of the interior, opens the way for the development of this project by the above parties without any interference from the government.

Application 424 by Andreas A. Jones East Las Vegas, is to be approved upon receipt of proper plans and specifications and adequate water supply records regarding this project. This project is to be developed on the Preston grant. Water will be appropriated from the Pecos river in the vicinity of Tecolotito. In the final approval of this application the appeal now pending in the district court will be withdrawn and the applications on the Urton Lake, McCune and Jones projects, will be approved subject to the rights of the Las Vegas district, the United States reclamation Carlsbad project, and others having prior valid rights to the use of waters described.

Application No. 327, by Hart C. Cleveland and E. H. Weatherhead of Mogollon for 1 sec. ft. of water from Indian Red Springs, western Socorro county, was approved by the territorial engineer for milling, mining and domestic purposes.

Application No. 312 by George K. Williams for 8 second feet of water from Four Mile Draw, Pecos valley for the irrigation of 580 acres, approved, cutting down to 5 second feet, continuous flow during irrigation season.

Application No. 134 by H. H. Jones, Santa Rosa, N. M., which has been pending in the office since February 24th, 1909, account of appropriation by the government on Carlsbad project, approved for the irrigation of 13,000 acres for power purposes, cut to 12 second feet continuous flow during irrigation season, and 43.5 second feet for power purposes, this project to cost $15,000 exclusive of power plant.

Application No. 170 by the Fort Sumner and Pecos Land company, for 9.42 second feet for waters of Pecos for the irrigation of 659 acres to cost $1,000, was approved, cutting down to 6 second feet, and made subject to the rights of the reclamation service Carlsbad project, board of trustees Las Vegas grant, and others having prior valid rights to the use of water from this stream system.

Application 130 by Fort Sumner and Pecos Land company for 17.42 second feet for waters of the Pecos river for the irrigation of 1342 acres, approved, cutting down to 11 second feet and with the similar proviso to that included under application No. 170.

Application No. 437 by L. A. Hughes and G. W. Pritchard filed April 11, 1910, for 500 second feet of waters of the Rio Grande river for the development of power purposes near the Cochita pueblo grant, to cost $25,000 was approved.

Application No. 419 by S. K. Normant of Santa Fe, filed May 12, 1910, for 800 second feet waters of the Rio Grande in the vicinity of Cochita Pueblo grant, for the development of power to cost $900,000, rejected on account of prior filings by Hughes and Pritchard for same location and water supply. This application was rejected with the privilege of reinstatement and probable approval in case applicants Hughes and Pritchard do not comply with the approval of the territorial engineer in the way of construction work within certain prescribed periods.

Governor Mills has appointed Joseph M. Cunningham of Carlsbad, Eddy county, a notary public.

Territorial Treasurer M. A. Otero has received the following sums for the treasury: Lee G. Pierson, treasurer of Quay county, $6,052.34; Gregory Page of McKinley county, $2,621.45; Jose E. Torres, Socorro county, $5,293.95; Camilla Sanchez, Guadalupe county, $4,531.76; Tito Melendez, Mora county, $3,851.17; Thomas McBride of Colfax county, $19,486.04 and Charles V. Safford, bank examiner, bank fees, $25, Game and Fish Warden Thomas P. Gable, $18.75.

The land entries at the Santa Fe land office Saturday were by Beulah M. Williams, Albuquerque; Belsor Gonzales, Albuquerque.

Articles of incorporation were filed in the territorial secretary's office by the Lamanex Mining company which has its principal office at Hachita, Grant county, and James Hartzog is named as the statutory agent. The amount of capital stock is $500,000 consisting of 500,000 shares at $1.00.

The Romero Trading company of Arizona was admitted to the territory. Its principal office in New Mexico is Rodeo, Grant county, and A. T. Peters is named as the statutory agent. The capital stock is $50,000 and the character of business to be transacted in New Mexico is general merchandise.

GEORGIAN CONQUERS DYSPEPSIA

Tried Many Physicians Without Relief. Now Well, Thanks to Peruna.

Mr. L. F. Verdery.

Mr. Leonard F. Verdery, Real Estate and Renting Agent, 419 Walker St., Augusta, Georgia, writes:

"With many others I want to add my testimonial to the wonderful good Peruna has done me. I have been a great sufferer from catarrhal dyspepsia. I tried many physicians, tried a good many springs, but I believe Peruna has done more for me than all of the above put together. I feel like a new person. I have taken the Peruna and Manalin together, and always expect to have a bottle in my home."

Catarrh Caused Deafness.

Mr. William Baker, Burton, Texas, writes:

"Some four years ago I lost the hearing in my left ear. I went to a specialist, who said it was caused by catarrh. I took a course of treatment for it and had my hearing temporarily restored. However, I lost it again in the same manner as previously.

"Now, I am happy to say, after following your instructions, taking Peruna every bottle is alike and using the nasal water gargle in connection with it. **I have recovered my hearing completely.** Accept my thanks for your advice. I shall sing the praises of Peruna whenever an opportunity is offered."
