PHARMACY BOARD OF STATE GRANTS THREE CERTIFICATES

The state board of pharmacy, which concluded a three-day session here today, granted registration to F. M. Delgado of Mondaloma and issued temporary certificates to A. E. Sher of Nara Visa and H. F. Poole of this city.

President E. G. Murphey of East Las Vegas, J. N. Zook of Santa Fe and B. G. Dyne of Las Cruces were the members attending the session, which was held in the law library building.

MORTUARY

Mrs. Victoria V. Merrifield.

Mrs. Victoria V. Merrifield, 73 years old, died yesterday at her home, 201 North Hill street. She came here fifteen years ago from Elkhart, Ind. One son, James H. D. Merrifield, survives. She was a member of the First Methodist Episcopal church. Funeral services were held at 3 o'clock this afternoon at C. T. French's chapel, Rev. C. D. Beckman officiating. The body will be taken to Elkhart for burial.

The Coming Baby! Hooray! Hooray!

Nothing else can so completely endear us to the present and the future as the expected arrival of a baby. But in the meantime the comfort of the mother is of vast importance. There is a splendid external remedy known as "Mother's Friend" which exerts a wonderful influence upon the expanding muscles. They become more pliant, stretch without undue pain, make the period one of pleasant anticipation instead of apprehension. In a series of splendid letters from women who tell how mothers felt of the great help "Mother's Friend" was to them, they gratefully tell the wonderful story of truly easy childbirth. Send to mother the gift of mothers—Get a bottle of "Mother's Friend" today of any druggist. Use it according to the simple directions and then when your baby comes rejoice with your husband and your doctor. For a free book of valuable suggestions to all mothers write to Bradfield Regulator Co., 206 Lamar Bldg., Atlanta, Ga. It relates the personal experiences of many happy mothers, it tells when baby comes that all pain should be relieved, it is of vital importance to every woman and her family, and an invaluable aid to her husband.

Sold by druggists for $1.00 per bottle.

WANTS NOTHING FOR FRANCHISES IN WATER DEALS

As Alternative to Flat Price Concern Is Willing to Abide by Appraisal Even if Less Than $400,000.

The formal written offer of the water company to sell its property to the city for $400,000 was received today by Mayor Westerfeld from President A. B. McMillen of the company. In suggesting appraisal if the price in the offer is unsatisfactory the water company agrees to expect nothing for its city and state franchises and to abide by the appraisal price even if lower than $400,000.

The offer in full follows:

May 12, 1916.

Mr. Henry Westerfeld, Mayor,
Albuquerque, N. M.

Dear Sir:—In answer to your request and the request of the water committee that I should fix a price upon the property of the Water Supply company will say that it is my judgment that the best way to handle the matter is to have it valued by competent, disinterested persons, but at the same time I am anxious to comply with all reasonable requests about the matter and will say that I would be willing to accept $400,000.00 in cash, or to take five per cent bonds at par for all the property of the Water Supply company except its private books and papers, and its accounts and bills receivable at the time of turning over the property, with the understanding however, that the outstanding accounts would be collected in the ordinary way through the office of the water department and turned over to us, and that the ordinary means of collecting such collections should be at our disposal until they were collected. The above proposition would include the following:

The reservoir, with about 24½ acres of land east of the reservoir.

The block of land bounded on the north by Tijeras avenue, on the east by Broadway, on the south by Haba's coal yard, and on the west by railway tracks, being about 1040½ feet, together with all wells and improvements, one 125 horse power Springfield boiler, marine type, one 150 horse power Springfield boiler, marine type, one Holly pump, one extra pump, coal house and other buildings.

The electrical pumping-plant at the corner of Mountain road and Fifth street, and lots 1 to 5 of the Romero addition. This last pumping plant is supplementary, and either plant will furnish plenty of water for the city with its present needs, except in case of emergency.

All pipe lines and service lines forming a distributive system of over thirty miles of pipes.

Total number of meters in service—something over 2,720.

Valves throughout the distributing system, ranging from 14-inch to 4-inch—about 140.

Two hundred forty-five fire hydrants connected with the distributing system, each with two nozzles, except the steamer hydrants, which have steamer connections and two nozzles for ordinary connections.

This also includes all supplies on hand, coal, variable. About four carloads of pipe, consisting of 10-inch, 8-inch, 6-inch, and 4-inch. One 65-horse power electric motor. One 15-horsepower electric motor. Two Ford automobile trucks.

And a large amount of supplies and tools that it is not practical to mention in this letter. A detailed list of inventory will be furnished at a later date.

Will also surrender the franchise and contract with the city which expires April 1, 1919, and the franchise from the state authorizing the use of the streets and alleys of the city, which expires May 28th, 1916. In fact, all property of the Water Supply company of every kind and nature, whether specifically mentioned or not, is included, except private books and papers and its accounts and bills receivable, the property to be turned over to the city free from all encumbrances.

I am willing to make the transfer on the last day of any month that you may select, and the amounts received to month include the water rentals up to the time of the last meter reading, which usually begins on the 10th and is completed in about one week.

As you are perhaps aware, the Water Supply company has on hand at this time a very large amount of pipe and meters which were purchased in anticipation of the great advance in prices of all metals we used by the water company.

If the price quoted should not prove satisfactory, as you I am perfectly willing to take the reasonable appraised value of the property of the water company as a going concern, such valuation to be made by disinterested experts upon such arrangement as may be fair to both the city and the water company, each party to abide by such valuation without regard to whether it is more or less than the above price of $400,000.

I wish also to state that in having the appraisement made I would not expect to have the value of the franchise and rentals from the city of Albuquerque, or the value of the franchise from the state authorizing the use of the streets and alleys of the city, included in the appraised value.

In case the city issues five per cent bonds I would agree to accept such bonds at their par value and accrued interest to date of delivery.

Yours truly,
A. B. McMILLEN,
President Water Supply Company.

Y. M. C. A. PAYMENT.

Bonds coupon have paid the first payment of the Y. M. C. A. Finishing and Fur nishing Fund which was due and payable May 1st. If you have overlooked paying yours please mail check at once or call at the Association Building and get receipt.

A. B. McMILLEN,
President Board of Directors.

ALBUQUERQUE NOW EQUIPPED WITH A MODERN CAFE

Public Discovers the Pullman Cafe at 118 West Central Is Up to the Very Best Standard.

During the past ten days Albuquerque people have waked up to the fact that in P. M. Lenkson's new Pullman cafe this city has a restaurant which is up to the very highest standard of the modern eating place. Patronage of the new Pullman has been going forward by jumps until the enlarged establishment is being taxed to serve its patrons. In remodelling his restaurant at 118 West Central Mr. Lenkson spared neither pains nor expense to make it a model of comfort, convenience and good service. He started with the decorations and employing expert decorators and interior finishers he has produced an interior almost striking and attractive. Both classic and pastoral scenes have been employed in the panels which line the walls and these are lightened and softened by a metal ceiling of artistic design. The Pullman, in fact, is one of the most attractive rooms of its kind in the whole west. Service at the Pullman is good. Buying is done by experts and with care and the markets best is always on hand. It is just what its enterprising proprietor claims it to be, "The best little restaurant in the best little city in the southwest."

STRIKING SCENES OF WAR AS IT IS TODAY IN EUROPE ARE SHOWN

War, real war, as it is fought today in Europe, is the subject of a striking film series shown today and tomorrow at the Kiehn theater. These scenes show war with the mask off, without glory, shorn of romance and pageantry. There is little in the pictures but the tragedy, the horror of it, and the defiant interest of the war, the tremendous momentum the war has gone, is actual action. How tanks look when bombarded, how a skirmish begins when shelled to the point of shaking and similar things.

Not that the pictures are devoid of interest—far from it. They have a distinct appeal to all who want to know what war really is. They are thrilling with a thrill that no more dramatic production ever could attain, for they show human beings in toils reverting to elemental clay.

Some of the most stirring pictures were taken from the deck of a Russian battleship, shelling a Turkish town. How that town crumbled beneath the bombardment and finally burst into flames, how the guns of the cruiser are operated, every detail that goes to make up the awe-inspiring scene is shown in these wonderful films.

The work of the cruiser's guns against a hostile vessel entering the harbor is shown. In the end the hostile ship shivers and sinks, crushed and broken by the fire of the Russian man-of-war.

Other interesting scenes are trench fighting, grenade throwing between the trenches, the wrecking of a huge steel bridge to prevent the advance of the enemy, French aeroplane guns in action, and many, many others of striking import and wonderful appeal.

Those who see this picture become people advocates before the first reel is shown and are ready to fight for peace before the end is reached.

MEETING AT CLUB MONDAY NIGHT OF VAST IMPORTANCE

Drainage Problem Biggest Development Question Before Albuquerque in a Generation; What It Means.

Drainage of the valley lands will be discussed at length at a mass meeting at the Commercial club Monday night. The problem of reclaiming soil from Alameda to Pajarito will be gone into thoroughly with E. G. Miller, government expert, who has been surveying the field, and County Agent H. F. Stewart leading the discussion.

President Chas. M. Carr and the other officers of the Commercial club urge every citizen of the city to attend the meeting. The drainage problem is the most important development question the city has had to consider in a generation and the Commercial club is anxious that its importance be realized and a proper interest taken in it among the citizens.

It is said that there are 25,000 acres of land now uncultivated and valued at $1,000,000, which with drainage would become worth $3,500,000. The land is now rated at $40.00 an acre. It could be drained for $20 an acre and increased in value approximately 100 per cent. Under cultivation the reclaimed land would add $500,000 in crops to the county resources each year, it is said.

A drainage petition addressed to Mr. Miller, will be held at Pajarito tonight and a meeting will be held at Alameda tomorrow afternoon.

MOBILIZATION OF NEW MEXICO MEN COMPLETED TODAY

Thousand Men From Towns of This State Concentrated at Columbus; Recruiting Progresses Rapidly.

(By Evening Herald Leased Wire)

Columbus, N. M., May 13.—Mobilization of the 1,000 men of the New Mexico national guard was completed here with the arrival early today of additional companies from Deming, Silver City, Clovis, Portales, Artesia and Carlsbad and a battery of artillery from Roswell.

The militia encamped on the southern extremity of the military reservation, consists of a skeleton regiment of infantry and the battery. Recruiting to bring the command to war strength is progressing rapidly throughout the state, according to reports today to H. T. Herring, adjutant general.

BUSINESS CONDITIONS AND WOOL OUTLOOK IN EAST FINE, SAYS KELLY

Harry W. Kelly, of the firm Kelly company, here today on a brief business visit, declared this afternoon that business conditions throughout the east are better than for many years. The outlook for a big summer and fall business in all lines, he said, was excellent.

Mr. Kelly recently spent sixty days in New York and Boston and in the latter city he says, the prospects for high prices for wool are unusually good.

ELEPHANT BUTTE DAM COMPLETED; BEGUN IN 1911

Main Feature of Great Reclamation Project Finished Today; Will Irrigate Nearly 200,000 Acres.

(By Evening Herald Leased Wire)

Elephant Butte, N. M., May 13.—Work was completed here today on the Elephant Butte dam, a United States reclamation project which dammed the Rio Grande river, forming the greatest human reservoir in the reclamation district. Construction began five years ago. The reservoir will feed an irrigation system that will water 185,000 acres in New Mexico, Texas and Mexico.

The dam blocks a canyon in the Rio Grande 120 miles north of El Paso. It is the fifth of the government's big irrigation projects and will store the entire flow and flood of the river. The reservoir will hold 1,000,000,000 cubic feet of water, which reclamation service reports, say, would cover the state of Delaware to a depth of two feet.

The dam stands 305 feet high and is 1,674 feet long. It provides a roadway across the canyon sixteen feet wide and is 30 feet at its base and 16 feet thick at the top.

The government before beginning the dam's erection built a town complete with modern conveniences such as electric lights, water and sewerage system, schools, hospitals, hotels and a theater.

BUCKMAN BRIDGE IS ISOLATED BY FLOOD

Santa Fe, N. M., May 13.—High water in the Rio Grande has cut the approach to the bridge at Buckman north of here, isolating the structure. Several bridges in the upper Pecos valley have been washed out. The Buckman bridge is expected to go out at any time.

THE majority of the older states have a law which stipulates the amount of fat ice cream offered for sale to the public must contain, exactly the same as our own city ordinance requiring so much butterfat in all city milk or cream. The highest percentage required in any state for ice cream is fourteen per cent.

Sunshine Ice Cream Contains 18% Butterfat

or four per cent more than the highest state requirement. Its value as a food product is based entirely upon its fat contents.

Why are we doing this?

Because we are not satisfied with a verdict of "JUST AS GOOD," but want it

Absolutely the Best
