EXCITING PERIOD NOW ON IN INTELLIGENCER'S CONTEST

Race Is the Closest Ever Observed by the Management of the Contest Department—Impossible to Pick Winners.

DON'T STOP TO REST NOW.

What did I do yesterday? This is a question that every fair-minded live contestant should ask herself. This is a battle of fame and fortune but it is measured nevertheless by the results you get day by day. It is not the contestant who works hard today and spend the rest of the time telling others what she has done that wins anything. It is the one who keeps at it and works every day and says very little to any one. Work is the only thing that will win, and a candidate must work to get the greatest results.

On the great clock of time there is just one word—"Now," and that applies to the ladies in this race who wish to be the winners of the beautiful prizes that we are giving the 12th of March.

The man who starts with nothing and works his way through obstacles, natural and artificial, to competency finds himself in a contest at every turn of the way. Measuring one's power with that of others brings out the best things in one. Many never know their power until they meet others in the affairs of life, and are made to measure their capacity with that of some other individual, who has his mind set on a certain goal.

In this great contest many have the chance to match their capacity against that of others, test the real depth of friendship of others. In this effort many are finding what they can do under pressure and are learning their capacity as they could not in any other field of effort. This is a training course in which strength and continuity are tested. The ones who stay to the finish will be the ones to carry off the honors and the prizes.

--Use--
Good Fertilizers

You can make better crops using our ready mixed goods than you can with your home mixed goods. In the first place in making your home mixed goods you get your ammonia from cotton seed meal, which is a good ammoniate, but it does not last long enough. About the time your cotton begins to fruit—take on bolls—your cotton seed meal is almost exhausted. So that just at the time when the strain is the gratest on the cotton plant and needs the greatest amount of plant food the supply of plant food which you get from cotton seed meal is about exhausted and is rapidly growing weaker and the result is that your cotton sheds.

Now in getting our mixed goods, the ammonia is derived from Fish, Blood, Tankage, Cotton seed meal and Sulphate of Ammonia. As one of these ammoniates exhausts another comes in and takes its place, fish lasting longer than any. So that as one of these ammoniates gives out another comes in and your crop is supplied with plant food from the time it sprouts in the ground, all during the working season, all during the laying by season and until the crop is grown and ready to be gathered. Now if fish and blood and tankage and sulphate of ammonia are worth anything in a fertilizer, it makes a better fertilizer than when the ammonia is derived from cotton seed meal only, and our fertilizer is better than your home mixed goods. If you put in the same ammoniates in your home mixed fertilizer that we put in ours it would cost you as much as ours will and it won't be as good for the simple reason that it won't be as well mixed. It won't run regular, and the crops grown from it won't be as regular.

They will be spotted, some good stalks and some small stalks. It is the regular field of cotton where all the stalks are about the same size that turns off cotton at gathering time. The prospect now is that the next crop of cotton will bring a good price, so you want a good crop and don't want to take any chances in making a good crop. In using our goods ammoniated as they are you are not taking any chances, for you are getting the best fertilizer to be had, and the only thing is to use enough of it. One or two more good crops at present prices and at prices which seem probable, will put a great many of you out of the woods. So it does not seem to be a good business to take any chances on making a good crop.

Suppose you make your home mixed goods, getting your ammonia from cotton seed meal at a dollar a ton cheaper than we can sell it to you for, and you use 400 pounds to the acre. A ton covers five acres, our goods will cost you twenty cents an acre more than your home mixed goods. Suppose your home mixed goods cost you $2 a ton less than ours and you use 400 pounds to the acre, our goods will cost you 40 cents an acre more than yours. The difference in the crops will be a great deal more than this. You can tell the difference in the crops in riding along the road. Good farmers who are close observers say that when they can tell the difference between the contents of fertilizer bags along the road, the difference must be at least 200 pounds of lint cotton to the acre. That makes about 100 pounds of lint cotton and that means at present prices about $12.00. Now you don't think it will pay to risk this, trying to save 20 or 40 cents an acre on your fertilizer bill, when it takes the same labor for both.

You won't make any mistake to use our 8-3-3 or 9-3-3 or 10-3-4 on your red lands and our 8-4-4 and 10 4-4 on your gray lands. Cotton was late opening this fall and there was quite a little cotton to be gathered after Christmas.

One advantage in using 10-3-3 and 10-4-4 is that this 10 per cent of Phosphoric acid hastens the maturity of the bolls. And when a cotton boll is grown, it will open, just as when a peach is grown, it will ripen, and when a watermelon is grown it will ripen.

There is nothing better than the goods made by

The Anderson Phosphate & Oil Company,
Anderson, S. C.

THE MARKETS

New York Cotton

New York, March 3.—Reports that the active spot demand expected after the first of March had failed to develop and rumors of freer spot offerings today were accompanied by active liquidation in cotton. The opening was steady, 3 points higher to 2 lower, in sympathy with steady cables.

Some buying seemed to be encouraged by reports that active business was pending in Russia, and private advices claiming that German spinners would call cotton freely in the near future. There was not much support, however, while the first messages received from New Orleans showed relative weakness there and brought southern selling orders.

The market soon weakened in consequence, and all months, except March, made new low ground for the season, with the close barely steady, 11 to 16 net lower.

General business was still restricted by the limited wire service, and New Orleans was the only southern market heard from up to the close.

Spot cotton quiet; middling uplands, 13.00; gulf, 13.25. No sales.

Cotton futures closed barely steady.
March opened at 12.23, closed 12.09.
May opened 11.32, closed 11.65.
July opened 11.30, closed 11.69.
October opened 11.42, closed 11.30.

Liverpool Cotton

Liverpool, March 3.—Cotton: Spot in fair demand; prices steady; middling fair, 7.67; good middling, 7.39; middling, 7.03; low middling, 6.67; good ordinary, 5.89; ordinary, 5.39.

Sales, 8,000, including 7,000 American and 500 for speculation and export. Receipts, 74,000, including 66,700 American. Futures closed barely steady.

New Orleans Cotton

New Orleans, March 3.—Spot cotton steady, 1-8 lower. Middling, 12 7-8; sales on the spot, 3,100; to arrive, 500. Cotton futures closed March, 12.26; May, 12.21; July, 12.22; August, 11.81; October, 11.38; December, 11.38.

Cotton Seed Oil

New York, March 3.—Cotton seed oil today was higher, owing to influence of March tenders, light crude offerings and in sympathy with lard. Final prices were 1 to 2 points net higher.

The market closed steady. Spot, 7.10@7.25; March, 7.12@7.14; April, 7.19@7.22; May, 7.26@7.30; June, 7.30@7.32; July, 7.35@7.36; August, 7.51@7.52; September, 7.55@7.62; October, 6.84@7.10. Total sales, 5,600.

Cotton Goods

New York, March 3.—Cotton goods markets today were quiet and steady. Yarns were dull. Mock linen prices ruled firm. Silks offered for fall have been advanced 2 1-2 per cent in some leading lines.

Stocks and Bonds

New York, March 3.—Stock exchange transactions today, while on a larger basis than yesterday, still were abnormally small. The financial district had not recovered from the effects of the storm.

Movement of the important stocks were small and the undertone was good. None of the leaders moved more than a fraction above or below yesterday's close.

Of the influences immediately surrounding the market, most attention was given to the decidedly poor showing of the railroads for January. The growing sensitiveness of railroad stocks to this conditions of affairs was indicated by New York Central's weakness yesterday.

New Haven sold at 95 1-2, the lowest figure in the history of the company. Last month it was marked up to 78, after selling at 65 5-8 in December on the passing of the dividend.

Express stocks were again strong. Adams Express showed a 5 point advance.

Bonds were steady. Sales, $2,700,000.

Money Market

New York, March 3.—Call money steady, 1 3-4@2; ruling rate, 1 3-4; closing, 1 3-4@2. Time loans firm; sixty days, 2 3-4@3; ninety days, 3 1-4; six months, 3 1-2@3 3-4. Mercantile paper, 3 3-4@4 1-2. Sterling exchange steady; sixty days, 4.8375; demand, 4.8580. Commercial bills, 4.83. Bar silver, 57 3-4. Mexican dollars, 45. Government bonds steady; railroad bonds steady.

Chicago Grain

Chicago, March 3.—Speculators today sold wheat with more courage than they have shown in some time. Opinions by crop experts that the plant was entering spring weather with the best promise in many years took attention away from scattering advices of damage. The close was weak, 3@6 1-2 to 2@4 7-8 under last night. Corn declined 3-8@3 1-2 cents. Oats were off 1-8@1-4 and provisions varied from a shade decline to an advance of 5c. Futures closing:

Wheat—May, [illegible]; July, [illegible].
Corn—May, [illegible]; July, [illegible].
Oats—May, 40 1-2; July, 40 1-4.
Pork—May, 21.55; July, 21.45.
Lard—May, 10.87 1-2; July, 10.77 1-2.
Ribs—May, 11.37 1-2; July, 11.50.
Cash wheat: No. 2 red, 95 1-2@[illegible]; No. 2 hard, [illegible]; No. 3 northern spring, [illegible]; No. 2 spring, 94 1-2@[illegible].

Atlanta Letter

NEW SITEMS

Real Duke in Atlanta

Atlanta, March 3.—A real live duke and his beautiful American wife, a former Baltimore girl, are in Atlanta. The newspapers knew him for a real duke because he tried his best to dodge all the reporters and then treated the reporters with beautiful courtesy when they finally caught him despite his dodging.

The average alleged duke who comes to Atlanta signs himself "duke" so and so on the hotel register, and then goes to his room and telephones all the city editors to send their reporters, and photographers and society editors around.

This kind of a duke who has footed the Atlanta public more than once always proves to have n odukedom, but an unbounded amount of nerve.

The real duke who is here now and by the way he is the first sure-enough duke Atlantians have entertained in a number of years, is Armand Duc de Richelieu, accompanied by his wife, the Duchess de Richelieu, who was formerly Miss Douglass Wise of Baltimore, Md. They registered as plain Mr. and Mrs.

An interesting thing when the noted visitor was prevailed on to talk was the fact that the principal thing he knew about Atlanta and the thing he was most interested to see here was the United States federal penitentiary, which he declared had a world-wide reputation as one of the models of its kind.

Re-elected President

Atlanta, March 3.—W. T. Gentry of Atlanta has returned to this city after having been re-elected in New York as president of the Southern Bell Telephone and Teelgraph company.

Mr. Gentry was accompanied to New York by J. Epps Brown of Atlanta who was re-elected as vice-president. Other officers elected were J. M. B. Hoxsey, second vice president and treasurer; Leland Hume, third vice-president; Isaac Bailey, general counsel; C. J. Holditch, general auditor.

The reelection of the officers follows action taken not long ago throughout the south, changing a good deal of the detail arrangements as to the handling of divisions and increasing the general efficiency of the system throughout the southern territory.

As to Grand Opera

Atlanta, March 3.—The Atlanta Music Festival Association announces today that the sale of season tickets for the Metropolitan opera season this year will begin March 9, which is next Monday and will continue through March 28. Letters from all parts of the south asking for reservations are already coming in, and it is the announced policy of the association to give out of town orders for seats exactly the same consideration as is given to those from people right here in Atlanta.

The sale of seats for single performances begins April 1 and continues through the opera season. The season this year includes seven performances, April 21 to May 2, inclusive.

The opening night this year will be a presentation of the big revival of Carmen, with Geraldine Farrar and Caruso. Other operas will be Trovatore, Rosenkavalier, the Masked Ball, Madame Butterfly, Lohengrin and double bill with Madeline and Pagliacci.

Eastern Canal Bill

Washington, March 3.—A bill authorizing the secretary of war at his discretion to accept 4,000 acres of land at Anniston, Ala., or 5,000 acres at Tallahoma, Tenn., for the establishment of a government maneuver camp for the army and a second lock and dam [illegible]
