An Industry That Should Not Grow.

The Tampa Tribune thus tells of an industry which is a disgrace to our civilization:

Andrew D. White, former Ambassador to Germany, delivers himself of this startling prophecy:

It is now January 29. Before the [illegible] of next January comes around [illegible] men and women in the United States will have been murdered. But for the maladministration of the criminal law in the United States, they would have escaped.

There are now 6,000 homicides a year in the United States. Twenty-five years ago, according to the statistics, there were 1,000. Yet Canada has but three murders per million population; Germany, five; Great Britain, ten; France, fourteen; Belgium, sixteen.

Belgium, with the highest European percentage, has no death-penalty, which is significant. Canada punishes with death seven-eighths of the persons convicted of murder; in this country, one murderer out of seventy-four is executed. Not one lynching occurred in Great Britain last year; in the United States there were eighty-seven.

In England, technicalities do not figure in murder cases. In this country, they are main features. In England the average murderer is executed within a month, in this country, the [illegible] try to "hang" each other and the murderer escapes. It is safer to [illegible] in this country than to kill [illegible] out of season.

Of Interest to Public School Teachers

The Stetson Normal School at DeLand has sent out a bulletin to all teachers of the State, announcing the Spring Term Review Courses for teachers and for those who are planning to teach.

Free tuition, free room rent, a reduced boarding rate, and special reduced railroad rates are some of the advantages offered.

All subjects on which teachers are examined for any grade of certificate in Florida will be reviewed.

President Hulley will deliver a special series of lectures for the benefit of the teachers. Free entertainments of a high order will be provided each Friday evening.

More than thirty of the Stetson Professors will conduct courses for the teachers.

For particulars concerning railroad rates, courses, accommodations, etc., address Director A. L. L. Suhrie, DeLand, Florida.]

THINGS ABOUT WOODVILLE.

Lots of Inquiries About Timber and Lands in These Parts.

Woodville, Fla., March 5, 1910.

Editor True Democrat:

Politics are warming up, so it would be right for candidates to tell their beloved constituents how they stand on some important questions: lower taxation, school improvement, agricultural uplift and prohibition.

Now, the turpentine business is owned and controlled by only a very few rich men and will soon be pulled to the top. Then farming will begin hereabout in earnest, so we think it would be wise to make a start and see how much can be made per acre. Who will raise a hundred bushels of corn or a bale of cotton per acre in ten miles of Woodville? What, boy? A prize will be given.

We are glad to note you are doing everything helpful to the interest of your adopted country, and are glad you have the courage to stand against the open saloon.

This is a cheap country to live in just now. We see pork quoted at nearly ten dollars per hundred; we cannot sell at eight here. We wish some men in your city would fix to buy what we have to sell.

Mr. Ross Johnson and family and Mr. Reynolds, of Georgia, through the former's father, Mr. H. J. D. Johnson, have purchased the old Hill place, just south of town.

Dr. Williamson, a capitalist of Florence, S. C., and a large land owner at Pensacola, has been here for some time prospecting.

Major H. D. Williamson, who runs a large saw mill in North Carolina, has been spending some time with his brother, F. C. Williamson.

These Carolina men may invest in property hereabouts. We need more enterprising men to make things hum in this section.

Mr. Boyd is fast putting up Mr. Sam Rhodes cottage, which will be for rent when finished.

Mr. Wm. Harris, of near Crawfordville, was here visiting his son, George, this week.

Miss Phoebe Dykes and Broadus Wilkinson are taking a normal course with the agricultural course at the Woodville high school.

Prof. H. S. Fletcher, who has been in the hospital, has so far recovered that he came home and resumed his duties as principal.

Hon. John L. Neeley and a railroad commissioner were in town Thursday, talking politics to the voters of the city, whose power in the county elections is very popular and much desired.

Woodville must have a brush cleaning, and that soon.

Mr. James Stephens, who lived here a long time ago, died at his home on St. Marks river a few days ago.

Mr. and Mrs. Charles Gloves have the sympathy of all in the loss of their second twelve months old infant, which was buried here Friday.

One hundred and fifty miles an hour is the speed that will be attained by Barney Oldfield in his 200-horse-power Benz at Daytona Beach, according to the prediction of Hemery, the French pilot, for whom the car was constructed. Sanction has been granted for the Daytona Beach races, and they will begin March 22d and last three days.
