The First National Bank of Burns, Oregon

Why a National Bank is the Best

REASON VI: The stockholders of a National Bank are held responsible by the United States Government for double the amount of their stock. This is for the benefit and protection of the depositors.

The stockholders of a National Bank are thus held responsible by the Government not only for the Capital Stock of the bank, but also for an additional amount equal to its Capital Stock. The Government thus affords a double protection to the depositors of a National Bank, and herein lies the one great reason of the public confidence in National Banks as well as the success of the National Banking System.
