Facts About Ambrotypes.

AMBROTYPES were "*introduced*" in Nashville by A. LARCOMBE.

Ambrotypes are made nowhere else in Nashville than at the Ambrotype Rooms, No. 40 College St.

Ambrotypes are made upon a double plate glass, hermetically sealed, and thus protected against all possibility of injury.

Ambrotype Counterfeits are made on single glass, not sealed, and are not so durable as an ordinary daguerreotype.

Ambrotypes are represented by the jewelers in double gold frames, as other pictures. Other men borrow the name, and apply it to an inferior picture which lacks the main merits of an Ambrotype—tone and durability. ms18
