FINANCIAL RECORD HERE AND ABROAD

Prices Irregular and Trading Slackens—Steel Lower.

Shortly after the opening yesterday securities appeared decidedly weak. Heaviness in Steel, sold because of the unsatisfactory report for the last quarter to be made public to-day, had a particularly depressing influence. Professional operations for a decline, however, produced comparatively little effect on prices. As the day went on the volume of trading diminished and at the close the more active issues showed irregular changes of a fraction. Bonds failed to present the firm appearance that has ruled since early in the month, but here, too, advances were not infrequent. In bonds the day's total of a little over $2,500,000 was the smallest for a five-hour session in about two weeks.

Prices in many instances are enough above the minimums to afford some range for short selling, but it must be remembered that the market is not yet a normal one. The sustained advance of this month does not necessarily mean the large accumulation of stocks to be sold for speculative profits. An unusually large portion of buying orders have specified transfer of securities purchased and indicate withdrawal from the market to be held for investment. This has in great measure kept down the floating supply in spite of sales here for foreign account.

That the Steel Corporation's earnings for the last quarter of 1914 must be abnormally low has, of course, been obvious for some time. Mill operation was greatly under capacity, and this rather than any important increase in new orders accounted for the gain in unfilled tonnage reported. Yesterday, however, estimates of earnings for the period circulated in the financial district were unusually discouraging and the stock made a maximum loss of 1 point. The directors, however, in today's dividend action, as in their refusal to order a sweeping reduction of wages, may be expected to consider trade prospects as well as the results for the three months just ended. The chairman of the board has recently expressed his confidence in the general outlook.

Apart from Steel, price movement of the day was generally not important. Copper shares were weak, though producers put up their price for the metal. Reading, Canadian Pacific and New York Central each lost a fraction and Union Pacific was higher. Missouri Pacific was rather actively dealt in and turned upward again. American Sugar made a substantial gain.

The success by the British fleet in the North Sea was followed by a small advance in consols and some investment buying of gilt-edged securities in the London market. On the Paris Bourse 3 per cent rentes were higher.

Discount rates in London were easier, three months' bills being quoted under 1¾ per cent. Here mercantile paper passed as low as 3½ per cent, but otherwise the immense surplus reported in Saturday's Clearing House statement had no appreciable effect on money rates. Sterling exchange closed firmer, in spite of a liberal supply of commercial bills.

TRADING IN THE CURB SECURITIES

Trend of Prices Upward, with Market More Active—Oils Dull in Broader List.

The outside market yesterday displayed an upward trend in prices with a fair amount of business transacted. Exceptional strength was again shown in Kelly Springfield Tire, the common making a net advance of 6½ points, the first preferred of ½ and the second preferred of 3. National Cloak and Suit was also higher, improving 2 points. World Film was more active at a fractional advance. Tobacco shares were generally firm.

A broader list of oils was dealt in, although trading was comparatively quiet. Prairie Oil and Gas moved up 5 points. A loss of 5 points was made by Prairie Pipe Line. Mining issues showed some improvement. Atlanta rose 2 and Kewanas 3½ points. Bonds were dull. Chicago & Northwestern 5s made a fractional decline.
