Shreveport gets the State en-  
 compassment this year.

To-day's COMMERCIAL com-  
 pletes volume sixteen.

We hear that the title to Jeffer-  
 son's Island is to be contested ere  
 long, by a Lake Charles man.—  
 Thorian.

Mr. J. M. Hutchins has opened a  
 fruit stand in the second build-  
 ing south of the Calcasieu bank,  
 on Ryan street. Success old boy.

A Chicago paper gives a late  
 spring and continued cold feet as  
 a reason for the great increase in  
 applications for marriage licenses  
 in that city.

Secretary C. M. Richard, of the  
 Hoo-Hoo Park Association, has  
 our thanks for complimentary  
 tickets to witness the 4th of July  
 celebration at the park.

About thirty cars of steel rails  
 arrived this week via the South-  
 ern Pacific road for the Kansas  
 City, Shreveport and Gulf rail-  
 road, and were at once forwarded  
 to the front.

We sympathize with Mr. and  
 Mrs. Lee Dick in the loss of their  
 little son, George Lee, at half past  
 ten Tuesday morning. The child  
 died of diphtheria, and was aged  
 2 years, 11 months and 25 days.

Within the last week or so the  
 Calcasieu Export Lumber Co. has  
 loaded several big barges with  
 lumber from our saw mills. These  
 barges were towed to Sabine Pass,  
 and the lumber put aboard of sea-  
 going vessels for foreign ports.

The Jolly Social Club, composed  
 of a large number of young ladies  
 and gentlemen, gave an excu-  
 sion to Fenton Thursday night, at  
 which place a dance had been ar-  
 ranged for. Quite a large number  
 of our young folks availed them-  
 selves of the opportunity to have  
 a jolly good time.

The English government is now  
 experimenting with a gun which  
 will fire 1000 shots in 123 seconds.  
 It is the deadliest of all the auto-  
 matic man-slayers ever yet in-  
 vented, says the New York Herald.  
 As with all machine guns, the first  
 shot must be fired by hand. After  
 that the weapon will absorb car-  
 tridges and emit a chain of bullets  
 as long as it is fed. Experiments  
 made thus far show that on the oc-  
 casion of a brief, sharp attack, the  
 gun can actually be made to fire  
 eleven shots in a single second.  
 A very interesting feature of this  
 new gun is that the explosive  
 power results from the use of cor-  
 dite. The whole of this sub-  
 stance is expended in pressure,  
 whereas black powder is only use-  
 ful for pressure to the extent of  
 50 per cent. The experiments with  
 cordite and with the gun referred  
 to show conclusively that cordite  
 is not affected by water, as is gun-  
 powder, and will stand great varia-  
 tion in temperature.

**They Voted the Wrong Ticket.**

The Atlanta Constitution men-  
 tions the fact that 18,000 tailors  
 residing in New York, are on a  
 strike with prospects, of the num-  
 ber being increased to 32,000. It  
 says: "The cause of the strike may  
 be explained in a few words.  
 During the late campaign the New  
 York tailors were given to under-  
 stand that as soon as the Republi-  
 can party came into power times  
 would materially improve and  
 wages be increased. On the  
 strength of these pledges many  
 of them were induced to vote the  
 republican ticket; but instead of  
 realizing the hopes which they  
 were led to entertain before the  
 election, they have since been re-  
 quired to do additional work with-  
 out any compensation. Unable  
 to continue the situation longer and  
 seeing no relief ahead, they de-  
 cided to strike with the result  
 which has just been noticed.  
 Until the pledges of good so-  
 ciety are removed to the perma-  
 nent record, there can be no other  
 result than a general strike."  
 The strike in New York is a  
 serious matter, and it is to be  
 hoped that the republican party  
 will not be so easily deceived in  
 the future.

**The "Bryan Panic" vs. "McKinley  
 Prosperity."**

Last summer when the presi-  
 dential campaign was in progress,  
 the people were told by the Re-  
 publicans and the gold press that  
 the hard times then existing were  
 the direct result of the agitation  
 of the free coinage issue. "We  
 are having a Bryan panic," they  
 declared, "but it is only a fore-  
 taste of what you will experience  
 if you defeat McKinley," they  
 asked the people to choose be-  
 tween "a Bryan panic" and Mc-  
 Kinley prosperity."

The result showed that a suffi-  
 cient number of voters were im-  
 pressed by declarations of this  
 character to give the presidency to  
 McKinley. The result also shows  
 that the difference between "Mc-  
 Kinley prosperity" and a "Bryan  
 panic" are largely in favor of  
 the latter, for business conditions  
 of all kinds are on a narrower  
 and more unprofitable basis, and  
 times are harder under the opera-  
 tions of "McKinley prosperity"  
 than they were under the "Bryan  
 panic."

We beg to call the attention of  
 the gold press and the Republican  
 organs to this remarkable state of  
 things, and to ask them for a brief  
 explanation thereof. Times are  
 harder, more people are out of  
 work, prices are lower, and gen-  
 eral business is less profitable,  
 now that we have "McKinley pros-  
 perity" than when we had the  
 Bryan panic." If the present con-  
 ditions are merely the forerunners  
 of "McKinley prosperity," the peo-  
 ple may well cry aloud in their  
 despair to be saved from the re-  
 sults of such prosperity.

Mr. McKinley himself seems to  
 take no note of the situation. It  
 is true that he is keen to demand  
 relief for suffering Americans in  
 Cuba, but on the awful condition  
 of millions of men, women and  
 children in this country he turns  
 his back. Why should this be  
 so? The Constitution does not  
 begrudge a dollar that has been  
 or is to be sent to destitute Ameri-  
 cans in Cuba, but what greater  
 claim on the benevolence of the  
 government have these people  
 than the millions of destitute men,  
 women and children who are  
 tramping the streets of our great  
 cities hunting in vain for work,  
 begging and starving?

To these people, Mr. McKinley  
 says, through the Republican Con-  
 gress: "You want relief and you  
 shall have it. You are to be com-  
 pelled to pay more for your tea,  
 your sugar, your blankets and  
 woolen goods, your calicoes, your  
 shoes and your crockery. If this  
 doesn't relieve you, you do not  
 deserve relief." That is what Mr.  
 McKinley is saying to the suffer-  
 ing Americans at home. The re-  
 sult is that "McKinley prosperity"  
 is a much more dreadful affair than  
 the "Bryan panic," and threatens  
 to sacrifice the welfare of all the  
 taxpayers to the interest of a few  
 monopolies and manufacturers  
 who contributed to the Republi-  
 can corruption fund.

Matters have reached the point  
 where the most ignorant voter is  
 able to see that "McKinley pros-  
 perity," in its results and prom-  
 ises is a hundredfold worse than  
 the "Bryan panic" the gold press  
 and Republicans discovered last  
 year.

In point of fact, the condition  
 which they name "a Bryan panic"  
 was simply the outcome of the  
 single gold standard, whereby all  
 the elements of productiveness  
 are robbed of their value and  
 profit by dear money and dis-  
 honest prices. Every phase of  
 McKinleyism that has been sug-  
 gested as a remedy thus far will  
 simply add to the pressure of the  
 hard times, and this will continue  
 until the people rise in their might  
 and wipe the Republican party—  
 the party of the gold syndicate—  
 out of existence, and place in  
 power the Democratic party, the  
 party of the people.

By next year we think the dull-  
 est-minded business man and the  
 blindest voter will be able to per-  
 ceive that a continuation of "Mc-  
 Kinley prosperity" and the gold  
 standard mean the ruin of all  
 interests for the benefit of  
 the money-lending combination.  
 Every day brings news from Wash-  
 ington of the fight of the Demo-  
 cratic candidates that there can  
 be no compromise in this terrible  
 struggle. The people are becoming  
 more and more every day that  
 the only way to save the country  
 is to elect a Democratic president  
 and a Democratic Congress.

**Stirring Up McKinley.**

Six months have passed since Mr. McKinley was elected, yet nothing has been done to redeem the pledges to which the business world attached the chief importance. The uneasiness of the business community seems to have made itself felt in official circles, with the result that we have Mr. Gage's statements, which are not much in themselves, but have a soothing effect on Wall Street.

It is unfortunate, however, that Mr. McKinley has no convictions favorable to a gold currency, and Secretary Gage, though sincere, cannot go faster than the present. As a matter of fact, the Wolcott bimetallic mission is nothing but a device for postponing unavoidable decisions. To outside observers the government of the United States appears to be running risks with a wonderfully light heart. It will not need a long continued decline of gold to bring the American treasury face to face with the necessity of another loan.

President McKinley thinks that everything can be remedied by a high tariff. If the proposed duties fail to bring prosperity his natural impulse will be to raise them still higher, and any slaying of strength by the situation will serve to delay still longer the necessary reform desired by the Eastern States.—London Times.
