THURSDAY, June 20.

It was proved by the stock market to-day that the fears have not relaxed their efforts to bring about a more important reaction than was accomplished late yesterday. It was their offerings which made most of the selling today, and on every opportunity they attempted to retard the tendency of the market to recover. An emphatic denial from the West that the Rock Island road had any intention hostile to the perfect success of the Inter-State Railway Association, imparted a strong tone to the opening, which was assisted by some London buying of the favorites of the foreign market. The advances in prices from the opening, however, were not material, and perhaps part of the early strength was derived from the covering of timid shorts, the controlling bull interests in the market do not seem at the moment to be inclined toward an aggressive policy, probably arguing that as promissory holders show no disinclinement of confidence it would not be unwise to permit the short interest to accumulate at its own pleasure for a few days. So long as those persons bearishly inclined prefer to pick flaws in the granger situation, instead of regarding its improving tendency, so can no harm to the basis of the speculation to permit them to express their opinions in sales of stocks that they must subsequently recover. The Granger Presidents are to meet next Tuesday, and there is no reasonable doubt that the result will be to strengthen the Inter-State Association, whether or not reason is imparted to the Chicago and Alton management.

The comparative unimportance of to-day's transactions was illustrated by St. Paul, which led the list in point of activity, but fluctuated only ¼ ⅌ cent. At the same time the relative strength of the market was shown in the fact that even under the late bearish influences St. Paul ended fractionally higher. The coal stocks showed strength independently of the rest of the list, and advices said to have been sent from the West by Mr. Villard, holding out promise of the fulfilment of the Oregon and Transcontinental Company "on a better financial basis" put that stock up 1 ⅌ cent, and left it almost as high at the close. Southern Pacific also showing sympathetic strength. In fact, Union Pacific was the only important stock which could be called consistently heavy, and its decline was small and probably due to unconfirmed rumors of possible trouble between the company and its engineers.

There was some feverishness in the afternoon dealings, and prices receded under the influence of reports of heavy gold engagements for export. The actual amount ($4,000,000) is large, but it was exaggerated in the Board room just before the close. Some suspicion was created that the engagements were made to-day instead of to-morrow (the usual day for obvious purposes), but if this be true the policy may prove to be a mistaken one, as it allows a full night's reflection on the practical disinfectance of the movement. Large shipments had been generally expected for this week, and they are no more significant to-day than they have been previously, when neither the money nor the stock market was disturbed by similar transactions. The market closed generally higher, and fully steady if not firm in tone.

The leading sales compare with those of yesterday as follows:
