BOYD'S TIMELY ADDRESS

Hilo, Oct. 10.—Some of the leading Hawaiians here who were desirous of meeting the Superintendent of Public Works called a meeting at the Fish-market last night, at which several prominent Hawaiians spoke and stated their desires in the matter of road work. There was a sharp criticism of the local Road Board. Mr. Boyd expressed himself as pleased at the opportunity afforded him to meet the people of Hilo and assured the citizens, through those who were present, that everything possible would be done to advance Hilo to the front.

"It is hardly necessary," he said, "for me to explain the reason for my presence in the city of Hilo at this time but, to remove all cause for surmises in the matter, I desire to say to you this evening, that I am now journeying over the Hilo district, as I have other other districts of your big Island of Hawaii, in the search of desired information as Superintendent of Public Works, relative to the existing conditions of the roads, bridges and public buildings.

"I hope, by personal inspection and by meeting with the residents and taxpayers of the district, in council, to be enabled to obtain such information as will permit me to suggest the use of the funds at the disposal of the department in such a manner as will result in the greatest good to the greatest number.

"Do not charge the Department of Public Works with any lack of desire or intentional neglect to expend the appropriations for public improvements, but rather place it to the true cause, lack of funds.

"I desire to impress upon you, my fellow citizens, that this work undertaken by me as a member of the Government, in a way, conveys the intent of the Government to endeavor, in a practical manner, to do away with existing just causes for complaint, and to aid the advancement of the interests of all classes by improving the opportunities in improved and extended conveniences for the traveling public and the owners of homesteed lands.

"I am here tonight by request to listen to any statements made, information offered, or petitions that may be presented relating to matters within the scope of the Public Works Department, and I can assure you that I am desirous of having a full and free expression of public opinion on such matters, and I further assure you, my fellow citizens, that all just and properly presented complaints will be impartially considered and acted on, without fear or favor, but with a desire to decide entirely pro bono publico.

"In closing I would ask that the omissions or unfulfilled expectations of the past, be forgotten, and I assure you that the existing and immediate needs of this district will be presented by me to the Government for careful consideration and appropriate and approximate action."

There were not many white residents present owing to the notice being short and the meeting being called by Hawaiians.—Herald.

DEFENSE OF OUR HARBOR

Washington, Sept. 30.—(Special)—Orders have been issued convening a board of army officers to examine and report upon the fortifications necessary in the Hawaiian Islands.

The order designates Lieut. Col. William H. Heuer, Corps of Engineers; Lieut. Col. Charles E. L. B. Davis, Corps of Engineers; Major William E. Birkimer, Artillery Corps; Captain Adam Slaker, Artillery Corps, a board to meet at Honolulu, Hawaiian Territory, at the earliest date practicable, at the call of the president of the board, to carefully consider and report upon the subject of the defense of Pearl Harbor, and the harbor of Honolulu; to submit projects for the defense of those harbors, with estimates of the cost, and to make recommendations as to what land should be acquired or set apart to meet all the military demands of the said defense.

J. A. BRECKONS.

PAID $25 FOR BLAST.

Takami, the Japanese contractor in charge of the work of excavating for a foundation on the premises next to the Y. M. C. A. building, on Hotel street, appeared in the Police Court this forenoon on the charge of careless blasting with giant powder. The defendant pleaded guilty and was fined $25 and costs by Judge Wilcox.

On Saturday last a charge of giant powder was exploded by Takami and his men that caused considerable consternation in the vicinity. One of the rocks thrown up in the air weighed fully thirty-five pounds. This missile dropped on the roof of the Wicke house on Alakea street, went through without much trouble, landed in the bath-room, wrecked a shelf there and then went through the floor. Fortunately, no one was in the room at the time.

When the police investigated the matter it was found that only one light chain had been placed over that portion of the coral bed in the foundation which it was sought to blow up.

Willemsted (Curacao), Oct. 4.—The correspondent here of the Associated Press has received the following message from a correspondent in the field:

"On the road between Sinamaica, Venezuela, and La Hacha, Colombia, Guaija peninsula, September 29th.—General Davila's first fight at Curoga was an absolute rout. Five Venezuelan battalions of 400 men each were engaged and the Colombians are estimated at the same number. General Echeverria was killed on the battlefield and not shot by the Colombians. After Echeverria was killed Generals Davila, Clodomiro Castillo and Emilio Castro, a brother of President Castro, fled from the field. Another battalion then broke. The three remaining battalions kept up the fighting until routed. About 600 were killed on the Venezuelan side, including thirty minor officers.

The Indians ambushed General Davilas' retreating vanguard, composed of 200 men and annihilated it.

When Emperor William made his Oriental trip the Sultan presented him with a number of horses and valuable rugs. Having heard that the Sultan was planning a zoological garden the Emperor has now purchased in Hamburg and sent to him a fine collection of lions, tigers, bears, parrots, deer and other animals.

Mr. Irving belongs to the greatly increasing band of university men who have become actors, for he was educated at Oxford. It is now ten years since he made his first appearance on the stage, which he left for a time in order to finish his reading for the bar.

The method of measuring smell adopted by M. Berthelot opens a wide field for investigation. A bottle is filled with the vapor of an odorous substance, which is weighed before and after to determine the quantity of vapor, and measured tractions of this vapor are then poured from bottle to bottle until just enough remains in one to excite the nerves of smell. With iodoform the quantity was three-eighths of one millionth of a grain, while a thousandth as much musk would probably suffice.
