**Happy New Year**

Among the things to be thankful for at this season is the downward trend of food prices. We are all grateful for that.

But the owners of the Grabateria are particularly thankful for the handsome business it has done all thru this year.

It is to our many patrons we wish to express our appreciation for their patronage and good will that has enabled us to be a factor in the life of the best locality in the City of Portland.

So we extend to you all our best wishes for a Happy New Year.

Many manufacturers and investors throughout the east are making investigation of conditions in Oregon relative to establishing industries in this state. Recently numerous inquiries have been received by the bureau of industries of the Portland Chamber of Commerce asking for information, including consuming population, raw material available, rail and water transportation, weather conditions, availability of labor and power and other matters either directly or indirectly affecting industries. This wave of inquiries is said to be due largely to the fact that rail rates have been increased to such an extent that it is almost prohibitive for industries to ship raw products to the east and then ship them west again in their finished state to supply their demand on the Pacific coast and in the rapidly growing trade territory in the orient. Manufacturers are also looking for locations where climatic conditions are such that they can operate during the entire year and where there is contented and efficient labor. Prospects are that within the next two or three years Oregon will experience a wave of industrial development beyond the fondest dreams of the most optimistic.—Abstract.

The Portland Ad Club is directing a ship model and foreign commerce contest. Several prizes are to be given for the best model cargo boats and essays describing the type of vessel submitted. The contest is open to all students attending schools, college, high school or grade school in Oregon. Information regarding the contest may be obtained at the St. Johns library. Also several cuts of freight boats are on exhibition there. The Peninsula Shipbuilding Co. has loaned the library some very good views of modern freight vessels. Several books on shipbuilding are also available at the library.

Cards of thanks notices are charged for at the rate of fifty cents each. Persons desiring to have such notices published should make a note of this.
