AND A Bright Woman's Answer.

Mrs. Mary E. Lease: Do you read ads, and if so why?
Nebraska Clothing Company.

Yes! In reading "ads" is obtained knowledge obtainable never—in school or in college; You keep in advance of humanity's throng, And feast on the best as you journey along.

Cordially Yours, Mary E. Lease.

You may not agree with Mrs. Lease about politics. You may differ with her on almost every topic under the sun—but we must confess that if her political views are one half as clear as her ideas about advertising, she knows more about politics than nine men out of ten who wield the ballot. Do you MEN who read ads ever stop to think that there's money in it for you? Did it ever occur to you, that by watching the advertising of an up-to-date house, you can often save a day's wages on some one thing that you want to buy? Do you realize that if a house wants to make its advertising count, it has got to tell the truth about its goods. Do you realize that when we tell you that we will sell you *This week and Next*—best quality Jewelry and Silverware, and the best makes of watches and clocks for a lower price than you can buy anywhere else—that we are going to do that very same thing? Remember that we are the leaders in the Jewelry business, as usual, with the largest stock of Holiday goods bought for cash by an experienced buyer, and that every article we sell is backed up by a guarantee good as a bank check.
