

Bath Supplies.

The million pores of the skin are little sewers through which poisonous products should escape from the body. Few realize the importance of keeping them open or realize how much one's vigor and energy is increased by keeping them active.

A Health Recipe.

Every morning, a quick sponge bath with cool water to which a handful of sea salt has been added. Then brisk rubbing with a bath brush or loofah until the skin glows and the perspiration starts. It will double your accomplishment for the day.

We have the bath sponges, sea salt, bath brushes and loofahs.
