**CONGO NEVER LEAK. ROOFING Always Dry and Tight!**

Study the subject of roofs. Send for catalogues; ask questions; investigate. We give you this advice because we feel sure that after you have looked into the matter thoroughly you will decide upon Congo.

Congo can stand the minutest examination. In fact, we urge this method for our own good as well as the consumers', because it increases trade and makes for us life-long friends.

Congo deserves its leading position among ready roofings, because it has all the qualifications needed in a durable, waterproof roof.

If you have a leaky roof, you can appreciate how annoying and expensive it is. Congo avoids all this.

These are facts well worthy of consideration, and if you put up a new building, or if your old roof gives trouble, use Congo. Congo can be laid right over an old roof, and you can do it yourself. No special tools or skilled labor required.

Send for Free Booklet and samples and see for yourself.

Don't get alarmed. Mayor Dean and the city officials will test the fire whistle Friday evening about six o'clock. Don't run and get skeered.

He owns a fine half section farm near Worthing which is managed by Mr. Marshall and he enjoys the comforts of a home in Sioux Falls.

Miss Norton, daughter of F. E. Norton of this city, was taken suddenly ill last week and as symptoms of insanity were uppermost it was decided to send her to Yankton for treatment. The many friends of the family in Canton and over in Brooklyn township where Mr. Norton formerly resided, will be pained to learn of the young lady's serious condition. It is hoped that a season of treatment will restore Miss Norton to her grief stricken father and friends entirely cured.
