

DAIRY

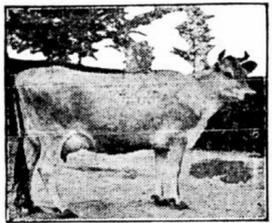

MILK COW THREE TIMES A DAY

Does it pay to milk a cow three times a day? Dairymen and owners of large herds say so. They can, and do, produce the profit, too, that milking their cows three times a day is a very profitable practice.

To obtain the best results from your cow, or cows, health and comfort must necessarily be considered carefully. The modern farmer is making rapid progress in regard to the sanitary conditions of his barns and dairy stables, and learning also many improved methods of feeding. Yet a surprisingly large number of farmers do not see that the cow with a heavy, full udder, unrelieved, is laboring against big odds.

The two indisputable benefits derived from milking three times every day are: A steady increase in the amount of milk produced, and a higher percentage of butter fat in the milk. The first is especially valuable to the persons who feed skim-milk to the young stock.

Danish dairymen have shown clearly that infrequent milking tends to make the lymphatic glands in the cow's udder become inactive and sluggish, which is the principal cause of the "drying up" stage, and proved thoroughly that when their cows were

A Prize Winning Jersey.

milking frequently it caused these glands to be enlivened and stimulated, with the result that more and better milk was drawn from the cows, and the milking period was lengthened in nearly every instance.

The feed question is solved, too. Keep a high-class breed of cows, and whatever expenses are incurred by extra feed will be overbalanced by a gain. The Holstein, Jersey and Ayrshire breeds are considered the best for dairy purposes.

Milk three times daily for a month and compare the results with this month. Give the cow a square deal and you'll be a wiser, wealthier farmer for the experiment.

PHYSICIANS NOW FAVOR MILK

Once Regarded as Doubtful Diet Today It Is Preferred to Anything Else for Sick.

(By R. B. HUCKHAM.)
Dairying is always sure to prove profitable. Many other ventures in agriculture are fraught with risks and uncertainties, but this invariably proves secure, in season and out of season.

The demand for dairy products is constantly on the increase. The time was when the dairyman was compelled to be on the watch for a market for his commodities. Nowadays, the consumer is out in search of him. His market is assured. Conditions have been reversed.

The constant growth of the great industrial centers has slowly but surely brought about a revolution in the dairy market. Little by little the suburban farmers have been forced to retreat before the steady advance of the builders' brigade, until now almost every farmer in the land is on an equal footing with them.

Within a very few years the race has come to recognize as it never did before the true value of milk as an article of food. Even among physicians, too, this same change of opinion has come about. Formerly the doctor regarded milk as a doubtful article of diet for his patients. Now he prefers it to anything else.

The steady increase in the price of all dairy products is the best tribute to their worth that could possibly be paid. The world at large is extending them a recognition such as it never did before; voluntarily places a higher estimate on their value than formerly.

The dairy farmer can ask no more substantial evidence of appreciation than he is today receiving from the community at large, in the shape of advanced prices for the products of his care and labor. And it is well earned and justly due.

Any man who is willing to conduct a dairy, in a progressive and painstaking manner, is bound to put his fellowmen under a debt of obligation to him which will not pass unrequited.

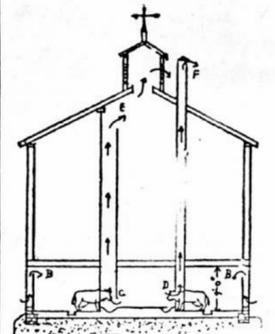

Using Disinfectants.
There is no danger of using too much disinfectants around the dairy barn. Air slacked lime is one of the very best disinfectants that can be used. Crude carbolic acid in warm water is also very good. About a tablespoonful to a gallon of water is effective. Bichloride of mercury at the rate of one ounce to each eight gallons of water is another mixture that will prove death to the germs.

Slip-Shod Methods.
Why do men continue to dairy in a slip-shod manner, deluding themselves into the belief that they are dairymen?

KING PLAN OF VENTILATION

Arrangement by Which Foul Air of Barn Is Removed by Shaft—Illustration Shows Flues.

The King system of ventilation is an arrangement by which the foul air of the barn is removed by a shaft called a ventilator. It is built upon the same principles as a chimney to a fireplace. The fresh air is admitted to the barn by ducts made in the wall that open on the outside near the base of the wall and on the inside near the ceiling, says Hoard's Dairyman. This construction prevents the warm air at the ceiling from passing down and out and permits the cold air to be tempered more or less before it reaches the animals. The ventilating flue takes the coldest and foulest air from

King System of Ventilation.

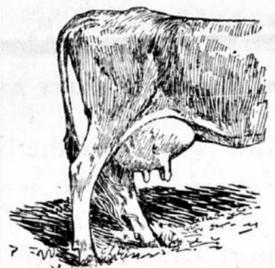

the floor and carries it out of the barn. The illustration shows the intake and the outtake flues.
Ventilator F should extend above the cupola and ventilator E is the wrong system of construction. Opening inside the barn impairs the ventilator's draft.

JERSEY COW IS BEAUTIFUL

Its Gentleness and Pretty Fawn Color Takes Strong Hold on Sentiment of Farmers.

Possibly no class of cattle appeals more strongly to the majority of people than the Jersey. Its gentleness and pretty fawn color, and the deer-like appearance of the young calves, takes strong hold on the sentiment of people, farmers as well as others.

The Jersey is easily kept and while her flow of milk is not as large as that of some other breeds, it makes up in richness and quality. The conformation of the Jersey is lean and muscular, and represents the two dairy types. Well bred Jerseys have a thin skin, elastic and fine to touch, and covered with a thick coat of soft hair. Its back should be strong, straight and not sag; and the ribs, as in all dairy cows, should be well sprung.

Jersey Milch Cow.

giving a large bread-basket. The hips should be broad and long and the thighs thin, muscular and set wide apart.

The udder is of fairly good size, although not as large as those of the Holstein and other breeds. The teats should be large and well placed. The weight of the average Jersey cow is about 800 pounds.

Feeding Silage.
The more progressive farmers have silos and winter their cows largely on silage, but even with this food the cow must have some protein concentrate, and this is purchased in oil-meat, cottonseed meal, malt sprouts, brewers' grains, etc. The cottonseed meal is said to be the cheapest carrier of protein and great quantities are used, but the farmers are not satisfied to pay out so much money for these feeds.

Interest Among Dairymen.
Ever notice how the dairy business booms when the owner is interested in his work. There is too much lack of interest among dairymen.

DAIRY NOTES

Paying for quality is the way to encourage quality.
The milker should wear clean clothing, preferably white.

Good feeding is an integral part of success in breeding dairy cattle.
The Jersey cow is adapted to the conditions imposed by all climates.

If intending to get into the dairy business and don't plan a silo, stay out.

On the farm the Jersey has proven herself to be the lifer of the mortgage.

The cow's flank and udder should be wiped with a damp cloth before milking.
Keep the cows comfortable at night, especially when the weather is cold and wet.

There is a general movement among creamery men to pay for butter according to quality.
The farmers that have had most experience with silage are the most enthusiastic advocates of the siloing system.

The young heifer that is expected to freshen 18 months old will quite the very best of care and very best of liberal feeding.

DAKOTA RETAILERS

STATE CONVENTION ENDS AT HURON WITH A BANQUET.

HAPPENINGS OVER THE STATE

What is Going On Here and There That is of Interest to the Readers Throughout South Dakota and Vicinity.

Huron.—The South Dakota Retail Merchants' association held its annual convention here with a large attendance. Mayor Charles F. Koepf delivered the address of welcome and P. H. Wickham of Alexandria, responded. Both gave valuable suggestions and were listened to attentively. President Loftus of DeSmet gave an address. The organization has increased in numbers and its financial condition is good.

SOUTH DAKOTA NEWS NOTES

The Mitchell Elks have moved into their new home.
A movement has been inaugurated by the women of Northville to organize a relief corps.

The people of Milesville, in northwestern Stanley county, are to have a creamery at that place.

The Presbyterian church society of Groton has awarded the contract for the erection of a new \$18,000 edifice.

The Masonic Building association at Wagner has completed its building and the lodge has moved into its new quarters.

Watertown will have a \$60,000 hospital to be erected by the Lutherans of the state. It will be of reinforced concrete and modern in every respect.

The business men of Sioux Falls have arranged for a \$16,000 memorial for Bishop Hare. It will be in the form of an addition to the All Saints school.

The dates for the auto show at Belle Fourche have been changed to June 22 and 23, so that they will not interfere with the dates of the horse racing at Spearfish.

The Aberdeen Railway company has added three new street cars to its equipment. Work is being pushed on the extensions of the line in the south-east part of town.

Frank Garskel of Watertown, a tinner, suffered several broken bones and bruises about the head and face as the result of a 30-foot fall from a roof of a residence.

Aroused to the importance of securing better fire protection, the business men and other residents of Claremont have commenced an agitation for municipal waterworks.

The women of Belle Fourche succeeded in having 270 trees planted on Arbor day. This is the best record reported for the state, so far as individual towns are concerned.

E. O. Churton of LaDelle recently sold fourteen Galloway steers which averaged 1,318 pounds in weight each, altogether 18,460 pounds and the average price was \$73.84, the entire bunch selling for \$1,033.76.

A force of nearly one hundred men have commenced extending the North-western railroad from Colome to Winner. The towns are thirteen miles apart and it is expected the track laying will complete their work by June 1st.

The temperance people of Miller have served notice on the city officials that the recent election will be contested. The drys claim that they will have no difficulty in throwing the illegal votes out and that the town will be dry after July 1.

Arrangements are being completed for a big historic pageant to be put on in Yankton during the semi-centennial celebration of Dakota, depicting the earliest days among the Indians and French traders. The dates of the celebration are June 11 to 17.

Arrangements are being made for the erection of a new public school building at White Lake, for which the voters at a special election authorized bonds of \$5,000. Only 21 votes were cast against the proposition. The new structure will be ready when the fall term commences.

James O'Brien, Joe Howard and Joe Smith were sentenced in federal court at Aberdeen by Judge Willard for robbing the postoffice at Soteholm on December 22, 1910. O'Brien and Howard received five years each for burglary and three years, but Smith was let off with three years for burglary and two years for robbery.

Sioux Falls has been chosen by the national committee in charge of the Men and Religion Forward movement as one of the 99 cities of North America which shall be used as centers of this movement. A campaign, similar to the laymen's missionary campaign of last year, is being planned for the fall of 1911 and the spring of 1912.

Crop conditions are excellent in Yankton county, and farmers are looking forward to the biggest year in the history of the county. The heavy rain and snow of the first of the month put the soil in fine shape for corn.

Four prisoners were taken to the penitentiary at Sioux Falls, following their trials at Hot Springs before District Judge McGee, at which all pleaded guilty. Thomas Bewley, Charles Cocayne and Will Redding were sent up for burglary near Minnekahta received six months each. Oliver J. Scott, of Smithwick, was given nine months for embezzlement of life insurance funds.

Marvin announces that the Fourth of July will be celebrated in that village.

Not Particular.
She—I heard Freddy Pickle has decided to marry and settle down to a particular girl.
He—Huh! She can't be.

Quite Often.
Figs—Two negatives make an affirmative, you know.
Fogg—With a woman it takes only one.

Important to Mothers
Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of *Dr. J. C. Fletcher* in Use For Over 30 Years.
Children Cry for Fletcher's Castoria

If You Have Money.
"That fellow Getrox is a multimillionaire. He has more money than brains."
"Well, what does he want with brains?"

Consistent.
Doctor—You are considerably under weight, sir. What have you been doing?
Patient—Nothing. But I'm a retired grocer, Doc.—Puck.

Too Much Like Work.
"The boss's son is kicking."
"Why?"
"Says he's overworked. All he used to do was tear the pages of the office calendars once a month. Now he has to wind the eight-day clock, too."

His Wurst.
The German proprietor of a Brooklyn delicatessen store has got far enough along to pun in English. A writer in the New York Sun reports the fact.

Hanging in the window of the little shop is this advertisement:
"The Best You Can Do Is Buy Our Wurst."—Youth's Companion.

Well Mated.
Thus the inquisitive boarder:
"What has become of the old-fashioned woman who used to call a wedding reception an infarct?"
Response by the white-haired boarder:
"I think she married the old-fashioned man who used to crack his knuckles regularly twice a day."

To the Childish Mind.
Dorothy Ullman of Elgin's-fourth street, is a very literal young person. To her mother's definition of the All-Seeing Eye she returned a question as to the size of the eye.
"Can God see everything?" she continued.
"Yes, dear. He can see everything, at all times."

That afternoon Dorothy escorted her mother down town. Before an optician's display she stopped. Then, "Mother," she asked, pointing to the big blinking eye in the window: "Is God's eye as big as this?"—Cleveland Leader.

Had His Troubles.
"Michael Dolan, an 'is it yourself'?"
"Yes; sure it is."
"Well, ye know that bletherin' spalpeen, Widdy Castigan's second husband?"
"That I do."
"He bet me a bob to a pint of whiskey I couldn't swally an egg without breakin' the shell uv it."
"An' ye did it?"
"I did."
"Then phwats allin' ye?"
"It's down there," laying his hand on the lower part of his waist coat. "If I jump about I'll break it and cut me stomach wid the shell, an' if I kape quiet it'll hatch and I'll have a Shanghai rooster scratchin' me inside."

Some Antique Mugs.
The college collector of antiques stopped off at Bacon Ridge.
"Good day, sir," he said, addressing the postmaster. "I am collecting old-fashioned articles and would like to know if I could find anything like that in his hamlet. Say antique mugs, for instance."
"Uncle Jason stroked his chin whitely."
"Antique mugs! By hek, I know the very place where thar be two of them now."
"You do? Here's a good cigar. Now where can I find these antique mugs?"
"Why, down on Main street, in Hiram Spruceby's shop. Grandad Wheatley and Pap Simmons are in there getting shaved, and by hek, when it comes to antique mugs, I reckon thars' be the oldest in the country, stranger."

A Poetic Prosecutor.
John Burns, city prosecutor of St. Paul, was trying to show Judge Fineout why some young men ought to be fined for tearing plectets off the fence of Mrs. Joe Goesik. Mr. Burns said:
"I know Mike Chicklet tore off that plectet, and the lady took offense."
"No harm is charged with taking a fence," replied Judge Fineout, "and, besides, this is no place for poetry."

To the Point.
Over in Hoboken in a shop frequented by Germans, hangs a sign framed in mournful black, reading thus:
"We regret to inform our honored customers that our good and generous friend, Mr. Credit, expired today. He was a noble soul, always willing and helpful, but has been falling for some time. May he rest in peace. PAY CASH!"

The Riddle.
The Sphinx propounded a puzzle.
"Why does it always rain the day you move?" she asked.
Herewith the ancients gave it up.

Many a girl would promise to marry a man if she thought he wouldn't be so silly as to expect her to live up to her promise.

A Strong Preference.
"She is literary, isn't she?"
"Yes, indeed; she'd rather read than do housework any day."

A FRIENDLY DIG.

Edith—There is a rumor that Daisy cheats awfully at bridge.
Ethel—Is that why you were so anxious to get her for a partner last night?

Socially Launched.
In his native town Jimmy had always been most popular with young and old, but when he was sent away to boarding school, he was for a time too homesick to make friends. His first letter was little more than a wall.

"I'm way behind the other boys in everything," he wrote, dejectedly. "Tisn't only studies, but it's gymnasium and banjos and everything. I don't believe they'll ever have much use for me."

But the second letter, written after a week in the new school, was quite different in tone.
"I'm all right," he wrote to his mother. "The boys say they'll teach me all they know, for they're proud to have me here. I can stretch my mouth half an inch wider than any other boy in school, and my feet are the longest by a full inch. So you needn't worry about me any more."

Youth's Companion.

Age of Oysters.
Oysters grow only during the summer and especially during the long, warm summers at that, and are scarcely big enough for the mouth before the third year. It is easy after looking over a bunch of shells to tell how old an oyster is. A summer lump and the winter sink come across the shell every year, but after the seventh or tenth year full growth comes; then, by looking at the sinks between the humps it is hard to tell anything more about Miss Oyster's age. Oysters live to be twenty years old.

A Question of Change.
A story is going the rounds of a couple of young people who attended church recently. When the collection was being taken up the young man commenced fishing in his pocket for a dime. His face expressed his embarrassment as he hoarsely whispered: "I guess I haven't a cent, I changed my pants." The young lady, who had been examining the unknown regions of woman's dress for her purse, turned a pink color and said: "I'm in the same fix."

A Poetic Prosecutor.
John Burns, city prosecutor of St. Paul, was trying to show Judge Fineout why some young men ought to be fined for tearing plectets off the fence of Mrs. Joe Goesik. Mr. Burns said:
"I know Mike Chicklet tore off that plectet, and the lady took offense."
"No harm is charged with taking a fence," replied Judge Fineout, "and, besides, this is no place for poetry."

To the Point.
Over in Hoboken in a shop frequented by Germans, hangs a sign framed in mournful black, reading thus:

"Why does it always rain the day you move?" she asked.
Herewith the ancients gave it up.

Many a girl would promise to marry a man if she thought he wouldn't be so silly as to expect her to live up to her promise.

A Strong Preference.
"She is literary, isn't she?"
"Yes, indeed; she'd rather read than do housework any day."

Fine Scheme.
Wife—Please match this piece of silk for me before you come home.
Husband—At the counter where the sweet little blonde works? The one with the soulful eyes and—
Wife—No. You're too tired to shop for me when your day's work is done, dear. On second thought, I won't bother you.

Made It Necessary.
"Horec Greeley invented the typewriter."
"Where did you get that idea?"
"Well, that isn't exactly what I mean, but his handwriting was probably more responsible for it than any other one thing."

Dr. Pierce's Pellets, small, sugar-coated, easy to take as candy, regulate and invigorate stomach, liver and bowels. Do not gripe.

When a married woman prays for a hat, the Lord may answer her prayer, but it's her husband who pays for it.

Eminence is not to be obtained without time and energy.—McCormack.

Husband Who Had "Married Money" Acknowledged the Truth to His Friends's Query.

Proprietor of a beautiful young wife, worth \$40,000,000, who had just divorced her penniless husband in order to marry again, Henry E. Dixey, the comedian, said at a dinner in New York:

"The young man who marries for money has none too easy a time of it. His rich wife is likely to tire of him and throw him out in a few years, or else she is likely to limit his allowance to 25 or 50 cents a day.

"I married money," a man once said to me.
"Wasn't there a woman attached to it?" I asked.
"Yes, you bet there was," he exploded. "So much attached to it that she never parted with a penny."

"Kicking the Bucket."
When we speak facetiously of some one for whom we have no reverence as having "kicked the bucket" we employ a phrase that would seem to be a piece of latter-day slang, but, as a matter of fact, it dates back to old England, when, about the year 1725, one Bolsover hung himself to a beam while standing on the bottom of a bucket and then kicked the bucket away. Although at first used only in cases of suicide, it has been applied in the course of years to any death without distinction.

Foolish.
"I am going to ask your father tonight for your hand in marriage."
"How dreadfully old fashioned you are."
"In what way?"
"Don't ask him; tell him."

"All Run Down"

Describes the condition of thousands of men and women who need only to purify and enrich their blood. They feel tired all the time. Every task, every responsibility, has become hard to them, because they have not strength to do nor power to endure.

If you are one of these all-run-down people or are at all debilitated take Hood's Sarsaparilla. It purifies and enriches the blood, and builds up the whole system.

Get it today in usual liquid form or chocolate tablets called Sarsatabs. Established 30 Years

Can't Get Away From It

Is it possible to nourish, strengthen and Re-build the Brain by Food?
Every man who thinks uses up part of the brain each day. Why don't it all disappear and leave an empty skull in say a month of brain work? Because the man rebuilds each day.

If he builds a little less than he destroys, brain fog and nervous prostration result sure. If he builds back a little more each day, the brain grows stronger and more capable. That is also true. Where does man get the material to rebuild his brain? Is it from air, sky or the ice of the Arctic sea? When you come to think about it, the rebuilding material must be in the food and drink.

That also is true.
Are the brain rebuilding materials found in all food? In a good variety but not in suitable proportion in all.

To illustrate: we know bones are made largely of lime and magnesia taken from food; therefore to make healthy bone structure we must have food containing these things. We would hardly feed only sugar and fat to make healthy bone structure in a growing child.

Likewise if we would feed in a skillful manner to insure getting what the brain requires for strength and rebuilding, we must first know what the brain is composed of and then select some article or articles (there are more than one) that contain these elements.

Analysis of brain by an unquestionable authority, Geoghegan, shows of Mineral Salts, Phosphoric Acid and Potash combined (Phosphate of Potash) 2.91 per cent of the total, 5.33 of all mineral salts.
